

creating
active learning spaces
with turnstone

Socialize, collaborate, and focus—here's how we can help make your students' favorite places work for them.

campfire additions

Thirty-two percent of people aged 18-34 prefer to work in lounge settings. That's why we created our new Campfire additions.

Slim Table

Footrest

Skate Table

power

Designed to support the changing ways students work, Slim Table is the perfect complement to any lounge setting. A discreet power outlet makes it easy to stay fully charged all day long.

cord management

Inspired by smooth-rolling skateboard wheels, Skate Table allows students to pull tasks and technology close while working in a lounge setting. The cord grommet keeps cords in place and out of the way.

support

Designed as a place to put feet up, support the backs of your legs or encourage a shift in weight while standing, Footrest is a small product with a big impact.

campfire

Campus looks better than ever with casual lounge spaces from turnstone.

lounge

Turnstone's Campfire collection provides comfort and modularity for both collaborative and private lounge spaces, offering places to "get away" within libraries and common areas.

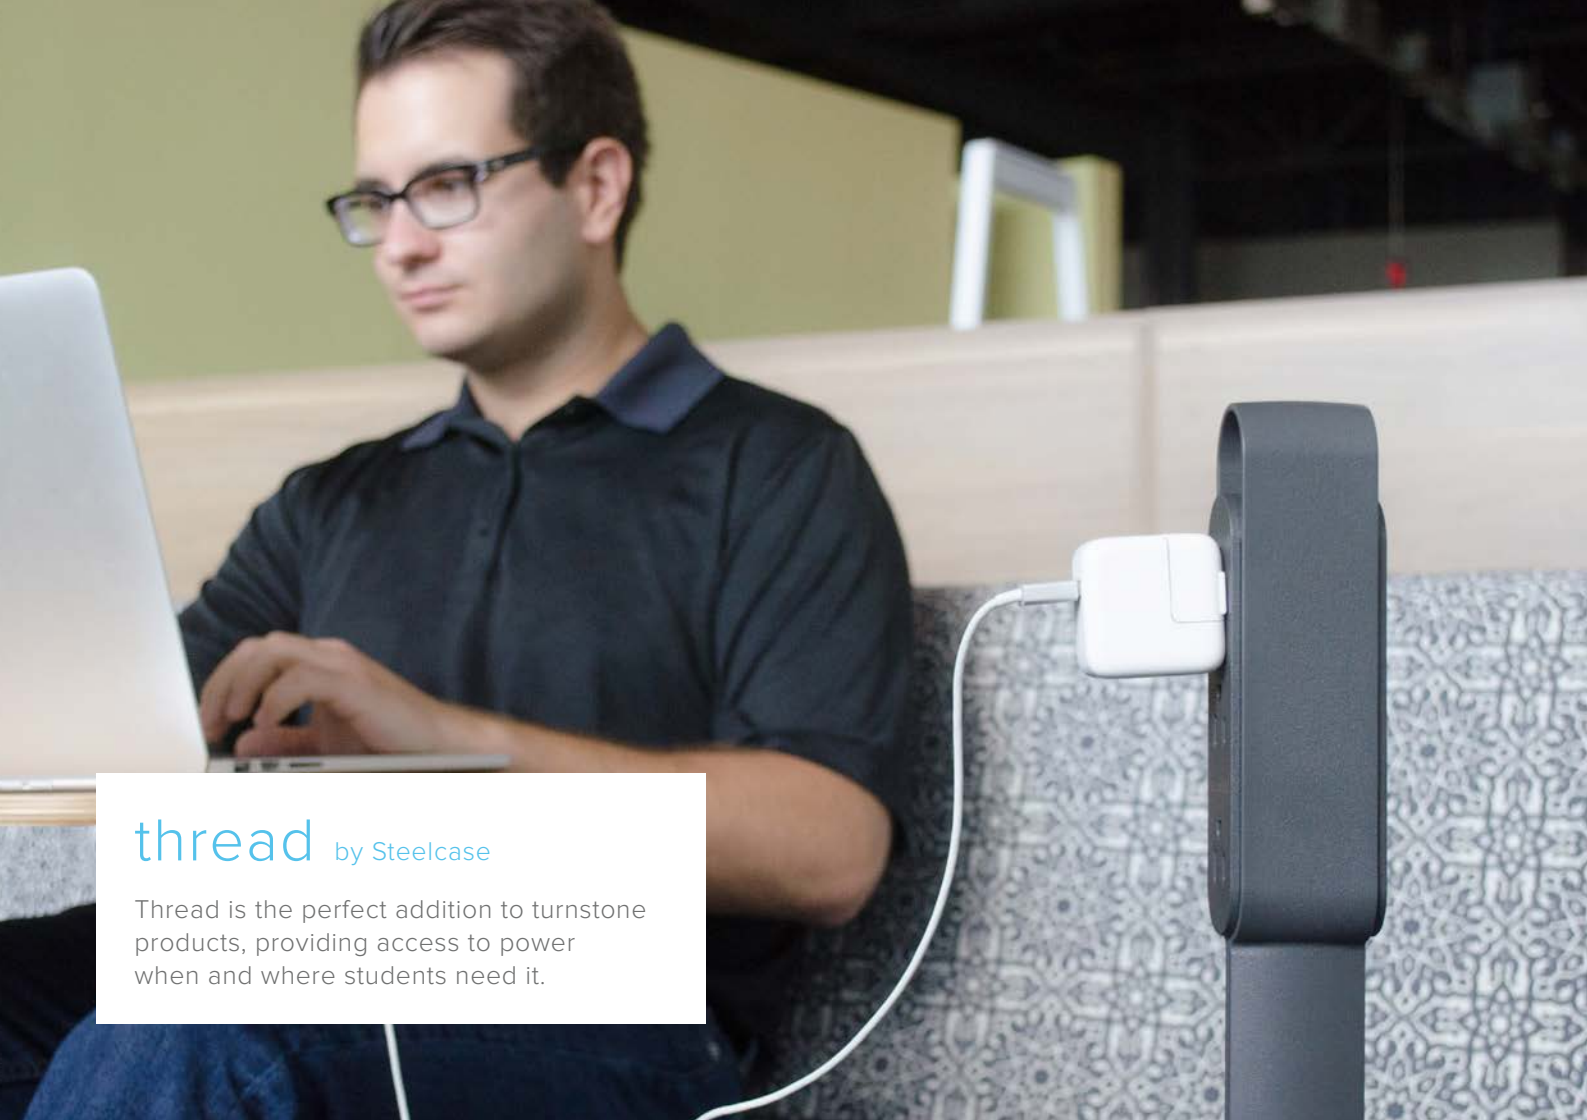

focus

Enclosed in mesh, our sturdy steel Campfire Screen creates a study oasis by providing semi-private boundaries to any lounge setting.

collaborate

Campfire provides solutions for group and solo work on campus. Big Table in desk height is ideal for content sharing, while standing height Big Table offers a palette of posture for impromptu collaboration.

thread by Steelcase

Thread is the perfect addition to turnstone products, providing access to power when and where students need it.

ultra thin

Thread power track lays under carpet, providing power, without impacting foot traffic. With modularity that makes it easy to reconfigure, power can be added to new construction or retrofitted into existing spaces.

simple

Thread's simple kit of parts provides power to any space. Power hubs are lightweight and portable, so students can have access to power in any space, enabling them to create, collaborate, and focus anywhere.

hard working

The perfect fit for all spaces, whether a classroom, library or in-between space—Thread allows under-utilized real estate to work harder. Students no longer have to sacrifice comfort and control for the needs of their device.

shortcut

This easy-to-clean multi-purpose chair adds comfort and flexibility to study halls, common areas, and campus libraries.

accessibility

With seven shell colors and dozens of cushion fabric options, Shortcut delivers beauty and value at an accessible price point.

simple. smart.

Available as a chair or stool, Shortcut's generous seat supports easy-in and easy-out mobility for short sits.

comfort

Shortcut's signature cutout allows for flexibility, natural movement and surprising comfort. Elbow rests support technology use but stay out of the way, allowing students to pull close to their work.

buoy

Lightweight and portable, Buoy brings wellbeing to the classroom.

wellbeing

For many students, frequent posture changes spark energy and combat the negative effects of inactivity. Buoy's curved base engages leg and abdominal muscles by promoting balance while students tilt and wobble.

adjustable

With five and a half inches of height adjustability and at a weight of only 20 lbs., Buoy can travel anywhere for impromptu meetings and classroom collaboration.

customization

Six base colors and endless cap options make Buoy put school spirit on display, matching any decor.

jenny

Classic, versatile and durable, Jenny makes a statement in any setting.

socialize

Students need a comfortable place to gather, whether it's to socialize or collaborate. Jenny offers modern style with practical design.

modularity

Jenny's modularity makes it one of our most versatile seating options. Available with a range of options like tablet arm, Jenny makes it easy to get to work.

comfort

Paired with the Jenny Coffee and Side Tables, Jenny chair creates relaxing common areas for students looking to socialize or lounge.

alight

Designed for hospitality and collaboration, Alight configures to meet the needs of any space.

modularity

With endless possible combinations, Alight's modularity is perfect for libraries and reception areas. Bench and Square Ottomans allow for any configuration, facilitating student and staff collaboration.

tables

Alight Coffee and Side Tables are unique and distinctive, providing a visual bookend to your space and room to display content.

collaborate

Alight sets the stage for creative thinking in a more relaxed environment. Round Ottomans offer casual seating while students tackle projects together.

bivi

Simple, modular design adapts to any organization or industry.

support

Bivi's sleek, modular design customizes to fit your classroom needs. With integrated power outlets and USB ports, your technology will remain fully charged so students don't miss a beat.

collaborate

Bivi creates workspaces that support both individual work and collaboration. Accessories like Bivi Monitor Mount make it easy for students to share digital content, while Bivi Trunk stores classroom materials for easy access.

modularity

Bivi's innovative design and simple modularity adapt to any environment, from classrooms to libraries to study halls. Easy to setup and configure, Bivi grows as you grow with the turn of a tool.
