What makes the Lomi Series special?

The cushions provide an exceptional comfort due to the base with no-zag springs. The filigree legs add elegance and lightness to the sofa. Also the wood of the interior construction is FSC-certified.

Finishes

Lomi sofas and pouf are visible in pCon in all Bolia fabrics. The legs are in black lacquered steel.

Why the Paste?

The sleek frame is highlighted by the soft curved cushions in high quality cold foam with fibre padding to create inviting comfort. The cushions on the sofa and armchair are kept in one piece, and the back cushion is zipped to the frame to ensure the cushions always stay in place. An elegant and functional detail that extends the life of the sofa and gives you flexible design options.

- Elegant and functional design
- Cushions made of one single soft piece
- FSC-certified wood

Product overview

Sustainability

- Most sustainable sofa
- FSC-certified wood
- Durable foam
- OEKO TEX → no harmful chemicals

Special benchmarks of the Recover?

If the customer purchases the Recover he does not get a sofa. He gets modules so that he can create his own personal sofa depending on his needs and the mood he wants to set. The Remix seems to have endless combinations. The seating depth is extraordinary wide and it comes with simple and clean lines.

Finishes

The wooden brackets keep the modules in place and are made of FSC wood. They are available in the colors oiled oak and white pigmented oak.

On top the cover of the sofa can be changed easily which allows an easy cleaning process and also a change of the sofa look after a few years.

Frank Dining Sofa

Measurements

Why the Frank?

Frank has a curvy contour and is shaped to add a light, inviting and durable comfort. A beautiful design fitting for communicative spaces that with great elegance acts as a luxurious and durable setting for years to come.

The sofa is not a traditional shaped sofa. But like this it is perfect for offices, since it is quite high for a sofa and has a good level of comfort which still leads to productivity.

AB0211715	Valby dining chair stackable					

The difference of the stackable and unstackable version?

There is no difference in measurement as you can see. The only difference is the legs. For the unstackable version it's wooden legs and for the stackable version it's chrome legs. The price is the same as well.

Saga

Measurements

Code	Product	Depth	Seat depth	Width	Total Height	Seat height
AB0209101	Saga Armchair	84 cm	53,5 cm	77 cm	101 cm	45 cm
AB0209102	Saga Armchair Grand	84 cm	53,5 cm	81 cm	104 cm	45 cm
AB0209103	Saga Armchair with return swivel function	84 cm	53,5 cm	77 cm	105 cm	49 cm
AB0209104	Saga Armchair Grand with return swivel function	84 cm	53,5 cm	81 cm	109 cm	49 cm
AB0209105	Footstool	38 cm	N/A	55 cm	42 cm	N/A

Why the total height is different in every version?

The pipes for the return swivel function are the reason why there is a difference in the height.

The same reason applies for the **seat height**, as the pipes increase 4 cm. the height of the armchairs.

The only difference between Saga and Saga Grand is the size. Besides the measurements the chair is completely the same.

Features information

Universal Headrest

Besides the footstool, this series also includes a headrest. This is a great complement for any armchair as an additional ergonomic and comfortable complement.

Saga with return swivel base

The armchair base has a memory function, so that it returns to the position it was installed. This is an excellent option which helps to ensure an organized space.

Finishes

Saga armchairs and footstool are visible in pCon in all Bolia [fabrics](#) as well as in black lacquered steel and matt chrome base.

Black lacquered

Matt chrome base

Price increase with matt chrome base

Matt chrome base has a **higher price** than black and white lacquered steel. It is around +/- 150€, but there is not a linear increase of this since the price depends also on the fabric grade.

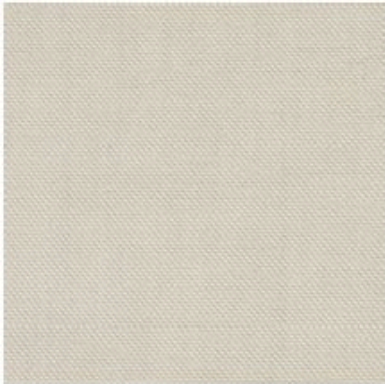

For example, tin Baize, Bergo it is +150€ in London, Memory, Qual +157€, in Mira +147€.
