

Cors

A high stacking universal chair

orangebox

Product Description

Cors is a robust, high stacking universal chair for use in either small groups or within dense function scenarios. The metal structural frame is integrated into the pattern matrix back during the moulding process, offering a level of flexible comfort that's surprising in a chair with such an elegant, slim profile.

Cors can be specified with an individual wire frame base, or a base with a durable linking clip. It is also available with an arm or writing tablet.
