Network Analysis  
Private Office  
Higher Education

### **Are you looking for ways to improve your workplace, involve employees in the process and define measures for improvement?**

Steelcase offers a suite of planning tools that are easy to use and help gain deeper insights about how people really work. With a range of workplace surveys, our goal is to help design professionals and clients create workplaces that help people fit the way your organization needs to work — whether you need to collaborate, concentrate or both.

These surveys are an excellent way to engage employees in efforts to change the work environment. They can stand alone or be used in conjunction with one another to gather rich information that will help you gain deeper insights into your organization and determine how the workplace can help support worker needs.

- On-line
- Easy to access and complete
- Allow large numbers of people to participate
- Reports distill large amounts of data into easy-to-read charts
