For Canadian Pricing

Canadian factor can be found at steelcase.com/CADpricing.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Eleven Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Things to Know About Series 9000

Series 9000 is a portfolio of products that offers a full range of solutions for creating effective workspaces.

Products

Products are available in three sizes and three colors for individual and team workspaces. They can be used to support shelves and storage bins and accessories. Or workspaces can be reconfigured.

Two panel types are available – Extended and Conventional.

Pathways Required can be used along with Series 9000 panels and hardware for medium to large room applications. They are designed to support shelves and storage bins. Typical installation, for customers with existing pathways, requires no additional hardware. For new installations, the customer must provide the necessary hardware and ensure proper installation. For more information, see the Series 9000 Product Specification Guide.

Review Things to Know About Series 9000 pages for an introduction to Series 9000 and the product features that make it a unique furniture system.

▶ Page 4

Tip 3

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 4

Find cross references by looking for page numbers flagged with an arrow.

Tip 5

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Details gives specific information on the product and how it is used.

Surface Materials lists what material is used for each part of the product.

Connections describes how the product is assembled or how it attaches to another product.

Product Drawing shows you what the product looks like and points out important features.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the energy-management and cable-routing capabilities of the product.

Application Topics provides useful advice on how to apply the product.

Things to Know About Series 9000

Series 9000 is a portfolio of products that offers a full range of solutions for creating effective workspaces.

Panels

Panels are available to define spaces and create privacy for individuals and teams. Panels can be used to support shelves and storage bins and worksurfaces. Or worksurfaces can be freestanding.

Enhanced panels were introduced in 1991 and offer square or radius top cap styling, removable surfaces, and enhanced cord- and cable-management capabilities, including a 4"H base.

Worksurfaces

Worksurfaces are available in three types that are not meant to be mixed:

- Universal
- Conventional
- Options

► See *Worksurfaces and Storage Differences Matrix*, pages 6 and 76.

Series 9000 Universal Worksurfaces is a comprehensive solution of worksurfaces, supports, and privacy screens designed to deliver flexibility, mobility, and options to create inspiring spaces that support the different ways people work. These worksurfaces are available in both panel-supported and freestanding options to meet a variety of planning applications.

Surface materials:

- Laminate

Options edge profile

Options Series 9000 worksurfaces are available in a very broad range of shapes that feature curved contours that smooth the transitions from one part of the worksurface to another. These worksurfaces always rely on Series 9000 panels or adjacent worksurfaces for support. Options worksurfaces have a wood core and a laminate surface. Supporting end panels, cantilevers, and end supports are always positioned below the worksurface so there is no interruption when two adjacent worksurfaces join.

► Page 311

Surface materials:

- Laminate

Conventional edge profile

Conventional Series 9000 worksurfaces are available in a very broad range of shapes and can be used as freestanding furniture elements or panel-supported or as a combination of both. Conventional worksurfaces have a wood core substrate and a laminate surface. In freestanding and most panel-supported applications, the supporting end panel or cantilever is adjacent to and slightly taller than the worksurface level.

► Page 121

Surface materials:

- Laminate

Storage

Storage components are available in two types that correspond to the worksurface choices described above:

- Conventional
- Options

Conventional storage

(900 Series lateral files and Universal storage with flush fronts)

Conventional Series 9000 storage components include a very broad array of choices, including panel-supported shelves and bins, service module packages that stand on worksurfaces, and pedestals that are worksurface supported. Surfaces are painted.

► Page 121

Surface materials:

- Paint

Options storage

(Use Universal Bins and Shelves)

(900 Series lateral files and Universal storage with flush fronts)

Options Series 9000 storage components include pedestals that can be used to support worksurfaces, panel-supported universal shelves and bins, as well as freestanding cabinets may be used with Options products. Surfaces are painted.

► Page 311

Surface materials:

- Paint

Wiring and Cabling

Power distribution systems can be built two different ways in Series 9000—powerways or Internode power distribution kits.

Powerways can be used to build power distribution networks within the base of Series 9000 Enhanced panels. A full range of components are available to allow power networks to go wherever there are panels and to provide access where the user needs it.

► Page 382

Internode components can be used to build power distribution networks and data/voice networks. These components attach above and below Series 9000 worksurfaces. Internode components cannot connect to Series 9000 powerways.

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials program
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications

If your device has a bar code reader App, scan this QR code for a direct link to the online digital publications. Utilizing this QR code allows you to search across multiple specification guides, share across social media, or print out pages. You can also access these digital publications at www.steelcase.com or village.steelcase.com.

Product Comparison CD

This interactive tool is filled with basic product information and comprehensive data detailing how Steelcase and competitors position their products, enabling you to compare Steelcase products to the competition. Invaluable in helping you to prepare bids, proposals, and presentations.

Series 9000 Product Training

Basic training for Series 9000 is available as part of the Building Product Muscle (BPM) curriculum on the Steelcase University Web site at village.steelcase.com.

The Series 9000 BPM is a self-paced, printable module designed to build knowledge of the product's positioning, statement of line, features and benefits, competitive products, application, and sales presentation for Steelcase and dealer salespeople. The Series 9000 BPM is course SAL398.

Installation Training

is available for salespeople. This Series 9000 sales-focused product training gives hands-on learning opportunities on how products work and how to present features and benefits. The course code is SAL 333.

Enhancing Your Series 9000 and Avenir Environments CD-ROM

This interactive CD tool helps customers leverage their existing Series 9000 and Avenir products.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939, or visit our Web site: www.steelcase.com.

Related Products

Steelcase produces products that are ideal to use with Series 9000. Some of them are listed here along with details about how to get product literature.

Huddleboard products were designed to complement the ways you work, individually or as a group. Huddleboard markerboards and photo album can be used either horizontally or vertically. These ultra-light boards attach to a panel, panel-mounted worktool rail, or are used with any of the Huddleboard support tools. Huddleboard products offer new ways to manage your information by supporting the capture, transfer, and display of individual or group information.

► See *Meeting Spaces Specification Guide*.

900 Series Lateral Files

are available in a comprehensive range of sizes to meet all lateral file storage needs. They feature the same flush, integral drawer pull found on Series 9000 Storage products and are available in all the same colors as Series 9000 products.

► *Storage Specification Guide*

Details worktools

include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

► For additional information refer to *Details Specification Guide* or contact Details at 888.783.3522 or email info@details-worktools.com.

Specifying Tips

General Tips

Plastic Panels

Standard Includes

- Panel with two surfaces: vertical surface and horizontal surface
- Top cap, end trim, and plain base or skirt
- Hinge: plastic

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formulated pattern, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Panels

Specify style numbers and surface materials for all panels.

Keep track of panels that require power and list panels *with power* separately.

Specify fillers and their surface materials. Specify change-of-height trims if using wood top caps.

Worksurfaces

Specify style numbers and surface materials for all worksurface packages. Supports are included with panel-supported worksurface packages. Also specify options such as grommets and any specific keying information.

Storage

Specify storage component style numbers and surface materials.

Lighting

Specify style numbers of lights.

Wiring & Cabling

If you specified with power as you ordered your panels, the only things left to specify are power-ins, power and cable poles (if desired), and receptacles.

Example of Order

Here's what the specification would be like for the installation shown at the left.

Qty.	Style No.	Description
Panels		
6	9TT6545P3	65"H x 45"W tackable acoustical panels w/3-circuit power sides 1 & 2: fabric, 5664 top cap and powered base: paint, 4650 hinge: plastic, 6608
2	9TT5345P3	53"H x 45"W tackable acoustical panels w/3-circuit power sides 1 & 2: fabric, 5664 top cap and powered base: paint, 4604 hinge: plastic, 6602
4	9TT6525	65"H x 25"W tackable acoustical panels side 1: fabric, 5339 side 2: fabric, 5664 top cap and plain base: paint, 4650 hinge: plastic, 6602
Fillers		
1	9XCAP	X-configuration filler, cap only: paint, 4650
2	9T65	65"H T-configuration filler packages filler cover: fabric, 5653 cap and base: paint, 4650
Worksurfaces		
4	99992CCM	25"D x 45"W modular corner worksurface packages (includes shared cantilevers): laminate, 2722 paint, 4651 filler strip: plastic, 6602
4	99107APLM	25"D x 45"W modular worksurfaces: laminate, 2722 end panel left, no support right
4	99107APRM	25"D x 45"W modular worksurfaces: laminate, 2722 end panel right, no support left end panel and trim: paint, 4650
Storage		
4	9U223	25"D box/box/file pedestals: paint, 4650
4	9U224	25"D file/file pedestals: paint, 4650
8	9BBL4515	45"W overhead storage bins w/locks: paint, 4650
Lighting		
8	LSM36KD	37"W standard shelf lights with daisy chain cords, black
4	LS1FSC	daisy chain starter cords
8	98862-65BB	17½"H vertical wire managers for 65"H panels: fabric, 5664
Wiring and Cabling		
1	986831DA15S	line 1 duplex receptacles: 6608
1	986832DA15S	line 2 duplex receptacles: 6608
1	986833DA15S	line 3 duplex receptacles: 6608
1	98669	3-circuit base power-in

Panels

Enhanced panels were introduced in 1991 and offer new top cap styling, removable surfaces, and enhanced cord- and cable-management capabilities, including a 4"H base.

Enhanced Tackable Acoustical Panels

Tackable acoustical panels are constructed with a tubular steel frame and acoustical removable surfaces that are attached to each side.

► Specifying, page 40

Cable door is removable to allow cables to be routed to adjacent panels of the same height.

Vertical slots are concealed by the panel surface and accepts panel-supported components in 1" increments.

Fabric surface is molded so it can accept directional or patterned fabrics. Easy replacement allows you to change the color or function of the workstation without disrupting adjacent workstations.

Base end cover is removable to allow cord and cable routing through panel runs. Base cover contains "invisible" knock-outs for receptacles.

Base cover is removable to allow access to cavities in panel base. Base cover contains "invisible" knock-outs for receptacles.

Leveling glides adjust to install panels on uneven floors.

Top cap conceals space that can accommodate twelve $\frac{3}{8}$ "-diameter cables. It is available in metal or wood.

Fiberglass material construction provides a tackable surface, serves as a sound barrier, and improves acoustical qualities.

Upper base cavity accommodates up to ten $\frac{3}{8}$ "-diameter cables.

Lower base cavity accommodates a factory- or field-installed powerway, which is shielded from cables stored in the upper base cavity.

Panel boot allows routing of four $\frac{3}{8}$ "-diameter cables.

Panel surfaces are removable to allow access to the interior of the panel, or to change the color or function of the workstation.

Product Details

Top caps are available with radius detail to articulate individual panels or with square detail to create a visual impression of a continuous line.

Panel Actual Dimensions

Depth (thickness)	2¼"
Width	20", 25", 30", 35", 36", 42", 45", or 60"
Height	34½", 42", 53", 61", 65", or 75"
Top cap height	¼" (metal) or ⅞" (wood)
Base cover height	4"
Leveling glide range	1½"

Connections

Flexible hinges, shipped with every panel, connect panels in straight-line, L-, T-, Y-, and X-configurations.

Panels of different heights can be joined in-line or at an angle. No trim pieces are needed for exposed panel ends, but metal end-of-run and change-of-height trim pieces are available.

Panel-run stability recommendations vary depending on the length of the run and the use of panel-supported components or free-standing furniture.
▶ Pages 32–35

Wall-attachment bracket is available to join a panel to an interior wall.
▶ Page 28

Filler packages provide an area for cable routing and fill in the space that results when panels join in L- and T-configurations.

Tip: Wood corner fillers should be specified when panels with wood surfaces form 90° corners.

▶ Page 26

Base power-in brings power to a panel run by connecting at a designated receptacle location.

▶ Page 378

Power and cable poles bring power and communication cables from the ceiling to panels and can be connected at the junction of L- and T-configurations.

▶ Page 380

Powerways are factory or field installed. Three-circuit or four-circuit (3+D) powerways are available.

▶ Page 382

Panel base has one standard-size and one larger-size receptacle knockout on each side of the panel.

Exception: 20"W panels have one larger-size receptacle knockout on both sides of the panel.

Voice/data knockouts in the base covers accept modular furniture communication faceplates.

Tip: A full-height back panel will block access to voice/data knockouts on E9000 panel base.

Flexible corners allow a cable to exit from the top of the panel to serve individual workstations.

Tip: Cables can be routed to the worksurface using vertical wire managers.

Cables can be routed horizontally at the top or bottom of the panel.

All panels are UL listed and CSA certified.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Chicago, New York City, and Los Angeles have special requirements.

▶ Pages 371–373

Surface Materials

Top cap

- Paint (standard)
- Wood (option)
- Customiz stain (option on wood)

Panel surface

- Fabric (standard)

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

▶ See *Specification Guidelines for Vertical Fabric Applications*, page 434, for details on these exceptions.

Warp vertical is available as an option.

Tip: If a panel has different surfaces, use these guidelines:

The first surface you specify is considered surface one. The second surface you specify is surface two.

End trim

- Paint

Hinge

- Plastic

Base cover

- Paint

Panel boot

- Black plastic only

Pricing

To price a panel with fabrics in two different price groups, add the two prices together and divide by two.

Wiring and Cabling

▶ Page 357

Enhanced Panel Stackers

Tackable and Glass

Panel stackers provide visual privacy to existing panels.

Panel stackers are constructed of extruded, painted, aluminum frame. Choices include tackable skin on each side covered with fabric and a single panel of clear, tempered safety glass on the panel centerline.

► Specifying, pages 42–44

Stackers are designed for single stacking. Panel stackers cannot be stacked on top of one another.

Mounting bayonet has capacity to route up to twelve cables.

Product Details

Top caps are removed from the base panel and are used to trim the top of the stacker. Fabric panel surface is non-removable and non-replaceable.

Stacker panels are connected to the base panels with two attachment brackets that are sited on existing frame screws. The attachment brackets are secured to the panel frame with clips.

Stacker panels are for use on Enhanced Panels only.

Actual Dimensions

Depth (thickness)	2¼"
Width	20", 25", 30", 35", 36", 42", 45", or 60"
Height	10", 11", 12", or 23"

Connections

Panel stackers are shipped with a flexible hinge to connect to adjoining panels in straight-line, L-, T-, Y-, and X-configurations. The flexible hinge helps stabilize and align the stackers for proper fit and finish.

Wood top caps are not designed to fit onto stackers. Use steel top caps instead.

Wiring & Cabling

Power and cables cannot be routed vertically or horizontally or accessed in panel stackers. Limited lay-in cabling within the base panel's top cavity is accommodated with the U-shaped design of the attachment brackets. Cable capacity is limited to six to eight Category 5 cables.

Surface Materials

The fabric specified for tackable fabric stackers is the same on both sides of the panel stacker. The glass stacker is offered in 6500 Clear Tempered Glass and 6530 Frosted Glass (option).

Application Topics

Panel stackers are available in four heights. 10" heights are used when aligning 65"H base panels to adjoining 75"H base panels. 11" heights are used when aligning stackers on 42"H base panels to adjoining 53"H base panels. 12" heights are used when aligning 53"H base panels to adjoining 65"H base panels. 23" heights are used when aligning 42"H base panels to adjoining 65"H base panels. In applications where the stackers are not aligning to adjacent base panels, any of four heights can be used.

Hanging components cannot be used on panel stackers. Panel stackers are non-load bearing.

Panel stackers cannot be stacked on top of another panel stacker.

Panel stackers are UL listed and CSA certified.

Rules for Panel Stacker Stability
▶ Page 34

Enhanced Straight Transparent Panels

Transparent panels

are available with an insert of clear or tinted, tempered glass.

► Specifying, page 46

Cable door is removable to allow cables to be routed to adjacent panels of the same height.

Frame surface surrounding transparent insert is available in fabric.

Base end cover is removable to allow cord and cable routing through panel runs.

Base cover is removable to allow access to cavities in panel base. Base cover contains "invisible" knock-outs for receptacles.

Vertical slots are blocked by glass and cannot support components.

Leveling glides adjust to install panels on uneven floors.

Top cap conceals space that can accommodate twelve $\frac{3}{8}$ "-diameter cables. It is available in metal or wood.

Fabric surface is tackable and is molded so it can accept directional or patterned fabrics. Easy replacement allows you to change the color or function of the workstation without disrupting adjacent workspaces.

Upper base cavity accommodates up to ten $\frac{3}{8}$ "-diameter cables.

Lower base cavity accommodates a factory- or field-installed powerway, which is shielded from cables stored in the upper base cavity.

Panel boot allows routing of four $\frac{3}{8}$ "-diameter cables.

Product Details

Full transparent panel has a clear insert that is surrounded by a frame.

28 1/2"H sill panel features a fabric-covered panel from the floor to worksurface level and a transparent insert or open portion from the worksurface level to the top of the panel.

42"H sill is only transparent in the top one-third of the panel height.

Top caps are available with radius detail to articulate individual panels or with square detail to create a visual impression of a continuous line.

Panel Insert Actual Dimensions

Panel Width	A
20"	13 $\frac{5}{32}$ "
25"	18 $\frac{5}{32}$ "
30"	23 $\frac{5}{32}$ "
35"	28 $\frac{5}{32}$ "
36"	29 $\frac{5}{32}$ "
42"	35 $\frac{5}{32}$ "
45"	38 $\frac{5}{32}$ "

Panel Height	B	C	D
65"	52 $\frac{7}{8}$ "	32 $\frac{1}{8}$ "	18 $\frac{5}{8}$ "
75"	62 $\frac{7}{8}$ "	42 $\frac{1}{8}$ "	28 $\frac{5}{8}$ "

Panel Actual Dimensions

Depth (thickness)	2 $\frac{1}{4}$ "
Width	20", 25", 30", 35", 36", 42", or 45"
Height	65" or 75"
Top cap height	$\frac{1}{4}$ " (metal) or $\frac{7}{16}$ " (wood)
Base cover height	4"
Leveling glide range	1 $\frac{1}{2}$ "

Connections

Flexible hinges, shipped with every panel, connect panels in straight-line, L-, T-, Y-, and X-configurations.

Panels of different heights can be joined in-line or at an angle. No trim pieces are needed for exposed panel ends, but wood or metal end-of-run and wood change-of-height trim pieces are available.

Panel-run stability recommendations vary depending on the length of the run and the use of panel-supported components or free-standing furniture on adjacent panels.

Tip: Panel-supported components should not be used on transparent panels.

► Pages 32–35

Panel-supported components can only be attached to the fabric-covered portion of these panels.

Wall-attachment bracket is available to join a panel to an interior wall.

► Page 28

Wiring & Cabling

Filler packages provide an area for cable routing and fill in the space that results when panels join in L- and T-configurations.

► Page 26

Base power-in brings power to a panel run by connecting at a designated receptacle location.

► Page 378

Power and cable poles bring power and communication cables from the ceiling to panels and can be connected at the junction of L- and T-configurations.

► Page 380

Powerways are factory or field installed. Three-circuit or four-circuit (3+D) powerways are available.

► Page 382

Panel base has one standard-size and one larger-size receptacle knockout on each side of the panel.

Exception: 20"W panels have one larger-size receptacle knockout on both sides of the panel.

Voice/data knockouts in the base covers accept AMP® FLEXMODE®, or equivalent, faceplates for communication and computer equipment.

Tip: A full-height back panel will block access to voice/data knockouts on E9000 panel base.

Cables can be routed horizontally at the top or bottom of the panel.

All panels are UL listed and CSA certified.

Chicago, New York City, and Los Angeles have special requirements.

► Pages 371–373

Local electrical codes vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Surface Materials

Top cap

- Paint (standard)
- Wood (option)
- Customiz stain (option on wood)

Frame surface

- Fabric

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

► See *Specification*

Guidelines for Vertical Fabric Applications, page 434, for details on these exceptions. Warp vertical is available as an option.

Tip: If a panel frame has different surfaces, use these guidelines:

The first surface you specify is considered surface one.

The second surface you specify is surface two.

Insert

- 6500 Clear glass
- 6518 Opaque glass

End trim

- Paint

Hinge

- Plastic

Base cover

- Paint

Panel boot

- Black plastic only

Panel Creep

► Page 36

Wiring and Cabling

► Page 357

Enhanced Panel Filler Packages

Fillers close the gap that results when enhanced panels form L- and T-configurations. They also conceal cables that run between panels.

► Specifying, page 53

Top cap matches the shape of the panel top cap and is available in metal.

Open side on the filler allows cables to be laid in before the cover is snapped into place.

Fillers are fabric covered.

Carrier fastens to the edge of the panel and allows the filler to snap into place.

Base cover matches the base of adjacent panels.

Product Details

Filler must match the height of the tallest panel in each configuration.

Carrier can be cut to match panel height.

Templates are provided so that openings can be cut in the filler. Cuts accommodate lay-in cable routing through varying heights.

Back filler closes the side of the filler that is exposed in change-of-height applications.

Attachment clips are shipped with each filler to fasten the sides of a filler to adjacent panels when there is no carrier.

Base cover can be used alone to conceal cords and cables in the base of the panels connected in T- or L-configurations.

Connections

Carrier fastens to the end of a panel.

Filler snaps onto the carrier.

Back filler snaps into place on the open side of the filler.

Top cap slides into the channel in the filler. Use same top cap for all configurations of panel junctions.

Base cover is attached to the adjacent panel.

Actual Dimensions

Depth	2¼"
Width	2¼"
Height	34½", 42", 53", 61", 65", or 75"

Wiring & Cabling

End-of-run filler allows a power or cable pole to be field installed at the end of a run of enhanced Series 9000 panels. Filler cover must match the height of the panel that it is attached to.

Surface Materials**Filler cover**

- Fabric (standard)
- Tip: For most fabrics, fabric application is standard in the warp horizontal direction.*

Panel Brackets

Wall-Attachment Bracket for Enhanced Panels

► Specifying, page 60

Application

Use to attach a perpendicular run of panels to an interior wall or column.

Available in six heights to correspond with panel heights: 34½", 42", 53", 61", 65", and 75"H. Adds 7⁄8" to the panel run.

Connections

Screws into architectural wall or column and accepts connecting hinge of adjacent enhanced panel. Functions on any surface, including steel, drywall, concrete block, wood, or plaster. Wall anchors may be required.

Surface Materials

Bracket

- Paint

Panel-Stabilizer Bracket

► Specifying, page 60

Application

Use to increase panel stability by connecting panels to freestanding furniture, such as desks or files.

Connections

Screws to the back of free-standing furniture and hooks into the slotted channel of the panel.

Surface Materials

Bracket

- Black paint only

Specifying

Must order separately.

End Panel-to-Panel Stabilizer Bracket

► Specifying, page 260

Application

Use to stabilize a panel-supported worksurface package.

Connections

Screws to the end panel and hooks into the perpendicular panel.

Surface Materials

Bracket

- Tan Value 1 paint only

Specifying

Included when 30"H end panels are shipped as components or as part of worksurface packages.

Can be ordered separately for other applications.

To order, see Worksurfaces chapter of the specifying section.

Parallel Clamp

► Specifying, page 60

Application

Use to attach the end panel of a Series 9000 free-standing desk to a panel to provide extra stability for panels that support components.

Connections

Attaches to the interior of the end panel and hooks into the panel. Non-handed.

Surface Materials**Clamp**

- Black paint only

Specifying

Must order separately.

Alignment Plate

► Specifying, page 61

Application

Use to maintain vertical alignment on load bearing right-angled panel connections.

Connections

Wraps around the inner uprights of the panel and is screwed into place on the inside of a 90° angle.
Tip: Plate may not be attached within the top 3" of the panel.

Surface Materials**Alignment plate**

- Black paint only

Specifying

One shipped with every third 65"H and 75"H panel.

Can be ordered separately.

Anchor Bracket

► Specifying, page 62

Connections

Attaches to the panel glide located at the base of a panel.

Anchors a panel to the floor at the power entry point, such as a power pole or base power-in connection, to prevent panel movement and possible electrical wire damage.

Complies with the Office of Statewide Health Planning and Development Organization (OSHPD) requirements for 80"H panels that are used in health care occupancies in the state of California.

Surface Materials**Anchor bracket**

- Black paint only

Application Topics

Breakaway base power-in may eliminate the need for an anchor bracket on a powered panel if the panel is 65"H or shorter.

Special Requirements for Los Angeles

► Page 373

Panel Accessories

Panel Coat Hook

► Specifying, page 63

Application

Provides a convenient place for hanging coats and similar light objects in workstations.

Connections

Fits over the top cap of enhanced panels.
Tip: Cannot be used with wood top caps.

Coat hook conforms to the radius of the top cap to hold the hook in place.

Surface Materials

Coat hook
• Clear plastic only

Actual Dimensions

Panel coat hook

Depth	2 1/2"
Width	1 3/4"
Height	1 1/2"

Tackboard

► Specifying, page 64

Application

Provides increased tackability between overhead storage and work-surface when non-tackable panels are used. Can also provide a tackable surface on interior walls when used with wall channels.

Connections

Wall channels are available to attach tackboards to interior walls.

Brackets, which are factory installed on the back of the tackboard, lock into the slotted channel of panels or into wall channels.

Surface Materials

Tackboard
• Fabric
Tip: For most fabrics, fabric application is standard in the warp horizontal direction.
► See *Specification Guidelines for Vertical Fabric Applications*, page 434, for details on these exceptions. Warp vertical is available as an option.

Hardware
• Black paint only

Application Topics

Functions with enhanced panels.

Actual Dimensions

Depth	3/4"
Width	30", 35", 36", 42", 45", 60", 70", and 75"
Height	15" or 18"

Markerboard and Tray

► Specifying, page 65

Application

Provides a writing surface on the side of a panel.

Laminate surface on board cleans easily.

Tray to hold pens and accessories is available as an option.

Connections

Markerboard attaches to panels at any height using brackets that are included.

Tray is built into the markerboard bottom frame and is available as an option.

Surface Materials

Board surface
• White laminate only

Board frame and tray
• Black only

Application Topics

Wall channels are available to attach markerboards to interior walls.

Functions with enhanced panels.

Actual Dimensions

Board	
Depth	3/4"
Width	30", 35", 36", 42", 45", and 60"
Height	33"
Tray	
Depth	1 1/2"
Width	29 1/2", 34 1/2", 35 1/2", 41 1/2", 44 1/2", and 59 1/2"

Rules for Panel Stability

Series 9000, when properly installed, is designed to be a very stable furniture system. Adherence to the guidelines presented here will allow you to efficiently plan stable workstations using panels alone, panel-supported components, or freestanding furniture. To ensure safe performance and maximum stability, the installation instructions that accompany each furniture shipment must be strictly observed.

An “X” over a drawing means that this application is not recommended.

Change of height has no effect on these stability rules.

Rules for Tackable Acoustical Panels

Two-Panel Runs

Three-Panel Runs

Unstable. Requires additional support at end of panel run.

Perpendicular panel provides stability at end of panel run.

Furniture provides stability at end of panel run.
Tip: Not recommended on 75"H panels in a 12' run.

Four-Panel Runs

Unstable. Requires additional support at end of panel run.

Perpendicular panel provides stability at end of panel run.

Furniture provides stability at end of panel run.
Tip: Not recommended on 75"H panels in a 16' run.

Five-Panel Runs

Unstable. Requires additional support.

Rules for Straight Transparent Panels

Two-Panel Runs

Two transparent panels require additional support.

Two panels are stable if transparent panel is not at the end of run.

Perpendicular panel provides stability at end of panel run.

Furniture used in front of transparent panels adds stability but blocks the view.

Three-Panel Runs

Unstable. Requires additional support at end of panel run.

Perpendicular panel provides stability when three transparent panels are used in a run.

Furniture provides stability if transparent panel is not at the end of a run.

Tip: Not recommended on 75"H panels in a 12' run.

Furniture used in front of transparent panels adds stability but blocks the view.

Four-Panel Runs

Unstable. Transparent panels do not provide stability as a complete panel run.

Perpendicular panel provides stability at end of panel run.

Straight transparent panels can be used only in the first and second positions.

Furniture provides stability at end of panel run.

Straight transparent panels can be used only in the first and second positions.

Rules for Panel Stacker Stability

Series 9000, when properly installed, is designed to be a very stable furniture system. Adherence to the guidelines presented here will allow you to efficiently plan stable workstations using panels alone, panel-supported components, or freestanding furniture. To ensure safe performance and maximum stability, the installation instructions that accompany each furniture shipment must be strictly observed.

An “X” over a drawing means that this application is not recommended. In general, the rules for panel stackers apply the same as if the stacker and base panel were one panel.

Maximum height stackers are not designed to go from floor to ceiling. Consult local building codes when stacking above standard panel heights, especially above 72"H.

Rules for Glass and Fabric Panel Stackers

Doors

Unstable. Stackers do not mount above Series 9000 panel doors.

Unstable. Door cannot be connected to a panel with a stacker.

Freestanding Applications

Unstable. Requires a connection to a perpendicular return stacker or panel for rigidity.

Perpendicular panel provides rigidity at end of stacker run.

Perpendicular panel provides rigidity at end of stacker run.

60"W Stacker Panels

For stackers on panels, minimum of 30"W same height return panels are required.

Rules for Panel Stability with Components*

Rules for Panel Stability
with Components*

Maximum panel stability is always achieved when loads are counterbalanced by similar loads on the opposite side of the panels. The recommendations shown here apply to all straight panels except panel doors and transparent panels. Components should not be supported by straight transparent panels.

An "X" over a drawing means that this application is not recommended.

Rules for Tackable Acoustical Panels

60" minimum

Connect to a wall or a perpendicular run of panels at least 60"W.

Connect to perpendicular panels, freestanding furniture, or a worksurface with at least one end panel.

Rules for Panel Stability

Panel runs with one panel-supported component per panel require stability every three panels.

minimum two 20"W panel run-offs

Panel runs with two panel-supported components per panel require stability every two panels.

45"W maximum panel width

minimum two 25"W panel run-offs

45"W maximum panel width

45"W maximum panel width

Panel runs with two panel-supported components per panel can be extended for three panels, if the center panels only support one component and all loads are counterbalanced.

dimension must match worksurface

Fully loaded panels must be counterbalanced. In addition, panel run-offs are required at both ends of the panel.

*Panel components include storage bins, shelves, work-surfaces, and worksurface-supported pedestals.

Panel Creep

Some panel junctions add to the length of panel runs. The accumulation of these increments is known as "panel creep."

Change-of-height has no bearing on panel creep.

Straight Connections

No creep occurs when panels of the same or varying heights are joined with hinges.

L-Connections

3/32" increment occurs at the intersection when panels are joined in an L-configuration.

T-Connections

3/16" increment occurs when panels are joined in a T-configuration.
Tip: Don't forget to add the panel thickness (2 1/4") gained from L-, T-, and X-configurations when calculating wall-to-wall measurements.

X-Connections

3/16" increment occurs on both directions of an X-configuration.
Tip: Don't forget to add the panel thickness (2 1/4") gained from L-, T-, and X-configurations when calculating wall-to-wall measurements.

Permanent Wall Connections

3/4" increment occurs when panel is attached to a permanent wall with a wall-attachment bracket.

Bracket Application Rules

For Universal Curved Front Bin and Universal L-Shelf

Bracket Application Matrix

	On-module	Off-module
Answer	•	
Kick	•	
Montage	•	
Enhanced Off-Module Montage	•	•
Series 9000	•	
Avenir	•	

Basic Brackets

Basic brackets are used to mount bins and shelves to panels with vertical slot patterns. Answer, Avenir, Elective Elements, Kick, Series 9000, and Montage can support basic attachment brackets. Basic attachment brackets push bins and shelves $\frac{1}{4}$ " from frame.

Basic attachment brackets install in panel seams and allow bins and shelves that are wider to be attached. Total width of bin or shelf can extend 12" beyond the bracket on one side.

Width of overhead bin or shelf must match or be wider than the width of the panel or panels that it is attached to.

Enhanced Straight Transparent Panels

► Need help?
Product details,
page 24

Standard Includes

- Transparent insert: clear tempered glass
- Two frame surfaces on panels 53"H–65"H, fabric direction with horizontal application*: fabric price group 1
- Two frame surfaces on panels 75"H, fabric direction with vertical application: fabric price group 1
- Radius top cap, end trim, and base covers with receptacle knockouts: all paint price groups
- Hinge: plastic

Required to Specify

- 1 Style number
 - 2 Glass color number for insert: 6500 Clear
 - 3 Fabric color number for frame surface 1
 - 4 Fabric color number for frame surface 2
 - 5 Paint color number for top cap, end trim, and base covers
 - 6 Plastic color number for plastic hinge
 - 7 Options, if selected (see below)
- See *Surface Materials*, page 423.

Tip: To price a panel with two surface materials in different price groups, add the two fabric price group option prices together and divide by 2; then add the result to the panel base price.

**Tip: For most fabrics, fabric application is standard in the warp horizontal direction.*

► See Specification Guidelines for Vertical Fabric Applications, page 434, for details on these exceptions. Warp vertical is available as an option.

Tip: Replacement tackable acoustical panel surfaces are now available as standard product. Special tools are not required. Adjacent panels are not disrupted.

Transaction Worksurfaces

Series 9000 Universal Systems Worksurfaces

► Specifying Series 9000 Universal Systems Worksurfaces pages 98–111

Cable scallops allow cords and plugs to pass behind the worksurface. Cable scallops can be omitted as an option.

Series 9000 Universal Systems worksurfaces are available in three depths. 18³/₈"D worksurfaces match the depth of Universal proud front storage components. 24¹/₃₂"D and 29¹/₃₂"D worksurfaces match the depth of end panels, and Universal flush front storage components.

Worksurfaces are used to create a 1/2" cord drop gap at the back edges.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 1³/₁₆" thick.

Product Details

Laminate Worksurfaces

3 mm edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Spanner worksurfaces with 2" notch accommodate Series 9000 panels. Legs and cantilevers or adjustable column and cantilevers must be used for support.

Edge Profiles

Edge profile is applied to front (user's) edge only.

Bullet peninsula and jetty worksurfaces require three supports:

- Cantilever
- Center support panel or side support bracket
- Adjustable column or legs

Linking peninsula worksurfaces and linking worksurfaces with 2" notch accommodate Series 9000 panels. Two legs and two cantilevers or one adjustable column and two cantilevers must be used to support linking peninsula worksurfaces. One leg and two cantilevers must be used to support linking worksurfaces.

Visitor worksurfaces must be supported by either a cantilever and a center support panel, or by a cantilever, a side support bracket, and a leg.

Connections

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For panel-supported installations you can use:

- Side support brackets
 - Cantilever with tie plate
 - End panel
 - Support plate
 - Center support panel with tie plate
 - Adjustable column or legs
- See page 90 for *Panel-Mounted Universal Systems Worksurface Supports*.

For freestanding installations you can use:

- Post legs
 - Double post C-leg
 - Adjustable legs
 - Adjustable column
 - Support plate
- See page 92 for *Legs and Supports for Universal Systems Worksurfaces*.
Tip: Pedestal can also be used in freestanding installations.

Long work surface spans must be supported with cantilevers, pedestals, legs, or other supports at least every 54". Reinforcing channel (TS7WKSPPT) allows the distance between supports to be increased to 60" for worksurfaces that will be heavily loaded, or up to 72" for worksurfaces with lighter expected loads. Reinforcing channel must be specified separately.
► Page 115

Wiring & Cabling

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Optional cable scallops provide space for plugs to pass over the back edge of the work surface.

Cable scallop allows cord plugs to easily pass below the work surface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications.
► Page 396

Corner worksurfaces have scallops located 12 1/2" from the rear corner of the work surface to the center of the scallop. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

► See *Montage Solutions Specification Guide for Worksurface Power and Communication*.

Surface Materials

High-Pressure Laminate Worksurfaces

- High-Pressure Laminate
 - Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Application Topics

3 mm Edge Profile Worksurfaces cannot be installed perpendicular to adjacent worksurfaces in an "L" corner. Series 9000 Universal Systems Worksurfaces are undersized on depth to provide more room for the user in addition to the 1/2" cord drop gap. This causes a 15/32" gap to occur between worksurfaces installed in an "L" configuration. Also, the 1/2" cord drop gap will not be consistent. Use corner work-surfaces instead.

Screens mount to worksurfaces in privacy position or below the worksurface for modesty.

► See *Answer Solutions Specification Guide*.

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

► Page 32

Do not use a Series 9000 Universal Systems Worksurface

as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are slightly undersized for Series 9000 panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

► See *Storage Specification Guide*.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized. (Replace worksurface with table as appropriate).

Transaction Worksurfaces

Transaction worksur-
face provides a surface
that can be used by stand-
ing visitors or serve as a
shelf.

► Specifying, page 112

Worksurface has a wood
core with a High-Pressure
Laminate surface and is
1³/₁₆" thick.

15"	60"

Product Details

3 mm
edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and seven woodgrain finishes. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Connections

Transaction worksur-
face support brackets
connect to the vertical
upright.

Spanning two panels is
possible.

Top view
Width of transaction
worksurface matches
the width of corresponding
panel.

Recommended standing height for transaction worksurface is achieved by attaching it to 42"H panels.

Utility shelf lights can be installed beneath transaction worksurfaces using screws and keyhole slots in light fixture.

Transaction worksurface must be centered on the panel.

Panel-Mounted Universal Systems Worksurface Supports

For Series 9000 Panel Applications

Worksurface supports

can be used in various configurations.

► Specifying, page 113

Center support panel

can be shared by two worksurfaces and may be required for longer runs of worksurfaces.

► Specifying, page 113

9000 Options end panel

can be used to support the end of a worksurface.

► Specifying, page 351

Series 9000 Universal Cantilever

can be used to panel-support a worksurface at any height.

► Specifying, page 113

9000 Options shared cantilever

connects to a panel and supports two adjacent worksurfaces.

► Specifying, page 350

9000 Options end cantilever

connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version.

► Specifying, page 350

9000 Options side support brackets

can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

► Specifying, page 114

Product Details

On-module worksurface supports

engage the slots in the vertical uprights of Series 9000 panels.

Side support brackets

support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets

can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Actual Dimensions

	Series 9000 Universal Cantilever	9000 Options Cantilever	Center support panel	End panel
Height	12 ¹ / ₄ "	12 ⁵ / ₈ "	28 ¹ / ₂ "*	28 ¹ / ₂ "
Depth	15 ¹ / ₂ "	23 ⁵ / ₈ "	9 ⁷ / ₁₆ "	24 ¹ / ₁₆ " or 29 ¹ / ₁₆ "

*Height dimensions include the thickness of a worksurface.

Single side support bracket can be used to support the rear corner of corner, or extended corner worksurfaces.

Single side support bracket can be used to support the user's side rear corner of visitor and jetty worksurfaces.

Cantilevers support worksurfaces at any height in 1" increments. Universal cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, leg, side support bracket, or an adjacent return worksurface.

Center support panel is an alternative to a cantilever in supporting longer runs of worksurfaces for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

Center support panels are available in seated heights, and cannot be used in freestanding applications or as a substitute for an end panel. One tie plate ships with each center support panel.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Series 9000 pedestals with a filler can be used to support the end of a worksurface in place of an end panel.

Long workspan spans must be supported with cantilevers, pedestals, legs, or other supports at least every 54". Reinforcing channel (TS7WKSPT) allows the distance between supports to be increased to 60" for worksurfaces that will be heavily loaded, or up to 72" for worksurfaces with lighter expected loads. Reinforcing channel must be specified separately.

► Page 115

Surface Materials

Application Topics

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

► See *Montage Solutions Specification Guide*.

Legs and Supports for Series 9000 Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in free-standing or panel-supported applications.

► Specifying, page 116

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Double post C-leg can be used on a single worksurface or in a shared application.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14" or 20" deep and 31¹/₁₆" wide.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Column is 4" in diameter and can be used as a column support on a single worksurface. Adjustable and non-adjustable versions are available.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Adjustable-height leg adjusts from 25¹/₂"H to 31¹/₂"H in ³/₄" increments.

Actual Dimensions

	Column	Adjustable column	Double post leg	Post leg	Adjustable-height leg	Double post C-leg	Support plate
Height*	28 ¹ / ₂ "	28 ¹ / ₂ " - 31 ⁵ / ₈ "	28 ¹ / ₂ "	26" or 28 ¹ / ₂ "	25 ¹ / ₂ "–31 ¹ / ₂ "	28 ¹ / ₂ "	N.A.
Glide range, for legs equipped with glides	1 ¹ / ₂ "	3 ¹ / ₈ "	³ / ₄ "	³ / ₄ "	³ / ₄ "	N.A.	N.A.

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28½"H standard, 40⅞"H standing, or 25½"H to 31½"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28½"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, bullet peninsula, and linking peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with two cantilevers or center support panels, can be used as column support for linking worksurfaces.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, bullet peninsula, and linking peninsula worksurfaces for added stability.

Column can be used on spanner, bullet peninsula, linking peninsula, and jetty worksurfaces in panel supported applications. For freestanding desk applications, column can be used on bullet peninsula and jetty worksurfaces. Adjustable and non-adjustable versions are available.

Adjustable work-surface column cannot be used in a shared application.

Bottom View
Column

Bottom View
Post Leg

Column is not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25½"H to 31½"H in ¾" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

Long worksurface spans must be supported with cantilevers, pedestals, legs, or other supports at least every 54". Reinforcing channel (TS7WKSPT) allows the distance between supports to be increased to 60" for worksurfaces that will be heavily loaded, or up to 72" for worksurfaces with lighter expected loads. Reinforcing channel must be specified separately.

Freestanding Guidelines for Systems Worksurfaces

- ▶ Page 94

Freestanding Guidelines for Systems Worksurfaces

The following section on freestanding workspaces gives some guidelines to be used with common freestanding configurations.

There are several ways to support the ends of a freestanding workspace:

With post legs or post legs with casters. Nesting post legs can also be used.

With a double post C-leg.

With adjustable-height legs.

With a pedestal. Other storage products can be used. Counterweights are required in each pedestal or lateral file in a freestanding desk unless the desk is attached to another workspace in an L-configuration.

Double post C-legs can be used on a single workspace or in a shared application.

Tie plate is recommended to align workspaces. Support plates alone cannot be used to support workspaces.

18"D straight and transition worksurfaces must be connected to an adjacent worksurface for additional support.

Combined worksurfaces can give each other support when joined with a double post leg and support plate. Use 14"D support plate on 18"D and 25"D worksurfaces and 20"D support plate on 30"D worksurface. Tie plate is recommended to align the worksurfaces.

Double post C-leg can be used to support a corner or extended corner worksurface and adjacent worksurfaces.

Double post C-leg can be used to support an extended corner worksurface and adjacent worksurfaces.

Conventional worksurfaces are available in panel-supported versions for use with *all* Series 9000 panels.

Conventional Series 9000 worksurfaces have a wood core substrate with a laminate surface. Wood core substrate conventional Series 9000 worksurfaces replaced steel substrate worksurfaces in January 2007. The wood core worksurfaces use existing conventional supports and work with conventional (suspended) pedestals. Wood core conventional Series 9000 worksurfaces are backward compatible with the steel substrate version. In freestanding and most panel-supported applications, the supporting end panel or cantilever is adjacent to and is slightly taller than the worksurface level. Worksurfaces are no longer manufactured with a central-locking mechanism.

All panel-supported storage is compatible with enhanced panels.

Panel-supported bins have a door that is framed by the top, bottom, and sides of the cabinet. An integral, recessed door pull extends the entire width of the door. Lock is visible near the bottom edge, centered in the width of the door. Panel-supported shelves have matching design details and proportions.

Conventional pedestals are suspended beneath panel-supported or freestanding worksurfaces. They are available in two different heights— $\frac{3}{4}$ -height and full-height. Full-height pedestals usually do not extend all the way to the floor in order to allow clearance for the worksurface to be installed at lower-than-normal heights. Pre-2004 pedestals can be secured by the central-locking mechanism found on manufactured pre-2005 worksurfaces. Post-2004 pedestals have a face lock and do not interface with the central-locking mechanism of the pre-2005 worksurfaces.

900 Series lateral files are visually compatible with Series 9000 storage products. For product details, see *Storage Specification Guide*.

Understanding Conventional Worksurfaces, Storage, and Related Products

In January 2007, Series 9000 conventional worksurfaces with wood core substrates replaced steel substrate worksurfaces. The wood core worksurfaces use existing conventional supports and work with conventional (suspended) pedestals. Wood core conventional Series 9000 worksurfaces are backward compatible with the steel substrate version.

Panel-Supported Worksurface Packages

Worksurface packages are standard with two cantilevers that attach the worksurface to the panel.

► Specifying, pages 200–210 and 294–297

Supports extend $\frac{1}{8}$ " above the level of the worksurface.

Worksurface is wood core substrate with laminate surface.

Radius edge is located on the front and back of the worksurface.

End panel-to-panel stabilizer bracket

ships with the worksurface package to attach the supports into the panel's slotted channel.

► Page 143

End panels or clear-access end panels

can be substituted for the cantilever on one side of 25"D and 30"D worksurface packages.

Actual Dimensions

Depth	20", 25", or 30"
Width	30", 35", 36", 42", 45", 60", 65", 70", 75", or 90"
Worksurface thickness	1 1/2"
Cantilever depth	20", 25", or 30"
Cantilever thickness	1 1/8"

Center drawer can be field installed to provide additional storage on 25"D and 30"D worksurface packages.

► Page 156

Product Details

Modular worksurface packages have one cantilever or end panel. The other end of the worksurface attaches to the adjacent worksurface with a shared cantilever or attachment bracket or to a radius-end worksurface with an attachment bracket. The overall width, including support, remains modular with panel dimensions because the work- surface is $1\frac{1}{8}$ " longer.
Tip: Post-2005 worksurfaces no longer have a central-locking mechanism. The worksurface edge facing the user is smooth, without a hole or lock assembly.

Pedestals can be suspended beneath panel-supported worksurface packages. Order pedestals separately and install them in the field.

► Page 162

Tip: Pre-2004 pedestals are locked by engaging the central-locking mechanism of the pre-2005 worksurface. Post-2004 pedestals have a face lock and do not interface with the central-locking mechanism of the worksurface. Both pre- and post-2004 pedestals physically connect to the worksurface in the same way.

Connections

Cantilevers allow work-surfaces to be attached at any height. End panels and clear-access end panels support the worksurface at any of four heights: 26 $\frac{1}{4}$ "H, 27 $\frac{1}{4}$ "H, 28 $\frac{3}{4}$ "H, or 29 $\frac{3}{4}$ "H.

Cantilever-to-cantilever clamp is used to align side-by-side cantilever-supported work-surfaces at the same height.

Spring-activated safety catch prevents cantilevers from accidentally dislodging from the panel.

Cantilever end-support bracket is shipped with every cantilever. It connects the front of the cantilever to an adjacent panel.

Wiring & Cabling

Grommets are available, factory installed, to allow cords and cables to pass through the worksurface.
▶ Page 157

Wiring access holes in the cantilever allow cables to pass through. End panels and clear-access end panels can also accommodate cable routing.

A variety of products is available to manage cords and cables under the worksurface.

Application Topics

In an "L" configuration workstation in which each worksurface is supported by two cantilevers, the front edge of the return work-surface will rise $\frac{3}{16}$ " above the primary worksurface. Use a modular worksurface application to eliminate this situation.
▶ Page 160

End panel stabilizer bracket is required when the end panel does not meet a panel seam. It must be ordered separately.
▶ Page 143

Center support is shipped with 90"W work-surface packages to provide additional support.
Tip: Center support can conflict with center drawer. If 90"W worksurface is intended to span two 45"W panels, you must order center drawer offset to left or right to avoid center support. Center drawer will not lock when offset.

Panels with wood surfaces cannot support work-surfaces.

Worksurface Accessories

▶ Page 156

Modular Worksurfaces

▶ Page 160

Clearance Dimensions and Pedestal Depths

▶ Page 161

Panel-Supported Corner Worksurface Packages

Corner worksurfaces fit into the 90° angle formed by panels and form a transition between two right-angle worksurfaces of the same depth.
 ▶ Specifying, pages 210–212

Two types of panel-supported worksurface packages are available—cantilever-supported and shared cantilever-supported.

Cantilevers support the worksurface and attach it to the panel at any height. Two cantilevers are shipped with each panel-supported corner worksurface package.

Front edge, facing the user, is laminate. Keyboard cutout edge is plastic.

Back corner edge is unfinished. The other back edges are radiused to match the front edge.

Worksurface has a wood core substrate with laminate surface.

Two shared cantilevers are shipped with a modular corner worksurface package. They support both the corner worksurface and the adjacent worksurfaces at the same height.

Angled corner allows cords and cables to pass behind the worksurface.

Back edges and corner are unfinished, so the worksurface should not be attached to a transparent panel.

Rear attachment bracket is included with the corner worksurface package to connect the back corner of the worksurface to the panel.

Plastic filler strip, shipped with shared cantilever, finishes edge.

Adjacent worksurface must be modular. It is 1 1/8" longer to make up for the thickness of a cantilever that is not required.
 ▶ Page 160

Connections

Spring-activated safety catch prevents cantilevers from accidentally dislodging from the panel.

Back edge of corner worksurface is not finished; therefore, corner worksurface should not be attached to transparent panels.

Cantilever-to-cantilever clamp, ordered separately, is used to align side-by-side cantilever-supported worksurfaces of the same height.

Actual Dimensions

Cantilever-supported

Depth	25" or 30"
Width	30", 35", 42", or 45"
Front edge	5 5/8", 19 3/4", 22 5/8", or 27"
Thickness	1 1/2"
Cantilever depth	25" or 30"
Cantilever width (thickness)	1 1/8"

Shared-cantilever supported

Depth	25" or 30"
Width	35", 36", 42", or 45"
Front edge	14 1/4", 15 5/8", 17 1/8", 21 1/4", 24 1/8", or 28 1/2"
Width (thickness)	1 1/2"
Cantilever depth	25"

Wiring & Cabling

Grommets are available, factory installed, to allow cords and cables to pass through the worksurface.
▶ Page 157

Wiring access holes in the cantilever allow cables to pass through. Shared cantilever has no wiring and cabling capability.

A variety of products is available to manage cords and cables under the worksurface.

Application Topics

Panels with wood surfaces cannot support worksurfaces.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized. (replace worksurface with table as appropriate).

Worksurface Areas (in square inches)

With Cantilevers

With Shared Cantilevers

Radius-End Worksurfaces

Radius-end worksurfaces can be panel supported, or they can be attached to worksurfaces to form a return.

► Specifying, pages 213, 257

Product Details

Panel-supported application uses locking side supports to attach the end of the worksurface to a panel.

Spring-activated safety catch prevents the side support from accidentally dislodging from the panel.

Return worksurface is 30"D or 35"D and attaches to an adjacent perpendicular freestanding or panel-supported worksurface at the same height.

Filler strip is included to conceal the connection between the straight edge and the radius edge.

Connections

Panel-supported worksurfaces can be attached to 30"W, 35"W, or 36"W panels only.

Modular worksurface package can connect to the radius-end worksurface using an attachment bracket. Opposite end of worksurface can be specified with an end panel or cantilever.
► Page 160

Wiring & Cabling

Radius-end worksurfaces do not have cord- or cable-management capability. Use adjacent worksurfaces.

Actual Dimensions

Panel-supported depth	30", 35", or 36"
Panel-supported radius	15", 17½", or 18"
Return depth	30" or 35"
Return radius	15" or 17½"
Width	60", 65", or 70"
Height	26" to 30"
Worksurface thickness	1¼"
Column diameter	4"

Surface Materials

Worksurface

- Laminate (standard)
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates that are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Worksurface edge

- Plastic

Column support

- Paint (standard)
- 9201 Polished Chrome (option)

Attachment brackets

- Black paint only

Filler strip

- Plastic

Application Topics

For bridge applications, use a 45"W worksurface from the components section and use two support plates to connect to the worksurface.

Return worksurfaces can be attached at the same height to any worksurface that is more than twice as wide as the worksurface depth. Attachment to a worksurface that is less wide will limit kneespace.

Return worksurfaces can be attached flush to the adjacent worksurface, or they can be inset 1 1/8".

Pedestals are not available for installation on radius-end worksurfaces.

Panels with wood surfaces cannot support worksurfaces.

Modular Worksurfaces

▶ Page 160

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized. (replace worksurface with table as appropriate).

Panel-Supported Transaction Worksurfaces

Transaction worksur-
faces are available to
match Series 9000 furniture.
Series 9000 transaction
worksurfaces are laminate
with a plastic edge.
► Specifying, page 214

Radius edge is located on
all four sides.

Actual Dimensions

Depth	15"
Width	24 ¹⁵ / ₁₆ ", 29 ¹⁵ / ₁₆ ", 34 ¹⁵ / ₁₆ ", 35 ¹⁵ / ₁₆ ", 41 ¹⁵ / ₁₆ ", 44 ¹⁵ / ₁₆ ", 59 ¹⁵ / ₁₆ " or 69 ¹⁵ / ₁₆ "
Thickness	1 ¹ / ₄ "

Connections

Transaction worksur-
faces can be installed
between adjacent taller
panels.

Typical height for a
transaction worksurface is
achieved by attaching it to
a 42"H panel.

Two-piece bracket,
standard, locks in place to
prevent transaction work-
surface from accidentally
dislodging from the panel.
Brackets are not visible out-
side the workstation.

Panel top caps remain
in place beneath the
transaction worksurface.

Wiring & Cabling

Cable routing through
panel is not impaired.

Surface Materials

Worksurface

- Laminate (standard)
 - See *Surface Materials Reference Manual*.
 - Open Line laminate (option)
- A program including non-Steelcase laminates that are suitable for use on Steelcase products.

► See *Surface Materials Reference Manual*.

Worksurface edge

- Plastic

Support brackets

- Paint

Application Topics

Transaction worksur-
faces are not intended to
be load bearing.

Transaction worksur-
faces do not attach
to 34¹/₂"H enhanced panels.

End Panels

► Specifying, page 300

Product Details

End panels support unit assemblies and panel-supported worksurface packages. They should be used to provide sufficient support for pedestals when the worksurface is not panel-wrapped.

Dimensions of freestanding furniture include two 1 1/8"W end panels. Therefore, a 60"W desk has 57 3/4" of laminate worksurface.

Connections

End panel-to-panel stabilizer bracket is included when end panels are ordered as components or as parts of a work-surface package. It will accommodate left- or right-hand applications.

► Page 143

End panel stabilizer bracket is required when the end panel does not meet a panel seam, and there is no back panel.

► Page 143

Wiring & Cabling

Removable outer cover allows access to cords and cables that are routed through the reinforced steel core. Cords and cables can be routed through the end panel wiring access cap. They exit through an opening at the bottom of the end panel.

Surface Materials

End panels

- Paint

End panel trim

- Paint

Actual Dimensions

Depth	20", 25", 30", or 35"
Height	30"
Thickness	1 1/8"
Leveling glide range	1 1/2"

Clear-Access End Panels

Actual Dimensions

Depth	25" or 30"
Width (thickness)	11/8"
Height	30"
Support arm height	53/4"
Leveling glide range	3/8"

Product Details

Clear-access end panels can be substituted for 25"D and 30"D end panels.

Clear-access end panels provide worksurface attachment at 261/4"H, 271/4"H, 283/4"H, or 293/4"H.

Field modification on outer cover is required on 271/4" and 283/4" heights.

Connections

Left- and right-hand clear-access end panels are available.

15"D service modules can be attached to 25"D or 30"D clear-access end panels.

Center clear-access end panels can be specified left or right to support adjacent freestanding corner worksurfaces. Holes on both sides allow attachment of two worksurfaces to a single support.

End panel-to-panel stabilizer bracket is included when clear-access end panel is ordered as a component or as part of a worksurface package. It will accommodate left- or right-hand application.

► Page 143

Wiring & Cabling

Cords and cables can be fed through the wiring access cap. Punch-out access cover can be removed in the field to allow cables to exit near the base. Grommet must be ordered separately.

Surface Materials

Clear-access end panel

- Paint

Clear-access end panel trim

- Paint

Clear-access end panel grommet

- Plastic

Application Topics

Clear-access end panel without a foot can be used to support a freestanding corner worksurface. It must be ordered separately.

Pedestals should not be positioned next to a clear-access end panel because the pedestal will block the kneespace.

When using shelf lights with storage, a straight plug is required to pass through the clear-access end panel. Contact "Specials" for more information.

Cantilevers

Wiring access hole

► Specifying, page 298

Spring-activated safety catch prevents the cantilever from accidentally dislodging from a panel.

Actual Dimensions

Depth	20", 25", or 30"
Thickness	1 1/8"

Product Details

Cantilevers support work-surfaces and leave the floor unobstructed. They can be field or factory installed on panel-supported furniture and must match the depth of the worksurface.

Connections

Cantilevers are available in left- and right-hand versions and attach to the panel at any height in 1" increments.

Cantilever-to-cantilever clamp is used to align side-by-side cantilever-supported work-surfaces at the same height.

Cantilever end-support bracket is shipped with every cantilever. It connects the front of a cantilever to an adjacent panel.

Wiring & Cabling

Wiring access hole in trim allows routing of cords beneath the worksurface

Surface Materials

Cantilever

- Paint

Cantilever trim

- Paint

Center support

- Paint

Application Topics

Cantilevers are included with worksurface packages.

Center support is standard on 90"W worksurface packages to provide additional support for the worksurface. It can also be ordered separately.

When using shelf lights with storage, a straight plug is required to pass through the cantilever. Contact "Specials" for more information.

Panels with wood surfaces cannot support cantilevers.

Shared Cantilevers

► Specifying, page 298

Spring-activated safety catch prevents the shared cantilever from accidentally dislodging from the panel.

Product Details

Shared cantilevers support modular corner worksurfaces and provide concealed connections to the adjacent worksurface. They can also be used to conceal connections between two straight modular worksurfaces.
Tip: Overall width of adjacent worksurfaces should not exceed 120" when a shared cantilever is used.

One size is used for both 25"D and 30"D worksurface applications.

Filler strip is shipped with all shared cantilever packages to provide a smooth transition between worksurfaces.

Connections

Shared cantilever locks into a panel at any height and fastens to the worksurface with screws.

Adjacent worksurfaces must be attached at the same height.

Surface Materials

Shared cantilever

- Paint

Filler strip

- Plastic
- Tip: If color is not specified, black will be provided.*

Application Topics

Two shared cantilevers are included with modular corner worksurface packages. Order separately for use with straight worksurfaces.

Shared cantilever cannot be used to connect perpendicular worksurfaces. They must be used in straight connections only.

Actual Dimensions

Depth	23 ³ / ₄ "
Width	1 ¹ / ₉ "
Height	12 ³ / ₄ "

End Panel Stabilizer Bracket

► Specifying, page 260

Application

Use to stabilize the 90° connection between the end panel and the worksurface when the end panel doesn't meet a panel seam.

End panel stabilizer bracket is available in left- and right-hand versions.

Connections

Connects with screws to the underside of the worksurface and the inside of the end panel.

Surface Materials

Bracket
• Black paint only

Specifying

Must be ordered separately.

End Panel-to-Panel Stabilizer Bracket

► Specifying, page 260

Application

Use to stabilize a panel-supported worksurface package.

Connections

Screws to the end panel and hooks into the perpendicular panel. Non-handed. Locks up for left-hand attachment; down, for right-hand attachment.

Surface Materials

Bracket
• Black paint only

Specifying

Included when 30"H end panels are shipped as components or as parts of worksurface packages.

Can be ordered separately for other applications.

Cantilever-to-Cantilever Clamp

► Specifying, page 260

Application

Use to align two side-by-side cantilever-supported worksurfaces at the same height.

Connections

Screws into the bottom of each of the cantilevers.

Surface Materials

Clamp
• Black paint only

Specifying

Must be ordered separately.

Straight-Height Bridge or Return Attachment Bracket Package

► Specifying, page 302

Application

Use to attach a return or bridge to an adjacent wood substrate worksurface at 29 $\frac{3}{4}$ "H.

Connections

Package includes a filler strip to provide a smooth transition between work-surfaces of the same height.

Surface Materials

Filler strip

- Plastic

Tip: If color is not specified, black will be provided.

Specifying

Included with all returns and bridges.

Can be ordered separately.

Drop-Height Bridge or Return Attachment Bracket Package

► Specifying, page 302

Application

Use to attach a return or bridge to an adjacent worksurface at 26 $\frac{1}{4}$ "H, 27 $\frac{1}{4}$ "H, or 28 $\frac{3}{4}$ "H.

Connections

Package includes a cover plate with an opening for cords and cables to pass through.

Surface Materials

Bracket

- Paint

Filler strip

- Plastic

Tip: If color is not specified, black will be provided.

Specifying

Included with all returns and bridges.

Can be ordered separately.

Return Radius-End Worksurface Bracket

► Specifying, page 302

Application

Use to attach a radius-end worksurface to an adjacent modular worksurface.

Connections

Package includes a filler strip to provide a smooth transition between worksurfaces.

Matches depth of radius-end worksurface.

Surface Materials

Bracket

- Black paint only

Filler strip

- Plastic

Tip: If color is not specified, black will be provided.

Specifying

Included with all return radius-end tables.

Can be ordered separately.

Worksurface-to-Radius-End Worksurface Bracket

► Specifying, page 303

Application

Use to attach a modular worksurface package to a panel-supported radius-end table.

Connections

Package includes a filler strip to provide a smooth transition between worksurfaces.

Matches depth of perpendicular worksurface.

Surface Materials

Bracket

- Black paint only

Filler strip

- Plastic

Tip: If color is not specified, black will be provided.

Specifying

Included with modular worksurface packages for use with panel-supported radius-end tables.

Can be ordered separately.

Cantilever End-Support Brackets

► Specifying, page 298

Application

Use to stabilize a panel-supported worksurface by connecting the front of its supporting cantilever to a parallel panel.

Connections

Screws into the cantilever and hooks into the slotted channel of the panel.

Recommended for increased support of all panel-supported work-surfaces. It is necessary on 90"W panel-supported worksurfaces.

Surface Materials

Bracket

- Black paint only

Specifying

One shipped with each cantilever in a worksurface package.

Cantilevers with brackets can be ordered as components.

Cantilever end-support bracket can be ordered separately through Service Parts.

Desks

Freestanding desks

are components that can be ordered with a single style number for field assembly.

► Specifying, pages 215–243

Grommets are available factory installed.

Worksurface is a wood core substrate with laminate surface.

Back panels can be ¾-height (20¼"H) or full-height (25⅞"H).

Face lock is standard on post-2004 pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random. ► *Lock and Keying*, page 442

Leveling glides adjust to install furniture on uneven floors.

Drawer pulls are integral, flush, and span the width of the drawer.

Drawers are made of steel. Box- and file-size drawers are available.

Radius edge is located on the front and back of the worksurface.

Pedestals are suspended beneath the worksurface. You can specify their positions. ¾- and full-height are available. A maximum of two pedestals are allowed per worksurface.

Center drawer, if selected, is factory installed in the center of desks that are at least 25"D and 45"W. *Exception: Center drawer is field installed on 90"W unit assemblies.* ► Page 156

Product Details

Back panels are flush to the worksurface, or are available recessed 5" on 30"D desks. 35"D desks are available only with recessed back panels.

Back panel substitution is possible. You can substitute a full-height back panel on desks with ¾-height pedestals. You cannot substitute a ¾-height back panel on a desk with full-height pedestals without leaving the bottom of the pedestals showing.

Actual Dimensions

Depth	20", 25", 30", or 35"
Width	30", 45", 60", 65", 70", 75", or 90"
Worksurface height	29¾" (standard); 26¼", 27¼", and 28¾" (options)
Worksurface thickness	1½"
End panel thickness	1⅛"
End panel height	30"
Back panel height	20¼" or 25⅞"
Pedestal depth	17½", 22⅝", or 27⅝"
Pedestal width	15"
Pedestal height	18½" or 24½"
Leveling glide range	1½"

Lock is standard on post-2004 pedestals. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. All locks in unit are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Tip: Post-2005 desks no longer have a central-locking mechanism. The worksurface edge facing the user is smooth, without a hole or lock assembly.

► **Lock and Keying**, page 442

Pedestal substitutions

are available.

► Page 162

Tip: Pre-2004 pedestals are locked by engaging the central-locking mechanism of the worksurface. Post-2004 pedestals have a face lock and do not interface with the central-locking mechanism of the pre-2005 worksurface. Both pre- and post-2004 pedestals physically connect to the worksurface in the same way.

Individual drawer locks

are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access.

Clear-access end panels can be substituted on one or both sides of 25"D and 30"D desks.

Tip: Specify center clear-access end panel when using an adjacent freestanding corner worksurface.

Connections

Side attaching of a desk to a panel is possible.

► Page 159

Standard worksurface height is 29 $\frac{3}{4}$ ". Desks with $\frac{3}{4}$ -height back panels allow height to be set at 26 $\frac{1}{4}$ "H, 27 $\frac{1}{4}$ "H, or 28 $\frac{3}{4}$ "H. Desks with full-height back panels allow height to be set at 27 $\frac{1}{4}$ " or 28 $\frac{3}{4}$ ".

Exception: 35"D desks are available 28 $\frac{3}{4}$ "H or 29 $\frac{3}{4}$ "H only.

Returns and bridges

attach to desks using brackets that are supplied with the return or bridge.

Service modules can be attached to the end panels to provide overhead storage on 25"D, 30"D, or 35"D desks.

► Page 186

Wiring & Cabling

Grommets are available, factory installed, to allow cords and cables to pass through the worksurface.

► Page 157

Channel, between the underside of the worksurface and the top of the pedestal, allows space for cord and cable routing.

Cords and cables can be routed through the end panel and accessed through the end panel wiring access cap and through an opening at the bottom of the end panel.

A variety of products is available to manage cords and cables under the worksurface.

► Page 358

Surface Materials

Worksurface

- Laminate (standard)
- See *Surface Materials Reference Manual*.

- Open Line laminate (option)

A program including non-Steelcase laminates that are suitable for use on Steelcase products.

► Page 193

Returns

Returns attach to a desk or credenza to form an L-shaped configuration.
 ▶ Specifying, pages 244–255

Worksurface is wood core substrate construction with laminate surface.

Radius edge is located on the front and back of the worksurface.

Drawer pulls are integral, flush, and span the width of the drawer.

Face lock is standard on post-2004 pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying, page 442

Drawers are made of steel. Box- and file-size drawers are available.

Leveling glides adjust to install furniture on uneven floors.

Brackets are available to attach return to adjacent desks.

Product Details

Standard worksurface height is 29³/₄"H on 25"D and 30"D returns. Returns with ³/₄-height back panels allow height to be set at 26¹/₄"H, 27¹/₄"H, or 28³/₄"H. Returns with full-height back panels allow height to be set at 27¹/₄"H or 28³/₄"H.
Exception: Standard worksurface height on 20"D return with ³/₄-height back panel is 26¹/₄"H; 27¹/₄"H with full-height back panel.
Tip: Post-2005 worksurfaces no longer have a central-locking mechanism. The worksurface edge facing the user is smooth, without a hole or lock assembly.

Center drawer is field installed on 25"D or 30"D returns. Center drawers are non-locking.
 ▶ Page 156

Pedestal substitutions are available.
 ▶ Page 162
Tip: Pre-2004 pedestals are locked by engaging the central-locking mechanism of the worksurface. Post-2004 pedestals have a face lock and do not interface with the central-locking mechanism of the pre-2005 worksurface. Both pre- and post-2004 pedestals physically connect to the worksurface in the same way.

Actual Dimensions

Depth	20", 25", or 30"
Width	30", 45", or 60"
Worksurface height	29 ³ / ₄ " (standard); 26 ¹ / ₄ ", 27 ¹ / ₄ ", and 28 ³ / ₄ " (options)
Worksurface thickness	1 ¹ / ₂ "
End panel thickness	1 ¹ / ₈ "
End panel height	30"
Back panel height	20 ¹ / ₄ " or 25 ⁷ / ₁₆ "
Pedestal width	15"
Leveling glide range	1 ¹ / ₂ "

Filler strip, shipped with the straight-height attachment bracket, finishes the connection between worksurfaces attached at the same height.

Lock is standard on post-2004 pedestals. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Connections

Support plates allow return to be positioned at 29 3/4"H. Filler strip is included.

Returns install to the left side of the adjacent work-surface, unless specified as a right-hand return.

Returns can be attached flush to the end panel of the adjacent unit, or they can be inset 1 1/8" (the width of the end panel) to allow cords and cables to pass behind the worksurface.

Wiring & Cabling

Grommets are available, factory installed, to allow cords and cables to pass through the worksurface.
► Page 157

Channel, between the underside of the work-surface and the top of the pedestal, allows space for cord and cable routing.

Cords and cables can be routed through the end panel and accessed through the end panel wiring access cap and through an opening in the bottom of the end panel.

A variety of products is available to manage cords and cables under the worksurface.

Application Topics

Pedestals cannot be attached beneath a bridge.

Back panel clearance from the floor varies as the worksurface height varies.
▶ Page 161

Bridge cannot be used when both perpendicular worksurfaces are panel supported. One or both of the adjacent units must be freestanding.

Bridges must be attached at the same height or lower than both adjacent worksurfaces.

Worksurface Accessories

▶ Page 156

Radius-End Tables

Radius-end tables are perfect for conferencing and can serve as a primary work-surface. Unit must be connected to a bridge, return, or adjoining worksurface to form a L- or U-shaped configuration and to provide proper stability. Additional attachment hardware may need to be ordered.

► Specifying, page 256

Edge is plastic on laminate work-surfaces.

End panel provides support for freestanding radius-end table.

Leveling glides adjust to install furniture on uneven floors.

Center panel increases stability of end panel support.

Worksurface has a wood core with a laminate.

Product Details

Modesty panel is available and fits between the center support and the column support to provide additional privacy in the kneespace area. The modesty panel is attached in the field to the center support and the bottom of the work-surface; a column bracket is also included.

Modesty panels are 14"H to 1 1/16" thick; width varies by the size of the table as follows:

60" x 30" table	26 7/8"W
65" x 30" table	31 7/8"W
70" x 30" table	36 7/8"W
70" x 35" table	34 3/8"W

Actual Dimensions

Depth	30", 35"	
Width	60", 65", or 70"	
Height	29 3/4"	
Kneespace width	60" x 30" table	26 7/8"W
	65" x 30" table	31 7/8"W
	70" x 30" table	36 7/8"W
	60" x 35" table	24 3/8"W
	65" x 35" table	29 3/8"W
	70" x 35" table	34 3/8"W
Thickness	1 1/4"	
Column support diameter	4"	

Connections

Support plate from adjacent worksurface ensures alignment.

Worksurface fillers are available as transition fillers for radius-edge worksurfaces in a perpendicular or straight-line application.

► Page 134

Tip: Because of different furniture applications and installation techniques, it is suggested that worksurface fillers be ordered after the worksurface installation.

Wiring & Cabling

Grommet is available, factory-installed, to allow cords and cables to pass through the worksurface.

► Page 157

Surface Materials**Worksurface**

- Laminate (standard)
 - See *Surface Materials Reference Manual*.
 - Open Line laminate (option)
- A program including non-Steelcase laminates that are suitable for use on Steelcase products.

► See *Surface Materials Reference Manual*.

Edge

- Plastic (standard on laminate worksurface)

Column support

- Paint (standard)
- 9201 Polished Chrome (option)

Application Topics

Radius end table must be used in conjunction with an adjacent worksurface of the same thickness.

Shipping

Radius end table and modesty panel are shipped knocked down (K.D.).

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized. (replace worksurface with table as appropriate).

Universal Corner Worksurfaces

For Use with Freestanding Worksurfaces

Corner worksurfaces

are used to make a transition between two freestanding worksurfaces that are at right angles to each other.

► Specifying, page 259

Worksurface has a wood core with laminate surface.

Back panels are $\frac{3}{4}$ -height (20 $\frac{1}{4}$ "H) and are flush only.

Front edge, facing the user, is laminate. Keyboard cutout edge is plastic.

Radius plastic edge is located on the back of the worksurface.

Connections

Corner worksurface height can be set at 26 $\frac{1}{4}$ "H, 27 $\frac{1}{4}$ "H, 28 $\frac{3}{4}$ "H, or 29 $\frac{3}{4}$ "H and can be set independently of adjacent worksurfaces.

Center clear-access end panel on adjacent freestanding worksurfaces has attachment holes on both sides and provides support for the corner worksurface.

Actual Dimensions

Depth	25" or 30"
Width	42" or 45"
Height when attached	26 $\frac{1}{4}$ ", 27 $\frac{1}{4}$ ", 28 $\frac{3}{4}$ ", or 29 $\frac{3}{4}$ "
Thickness	1 $\frac{1}{2}$ "
Back panel height	20 $\frac{1}{4}$ "

Wiring & Cabling

Grommets are available, factory installed, to allow cords and cables to pass through the worksurface.

Modular worksurfaces

► Page 160

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized. (replace worksurface with table as appropriate).

Metal Center Drawer

► Specifying, page 262

Actual Dimensions

Depth	21 ³ / ₈ "
Inside depth	16 ¹ / ₂ "
Width	22"
Inside width	19 ⁷ / ₈ "
Height	2"
Inside height	1 ⁷ / ₈ "

Product Details

Center drawer provides convenient personal storage below the worksurface. They are field installed.

Center drawers can be installed on worksurfaces with a depth of 25", 30", and 35".

Center drawers on post-2005 worksurfaces are non-locking.

Tray for pencils and paper clips is built in.

Lock in pre-2005 worksurface secures the center drawer.

Tip: The center drawer can be shifted 9" off center under the worksurface, and still lock.

Tip: The runners of the metal center drawer are designed to fit under wood core worksurfaces. For drawer runners for steel worksurfaces, consult Service Parts.

Wiring & Cabling

Drawer frame and attaching hardware are included for field installation.

Surface Materials

Center drawer

- Paint

Tip: Drawer will match the color of the end panels or support substitutions. If you prefer a complementary color, you should order the drawer separately for field installation.

Application Topics

23"W kneespace clearance is required.

Field-installed center drawer should be offset toward the pedestal on all single-pedestal desks to accommodate attachment of a return or bridge.

Grommets cannot be used over center drawers.

► Page 157

Plastic Center Drawer

► Specifying, page 262

Product Details

Stores pens, pencils, paper, and other lightweight personal tools.

Center drawer does not lock.

Connections

Field install drawer wherever space is available beneath the worksurface. Minimum area required is 19¹/₂"D x 21"W.

Surface Materials

Drawer

- Black textured plastic only

Slides

- Black plastic only

Side Attachment of
Freestanding Desks

Back Panel Side-Connector Bracket

► Specifying, page 261

Product Details

Application

Use to attach back panel of freestanding units to perpendicular panel when end panel is omitted.

Connections

Attaches to back panel with screws.
Exception: Does not attach to machine support units, or desks with recessed back panels.

Left- and right-hand versions are available.

Specifying

Back panel side connector bracket and worksurface end support bracket (below) can be ordered separately or substituted for one end panel on 20"D, 25"D, and 30"D freestanding units.

Overall width of unit is 1 1/8" shorter when end panel is omitted.

Worksurface End-Support Bracket

► Specifying, page 261

Product Details

Application

Use to attach the end of a worksurface to a panel.

Connections

Attaches to worksurface with screws.
Exception: Does not attach to desks with recessed back panels.

Three lengths—20", 25", and 30"—match the depths of worksurfaces.

Specifying

Worksurface end-support bracket and back panel side-connector bracket (above) can be ordered separately or substituted for one end panel on 20"D, 25"D, and 30"D freestanding units.

Conventional
Products

Modular Worksurfaces

In Series 9000, the total worksurface width including end supports matches the width of panels.

In configurations in which the end support—end panel, clear-access end panel, or cantilever—is absent, there are special worksurfaces available that are slightly longer to make up for the end panel dimension. These worksurfaces are called *modular* because they allow the overall dimension to remain modular with the panel dimensions.

With modular worksurfaces there are fewer intrusions in the worksurface by supports. Worksurfaces attach with shared cantilevers or brackets. Brackets are also available to connect modular worksurfaces to panels.

Tip: Shared cantilever cannot be used to connect perpendicular worksurfaces. They must be used in straight connections only.

Standard Configurations

Panel-Supported

Tip: In an "L" configuration workstation in which each worksurface is supported by two cantilevers, the front edge of the return worksurface will rise $\frac{3}{16}$ " above the primary worksurface. Use a modular worksurface application to eliminate this situation.

Configurations with Modular Worksurfaces

Panel-Supported

 = Modular worksurface

Shared cantilevers cannot be used to connect perpendicular worksurfaces.

Worksurface height

	29 ³ / ₄ "H	28 ³ / ₄ "H	27 ¹ / ₄ "H	26 ¹ / ₄ "H
(A) Kneespace height	28 ¹ / ₄ "	27 ¹ / ₄ "	25 ³ / ₄ "	24 ³ / ₄ "
(B) ³ / ₄ -height back panel to floor	7 ¹³ / ₁₆ "	6 ¹³ / ₁₆ "	5 ⁹ / ₁₆ "	4 ⁵ / ₁₆ "
(B) Full-height back panel to floor	2 ¹³ / ₁₆ "	1 ¹³ / ₁₆ "	5 ¹ / ₁₆ "	N.A.
(C) ³ / ₄ -height pedestal to floor	9 ²⁵ / ₃₂ "	8 ²⁵ / ₃₂ "	7 ⁹ / ₃₂ "	6 ⁹ / ₃₂ "
(C) Full-height pedestal to floor	3 ²³ / ₃₂ "	2 ²³ / ₃₂ "	1 ⁷ / ₃₂ "	N.A.

Tip: You can substitute a full-height back panel on desks with ³/₄-height pedestals, but you cannot substitute a ³/₄-height back panel on desks with full-height pedestals.

Tip: A full-height back panel will block access to voice/data knockouts on E9000 panel base.

Pedestal Depths

Pedestal depth	Desk depth				
	20"D Desk Flush back panel	25"D Desk Flush back panel	30"D Desk Flush back panel	30"D Desk Recessed back panel	35"D Desk Recessed back panel
20"D Pedestal (nominal)	•				
25"D Pedestal (nominal)		•	•	•	
30"D Pedestal (nominal)			•		•

Pedestal depth can match worksurface depth or, in some cases, be less deep. Pedestal adapter package is available to attach 25"D pedestals to steel substrate 30"D worksurfaces.

► Page 288

25"D pedestals can be attached to wood core substrate 30"D worksurfaces. A pedestal adapter kit is not needed for wood core substrate worksurfaces due to the presence of an additional mounting channel on 30"D worksurface.

Worksurface-Supported Pedestals

Pedestals provide storage beneath the worksurface. Two heights are available—¾-height (18½"H) and full-height (24½"H).

Worksurface-supported pedestals lock into pre-determined positions beneath the worksurface.

► Specifying, pages 263–264

Finished back and sides are standard.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

► Lock and Keying, page 442

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Drawer fronts are only available in steel.

Pull on flush-front pedestal is full-width and integral. Full-width wood pull is available as an option. Wood pull if selected, ships separate from pedestal and is field-installed, attaching to the integral pull with double-solid tape.

Actual Dimensions

Depth	17½", 22⅝", and 27⅝"
Width	15"
Height	18½" or 24½"

Product Details

Box drawers are a welded steel construction with flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction with flush fronts. Drawer body sides are full-height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders. *Exception: Legal-size folders cannot be filed in 17½"D pedestals.*

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Optional full-width wood pulls attach to integral pull with double-sided tape. Wood pull ships separately from pedestal for field installation.

Pencil tray to hold small office supplies is included with each box/file and box/box/file pedestal.

Label holders are available through Service Parts. Label holder fits inside the integral pull.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 442

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 442

Connections

Panel-supported worksurfaces can support pedestals. Use an end panel to provide sufficient support for the worksurface.

Recessed back panels require that pedestals be 5" less deep than the worksurface.

25"D or 30"D pedestals can be attached to wood core substrate 30"D worksurfaces by using the appropriate channel on the underside of the worksurface. A pedestal adapter bracket is not needed.

Pedestals can be mounted to the underside of the wood core worksurface (a maximum of two pedestals). Pedestals can be attached two in a row on 45"W, 60"W, 65"W, 70"W, 75"W, or 90"W wood core worksurfaces.

3/4-height pedestals (18²³/₃₂"H) can be used on unit assemblies with 3/4-height or full-height back panels, but full-height pedestals (24²⁷/₃₂"H) can only be used with full-height back panels.

Field-installed accessories are available, including pencil trays, dividers, and rails. ▶ Page 188

Wiring & Cabling

Grommets should not be specified over pedestals.

Pedestals do not reach to the floor, which allows access to receptacles in the panel base. Pedestals can be used to conceal access to power on the floor.

Surface Materials

Pedestal, steel drawer fronts, and integral pulls

- Paint

Wood drawer pulls

- Open-pore finishes
- Customiz stain (option)

Lock

- 9201 Polished Chrome
- 9250 Ember Chrome (option)

Drawer bodies, drawer suspensions, rails, dividers, and glides

Application Topics

Full-height pedestal

3/4-height pedestal

26 1/4"H worksurfaces do not allow enough space for a full-height pedestal or back panel. Use 3/4-height pedestals or raise the worksurface.

45"W modular return or 45"W modular work-surface package will accommodate two pedestals.

60"W modular work-surface packages will accommodate two pedestals.

Clearance Dimensions and Pedestal Depths

▶ Page 161

Storage Capacities

▶ Page 193

Shipping

Pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Mobile Pedestals

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary work-surface when you need more space to spread out your work.

Tip: 27"H mobile pedestal will fit under 29³/₄"H worksurface with adequate kneespace. It will not fit under worksurfaces that are 26¹/₄"H or 27¹/₄"H.

► Specifying, page 266

Lock is standard on mobile pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 442

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/file pedestals and concealed within the base of box/box/file pedestals.

Top is 1/8"H steel. Additional top options are available.

Pull on mobile pedestal is full-width and integral. Wood pull is available as an option.

Drawer fronts are available in steel. Mobile pedestals maintain drawer pull and drawer front alignment with other storage components that have a 3" base.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Product Details

Box drawer is a welded steel construction with flush fronts. One divider is included with each box drawer.

File drawer is a welded steel construction with flush fronts. Drawer body sides are full-height and accommodate front-to-back filing of hanging letter-size file folders. Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders.

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Flush-front pull is full-width and integral with the drawer.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Handle can be extended to easily transport mobile pedestal. Available factory- or field-installed.

► Specifying, page 268

Actual Dimensions

	Box/File	Box/Box/File and File/File
Depth	22 ⁵ / ₈ "	22 ⁵ / ₈ "
Width	15"	15"
Overall height with 1/8"H top	21" or 23 ¹ / ₄ "	27"

Pencil tray to hold small office supplies is included with each box/file and box/box/file mobile pedestal.

Optional full-width wood pull attaches to integral pull with double-sided tape. Wood pull ships separate from pedestal for field-installation.

Label holders are available through Service Parts. Label holder fits inside the integral pull.

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops. 1"H steel tops, 1 3/16"H laminate with square edge profile, 1 7/16"H laminate with bullnose edge profile on the front edge, and 1 3/16"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for transport.

Mobile pedestal cushion top for field-installation can be used with mobile pedestal 9U111MH only.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Counterweights are included to provide added stability. All pedestals are shipped with a factory-installed counterweight package that meets or exceeds standards for the industry.

Connections

Mobile pedestals are not intended to directly interface with panels or other furniture components.

Field-installed accessories are available, including pencil trays, media trays, dividers, and rails.

► Page 188

Wiring & Cabling

Mobile pedestals do not accommodate cable routing. Plan accordingly when installing mobile pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Shipping

Mobile pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Universal Sliding Door Bins

For Use with Series 9000

Universal sliding door bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.

► Specifying, page 274

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.

► *Lock and Keying*, page 442

Recess beneath unit can accommodate a shelf light.

► Page 404

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	35", 36", 42", 45", 60", 70", and 75"
Height	16 ¹ / ₄ "

Upmount brackets, optional, are for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width. For Montage, upmount brackets attach near the top of a 55"H frame.

Two upmount bin brackets can be hung side-by-side in an in-line, T- or X- application.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► Page 404

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.

Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

► Page 192

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".

► Page 192

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Universal Over the Case Bins

For Use with Series 9000

Universal over the case

bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.

► Specifying, pages 276–278

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Flat-front and radius-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.

► *Lock and Keying*, page 442

Recess beneath unit can accommodate a shelf light.

► Page 404

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Upmount brackets are optional for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Actual Dimensions

Depth 15³/₄"

Width 25", 30", 35", 36", 42", 45", 60", 70", and 75"

Height 16¹/₄"

Two upmount bin brackets can be hung side by side in an in-line, T- or X-application. Universal over the case bins can be upmounted over or adjacent to a slatwall.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal over the case bin can not exceed 10½ pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of 7¼ pounds to 10½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.

► See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 173

Door assist mechanism, optional, consists of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal over the case bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

► Page 404

Divider is available as an option on overhead bins. Dividers ship in a package of four.

► Page 188

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number. *Tip: Select the omit brackets option when ordering the bin.*

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

75"	37 1/2" (per door)	15.933"	36.314"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal In the Case Bins

For Use with Series 9000

Universal in the case bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.
 ▶ Specifying, pages 280–283

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Flat-front lift-up doors (steel or wood) recess into the overhead storage bin.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.
 ▶ Lock and Keying, page 442

Recess beneath unit can accommodate a shelf light.
 ▶ Page 404

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Upmount brackets, optional, are for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	25", 30", 35", 36", 42", 45", 60", 70", and 75"
Height	16 ¹ / ₄ "

Two upmount bin brackets can be hung side-by-side in an in-line, T- or X- application. Universal in the case bins can be upmounted over or adjacent to a slatwall.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal in the case bin can not exceed 9½ pounds. An insert for a Universal in the case storage bin door with an assist mechanism must weigh within the range of 5½ pounds to 9½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.

► See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 177

Door assist mechanism, optional, consists of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal in the case bins ship with one assist mechanism per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► Page 404

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.
Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.
▶ Page 192

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".
▶ Page 192

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
▶ Page 411

Surface Materials

Overhead bin

- Paint
- Wood door (optional)

Locks

- 9201 Polished Chrome
- 9250 Ember Chrome (optional)

On-module and vertical off-module attachment brackets

- Black paint only

Horizontal off-module attachment brackets for Montage

- Paint to match bin

Upmount brackets

- Paint

Dividers

- White plastic

Application Topics

Clearance between Series 9000 Conventional or Options worksurfaces and bottom of overhead bins is 20" when storage unit is installed in the highest position on a 65"H panel and glides are adjusted all the way into the panel.

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal Shelves and Universal Personal Shelves

Universal shelves

supported by Series 9000
provide overhead storage
in the work space.

► Specifying, page 269

Universal personal shelves

provide a wall-
supported surface that
attaches to Series 9000.

► Specifying, page 270

Metal backstop on

Universal shelves pre-
vents notebooks and equip-
ment from damaging panel
surface. Universal personal
shelves do not have a
backstop.

On-module attachment

hooks are integral to the
end supports and are used
to mount shelves on panels
of the same width as bins.

Safety catch locks shelf
units to frame to prevent
accidental removal.

Shelves are steel and ship
ready to assemble.

Actual Dimensions

	Universal shelves	Universal personal shelves
Depth	14 ³ / ₄ "	13 ¹¹ / ₁₆ "
Width	24", 25", 30", 35", 36", 42", 45", 48", 60", 70", and 75"	24", 25", 30", 35", 36", 42", 45", and 48"
Height	7 ¹ / ₂ "	1 ¹¹ / ₁₆ " (thickness of shelf)

Product Details

Shelf lights are available
for use beneath shelves.
Lights recess into the bottom
of the overhead storage unit.

► Page 404

Dividers are available
field installed for use on
Universal shelves. Dividers
ship in a package of four.
Dividers cannot attach to
Universal personal shelves.

A 1¹/₂" gap exists between
the personal shelf and the
panel to allow for cable
routing.

**The height dimension
of the bracket** (from top
of personal shelf to the bot-
tom of the bracket) is 6¹/₂"H.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Wall channels are available to attach shelves to concrete or block walls. Wall channels can be used to attach shelves to wood, dry wall, or plaster walls, if wall is reinforced.

Universal Curved Front Bins

Bins, supported by frames, provide overhead storage in the work space. Bin shelf, top, and back are steel. Side panels are plastic. Door is steel or wood. Bins ship fully assembled.
 ▶ Specifying, page 284

Safety catches lock overhead storage unit to bracket and frame to prevent accidental removal.

Basic attachment brackets are used to mount bins on panels with vertical slot patterns. Bracket allows bin to be flush with the bracket or to extend beyond the bracket up to 12".

Lock is standard on bin. Lock is centered on the underside of the case and angled forward to provide a clean aesthetic, yet it is easy to access. Locks are standard factory-installed, keyed random.

▶ Lock and Keying, page 442

Easy open AND easy close doors open over the top of the bin.

Actual Dimensions

Curved front bin

Depth	16½"
Inside depth	13¾"
Width	30", 36", 42", 45", or 48"
Inside width	27¼", 33¼", 39¼", 42¼", or 45¼"
Height	15"
Height with door open	23"
Inside height	13¾"

Product Details

Lock is angled forward so it provides a clean aesthetic, yet it is easy to access. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 442

Bin has access holes in bottom of bin for wire management.

When curved front bin is in upmounted position, slotted channels are visible. A flat steel back is available through Specials.

Upmounted curved front bins cannot be attached above or adjacent to a slatwall.

Bookends hold books and other materials upright in bin.

Top of bin can align with the top of the frame.

Back of bin is closed.

Bin height accepts standard and A4 binders.

Top of bin cannot be loaded.

Ganging bracket is recommended on all panels. It joins adjacent overhead bins and shelves for optimal visual alignment. Ganging bracket is ordered separately.

Stationary shelves can be added to bins on site.

Stationary shelf hangs from the bottom of curved front bins with KBIN_ style numbers. Space between bottom of bin and top of stationary shelf is 5 1/2". Overall stationary shelf height dimension is 6 5/32". Specify the same width as corresponding bin. Shelf is steel with molded end caps. *Tip: Stationary shelf cannot hang from an upmounted bin or shelf.*

Connections

Bin comes standard with basic attachment bracket. Off-module and upmount brackets are optional.

► *See Bracket Application Rules*, page 37.

Underline task light's 3/4" profile makes it the ideal task lighting solution for universal bins and shelves. Underline task light includes the lamp, ballast, and 9' cord. It virtually disappears when mounted beneath these storage solutions. Underline mounts flush to the bottom of universal bins and shelves using screws. Task light is field-installed and pre-drilled holes are provided. Spiral 9' cord option is designed to drop straight down from fixture. This option is an aesthetic alternative to the traditional cord. Housing is 24"W and 3/4"H and is available in dark champagne, pewter, and black.

For New York City, tool-free clips are required for flush mount applications within New York. Clips allow removal of Underline without use of a tool.

Off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panel only. Shift bin or shelf to avoid joint.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. ► *Page 192*

Universal L-Shelves

L-shelf, supported by frames, provide overhead storage in the work space. L-shelf and back are steel. L-shelf is partially field-assembled.

► Specifying, page 271

Safety catches lock overhead storage unit to bracket and frame to prevent accidental removal.

Basic attachment brackets are used to mount bins on panels with vertical slot patterns. Bracket allows bin to be flush with the bracket or to extend beyond the bracket up to 12".

Endcaps are molded plastic.

5/16" diameter rods provide an open aesthetic to the sides of the L-shelf.

Spacers on shelf attach back to shelf.

Actual Dimensions

	Shelf
Depth	14 ¹ / ₄ "
Width	29 ⁷ / ₈ ", 35 ⁷ / ₈ ", 41 ⁷ / ₈ ", 45 ⁷ / ₈ ", or 47 ⁷ / ₈ "
Inside width	25 ³ / ₄ ", 31 ³ / ₄ ", 37 ³ / ₄ ", 41 ³ / ₄ ", or 43 ³ / ₄ "
Height	15"
Shelf thickness	5/8"

Product Details

Spacers on shelf provide 1/4" gap between back and shelf. Back screws to shelf through spacers.

Bookends hold books and other materials upright on shelf.

Top of L-shelf can align with the top of the frame.

Upmounted L-shelves cannot be attached above or adjacent to slatwall.

L-shelves are intended as a companion to the Universal curved front bins. They will not align horizontally if mounted adjacent to a Universal over the case or Universal in the case bin in standard or upmount applications.

Stationary shelves can be added to bins on site.

Stationary shelf hangs from the bottom of L-shelves with KLSHF_ style numbers. Space between bottom of L-shelf and top of stationary shelf is 5 1/2". Overall stationary shelf height dimension is 6 5/32". Specify the same width as corresponding L-shelf. Shelf is steel with molded endcaps.

Tip: Stationary shelf cannot hang from an upmounted bin or shelf.

Ganging bracket is recommended on all panels. It joins adjacent bins and shelves for optimal visual alignment. Ganging bracket is ordered separately.

Connections

L-shelves come standard with basic attachment bracket. Off-module and upmount brackets are optional.

► See *Bracket Application Rules*, page 37.

Underline task light's 3/4" profile makes it the ideal task lighting solution for universal bins and shelves. Underline task light includes the lamp, ballast, and 9' cord. It virtually disappears when mounted beneath these storage solutions. Underline mounts flush to the bottom of universal bins and shelves using screws. Task light is field-installed and pre-drilled holes are provided. Spiral 9' cord option is designed to drop straight down from fixture. This option is an aesthetic alternative to the traditional cord. Housing is 24"W and 3/4"H and is available in dark champagne, pewter, and black.

For New York City, tool-free clips are required for flush mount applications within New York. Clips allow removal of Underline without use of a tool.

Off-module brackets

cannot span a vertical or joint where two frames come together on enhanced off-module Montage panel only. Shift bin or shelf to avoid joint.

Wall channels are available to attach L-shelves to concrete or block walls. Wall channels can be used to attach L-shelves and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

Slim Shelves

Slim shelves provide a panel-supported surface that attaches to Series 9000 with panel-specific brackets.

► Specifying, page 273

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Series 9000 with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Surface Materials

Service Module Packages

Service module packages allow one Universal sliding door, over the case, or in the case bin, to be mounted above a desk or credenza, to provide privacy and overhead storage. A service module package includes two end supports, a back panel for the bin, an accessory rail, a double-sided tackboard, one cable manager, and attachment hardware.

► Specifying, page 286

Storage bins are sold separately. Any Universal sliding door, over the case, or in the case bin can be used. Select the omit bracket option when ordering the bin.

Steel back panel encloses the storage bin so the service module does not need to be panel wrapped.

End supports attach to the storage bin and to the freestanding desk and credenza.

Double-sided tackboard can be ordered with matching or contrasting fabrics.

Accessory rail accepts the hutch kit receptacle, power and data strip, selected Details worktools, and the dividers that are an option to the bin.

Access cover allows plugs and cords to be routed between the accessory rail and the worksurface without creating a large visible gap.

Actual Dimensions

Depth	15"
Width	45", 60", 70", or 75"
Height	35"

Product Details

Double-sided tackboards are standard with service module packages. They divide space, increase privacy, and provide a display surface.

Accessory rail accepts dividers that are available as an option to the storage bin, the hutch kit receptacle, power strip, and data strip. The rail also accepts selected Details worktools. An access cover allows plugs and cords to be routed between the accessory rail and the worksurface. If you choose to vary the height of the worksurface, the painted metal cover slides up and down to accommodate the height change without creating a large visible gap.

Connections

Shelf lights are available to recess into the bottom of storage bins.

Service module packages attach to Universal sliding door, in the case, and over the case bins which must be ordered separately. Specify omit bracket option on storage bin. Be sure to specify the storage bin in the same paint finish as the service module package.

End supports support storage bin at 65" height.

Service modules can be used on 25"D, 30"D, and 35"D freestanding desks and credenzas.

Exception: Service modules cannot be used on shared unit assemblies.

Service-module end supports attach to the end panels of the desk or credenza using attachment hardware that is shipped with all service module packages.

Wiring & Cabling

Light cords can be routed through a service module vertical cable manager and then through the gap between the accessory rail and the worksurface. One non-handed, painted steel vertical cable manager is shipped with each hutch kit. Additional cable managers are available separately.

Power receptacles and power and data strip are available for field installation on the accessory rail, providing access to power at worksurface height.

Surface Materials

End supports, back panel, vertical cable manager, and accessory rail

- Paint

Tackboard

- Vertical surface fabric

Power receptacle

- Black plastic only

Pricing

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Application Topics

Maximum clearance between 29³/₄"H worksurface and the storage bin is 18⁵/₈". Shelf lights reduce that clearance to 18⁷/₁₆".

Details accessories are available for use on accessory rail including letter tray, pencil cup, double square cup, shallow dish, office in a file, mini shelf, and slatshelves. For product information, see the *Details Specification Guide*.

Shipping

Service module packages are assembled in the field.

Storage Accessories

Pencil Tray and Reference Shelf

► Specifying, pages 289–290

Product Details

Pencil tray and reference shelf are used in:

- Conventional and Options pedestals (manufactured after February 22, 2004)
- Mobile pedestals (manufactured after February 22, 2004)

Tip: For pedestals manufactured on or before February 22, 2004, see Service Parts catalog.

- Universal towers
- Universal workstation verticals

Pencil tray is available to hold small office supplies.

Tip: Pencil trays are standard in box drawers of pedestals. One pencil tray per pedestal is included.

Reference shelf protects reference papers in box drawers. Shelf rests on top of drawer edges and can slide the entire depth of the drawer. A clear plastic insert is standard with each reference shelf.

- Metallic paint (option)

Accessories

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Horizontal wall attachment brackets can attach to wall of building to accept Universal sliding door, Universal Over the Case, and Universal In the Case storage bins. Brackets will not accept bins introduced prior to March 2007, TS Series bins, or universal curved front bins.

► Specifying, page 291

Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.

Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach Universal sliding door, Universal over the case, and Universal in the case bins to a building wall. TS Series and universal curved front bins cannot attach to horizontal wall attachment brackets.

Shelves can not hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with 5/8" thick Toggle R-type 3/16" wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksur-
faces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width 24", 25", 30", 35", 36", 42", 45", 48", 60", 70", and 72".

Surface Materials

Brackets and steel back

- Paint

Accessories

Wall Channels

For Use with Overhead Storage Products

Slotted steel channel accepts shelves, overhead storage bins, or tackboards.
► Specifying, page 290

Product Details

Wall channel can be positioned on wall at varying heights.

Order wall channel height according to its intended use. Cutting wall channels is not recommended.

Connections

Wall channels can be used to support shelves, storage bins, and tackboards.

Field install on:

- Concrete walls: Hilti type anchors
- Drywall or plywood: 5/8" thick, Toggler type 3/16" wall anchor
- Steel and wood studs: #10 sheet metal or wood screws of appropriate length

Anchors must be used on each screw hole location of the wall channel.

screw position

Components attach at 1" increments, but screws block some slot locations.

Limit to two panel-supported components for each pair of wall channels.

Wall channel horizontal brace is required to reinforce vertical wall channels that support storage bins and shelves that are wider than 45" and are attached to walls.

Wall channel horizontal brace is required for each component that is wider than 48". The brace should be positioned at the top location of each bin or shelf of the vertical wall channel. Horizontal brace is also available in 42" and 45" widths and can be used in applications where there is concern about the strength of the wall.

Width of horizontal brace must match width of shelf of storage bin. Brace is not required for applications that involve shelves and bins that are 45"W or less.

Attaching work surfaces to wall channels is not recommended.

Surface Materials

Wall channel

- Paint

Wall channel horizontal brace

- Paint

Tip: Horizontal brace will be visible until hidden by contents of shelf or storage bin.

Bracket Application Rules

For TS Series Bins, Universal Sliding Door, Universal Over the Case, Universal In the Case Bins, and Universal Shelves

Tip: This matrix does not include Universal curved front bins or Universal L-shelves.

► See page 37 for bracket application rules for those products.

Bracket Application Matrix

Panels	TS Series Bins, Universal Bins, and Universal Shelves—On-Module	Universal Bins—Single Side Vertical Off-Module	Universal Bins—Two Sided Vertical Off-Module	Universal Bins—Horizontal Off-Module (for use with Montage only)	Universal Bins—Upmount
Answer	•	•	•		•
Kick	•	•	•		•
Series 9000	•	•	•		•
Avenir	•	•	•		•
Montage	•	•	•	•	•

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, Series 9000, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.

Tip: See Stability Guidelines in each corresponding specification guide.

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-Module Brackets

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount Brackets

Upmount brackets, optional, can be used with Universal sliding door, Universal over the case, and Universal in the case bins. Brackets attach bins near the top of 53"H panels. TS Series bins and Universal shelves cannot be attached to upmount brackets.

Upmounted bin height is 65"H when installed on 54"H panels.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Omit Brackets

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Hutch kit supports bin at 66" height.

Service module package supports bin at 65" height on Series 9000.

Wood core substrate conventional Series 9000 worksurfaces replaced steel substrate worksurfaces in January 2007. The wood core worksurfaces use existing conventional supports and work with conventional (suspended) pedestals. The wood core conventional Series 9000 worksurfaces are backward compatible with the steel substrate version.

Tip: To determine what components comprise a standard product, find the product's style number in the breakdown of components listing.

Universal Stationary Shelves

For Curved Front Bin and L-Shelf

Tip: Stationary shelf hangs from the bottom of curved front bins with KBIN_ style numbers and L-shelves with KLSHF_ style numbers. Space between bottom of bin or L-shelf and top of stationary shelf is 5 1/2". Overall stationary shelf height dimension is 6 5/32". Specify the same width as corresponding bin or L-shelf.

Tip: Stationary shelf cannot hang from an upmounted bin or shelf.

Tip: Shelf is steel with molded endcaps.

Service Module Packages

Service Module Packages

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Tip: A service module package cannot support more than one bin.

Tip: Be sure to order the storage bin in the same paint finish as the service module package. Storage bin is ordered separately.

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Tip: 70"W and 72"W tackboards accommodate fabric in the horizontal direction only.

Standard Includes		Required to Specify	
► Need help? Product details, page 186	• Steel back to enclose storage bin, end supports, accessory rail, and one non-handed cable manager: paint price group 1	1 Style number	
	• Double-sided tackboards: fabric price group 1	2 Paint color number for back, end supports, accessory rail, and cord manager	
	• Attachment hardware	3 Fabric color number for tackboard surface 1 (front)	
		4 Fabric color number for tackboard surface 2 (back)	
		5 Options, if selected (see below)

Options worksurfaces are available in panel-supported versions for use with *all* Series 9000 panels. However, unlike Conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported only. They have different visual details and offer different surface materials choices. They are not intended to be used together.

Options worksurfaces have a wood core with a laminate surface. They are supported from beneath the worksurface, and therefore can be used to create uninterrupted curvilinear worksurfaces and allow a wide range of configurations that are not possible with Conventional Series 9000 worksurfaces. Supports are varied and unique to Options worksurfaces—including pedestals, end panels, and cantilevers—all beneath the work-surface. Therefore, these worksurfaces cannot be mixed with or interchanged with conventional Series 9000 worksurface supports.

Options pedestals extend all the way to the floor and support Options worksurfaces at 28½"H. They are available with or without locks. Options pedestals cannot be installed beneath Conventional worksurfaces but require additional Service Parts.

Planning with 9000 Options Worksurfaces

The worksurface configurations that are possible with Options worksurfaces are different from those of Conventional worksurfaces.

Series 9000 Conventional worksurfaces are rectilinear; Options worksurfaces are curvilinear.

The planning approaches are logically different.

Directional laminates

For grain direction, see page 317.
For laminate availability, see page 430.
For plastic edge color default, see page 438.

Directional Laminate
Grain Directions
for 9000 Options

Directional laminates

are standard with the grain directions shown.

Make a sketch of the grain direction on adjacent worksurfaces to be sure they are suitable for your installation.

Examples:

Corner Worksurfaces

Options worksurfaces

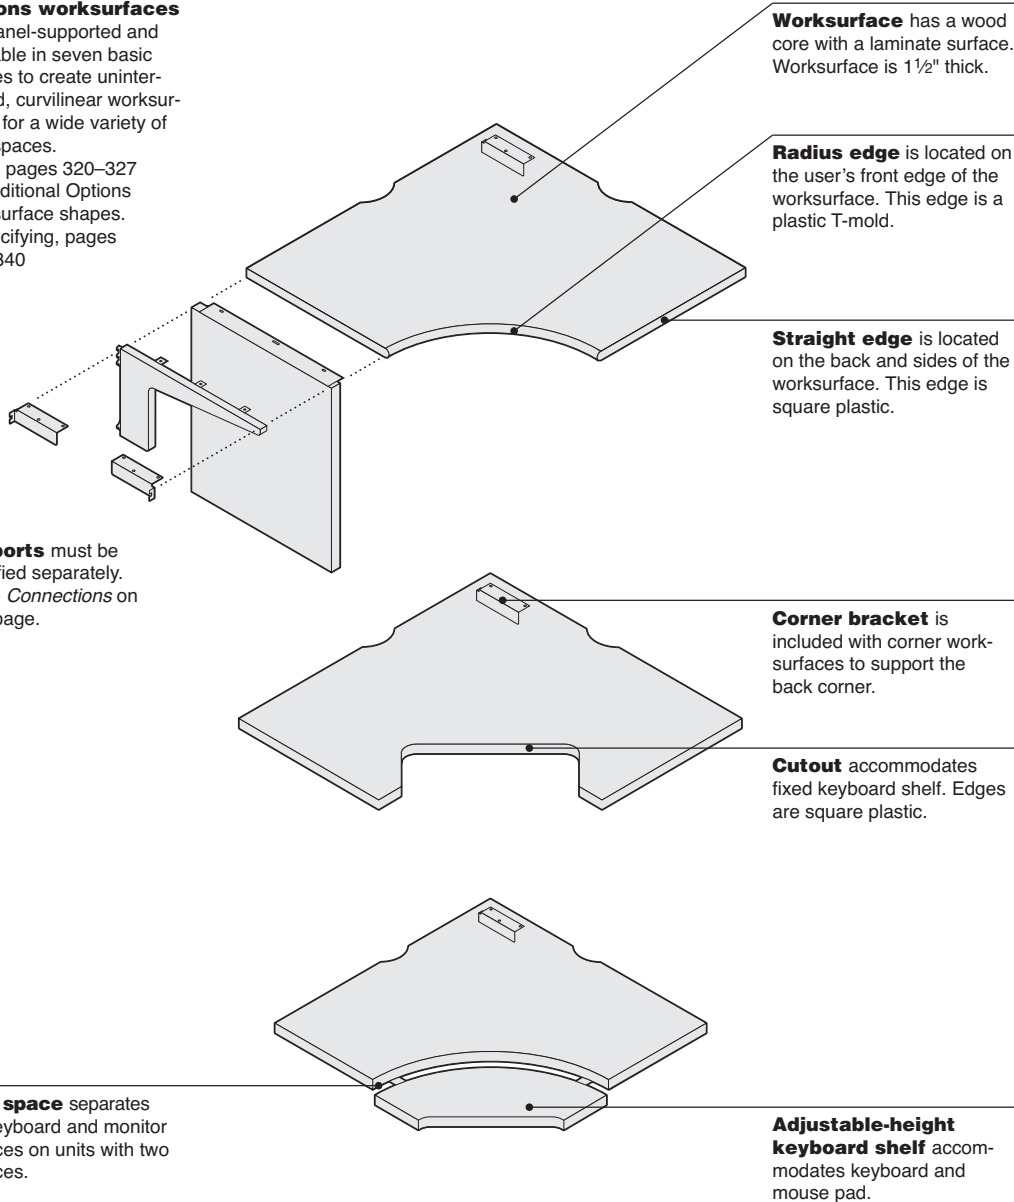

are panel-supported and available in seven basic shapes to create uninterrupted, curvilinear worksurfaces for a wide variety of workspaces.

► See pages 320–327 for additional Options worksurface shapes.

► Specifying, pages 338–340

Supports must be specified separately.

► See *Connections* on next page.

Product Details

Options worksurfaces and supports work on enhanced Series 9000 panels. However, unlike conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported. Supports are varied and unique to Options worksurfaces. All—including pedestals, end panels, and cantilevers—are installed beneath the worksurfaces. Therefore, they cannot be mixed with or interchanged with conventional Series 9000 worksurfaces and supports.

User's edges of Options worksurfaces are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Edge has ¼" radius at top and bottom and is ¼" thick.

► See *Edge Default Matrix*, page 438.

Floor

Keyboard worksurface

is supported by a spring mechanism that allows it to adjust to positions up to 6" higher or 5" lower than the monitor worksurface.

* Keyboard cutout is 12¹/₈"D

Supports include:

- End panel
- End cantilever
- Shared cantilever
- Side-support brackets
- Corner bracket

End panel connects to a panel and supports either the left- or right-hand end of a worksurface. They support Options worksurfaces at 28½"H.

End cantilever connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version. Use a shared cantilever to support two adjacent worksurfaces at the same time.

Shared cantilever connects to a panel and supports two adjacent worksurfaces.

Side-support brackets can be used to support the ends of worksurfaces when they are wrapped by panels with a width dimension that matches the worksurface's depth. Side support brackets are shipped in pairs.

Wiring & Cabling

Cable scallops are included centered in the back edges of many Options worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a 3/16" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Worksurface edges have scallops 20" from the back corner.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface. ▶ Page 358

Surface Materials

Application Topics

L-shape workstations

can be configured using a corner and two straight Options worksurfaces.

U-shape workstations

can be configured using two corner Options worksurfaces and three straight Options worksurfaces.

Worksurface Supports

▶ Page 328

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized (replace worksurface with table as appropriate).

Extended Corner Worksurfaces

Options worksurfaces

are panel-supported and available in seven basic shapes to create uninterrupted, curvilinear workspaces for a wide variety of workspaces.

- ▶ See pages 318, 322–327 for additional Options worksurface shapes.
- ▶ Specifying, page 342

Supports must be specified separately.

- ▶ See *Connections* on next page.

Product Details

Options worksurfaces and supports work on enhanced Series 9000 panels. However, unlike conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported. Supports are varied and unique to Options worksurfaces. All—including pedestals, end panels, and cantilevers—are installed beneath the worksurfaces. Therefore, they cannot be mixed with or interchanged with conventional Series 9000 worksurfaces and supports.

User's edges of Options worksurfaces are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Edge has ¼" radius at top and bottom and is ¼" thick.

- ▶ See *Edge Default Matrix*, page 438.

Plastic center drawer can be field installed beneath Options worksurfaces when there is sufficient space.

Space required for attachment of center drawer is 19½"D x 21"W.

- ▶ Page 330

Connections

Straight segment of extended corner worksurface varies depending on worksurface size. Refer to the following chart to determine if one or more pedestals will fit. When straight segment is at least 15"W, it can accommodate a pedestal without the curved portions of the user's edge of the worksurface overhanging the pedestal. A straight segment that is at least 30"W will accommodate two pedestals side by side.

Tip: Illustration and dimensions show left-hand unit. Right-hand units have the same dimensions.

Supports include:

- Pedestal
- Pedestal filler
- Center support
- End panel
- End cantilever
- Shared cantilever
- Side-support brackets
- Corner bracket

Pedestals to support Options worksurfaces extend full to the floor. They support Options worksurfaces at 28½"H. Pedestals are available with or without locks.

► Page 332

End panel connects to a panel and supports either the left- or right-hand end of a worksurface. They support Options worksurfaces at 28½"H.

End cantilever connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version.

Shared cantilever connects to a panel and supports two adjacent worksurfaces.

Side-support brackets can be used to support the ends of worksurfaces when they are wrapped by panels with a width dimension that matches the worksurface's depth. Side support brackets are shipped in pairs.

Center supports are included and must be used to provide additional support for worksurfaces wider than 60".

Wiring & Cabling

Cable scallops are included centered in the back edges of many Options worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a ⅜" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Worksurface edges that are 70"W or wider have two scallops, with scallops located 20" from the back corner. 60"W worksurfaces have one scallop that is centered.

Lateral file can be used to support worksurface in situations where full-depth pedestals would block a cable scallop. Use a side-support bracket to support the back of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

► Page 358

Surface Materials

Worksurface

- Laminate (standard)
- See *Surface Materials Reference Manual*.
- Open Line laminate (option)

A program including non-Steelcase laminates that are suitable for use on Steelcase products.

► See *Surface Materials Reference Manual*.

User's edge(s)

- Plastic T-mold
- Tip: The color of these edges must be specified separately.*
- See *Edge Default Matrix*, page 438.

Back and side edges

- Plastic default
- Tip: The color of these edges is determined by the laminate color that you select.*

Pedestal

- Paint

End panel

- Paint

End cantilever and shared cantilever

- Paint

Side-support brackets and corner bracket

- Black paint only

Application Topics

L-shape workstations

can be configured using an extended corner and a straight Options worksurface.

U-shape workstations

can be configured using two extended corner Options worksurfaces.

70"W or wider side of extended corner worksurface can accommodate two pedestals side by side. Extended corner worksurfaces that are less than 70"W can accept only one pedestal because the curved portion of the user's edge would overhang the second pedestal.

Full-depth pedestals

will block access to panel-base receptacle location behind them.

60"W worksurface

expanse must include one pedestal support.

Worksurface Supports

► Page 328

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized (replace worksurface with table as appropriate).

Straight Worksurfaces

Options worksurfaces

are panel-supported and available in seven basic shapes to create uninterrupted, curvilinear worksurfaces for a wide variety of workspaces.

► See pages 318–321, 324–327 for additional Options worksurface shapes.

► Specifying, page 344

Supports must be specified separately.

► See *Connections* on next page.

Product Details

Options worksurfaces and supports

work on enhanced Series 9000 panels. However, unlike conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported. Supports are varied and unique to Options worksurfaces. All—including pedestals, end panels, and cantilevers—are installed beneath the worksurfaces. Therefore, they cannot be mixed with or interchanged with conventional Series 9000 worksurfaces and supports.

User's edges of Options worksurfaces are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Edge has 1/4" radius at top and bottom and is 1/4" thick.

► See *Edge Default Matrix*, page 438.

Plastic center drawer

can be field installed beneath Options worksurfaces when there is sufficient space. Space required for attachment of center drawer is 19 1/2"D x 21"W.

► Page 330

Connections

Supports include:

- Pedestal
- Pedestal filler
- Center support
- End panel
- End cantilever
- Shared cantilever
- Side-support brackets
- Corner bracket

Pedestals to support Options worksurfaces extend full to the floor. They support Options worksurfaces at 28 1/2"H. Pedestals are available with or without locks.

▶ Page 332

End panel connects to a panel and supports either the left- or right-hand end of a worksurface.

End cantilever connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version. Use a shared cantilever to support two adjacent worksurfaces at the same time.

Shared cantilever connects to a panel and supports two adjacent worksurfaces.

Side-support brackets can be used to support the ends of rectangular and corner worksurfaces when they are wrapped by panels with a width dimension that matches the worksurface's depth. Side support brackets are shipped in pairs.

Center supports on 25\"D worksurfaces are included and must be used to provide additional support for worksurfaces wider than 60\".

Center supports on 30\"D worksurfaces are included and must be used to provide additional support for worksurfaces wider than 60\".

Wiring & Cabling

Cable scallops are included centered in the back edges of many Options worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a 3/16\" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Worksurface edges that are 30\"W or less have no scallops. Worksurfaces that are 35\"W to 60\"W have one centered scallop. 65\"W and wider worksurfaces have two scallops, located 20\" from the edges.

Lateral file can be used to support worksurface in situations where full-depth pedestals would block a cable scallop. Use a side-support bracket to support the back of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

Jetty and Enterprise Worksurfaces

Options worksurfaces

are panel-supported and available in seven basic shapes to create uninterrupted, curvilinear worksurfaces for a wide variety of workspaces.

► See pages 318–323, 326–327, for additional Options worksurface shapes.

► Specifying, pages 346 and 347

Support bracket is included with worksurface and attaches to a panel.

Product Details

Jetty and enterprise worksurfaces offer a desk-like worksurface that extends from the supporting panels and provides meeting space for as many as four people.

Options worksurfaces and supports work on enhanced Series 9000 panels. However, unlike conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported. Supports are varied and unique to Options worksurfaces. All—including pedestals, end panels, and cantilevers—are installed beneath the worksurfaces. Therefore, they cannot be mixed with or interchanged with conventional Series 9000 worksurfaces and supports.

User's edges of Options worksurfaces are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Edge has 1/4" radius at top and bottom and is 1/4" thick.

► See *Edge Default Matrix*, page 438.

Square plastic edge finishes the sides and back of worksurfaces. The color of these edges is determined by the laminate color that you select.

► See *Edge Default Matrix*, page 438.

Actual Dimensions

Plastic center drawer can be field installed beneath Options worksurfaces when there is sufficient space. Space required for attachment of center drawer is 19½"D x 21"W.
► Page 330

Connections

Pedestals should not be installed below jetty or enterprise worksurfaces. Use adjacent worksurfaces instead.

End cantilever connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version.

Shared cantilever connects to a panel and supports two adjacent worksurfaces.

Wiring & Cabling

Cable scallop is included centered in the back edge of Options jetty and enterprise worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a 3/16" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized (replace worksurface with table as appropriate).

Visitor and Spanner Worksurfaces

Options worksurfaces

are panel-supported and available in seven basic shapes to create uninterrupted, curvilinear workspaces for a wide variety of workspaces.

- ▶ See pages 318–325 for additional Options worksurface shapes.
- ▶ Specifying, pages 348 and 349

Conference support is included with the visitor worksurface to link to the panel and support one end of the worksurface. It supports the worksurface at 28½"H.

Column support is included with the spanner worksurface. It adjusts over a range of 4" to accommodate uneven floors.

Triangular supports are included with the worksurface.

Worksurface has a wood core. Worksurface is 1½" thick.

Radius edge is located on the user's front edge(s) of the worksurface. This edge is a plastic T-mold.

Straight edge is located on the back and sides of the worksurface. This edge is square plastic.

Large spanner (61⅓/32"W) that links two 30"D worksurfaces is supported with a column, two end cantilevers, two side-mounting brackets, and two straps that are shipped with the worksurface.

Small spanner (51⅓/32"W) that links two 25"D worksurfaces is supported with a column, two triangular spanner supports, side-mounting brackets, and two straps that are shipped with the worksurface.

Product Details

Visitor worksurfaces

terminate a worksurface run with a transitional form that provides a convenient, informal meeting place for guests.

Spanner worksurface

joins adjacent worksurfaces and provides space for collaborative or team projects.

Options worksurfaces and supports

work on enhanced Series 9000 panels. However, unlike conventional Series 9000 worksurfaces, all Options worksurfaces are panel-supported. Supports are varied and unique to Options worksurfaces. All—including pedestals, end panels, and cantilevers—are installed beneath the worksurfaces. Therefore, they cannot be mixed with or interchanged with conventional Series 9000 worksurfaces and supports.

User's edges of Options worksurfaces are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Edge has ¼" radius at top and bottom and is ¼" thick.

- ▶ See *Edge Default Matrix*, page 438.

Square plastic edge finishes the sides and back of worksurfaces. The color of these edges is determined by the laminate color that you select.

- ▶ See *Edge Default Matrix*, page 438.

Actual Dimensions

Center drawer and articulated keyboard shelf are not practical for use with visitor and spanner worksurfaces.

Central locks are not available on Options worksurfaces, but pedestals with locks are available to field install below adjacent Options worksurfaces.

Connections

Pedestals should not be installed below visitor or spanner worksurfaces. Use adjacent worksurfaces instead.

Wiring & Cabling

Cable scallops are not included in visitor and spanner worksurfaces. Use adjacent worksurfaces to route cables.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

► Page 358

Visitor worksurfaces are installed with $\frac{3}{16}$ " gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Spanner worksurfaces

cannot be used with a panel that has a wood end-of-run trim.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized (replace worksurface with table as appropriate).

Worksurface Supports

Supports for extended corner, corner, and straight Options work-surfaces include the following:

Center Support

Supports center of work-surfaces that exceed 60"W. Center support is included with work-surfaces wider than 60".

Corner Bracket

Supports the back corner of extended corner and corner work-surfaces. Corner bracket is Included with extended and corner work-surfaces.

End Cantilever

Supports work-surfaces that are installed adjacent to corner adjustable split-top work-surfaces.

End Panel

Connects to panel and supports the end of a work-surface. Must be ordered separately.

Pedestal with filler

Supports either end of extended corner and straight work-surfaces.

Shared Cantilever

Supports two adjacent work-surfaces. Must be ordered separately.

Side-Mounting Bracket

Supports the sides of corner adjustable split-top and spanner work-surfaces. Attaches to end cantilever.

Side-Support Brackets

Connect work-surface to panels that wrap the work-surface and have the same dimension as work-surface depth. Must be ordered separately.

Supports for jetty, enterprise, visitor, and spanner Options work-surfaces include the following:

Column Support

Supports the end of jetty, enterprise, and spanner work-surfaces. Column support, included with work-surface, adjusts 4" to accommodate uneven floors.

Conference Support

Supports the end of jetty, enterprise and visitor work-surfaces. Included with the worksurface.

End Cantilever

Supports work-surfaces that are installed adjacent to corner adjustable split-top work-surfaces. Two end cantilevers are also included with each 62 $\frac{1}{4}$ "W spanner work-surface.

Shared Cantilever

Supports two adjacent work-surfaces. Must be ordered separately.

Side-Mounting Bracket

Supports the sides of corner adjustable split-top and spanner work-surfaces. Attaches to end cantilever or triangular support.

Triangular Support and Strap

Support and align work-surfaces that are installed adjacent to 52 $\frac{1}{4}$ "W spanner work-surface. Use with side-mounting brackets.

Two triangular supports are included with 52 $\frac{1}{4}$ "W spanner work-surface.

Worksurface Accessories

Plastic Center Drawer

► Specifying, page 352

Product Details

Stores pens, pencils, paper, and other lightweight personal tools.

Center drawer does not lock.

Connections

Field install drawer wherever space is available beneath the worksurface. Minimum area required is 19½"D x 21"W.
Tip: Can also be field installed on options worksurfaces.

Surface Materials

- Drawer**
- Black textured plastic only
- Slides**
- Black plastic only

Actual Dimensions

Depth	18½"
Inside depth	12"
Width	21"
Inside width	19"
Overall height installed	2"
Inside height	1⅜"
Pencil spaces	2⅞"D x 7½"W
Clip spaces	1"D x 3¾"W

Pedestals

Options pedestals are floor-standing and can support worksurfaces at 28½"H.
 ▶ Specifying, page 353

Top is open and accommodates attachment to a work surface. Attachment hardware is included.

Finished back and sides are standard.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying, page 442

Leveling glides have a 17⁄8" adjustable glide range for uneven floors.

Drawer fronts are available in steel only.

Pull on flush-front pedestal is full-width and integral. Full-width wood pull is available as an option.

Base is integral to pedestal case.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Product Details

Box drawers are a welded steel construction with flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction with flush fronts. Drawer body sides are full-height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders.

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Flush-front pull is full-width and integral with the drawer.

Actual Dimensions

Depth	22⅝" or 28⅝"
Width	15"
Height	27"

Optional full-width wood pull attaches to integral pull with double-sided tape. Wood pull ships separate from pedestal and is field-installed.

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Label holders are available through Service Parts. Label holder fits inside the integral pull.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
► *Lock and Keying*, page 442

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
► *Lock and Keying*, page 442

Connections

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped.

Tip: One filler is included with each pedestal (shipped separately). Filler can be deleted as an option.

Field-installed accessories are available, including pencil trays, dividers, and rails.

► Page 334

Wiring & Cabling

Fixed pedestals do not block cable scallops.

Wiring and Cabling

	
Statement of Line	358
	
Understanding	359
	
Specifying	391

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC provisions for multicircuit branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment.

Wiring and Cabling Overview

Interface

Interface refers to the point at which the utilities (electrical and cables) for your panel installation connect with the building's power and communications.

Power poles route building power and cables from the ceiling through the panel to the powerway in the panel base cavity.

► Page 380

Cable poles can be used to run communications cables from the ceiling to the top or to the base of a panel.

► Page 380

Base power-ins connect building power from the wall or floor to a powerway in the panel base.

► Page 378

Product Details

Vertical post of enhanced power and cable poles attaches to the top of an L-, T-, or X-filler. Power and cable poles must be used with fillers.

► Page 380

Ceiling attachment kit, which includes a stabilizer, secures the vertical post of a power pole or cable pole to the suspended ceiling grid. Junction box at the top of the vertical post is hardwired to building power. The ceiling attachment kit is standard with power and cable poles and can be installed on ceilings that are up to 10'4"H.

Inner sleeve in the power pole separates power from communications cables.

Cut out in the side of the pole allows communication cables to enter the cable space in the top of a panel.

Connections

Power harness of the power pole has a flag connector that plugs into a designated terminal on either end of the powerway in the panel base.

Base power-ins supply building power to a panel run by connecting to the powerway at one of the full-function (green end) receptacle locations. Break-away models are available for use in California.

► Page 378

Power poles and base power-ins are connected to building power by an electrician in the field.

Application Topics

Enhanced power and cable poles cannot be used in change-of-height applications that require a back filler.

Steps to Plan an Electrical Network

► Page 366

TechnoLogical Binder

Form number S2402

Distribution

Distribution refers to the way in which cords and cables pass from one place to another through panel and worksurface components.

Fillers conceal cables passing from one panel to another in same-height or change-of-height applications when panels are joined in 90° configurations.

Cable space under top caps allows twelve 3/8"-diameter cables to be routed inside the tops of panels.

Product Details

Powerways connect within panel base cavities to route power through a cluster of workstations. They provide terminals for receptacles, base power-ins, or harnesses. Powerways can be factory or field installed.
▶ Page 382

Top cap filler conceals cords when panels form an X-configuration.

L- and T-base cover fillers conceal cords routed through the panel base in L- and T-configurations.
▶ Page 26

Fillers route and conceal cables in L-, T-, or X-configurations.
▶ Page 26

Tip: Panels must be the same height for in-line cable routing under the top cap.

Knockouts are provided on fillers for change-of-height applications.

Vertical wire managers attach at panel seams. They conceal task light cords running to the work surface, or cords running between the work surface and base receptacles. Plastic wire managers can be cut to fit; fabric-wrapped wire managers must be specified to fit.
▶ Page 411

Grommets in work-surfaces have removable covers. They can be specified in several locations on straight and corner work-surfaces or unit assemblies.
▶ Page 157

Connections

Powerways can be joined to form straight, L-, T-, or X-configurations. Power can be extended to all panels at a junction, and cables may be routed from one panel to any other panel.

Access and Storage

Access refers to the points at which you'll place electrical outlets so people can plug in equipment. Access also includes the links between communication and computer networks.

Storage refers to the ways in which you manage excess lengths of cords and cables.

Flexible corners at the top of the panel allow cables to enter or exit the interior of the panel.

Grommet receptacles can be used to provide access to power wherever there is a grommet.
Exception: Not available on Options.
► Page 392

Receptacles installed in the panel base provide access to power.

Knockouts for duplex-size voice/data receptacles are provided on panel base covers.

Product Details

Receptacles for panel base are available in standard-size or oversize with three-circuit or four-circuits.
▶ Page 384

Four receptacles can be installed per panel. Panels can have two receptacles per side: one standard-size and one oversize.

Exception: 20"W panel has a standard-size opening on one side and an oversize opening on the other side.

Four communication knock-outs are available on powered-panel base covers. Install AMP FLEX-MODE or equivalent faceplates.

Tip: A full-height back panel will block access to voice/data knockouts on E9000 panel base.

Power strips provide additional receptacles and can be attached to the underside of the worksurface.

Panel-supported receptacle with 9' cord can be placed at any height in the panel's slotted channel.
▶ Page 73

Cord reels, field installed under the worksurface, take up excess cord or cable.
▶ Page 395

Cable and fiber reel stores lengths of excess fiber-optic cable or conventional cables.
▶ Page 388

Termination plate accommodates the oversized junction boxes used for installation of fiber-optic cables.
▶ Page 389

Cable storage trays, field installed under the worksurface, hold cables out of the way.
▶ Page 395

Wire guide clips have adhesive backs to allow them to stick to painted metal components under a worksurface for routing and managing cords.

Connections

Cords with three-prong plugs connect pull-up receptacles and power strips to a panel base receptacle. Versions that allow hardwiring to building power are also available.

Application Topics

Chicago, New York City, and Los Angeles have special requirements.
▶ Pages 371–373

Steps to Plan an Electrical Network

There are four steps to planning an electrical network.

1
On a drawing of your panel layout, indicate where you want receptacles.

2
Designate which circuit (1, 2, 3, or dedicated) you want each receptacle to link to.

► For more information about dedicated and designated circuits, see page 368.

3
Determine how many power-ins are needed to supply enough power to each cluster of workstations.

► For more information about calculating power needs, see page 370.

4
Indicate the position of each base power-in, power pole, or cable pole on your floor plan.

You're probably done. If, however, your layout includes panels with different surface materials on the two panel surfaces, you may want to streamline the installation process by specifying surface materials in a special order.

► See the next page for details.

Steps to Specify Powered Panels with Different Surface Materials

Steps to Specify Powered
Panels with Different
Surface Materials

You can streamline the installation process when using different surface materials on each side of the panels by specifying the panel surfaces in order. Because powerways can be reversed in the field, you can skip this process, but allow extra time for installation.

1 Complete the steps described on the previous page, so you have a drawing of your installation with the positions of power-ins indicated.

2 Start with the powerway that connects to the power-in and use the letter "G" to indicate that this is the end of the powerway that is color coded green.

3 Continue by marking the green end of each powerway with letters. When assigning color codes, follow this rule:

- There must be at least one green end at each intersection.

► Page 383

4 Use a color marker to indicate the different surface materials of each panel.

5 Locate the side of each panel that has the green end of the powerway on the right. This is side one. Always specify the surface material on side one of the panel first, then specify side two.

6 You may have panels that are identical in every respect, except that the materials for side one and side two are reversed. The installers will be able to speed up the installation by arranging these panels to match your layout without rearranging the powerways.

Circuit Choices

Powerways and Strategies for Using Them

Powerways added to the base of panels allow you to distribute power wherever panels go.

Standard 3-circuit powerways have five wires—three hot wires carry power, one shared neutral completes the circuit, and one ground for safety.

All other powerways have eight wires.
▶ See page 369 for alternative wiring schematics.

Circuit Specifications

Detailed Information for the Electrical Engineer

Circuit Specifications

All the components in an electrical distribution network must use the same wiring schematic. The components (power poles, base power-ins, powerways, and receptacles) snap together and are keyed to make it impossible to connect mismatched parts. Color-coded and labeled components make it easy for installers to identify which wiring schematic each component is dedicated to.

Color coding

- 3 circuits shared = Black
- 3 circuits separate = White
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Tan
- 4 circuit 2+2 = Grey

Overview

Three-circuit electrical components with shared neutrals are standard with 5 wires to provide three circuits that share one oversized neutral and one ground. This is the traditional 3-circuit power alternative that is specified by adding the suffix P3 to the panel style number.

3 Circuit Shared Neutral, 5 Wires

Three-circuit with separate neutrals have 8 wires providing three circuits, each with its own separate neutral. The first two circuits share an isolated ground; the third uses the system ground.

3 Circuit Separate Neutral, 8 Wires

Four-circuit 3+D are standard with 8 wires to provide four circuits. Three of these circuits share an oversized neutral and a system ground while the remaining circuit has its own neutral and isolated ground. This is the traditional 4-circuit power, also known as 3+D, that is specified by adding the suffix P4 to the panel style number.

4 Circuit 3+D, 8 Wires

Four-circuit, 3I+1 again have 8 wires but with three circuits that share an oversized neutral and isolated ground. The fourth circuit has its own neutral and is attached to the system ground. This electrical system is like the standard 3+D, but the grounds are switched, providing three isolated circuits and one general purpose circuit as compared to one isolated circuit and three general purpose circuits.

4 Circuit 3I+1, 8 Wires

Four-circuit 2+2 also have 8 wires but provide two circuits that share an oversized neutral and a system ground and an additional two circuits with a second oversized neutral and an isolated ground.

4 Circuit 2+2, 8 Wires

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 39 receptacles for each 3-circuit power-in and 52 receptacles for each 4-circuit power-in. In Canada, the Canadian Electrical Code allows a maximum of 10 receptacles on each 15-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in and 40 receptacles for each 4-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps—20 amps times 3 circuits—(45 amps in Canada) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered. ▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps (12 amps in Canada) instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 15- or 20-amp circuit. It is recommended that such devices be supplied with their own receptacle, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Requirements of Office Equipment in Amps

General Equipment (Typical Amperage)

A.C. adapter	0.05
Adding machine	0.05
Answering machine	0.08
Calculator	0.25
Clock	0.03
Coffee pot	10.00
Copy machine	15.00
Desk-top copiers	7.00 to 10.00
Stand-alone copiers	15.00
Electric eraser	0.25
Fan	1.00
Manuscript holder	0.75
Microwave	8.00 to 12.00
Pencil sharpener	0.25
Radio	0.05
Space heater, 1000 watts	8.50
Space heater, 1500 watts	12.50

Electronic Equipment (Typical Amperage)

Desk-top memory storage devices	0.08 to 12.00
Modems	0.15
Desk-top printers	1.20 to 5.00
Stand-alone printers	3.00 to 11.00
VDTs and PCs	0.08 to 4.80

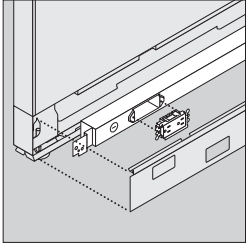

Steelcase Lighting (Actual Amperage)

Shelf lights:

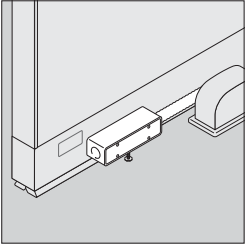

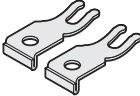

25"W, 17 watts	0.20
37"W, 25 watts	0.30
49"W, 32 watts	0.30

Special Requirements for Chicago

Special Requirements
for Chicago

	Chicago Code	Specification:	Electrician will supply:
Panel Requirements Chicago code requires hardwiring of all electrical components.	<p>Panels must be hardwired in the field.</p>  <p>Receptacles and wires are housed in a special wire channel in the base of the panel that functions like a conduit.</p> <p>Desk-high power on TRI panels must be provided by an electrician.</p>	<ul style="list-style-type: none">• Order panels with a “W” suffix. They will include a Chicago raceway, panel-to-panel connector for straight or 90° connections, and a base cover with receptacle knockouts.• Order connectors for T-configurations, straight, and L-connections through Service Parts in the Product Reference website.	<ul style="list-style-type: none">• Connection to building power supply• Wires• Fittings• Duplex receptacle• Electrical components
Worksurface Requirements	<p>Code does not allow cord-and-plug devices in commercial buildings. This includes:</p> <ul style="list-style-type: none">• End panel receptacles• Power strips• Grommet receptacles• Panel-supported receptacles		
Lighting Requirements	<p>Cords must include integral overload protection. <i>Exception: Shelf lights with 9' cords are approved for use in Chicago if they have integral circuit breaker.</i></p>	<ul style="list-style-type: none">• Order Chicago versions of shelf lights. These lights will recess into panel-supported shelves and bins, available after August 1991.	

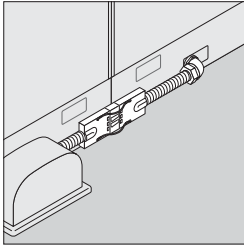

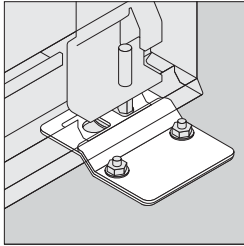

Special Requirements for New York City

	New York City Code	Specification:	Electrician will supply:
Panel Requirements New York City code requires that all electrical components be field installed.	Powerways must be installed in the field.  New York City-version of the base power-in is required. It is comprised of a junction box and a power-way connector. Special power pole is not required.	<ul style="list-style-type: none"> • Order panels without power. • Order powerways for field installation. • Order New York City-version of base power-in. • Order receptacles. 	<ul style="list-style-type: none"> • Connection to building power supply
Worksurface Requirements	Code does not allow use of cord-and-plug devices in commercial buildings. This includes: <ul style="list-style-type: none"> • End panel receptacles • Power strips • Grommet receptacles • Panel-supported receptacles 		
Lighting Requirements	Lights cannot require tools to install. Light harnesses are prohibited.	<ul style="list-style-type: none"> • Order shelf lights, which require no tools to install. • Order special hardware package to install shelf lights on Series 9000 service module upper cases without the use of tools. Available from Service Parts. 	

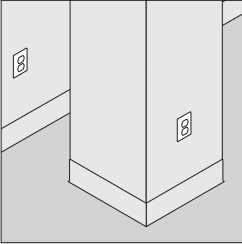

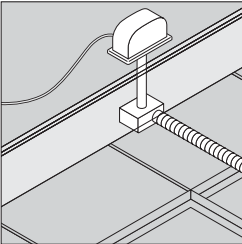

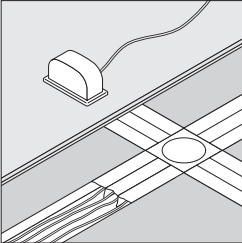

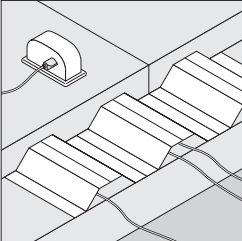

Special Requirements for Los Angeles

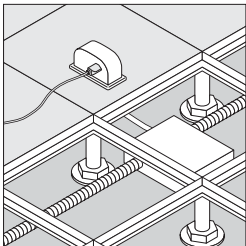

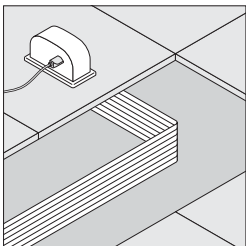

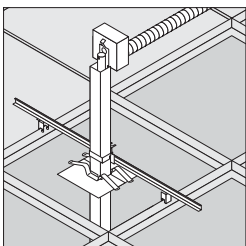

Including California OSHPD

Special Requirements
for Los Angeles

Los Angeles		
	Los Angeles Code	Specification:
Worksurface Requirements	<p>Code does not allow use of cord-and-plug devices in commercial buildings. This includes:</p> <ul style="list-style-type: none"> • End panel receptacles • Power strips • Grommet receptacles • Panel-supported receptacles 	
Lighting Requirements	<p>Lights cannot require tools to install.</p> <p>Light harnesses are prohibited.</p>	<ul style="list-style-type: none"> • Order shelf lights, which require no tools to install.
California OSHPD		
	California OSHPD	Specification:
Panel Requirements	<p>In California, the Office of Statewide Health Planning and Development (OSHPD) requires special power-in connections that will reduce the chance of a hazard if panels are disturbed during an earthquake. The rules are mandated for health-care facilities only. There are four products that can be used to meet OSHPD requirements.</p> <p>Hinges that meet OSHPD stability requirements for in-line and 90° panel connections are available.</p>	<div>  <p>Breakaway base power-in features a connector that interrupts the power supply if the panel tips.</p> </div> <div>  <p>Anchor bracket attaches to panel glide and secures the panel to the floor at a power entry point—where the power pole or base power-in is attached. Anchor bracket prevents panel movement and possible damage to the electrical connection.</p> </div> <ul style="list-style-type: none"> • Order breakaway base power-in for panels connected to power-ins. • Order anchor bracket for panels that are 75"H and are connected to power-ins. • Order in-line and 90° hinges for panel connections.

Understanding Building Wiring

System	Characteristics	Advantages	Disadvantages	Comments
Fixed Wall and Column 	<ul style="list-style-type: none"> Common to most buildings. Power and telecommunication run through permanent walls to wall receptacles. 	<ul style="list-style-type: none"> Low cost for initial installation. Provides power in corridors and small rooms. 	<ul style="list-style-type: none"> Must be used with other systems to reach areas away from walls. Moving wall receptacles is difficult and expensive. 	<ul style="list-style-type: none"> Workstation layout depends on location of wall receptacles and must be carefully planned. Usually used with other systems such as poke through or flat wiring.
Poke Through 	<ul style="list-style-type: none"> Wiring concealed in ceiling space of floor below and fed through holes in floor. Electrical receptacles and telecommunications outlets located in floor-attached monuments. 	<ul style="list-style-type: none"> More flexible than under-floor duct because wires can be pulled up at any location. 	<ul style="list-style-type: none"> High relocation costs. Moving junction boxes requires cutting a hole through the floor—a process called coring. Moving junction boxes can disrupt work on two floors. Monuments can cause people to trip. 	<ul style="list-style-type: none"> Not accepted by some local fire codes. May weaken floor slab. Flexibility dependent on building structure. Series 9000 pedestals can conceal monuments.
Underfloor Duct 	<ul style="list-style-type: none"> Ducts or continuous channels encased in floor slab. 	<ul style="list-style-type: none"> Low life-cycle costs. Easy access for relocation. Relocation causes little disruption. 	<ul style="list-style-type: none"> Flexibility limited to specific access points. 	<ul style="list-style-type: none"> Increasing wire and cable requirements may exceed capabilities of existing system.
Cellular Floor 	<ul style="list-style-type: none"> Underfloor system with large-capacity, divided distribution cells for electrical and telecommunication wiring. Wiring runs perpendicular to the trench header, a special duct that cuts across all the cells and provides access. 	<ul style="list-style-type: none"> Inconspicuous. Electrical and telecommunication systems run together to the workstation. Protects voice and data systems from interference and damage. 	<ul style="list-style-type: none"> System can add to required length of wire or cable because of trench header-cell configuration. 	<ul style="list-style-type: none"> Carpet tiles ease access to trench.

System	Characteristics	Advantages	Disadvantages	Comments
Access Flooring 	<ul style="list-style-type: none"> • Developed for mainframe computer rooms. • Modular floor panels raised above the slab on 6" to 36" high supports, and conduit and cables run beneath these floor panels. • Access through monument fixtures. 	<ul style="list-style-type: none"> • Ease of access and rearrangement of wiring systems. 	<ul style="list-style-type: none"> • May be noisy when walked on. • Requires stairs and ramps on building floor when added to existing facility. 	<ul style="list-style-type: none"> • Smoke alarms and fire protection sprinklers may be required. • Use only carpet tiles or area rugs.
Flat Wiring 	<ul style="list-style-type: none"> • Access from wall or column. Power and signal cables run to workstation via flat wire and cable sandwiched between slab and carpet. • Outlets in transition boxes on top of carpet. 	<ul style="list-style-type: none"> • Easy relocation. • Flexible. • Meets most capacity requirements. • Elements sold as one package. 	<ul style="list-style-type: none"> • Heavy wheel traffic can cause signal interruption in data transmission wiring. 	<ul style="list-style-type: none"> • Should not be used in areas susceptible to extreme dampness or water spillage. • Slab-on-grade installations, where concrete is poured directly on the ground, require careful preparation per manufacturer's instructions to ensure that moisture doesn't damage the system.
In-Ceiling Wiring 	<ul style="list-style-type: none"> • Conduit and cables run in space above suspended ceiling and are distributed to panels by power and cable poles. 	<ul style="list-style-type: none"> • Low initial cost. • Very easy to move. • Little disruption during move. • Space usually accommodates large capacities. 	<ul style="list-style-type: none"> • Power and cable poles used to route cables can detract from open-plan aesthetics. 	<ul style="list-style-type: none"> • Cost for installation increases when ceiling space is used as return air plenum to meet fire-protection codes. • Ceiling-suspended cable trays should be considered for communications wiring.

Cable Capacities of Enhanced Panels

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable as well as the furniture configuration you are considering. Cable capacities in this table are based on non-plenum-rated cables installed by a cable contractor under ideal conditions. Figures are approximations. Actual capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Base Power-Ins

Base power-in is field installed and connects the panel electrical system to the building power source.
► Specifying, pages 66–67

Actual Dimensions	
Depth	3/4"
Width	4 3/4" (duplex) or 6 3/8" (triplex)
Height	1 5/8"
Conduit diameter	1/2"
Conduit length	72"

Product Details

Base power-in brings power to panel run by connecting to a designated receptacle location.

Three-circuit shared neutral base power-in fits standard-size or over-size receptacle openings. Three-circuit with separate neutrals and all four-circuit base power-ins can only fit in larger size receptacle openings.

Four-circuit base power-in fits oversized receptacle openings.

Breakaway base power-in is also available.

Connections

Attaches to the green end of the powerway only.

Panel base closure plates are removed for installation of base power-in. They can be replaced if the application changes.

Wiring & Cabling

All five wiring schematics are available for power-ins.
Tip: All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Building power source can come from the floor, wall, or column.

Conduit leads must be hardwired to the building wiring by a qualified electrician or engineer.

Base power-in is UL listed and CSA certified.

Chicago, New York City, and Los Angeles have special requirements.
► Pages 371–373

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Understanding Building Wiring
► Page 374

Surface Materials

Conduit
• Black only

Power Poles and Cable Poles for Enhanced Panels

Power poles bring building power from the ceiling to the powerways in the base cavity of enhanced panels. They can also be used to run cables into the top cap or into the panel base cavity.

► Specifying, page 68

Cable poles provide a space to route cables from the ceiling to the top cap or base cavity of a panel.

► Specifying, page 68

Hanger bar secures the top of the pole to the ceiling grid.

Junction box, at the top of the power pole, encloses the hardwire connection to the building's electrical service.

Product Details

Ceiling heights up to 10' can be accommodated.

Trim plate finishes the opening in the ceiling tile.

Six to eight 3/8"-diameter cables can be accommodated inside the power pole or cable pole.

Ceiling trim plate

Fillers, ordered separately, must be used to conceal power harness and cables routed to the base of the panel.

► Page 26

Flag connector attaches to powerway at the designated terminal.

Cover protects connection to powerway.

Actual Dimensions

Depth	2 1/4"
Width	2 1/4"

Connections

Poles must be used with the appropriate filler package in the recess that results when panels are joined in an L-, T-, X- or end-of-run configuration.

Power and cable poles are 2 1/4" x 2 1/4" square so they fit snugly into junctions.

L-configuration allows the power pole to be attached to either panel.

T-configuration requires the power pole to be attached to the center panel.

Tip: Power connection must also be made to the center panel.

Six pole heights are available to correspond to panel heights.

Wiring & Cabling

All five wiring schematics are available for power poles.

Tip: All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Modular electrical connectors, inside the power pole, plug into a powerway. Electrical connection must be made inside the panel that is attached to the pole.

Flag connector on the power pole plugs into either end of the powerway. It does not interfere with a receptacle location.

Surface Materials

Power pole and cable pole

- Paint

Ceiling trim plate

- White paint only

Application Topics

Enhanced power poles and cable poles

cannot be used in change-of-height applications that require a back filler.

Powerways

Powerways added to the base of panels allow you to distribute power wherever panels go.

► Specifying, page 69

Powerways have one green flag connector to extend power to an adjacent powerway. Both ends of the powerway have powerblock terminals.

Powerblock terminals accept connector from adjacent powerway of same wiring schematic.

Product Details

Receptacles snap into terminals and are held in place with screws.

- Pass-through powerways have no receptacle locations.
- 20"W powerways have one receptacle location on each side.
- 25"W–60"W powerways have two receptacle locations on each side.

► Page 384

Connections

One rule for joining powerways applies to every installation:

- There must be at least one green end at each intersection.

Flag from the green end of powerway is connected to power terminal on adjacent powerway.

Straight connection is formed when a flag connector from one powerway attaches to the second powerblock terminal on the end of the adjacent powerway.

L-connection is formed when flag connector turns to left or right.

T-connection is formed by two flags that make right turns.

X-connection is formed by three flags that make right turns.

End-of-run is terminated by folding the last flag back and connecting it to its own powerblock terminal.

Panel-to-panel connector can be used to create a powerlink where no flag is available. It can also be used to correct planning and installation oversights without having to reconfigure.

Wiring & Cabling

All five wiring schematics are available for powerways.

Tip: All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC provisions for multi-wire branch circuits.

Chicago, Los Angeles, and New York City have special requirements
► Pages 371–373

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment.

Surface Materials

Powerways are concealed when they are properly installed.

Application Topics

Steps to Plan an Electrical Network

► Page 366

Base Covers and Receptacles

► Specifying, pages 70 and 72

Voice/data knockout on enhanced panels.

Receptacles are ordered separately and installed in the field.

Knockout can be removed in the field to allow receptacle to be installed.
Tip: Once removed, knockout cannot be replaced.

Openings for receptacles are visually unnoticeable until the knockout is removed.

Cutaway corner allows space for hinge connections.

Product Details

Base covers are plain with two perforated, visually unnoticeable receptacle knockouts that can be permanently removed in the field. Base covers have one standard-size opening on the left and a larger-size opening on the right.
Exceptions: 20"W base covers have one larger-size receptacle knockout located in the center of the base cover. Because both openings are positioned back-to-back, power can only be accessed on one side of the panel.

Knockouts cannot be accidentally removed by kicking them or striking them with a vacuum cleaner because pressure to remove the knock-out must be applied from the back of the base cover.

Reusable filler plates are available to replace the knockout or to fill the gap that results when you use a standard-size receptacle in an oversize opening. Filler plates are available through Service Parts.

Receptacles are available in 15-amp and 20-amp versions and are designed to link to a specific circuit. Most receptacles are duplex, meaning that they have two outlets, but some are designed to fit in the larger openings of Series 9000 base covers. As a result, specific lines may be limited to and fit only in specific receptacle locations in the base.

Chicago base covers have a closure plate for each opening that can be removed and reinstalled as needed.

Circuit connections are predetermined by the type of receptacle. Line 1 receptacles can only connect with line 1 in the powerway, line 2 with line 2, etc.

Standard size

Duplex receptacles are one of two sizes. Standard-size receptacles fit in the smaller size openings (2³/₄"W x 1³/₈"H) of the base cover. The standard-size receptacles will also fit in the larger-size (5¹/₄"W x 1³/₈"H) openings with a filler.

Larger size

Oversized duplex receptacles with two outlets will only fit in the larger-size opening of the base cover (5¹/₄"W x 1³/₈"H) in 25"W through 60"W panels. This larger opening is always in the right-hand position on 25"W–60"W panels and centered on 20"W panels.

Height	4"

Voice/data knockouts in the base covers of enhanced panels accept modular furniture communication faceplate.
Tip: A full-height back panel will block access to voice/data knockouts on E9000 panel base.

Connections

Base covers are attached to panels with concealed clips and are removable.

Receptacles snap into terminals on powerway and are secured with screws.

Surface Materials

Base covers

- Paint

Receptacle

- Plastic

Application Topics

20"W base covers have one larger-size receptacle knockout located in the center of the base cover. Because both base cover openings are positioned back-to-back, power can only be accessed on one side of the panel.

Receptacle Locations

Enhanced Panels

Enhanced Panels for Chicago

Power and Communication Spheres and Port

Power and communication spheres and port

provide convenient desktop access to power outlets and data jacks. Spheres and ports are field installed only.

Power spheres have four electrical outlets and two 6' cords with plug or conduit for hardwired applications.

► Specifying, page 392

Power and communication spheres provide two electrical outlets, faceplates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.

► Specifying, page 393

Communication sphere

includes face plate for four customer-supplied voice/data jacks.

► Specifying, page 393

Power and communication port has a low-profile cover that is almost flush with worksurface.

► Specifying, page 394

Power and communication port

includes two outlets and two adapters to accommodate customer-supplied standard voice/data jacks.

Product Details

Power and communication spheres are field installed. Use a 3"-diameter drill to cut mounting hole at desired location.

Round power and communication port contains an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Port is field installed. Use a 3 1/2"-diameter drill to cut mounting hole at desired location.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Hardwired version of power and communication sphere is available with 6' Greenfield conduit.
Tip: Hardwiring must be done by a licensed electrician.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power spheres, communication spheres, and round power and communication port
• Black plastic only

Cable and Fiber Reel

Cable and fiber reel

is available to store excess fiber-optic cable lengths. It is also suitable for storing power cables.

► Specifying, page 394

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the kneespace of freestanding desks or panel-supported worksurfaces.

Cable and fiber reel can be installed inside the communication bay.

Enhanced Series 9000 panels can accommodate a field-installed reel inside the panel frame. The reel must attach to the horizontal panel frame.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Reel

- Black plastic only

Actual Dimensions

Depth	1 1/4"
Width	8"
Height	8 5/16"

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.

► Specifying, page 395

Bracket allows termination plate to be connected to worksurface.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Opening provides access to a termination device.

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Enhanced Series 9000 panels can accommodate a field-installed termination plate inside the panel. The termination plate must attach to the horizontal panel frame.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Description

Intended to be a primary light source, LED personal task light covers the user's active work zone with a smartly-designed array of light. The light is specifically designed to direct light where it is needed. Energy efficient at only 14 watts, LED personal task light is engineered to have a useful life of over 50,000 hours. It attaches directly to the rail systems of c:scape, FrameOne, Impact, Elective Elements, Turnstone Big Table, and Details SOTO Rail. A non-rail-mounted version attaches to freestanding desks and tables.

Finish Options

- Fixture and stanchions, paint: 4231 Arctic White, 4710 Low Gloss Black, 4799 Platinum Metallic
 Plastic cover Arctic White (6009) only

Optics

- Polycarbonate matte film

Ballasts

- Energy saving low-voltage power supply

Electronic Dimmer

- Standard on all lights

Average Rated Lamp Life

- 50,000 hrs.

Warranty

- Power supply - 5 years
- Fixture - 12 years

Shelf Lights

Standard and Utility2

► Specifying,
pages 414–417

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Daisy chain starter light with cord must be ordered when Utility2 shelf lights are used in a daisy chain application.

Actual Dimensions

	Standard	Utility2
Depth	9 1/4" (235 mm)	6 7/8" (175 mm)
Width	24 5/8", 36 5/8", or 48 5/8" (625 mm, 930 mm, or 1235 mm)	24 5/16", 36 5/16", or 48 5/16" (617 mm, 922 mm, or 1227 mm)
Height	1 3/4" (44 mm)	1 5/8" (41 mm)

Width	Lamp width	Lamp wattage	Replacement lamps
24 $\frac{5}{8}$ "	24"	17 watts	F17T8-TL735
36 $\frac{5}{8}$ "	36"	25 watts	F25T8-TL735
48 $\frac{5}{8}$ "	48"	32 watts	F32T8-TL735

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath over-head storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately $\frac{1}{2}$ amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet. Utility2 light daisy chaining allows up to 10 fixtures.

► Page 410

Starter cord for Standard and starter light for Utility2 powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power-factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard and Utility2.

Normal-power-factor electronic ballasts are available on Utility2 shelf lights.

Batwing lens is available as an option on Utility2 shelf lights for applications where moderate improvement to light distribution is needed.

Surface Materials

LED Shelf Lights

► Specifying, page 418

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

Power supply for LED daisy chain starter light uses a 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light. A 15 watt power supply is used on the LED standard light, it is 9' long with a two prong driver plug.
Tip: Energy saving mini-LEDs greatly reduce power use.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood or aluminum shelves.

Wiring & Cabling

Shelf light includes the lamp and power supply with cord set. Daisy chain starter light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

Power supply for LED daisy chain starter light uses a 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light. A 15 watt power supply is used on the LED standard light, it is 9' long with a two prong driver plug.
Tip: Daisy chain starter light comes with a 60 watt power supply to support up to three lights. Daisy chain secondary lights do not come with a power supply, but instead come with a daisy chain cord set.

LED Personal Task Lights

► Specifying, page 419

Product Details

Personal task light includes the lamp and power supply with cord set. Rail-mounted version includes rail brackets. Non rail-mounted version includes Universal Mounting brackets.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Tip: Energy saving mini-LEDs greatly reduce power use.

Connections

LED personal task light mounts directly to the rail systems of c:scape, Frame-One, Elective Elements, Impact, Turnstone Campfire Big Table, and Details SOTO rail.

Non rail-mounted LED personal task lights will not work on worksurfaces with knife edge that is longer than 1 1/4", or with modesty panels or modesty screens closer than 6" from the back edge.

Wiring & Cabling

Personal task light includes the lamp and power supply with cord set.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Daisy Chaining

For Standard and Utility2 Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

Additions to a chain are possible at any time by adding a jumper cord.

For Utility2 lights, connect the power cord **1** between the first light and the wall receptacle. Connect the jumper cord **2** between the lights. Maximum distance between receptacles for 78" jumper is 74".

Tip: Connect up to 10 fixtures maximum. Voltage and current rating of fixture is 120 volt, .75 amps.

Starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

Vertical wire managers

conceal cords, cables, and light harnesses that are routed along the edge of panels.

► Specifying, page 420

Product Details

Cap finishes top edge when wire manager extends to the top cap of the panel. Cap is included with 12"H, 22¹/₄"H, 34¹/₄"H, and 48"H versions.

Five lengths are available for typical applications. 48"H plastic wire manager can be cut to meet special requirements.

12"H fabric wire manager matches the distance from 29³/₄"H worksurface to the top of a 42"H panel. It can also be used between a 29³/₄"H worksurface and the bottom of storage on a 61"H panel. Plastic version is not available.

17¹/₂"H fabric wire manager matches the distance from 29³/₄"H worksurface to the bottom of storage on a 65"H panel. It can also be used below the worksurface. Plastic version is not available.

22¹/₄"H fabric wire manager matches the distance from 29³/₄"H worksurface to the top of a 53"H panel. Plastic version is not available.

34¹/₄"H fabric wire manager matches the distance from 29³/₄"H worksurface to the top of a 65"H panel. Plastic version is not available.

Connections

Hooks attach the vertical wire manager to the slotted channel on a panel. Position of hooks can be adjusted in the field. 48"H vertical wire manager ships with four hooks. All other sizes ship with two hooks.

Surface Materials

Vertical wire manager

- Fabric
- Plastic (48"H only)

Cap

- Black plastic only

Application Topics

48"H plastic version can be cut to length. Fabric-covered versions must be ordered to fit height dimension of panel or clearance between storage and worksurface.

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surfacematerials.

Turnstone Laminate Collection

A selection of laminates and edge bands in this collection are available on Steelcase brand products. This collection is available with standard leadtimes and supported like standard laminates to help make ordering easy. Please see the Turnstone section of village.steelcase.com for swatching information.

2535 Virginia Walnut
2536 Blackwood
2612 Marbled Maple
2614 Chocolate Walnut
2615 Marbled Cherry

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$67 U.S. per worksurface or top, plus the cost of the laminate.

Edge color for custom laminate orders must be determined by the dealer and customer before orders can be entered.

Tip: Standard laminates being used in the Open Line Laminate Program to obtain a different edge detail will be charged the Open Line Laminate upcharge; however, no additional charges for the laminate will be applied.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

E = Established

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Flat-cut open-pore finish choices

3062	FC/OP	Graphite Walnut
3402	FC/OP	Clear Cherry (Aged)
3412	FC/OP	Natural Cherry E
3422	FC/OP	Medium Cherry
3522	FC/OP	Clear Maple*
3572	FC/OP	Amber on Maple E
3592	FC/OP	Blonde on Maple
3702	FC/OP	Clear Walnut
3712	FC/OP	Natural Walnut
3722	FC/OP	Dark Mahogany on Walnut
3752	FC/OP	Medium Walnut
3762	FC/OP	Dark Walnut
3772	FC/OP	Medium Mahogany on Walnut

Quarter-cut open-pore finish choices

3222	QC/OP	Clear Maple*
3272	QC/OP	Amber on Maple E
3292	QC/OP	Blonde on Maple
3302	QC/OP	Clear Walnut
3312	QC/OP	Natural Walnut
3322	QC/OP	Dark Mahogany on Walnut
3352	QC/OP	Medium Walnut
3362	QC/OP	Dark Walnut
3372	QC/OP	Medium Mahogany on Walnut
3382	QC/OP	Graphite Walnut

Rift-cut open-pore finish choices

3602	RC/OP	Desert Oak
3612	RC/OP	Warm Oak E
3692	RC/OP	Espresso Oak

Applies to:

- Universal worksurfaces

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or top only.

Flat-cut full-fill finish choices

3064	FC/FF	Graphite Walnut
3404	FC/FF	Clear Cherry (Aged)
3414	FC/FF	Natural Cherry E
3424	FC/FF	Medium Cherry
3524	FC/FF	Clear Maple*
3544	FC/FF	Blonde on Maple
3574	FC/FF	Amber on Maple E
3704	FC/FF	Clear Walnut
3714	FC/FF	Natural Walnut
3724	FC/FF	Dark Mahogany on Walnut
3754	FC/FF	Medium Walnut
3764	FC/FF	Dark Walnut
3774	FC/FF	Medium Mahogany on Walnut

Quarter-cut full-fill finish choices

3224	QC/FF	Clear Maple*
3274	QC/FF	Amber on Maple E
3294	QC/FF	Blonde on Maple
3304	QC/FF	Clear Walnut
3314	QC/FF	Natural Walnut
3324	QC/FF	Dark Mahogany on Walnut
3354	QC/FF	Medium Walnut
3364	QC/FF	Dark Walnut
3374	QC/FF	Medium Mahogany on Walnut
3384	QC/FF	Graphite Walnut

Rift-cut full-fill finish choices

3604	RC/FF	Desert Oak
3614	RC/FF	Warm Oak E
3694	RC/FF	Espresso Oak

**To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Form number 05-0001370.*

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUS-TOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Vertical Fabric Applications

What is the issue?

Some textiles are simple and look the same regardless of how you apply them to a product. Many other fabrics are patterned, textured, or have luster that will have a distinctly different appearance if applied in different directions on chairs or panels. Because of these differences, and the fact that there are limits to how some fabrics can be applied to Steelcase products, it is important to understand fabric application direction standards at Steelcase in order to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long yarns that run down the length of the roll are called the "warp" yarns. These yarns are used to define the direction you are viewing the fabric as it is applied to a panel or chair. Fabric directionality is determined by how the fabric comes off the roll. It is NOT determined by the way the pattern looks on the product (i.e., horizontal stripes do not mean the fabric was applied warp horizontal—it could have been applied warp vertical).

Warp Horizontal

Warp horizontal

application is the standard application direction for most Steelcase fabrics on Steelcase panel and seating products. Horizontal application means that as you view the panel or chair in its upright position, the warp yarns of the fabric are running in the horizontal direction.

► See *Fabric Application Direction for Systems, Casegoods, and Architecture* matrix in the *Surface Materials Reference Manual* for details on these exceptions.

Warp Vertical

Warp vertical application is the standard application direction for any panels taller than 68"H and a few other exceptions. Vertical application means that as you view the panel or chair in its upright position, the warp yarns are running in the vertical direction.

► See *Fabric Application Direction for Systems, Casegoods, and Architecture* matrix in the *Surface Materials Reference Manual* for details on these exceptions.

Warp Horizontal

Fabric on panels taller than 68"H cannot be applied warp horizontal because the height of the product is greater than the width of the fabric.

Warp Vertical

Fabric on panels wider than 68"W cannot be applied warp vertical because the width of the product is greater than the width of the fabric.

Steelcase is not responsible for charges associated with replacement or reupholstery of products due to incorrect specifications.

The combination of tall panels (75"H with warp vertical) with short panels (65"H or less with warp horizontal) will result in the fabric patterns running in opposite directions.

To remedy this situation, the following options are available:

- Use non-directional fabric. Only a small selection of fabrics are non-directional.
- Use fabrics that have standard warp vertical application direction.
- Specify warp vertical application on fabrics that are standard warp horizontal.

Tip: If you require warp vertical and it is not the standard, you must specify the warp vertical option on every line in the order.

Application Topics

Exception: Fabric warp direction cannot be altered from standard on tackboards.

Surface Materials

Representatives are available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

Price

No additional cost to specify warp direction.

How to Specify

You must specify warp direction when you need to depart from the standard. Series 9000 panels allow this option to be selected electronically. On non-electronic orders for all 9000 panels, add a written specification to each panel to indicate non-standard warp directions.

For example:

9TT5345P3

53"H x 45"W tackable

acoustical panels

side 1: fabric G220

(Bariolage Etude) with warp vertical.

side 2: fabric G221 (Antante Bariolage) with warp vertical.

Standard Warp Directions for Series 9000

Options Worksurfaces and Mobile Pedestal Tops

Plastic T-mold edge on front of Series 9000 Options worksurfaces

can coordinate or contrast with the laminate color that you select for the worksurface. You must select a front plastic edge color. Table at right gives suggested colors.

Sides and back of worksurfaces and mobile pedestal tops are square edge plastic in a color determined by the laminate color you select. These edge colors are defaults and cannot be specified.

Solid-color and speckle laminates
will have solid color plastic edging.

2HAT Acacia	6213 Warm White	6655 Warm White

Tip: To improve consistency, default edge colors are now identified by 6000-series numbers; the actual colors and defaults have not changed. Because default edge colors are not actually entered when specifying products, no specification changes are required. (Previous specification guides used 2000-series numbers to describe default edge colors, while 6000-series numbers were used for customer-specified edge colors, even though the edges were identical.)

► See the *Surface Materials Reference Manual* for more details.

Recommended Edge Colors for Series 9000 Universal Worksurfaces—Laminate, continued

Edges

The recommended edge color will complement the laminate color you specify.
Edge color is specified separately.

Laminate Color	Recommended 3 mm Edge Color	Recommended P-Edge Color
Turnstone Laminate Collection		
2535 Virginia Walnut	6242 Virginia Walnut	6000 Black
2536 Blackwood	6243 Blackwood	6000 Black
2612 Marbled Maple	6676 Marbled Maple	6000 Black
2614 Chocolate Walnut	6677 Chocolate Walnut	6000 Black
2615 Marbled Cherry	6678 Marbled Cherry	6000 Black

*A selection of laminates and edge bands in this collection are available on Steelcase brand products. This collection is available with standard leadtimes and supported like standard laminates to help make ordering easy.

Lock and Keying	442
Style Number Index	444

Lock and Keying

All locking products

are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks

are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders. ▶ See below.

Key Random

Required to Specify

Master key random +\$23 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify plug when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation — random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification. ▶ See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF
	XF1100
30	Total
1	877102003SR
	standard lock tool
1	877102002SR master
	lock tool

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
<ul style="list-style-type: none"> Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome Two keys 		1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR454.
Master key random	+\$23 each	Specify <i>master key random</i> .
Master key specific	+\$23 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$23 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF1150.
