

Ideation Hub by Steelcase (Microsoft)

Microsoft's Ideation Hub is a collaborative workspace that allows users to brainstorm and share ideas in real-time. It features a whiteboard interface where users can create sticky notes, draw, and collaborate with team members. The tool is designed to be intuitive and easy to use, making it a popular choice for remote and hybrid teams.

Key features include:

Real-time collaboration: Users can work together on a shared whiteboard from anywhere, at any time. This is particularly useful for remote teams and for those who work in different time zones.

Integration with Microsoft Teams: Ideation Hub is seamlessly integrated with Microsoft Teams, allowing users to launch the tool directly from their Teams chat or meeting. This makes it easy to start a brainstorming session during a meeting or to continue a discussion from a previous session.

Steelcase Maker Commons is a flexible, modular workspace designed to support collaboration and productivity. It features a variety of seating options, including sofas, chairs, and tables, that can be easily reconfigured to suit different work styles and needs.

Key features include:

Flexibility: The modular design of Maker Commons allows users to create different types of workspaces, from quiet zones for focused work to collaborative areas for team meetings and brainstorming.

Key features include:

Integration with Microsoft Teams: Duo Studio is integrated with Microsoft Teams, allowing users to launch the tool directly from their Teams chat or meeting. This makes it easy to start a brainstorming session during a meeting or to continue a discussion from a previous session.

Steelcase Duo Studio is a collaborative workspace designed to support productivity and collaboration. It features a variety of seating options, including sofas, chairs, and tables, that can be easily reconfigured to suit different work styles and needs.
