

Say hello to the world's first Cradle to Cradle Certified workstation.

Workstation Dimensions: 8' x 8'

- 1 Workstation Power:** Power solution is PVC-free, RoHS-compliant*, and WEEE-compliant**.
- 2 Panel:** Answer. 100% reusable, easy to disassemble, reconfigure and reinstall. Modular components can be replaced. Reuse saves materials, energy, time and cost.
- 3 Panel Fabric:** Designtex® Rivergrass 2690-101 Parchment, 100% recycled polyester (yarn is made from soda bottle PET and x-ray film); 14% post consumer/86% pre-consumer. As a 100% recycled polyester, it qualifies as a built-for-disassembly material, allowing for future recyclability.
- 4 Panel trim:** Sand. All metal finishing is 100% solvent free powder technology; plastic is PVC-free.
- 5 Storage:** Universal storage in 4799 Platinum paint with silver Jazz pulls. All metal finishing is 100% solvent free powder technology.
- 6 Worksurfaces:** Universal wood worksurfaces in 3402 Clear Cherry. Wood components are made from 100% pre-consumer recycled wood fiber. FSC and SFI certified woods are available. All our glues, stains, topcoats and UV finishes are water-based.
- 7 Seating:** Think® task seating (also Cradle to Cradle certified) in Designtex Skylark 2732-102 Feather. Move™ side seating (also Cradle to Cradle certified) in Rivergrass 2690-403 BlueJay. Think is up to 98% recyclable and Move is 99% recyclable. Both can be easily disassembled in 5 minutes with common hand tools.

The Answer® system solution, by Steelcase, has been awarded the first Cradle to Cradle Certification for a workstation. And we're not just talking about a couple of panels and a worksurface. We're talking about a fully-powered workstation with wood worksurfaces, glass windows and storage... in other words, a "real-life" workstation that someone could actually work in. That means that one of the best-selling systems solutions in the world, Answer, is also one of the most environmentally "huggable".

MBDC Cradle to Cradle Certification for a fully-powered workstation - Silver

Certification Criteria

This 8' x 8' powered Answer workstation satisfies all criteria from MBDC's Cradle to Cradle design protocol regarding designing for the environment. This Cradle to Cradle designation looks at a variety of factors including materials, energy, disassembly and recycling. Every material used in this workstation has been analyzed against a set of 19 human and environmental health criteria, down to a scale of 100 parts per million. All materials can be easily disassembled, contain recycled content and have exceptional recyclability quotients.

* RoHS - Reduction of Hazardous Substances

** WEEE - Waste of Electric and Electronic Equipment
