3/16" HEX DRIVE

3/16", 1/8" (all tables)
plus 5/32" (attached totems)
plus 9/64" (offset stool-height)

FLAT BLADED
SCREWDRIVER
(for data connections)

SOCKET WRENCH
WITH 1/2" SOCKET

NOTE: This page applies to existing media:scape tables. If this is a new installation, start on page 3.

INSTALL VP SERVER

1. a) Use a hex drive to remove screws, then b) remove cover from the underside of table top.

NOTE:

1. Media:scape table must be unplugged prior to removing the cover. Please note that some media:scape tables use two cords and the installer should be sure to unplug both.
2. The media:scape table mains plug will be considered the disconnect device for both the table and the virtual puck, the disconnect device shall remain readily operable to the user.
3. **WARNING:** To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

2. Install VESA Plate within the shaded area, shown to the right. Align “up” direction relative to table as shown.

3. Add (2) stud mount fasteners to the back of the VP Server.

4. Secure VP Server onto VESA Plate.

TIP: For ease of installation, drill (4) pilot holes using the VESA plate as a template for the fastener hole position.

VESA PLATE

2

DISPLAY SIDE

TIP: install plate within shaded boundary to prevent interference when reinstalling cover. Be sure arrow is in this orientation.

4

TIP: Rotate VP SERVER into place using slot pattern in plate.

CABLE CONFIGURATION

CABLE CONFIGURATION (Alternate View)

FLAG STYLE CONNECTOR

Note:

Power cord has a “flag style” connector. DO NOT confuse with power supply for switcher.

Note:

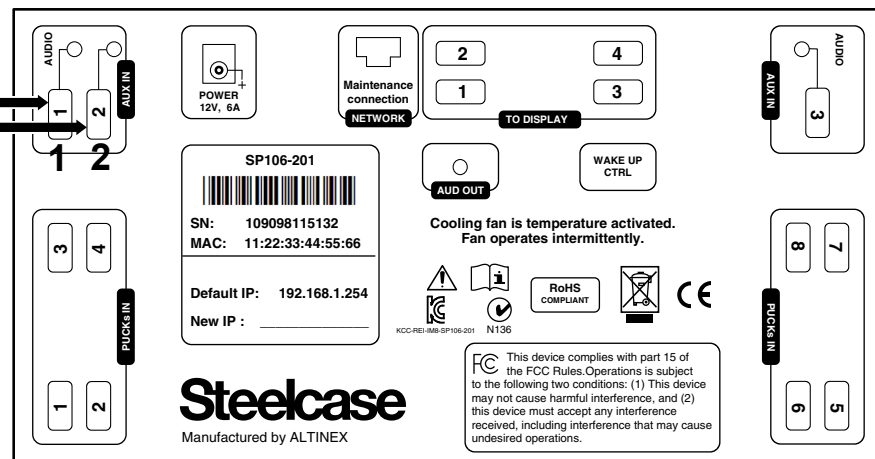

Must connect miniDP to HDMI cable for each video output between VP receiver and Digital Switcher.

Note:

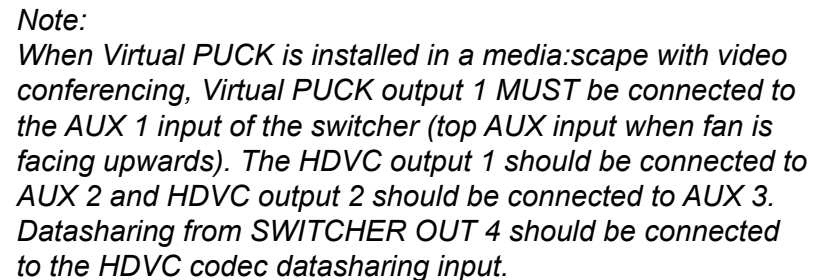

The HDMI output ports (1 & 2) require specific routing configuration. Configure: VP Server HDMI output 1 to Switcher Aux input 1, and VP Server HDMI output 2 to Switcher Aux input 2.

* For one monitor setting, use VP Server HDMI output 1 to switcher AUX input 1.

DIGITAL SWITCHER

STRAIGHT POWER CONNECTOR

CABLE CONFIGURATION: M:S WIRELESS ONLY OPTION

Note:

Must connect miniDP to HDMI cable for each video output between VP receiver and Digital Switcher.

DIGITAL SWITCHER CONFIGURATION

Configuration for media:scape can be accomplished using OSD. To enter configuration mode, press and hold power button for approximately 5 seconds. After that OSD will display the current status of the switcher. In this mode, only PUCK 1 will light up. To enter configuration mode user need to enter password: 1342. The PUCK will flash and unit will be ready for configuration. From here there are a total of 15 fields that can be changed either through the OSD or TCP/UDP format. Keys 1 and 3 are used to move between fields Keys 2 and 4 are used to change setting value for that particular setting.

If standard cabling shown on PAGE 5, change the setting value to the following:

OUT1 AUX OVR: 1

OUT2 AUX OVR: 2

If VP + HDVC cabling shown on PAGE 6, change the setting value to the following:

OUT1 AUX OVR: 2

OUT2 AUX OVR: 3

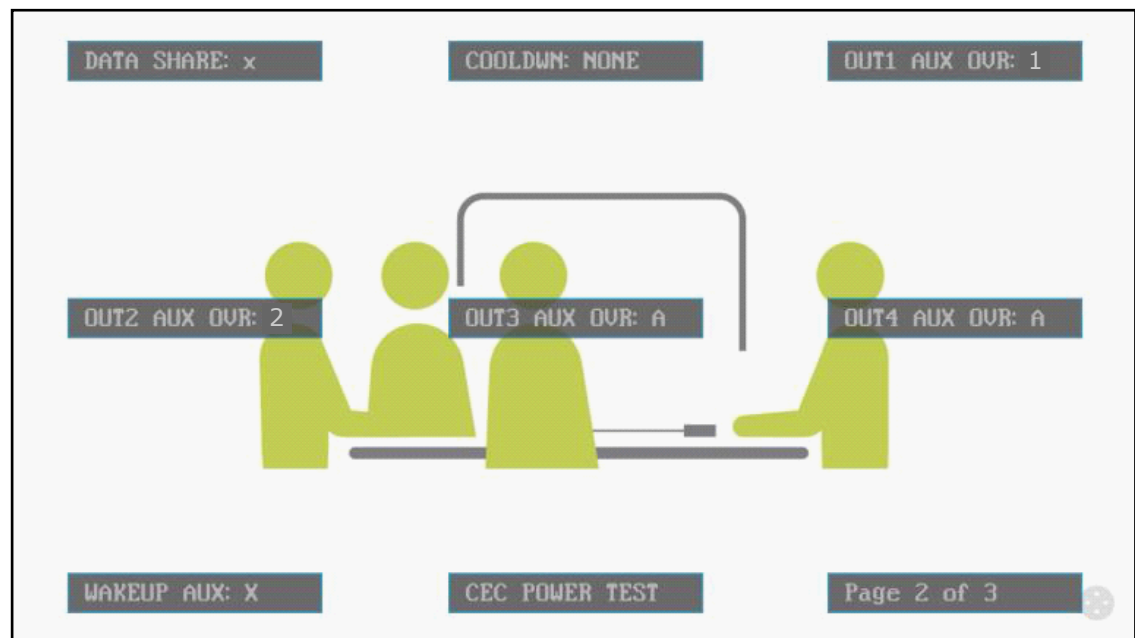

WALK-UP: 7 (only if new wux listed below,
if original do not change walk-up setting)

NEW WUX

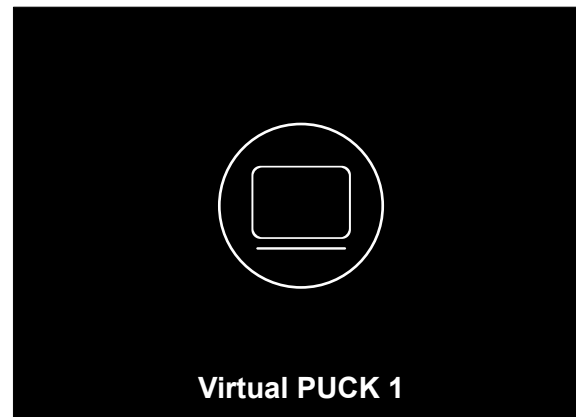

ORIGINAL WUX

CONFIRMATION

1. Press "POWER ON" for VP Server.
2. Confirm that screens are displaying:

Display 1

and

Display 2

ENABLE INPUT LAG REDUCTION (Recommended)

Display manufacturers often include an input lag reduction setting most commonly referred to as "Game Mode".

1. Using the remote or menu button on the display, open up the settings menu.
2. Find "Picture Mode" setting and change to "Game".

Note: Picture mode, picture setting, scene, and AV mode are common terms for the setting that needs to change to "Game". Most Samsung displays can be changed to "game mode" by navigating to Setup > General > Game Mode.

REINSTALL COVER

1. Install pyramid cover "a". Secure pyramid cover "a" using seven (7) 5/16-18 x 7/8" button head screws.

2. Install pyramid cover "b". Secure pyramid cover "b" using seven (7) 5/16-18 x 7/8" button head screws.

3. Plug device back in.

VP FOR KIOSK

1. Unplug Kiosk power cord before removing cover.
2. Remove (4) allen head screws and lower cover.
3. Attach (2) stud mount fasteners to the back of the VP Server.
4. Lift and rotate VP Server into position on Kiosk bridge, then secure.
5. Attach power cord.
NOTE: Power cord has "flag" connector. Do not confuse with media:scape switcher power cord.
6. Attach HDMI cable one to one (refer to page 5).
7. Attach network ethernet cable.
8. Enable input lag reduction setting (recommended, see page 6).
9. Reinstall the cover.
10. Plug the unit back in.

NOTE:

The Kiosk mains plug will be considered the disconnect device for both the Kiosk and the virtual puck; the disconnect device shall remain readily operable to the user.

WARNING: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

- 3** **TIP: Rotate VP SERVER into place using keyhole slots.**
