

Joy Meeting

A robust, high performance
meeting chair

orangebox

Product Description

It's combination of simplicity, functionality and affordability means that Joy lives up to its name...

Joy's deceptive simplicity is the result of ergonomic research. It offers users a level of comfort and performance previously unavailable in this class of product, and, thanks to its unique form, contours and proportions, this holds true regardless of the user's body shape and size.

Offering the technical attributes of more expensive products in a surprisingly affordable package, Joy also enables the designer's vision to be fulfilled, with design options ranging from an upholstered back in different fabrics to a lightweight mesh back.
