Sit Better.
Work Better.

High-Performance Seating

Why a Good Chair Matters

Sitting is a fact of life, but when we sit it's easy to adopt unhealthy habits like slouching and not moving for too long.

The fact is, our bodies were made to move and without the proper support, prolonged sitting can cause and lead to short-term pain and long-term health issues.

But the right chair can make a difference. If it's designed to support the human body in a healthy sitting posture and encourage movement, you'll stay comfortable and focused on your work, not your chair.

Steelcase high-performance seating helps you do your best work with better design, better comfort and better choice. We offer a broad range of dynamic options, all backed by Steelcase research, innovation and our unwavering standards for quality and sustainability.

That's our Steelcase Seating Difference.

Better Comfort

It’s not just about that initial feeling when you first sit down. Dynamic comfort is about encouraging healthy movement throughout your day, helping you stay engaged and focused without sacrificing support. Many features of office chairs are subjective, but Steelcase high-performance work chairs are all designed with features to solve for three key tenets:

Movement

All Steelcase high-performance chairs are designed to encourage you to move and change posture — without sacrificing support. This is achieved through our LiveBack® technology, which allows the backrest to flex and contour to mimic the natural movement of each individual spine and provide continuous lower back support reinforcing a healthy posture while you sit.

Connection

Comfortably interact with your technologies and stay connected to your work and other people. Our proprietary seat and back mechanism keep you in the ideal vision and reach zone with your arms parallel to the floor and worksurface — even as you recline.

Fit

Steelcase seating is designed with features to fit a range of people with one chair. Our high-performance chairs are designed with armrests that allow you to customize your fit by adjusting the height, depth, width and pivot, a flexible seat edge to relieve pressure under the thighs and tension adjustments allowing each user to find the right amount of back support during recline.

Healthy Sitting Tips

Seat Height
Adjust so your feet are flat on the floor or a footrest, thighs parallel to the floor.

Seat Pan Depth
Adjust your seat pan to allow for space between the front of the seat pan and the back of the knees (2 or 3 finger widths).

Reset
Sit all the way back in your chair with full contact with the backrest.

Back Lock + Tension
Adjust the chair lock/unlock. Find your ideal tension where you can comfortably recline and stay supported.

Lumbar
Adjust the lumbar to fit into the small of your back.

Arms
Adjust the armrests’ height so elbows and forearms rest comfortably on the arms of your chair, without bearing weight. Arms should hang naturally, close to your body with shoulders relaxed.

Workstation
Adjust your desk height to be level or slightly higher than the armrests.

Worktools
Make sure the top of your monitor is at eye level or slightly lower.

Better Design

It's more than a chair to us.
It's our deep understanding of people,
how they work, and what they need
to be supported that inspire our
seating solutions, expressed
with uncompromising quality,
craftsmanship and sustainability.

Research

At the core of our design is a human-centered research approach. People are at the center of everything we do. We study people to learn how they work (and sit) and our research leads to innovative seating solutions.

Quality

95% of the entire work chair is designed, manufactured and engineered by Steelcase allowing us to control the full process from the materials we use, to engineering proprietary parts, to designing for circularity. To ensure you can trust the quality of our products, we take an approach that goes beyond industry standard testing. Our high-performance seating is tested for durability and backed by an industry-leading warranty.

Sustainability

Our design process creates products that are good for people and the planet and is aligned with our corporate strategy to reduce our carbon footprint, choose and use materials responsibly and design for circularity.

Our high-performance seating:

Includes post-consumer and/or post-industrial recycled plastic

Follows minimal design with fewer parts for ease of recycling and even quicker disassembly

Certified ANSI/BIFMA, AFRDI Blue Tick, AFRDI Green Tick, SCS Indoor Advantage Gold-Furniture, Environmental Product Declaration (EPD) by NSF, LEVEL

Gesture®

Acclaimed Movement

Gesture supports the largest range of postures and users, so you can sit all day without feeling like you sat all day. Gesture offers best-in-class features and performance. Voted best office chair, Gesture’s 360-degree arms, contoured backrest and sophisticated adjustments are designed for supporting all the ways technology shapes your posture.

Product Features

- 1**

Back Support
Designed with 3D LiveBack® and an automated lower back firmness, the contoured backrest aligns perfectly with your spine’s natural S-shape, providing continuous lower back support while sitting upright or reclining.

*Optional additional lumbar support can be added.
- 2**

Most Adjustable Arms
The 360-degree arms mimic the human arm for comfortable support as you work across multiple devices. As you move, the armrests remain parallel to the worksurface keeping you connected at every angle of recline.
- 3**

Adjustment Mechanism
Gesture offers manual adjustments that are ideal for users who prefer to dial in the amount of tension they feel during recline. All adjustments are located on the right-hand side within an arm’s reach.

“The results of the global posture study basically made us deconstruct the chair and go back to the essence of the seating experience. We assembled a global team and took inspiration from the human body at work and how it interacts with modern technologies.”

Steelcase Ergonomic Specialist
Gesture’s story began with the Global Posture Study, involving 2000 participants in 11 countries.

Leap®

Absolute Adjustability

Leap revolutionized the way we sit and work. The first chair designed with our LiveBack® Technology, Leap conforms to everyone’s unique spinal motion to keep you supported throughout your day. With clearly labeled adjustments, Leap lets you dial in a precise fit in all the places you need it most. You’ll love the way the seat glides as you recline, keeping you connected to your work.

Product Features

- 1**

Back Support
Designed with LiveBack® technology, the back contours and adapts to mimic and support the natural movement of your spine. Leap even includes a lower back firmness dial that allows you to customize your lumbar support.
- 2**

Comfort and Connection
Designed with a Natural Glide System™, the seat glides forward as you recline — keeping your posture in check without disrupting your line of sight and reach — moving you closer to your worksurface.
- 3**

Adjustment Instructions
are included with every chair. Fully adjustable arm models include instructions under the arm cap. Instructions can also be found at www.steelcase.com

Control under the seat include tactile braille designators.

“The spine wants to move in ways that most chairs don’t allow, so we developed a ‘leap’ in technology that lets people sit properly and move naturally while sitting, providing appropriate support to the upper and lower back at all times.”

Steelcase Ergonomic Specialist
The Steelcase Motion Study revolutionized the way we create chairs. This study led to LiveBack®; a proprietary Steelcase technology, engineered for you.

Steelcase Karman™

Beyond Mesh
Sit back and let physics do its job. With a proprietary performance textile and an impossibly light frame, Steelcase Karman goes beyond leading mesh office chairs to provide effortless comfort by naturally responding to your body’s movement. The Karman line is where the earth’s atmosphere meets space, weightlessness becomes possible and where going beyond becomes a reality. That spirit and feeling is captured in Steelcase Karman.

Product Features

- 1

Back Support
Designed with LiveBack® technology, Steelcase Karman balances your bodyweight and keeps in contact with you as you move throughout the day. The precision tension of the Intermix material and soft edges help the back flex while supporting your spine in its natural, healthy S-shape by offering continuous lower back support as you move.
- 2

Adjustment Mechanism
Weight-activated adjustments automatically provide the right amount of back tension as you recline. The comfort dial has multiple settings including a boost setting which offers additional tension for those who need it most.
- 3

Beyond Comfort
Steelcase Karman provides long-term comfort through three distinct features: a patented hybrid seat with integrated cushioning that moves with you, comfort edges around the seat and back and our proprietary performance textile, Intermix.

“Karman is the amalgam of all our learning and legacy. There’s DNA of every single one of our chairs built into it. It’s the evolution of everything we know about seating and the way people work.”

Mark Spoelhof,
Steelcase Global Design Director

Think®

Sustainable Support
Think's award-winning design re-imagined what an office chair could do and how sustainable it could be. With smart and simple weight-activated controls, it allows anyone, anywhere to get comfortable and get to work. With beauty to match brains this icon of sustainable design serves up a breadth of style that is warm, tailored and sophisticated.

15 Steelcase

Product Features

- 1**

Back Support
The LiveBack® Flexor System with height-adjustable lumbar support conforms to your spine to provide flexibility and support as you move throughout the day.
- 2**

Adjustment Mechanism
Weight-activated adjustments automatically provide the right amount of back tension as you recline. The comfort dial has multiple settings including a boost setting which offers additional tension for those who need it most.
- 3**

Style Forward
Choose from three back designs: the performance 3D knit back, the plush quilted upholstered back and the classic upholstered back as well as an optional outer back cover for elevated sophistication.

Think was the first office furniture product to receive MBDC Cradle-to-Cradle certification in the world. It is designed with fewer parts for ease of recycling and even quicker disassembly and incorporates more recycled content, making up roughly a third of the chair's weight.

Steelcase Series® 2

Attainable Style
Steelcase Series® 2 expands on the comfort and attainability of Steelcase Series® 1, offering a higher performing back and arms alongside endless customization options. Choose from plenty of Air LiveBack colors or dress up the back with 3D Microknit or standard and quilted upholstery. The weight-activated mechanism with boost allows anyone, anywhere to sit down and get comfortable quickly.

Product Features

- 1**

Seamless back comfort
A patented mesh and membrane design prevents “hammocking” over long-term use, supporting smooth lateral and torsional movement.
- 2**

Recline Adjustments
A proprietary weight activated mechanism lets users personalize recline tension with a simple click. The interplay comfort dial has three settings to adjust the back recline: upright, boosted setting, and full recline.
- 3**

Seat Ergonomics
Seat is height- and depth adjustable. Flexible edges and adaptive bolstering in the seat foam provides pressure-free comfort.

Dynamic comfort is more than the initial feeling when you first sit down, it’s about encouraging healthy movement throughout the day, keeping you engaged and focused without sacrificing support.

Manual Recline Adjustments

Manual chairs allow the user to dial in a precise fit. Ideal for individual workstations, call centers, long-term sits.

The Difference Between Weight Activated and Manual Chairs

Our weight-activated chairs automatically adjust to your body weight, delivering the right back tension as you recline, no guesswork needed. But because every body is different, we've added a comfort dial with settings like "boost" for extra support when needed. It's comfort, made easy for everyone, everywhere.
