

Post and Beam Solutions Specification Guide

Availability

Electronic price list updated with release 180.E (U.S.) and 146.E (Canada), dated December 15, 2014.

Spec News is available on village.steelcase.com. Search AdStock and download the current release's Spec News.

View or download Steelcase Specification Guides at <http://www.steelcase.com/en/resources/design/spec-guides/pages/specguides.aspx>.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

This specification guide contains multiple Steelcase and Turnstone product lines

which are designed into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions.

► For a list of all trademarks, refer to the last page of this specification guide.
© 2014 Steelcase Inc.

For Canadian Pricing

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by 1.09.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Tip 3

Find cross references
by looking for page numbers
flagged with an arrow.

Product Drawing shows you what the product looks like and points out important features.

Product Details
gives specific information
on the product and how
it is used.

Surface Materials
lists what material is used
for each part of the
product.

Actual Dimensions
table lists the dimensions
of the product.

Connections
describes how the product is assembled or how it attaches to another product.

Wiring and Cabling details the cable-management and cable routing capabilities of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product.

Each product specifying page contains six elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes (under the dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Related Products provides specification information for products that are directly related.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Tip 6

Required to Specify

Specify with wood top cap and wood color number.
Specify with wood top cap and wood color number.
Specify with Customiz stain on
See Surface Materials Referen

Italic typeface on specifying pages usually identifies wording that you should use in your order.

i

Tip 7

fence beam locations. Specify tube to match width of fence beam. The bottom of the fence tube is 6³/₄" below the bottom of the beam.
Tip: Remember to order vertical post tube (BXPTHF11 or BYPTHF11) to manage cables between a horizontal

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Connection of two beams requires the use of a post.

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.
Page 244

Tip 10

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.
Page 258

Additional Resources

Post and Beam

products are supported with information materials, tools, and software to help you plan, specify, and order an installation efficiently.

This specification guide contains multiple Steelcase product lines which are designed into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions.

Additional storage products can be found in the *Storage Specification Guide*.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the AdStock web site at village.steelcase.com.

Printed Materials

Answer Solutions Specification Guide contains panels that attach to Post and Beam.

Kick Solutions Specification Guide contains Kick panels that attach to Post and Beam.

Architectural Solutions Specification Guide contains Privacy Wall and Glass Selections that attach to Post and Beam.

Montage Solutions Specification Guide contains Montage frames that attach to Post and Beam.

Storage Specification Guide contains storage that works with Post and Beam.

Height-Adjustable Worksurfaces Brochure Provides an overview of the advantages of using Details height-adjustable worksurfaces. Information on user ergonomics and how businesses can save money is included, along with visual and descriptive overviews of Details height-adjustable worksurfaces.

Computer Tools

Electronic Catalog
Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools — Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 Cap Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications

If your device has a bar code reader App, scan this QR code for a direct link to the online digital publications. Utilizing this QR code allows you to search across multiple specification guides, share across social media, or print out pages. You can also access these digital publications at www.steelcase.com or village.steelcase.com.

Post and Beam Product Training

Basic training for Post and Beam is available as part of the Building Product Muscle curriculum on the Steelcase University Web site at village.steelcase.com.

The Post and Beam BPM Web-based module is an interactive course filled with pictures, product detail, and practice exercises designed to build knowledge of Post and Beam's positioning, statement of line, features and benefits, competitive products, application, and sales presentation. It also provides printable job aids of all content covered in the course to serve as ongoing performance support for Steelcase and dealer sales people. The Post and Beam BPM is course SAL251.

Support

Steelcase Capabilities
Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939, or visit our Web site: www.steelcase.com.

Post and Beam

Post and Beam is a modular and reconfigurable system that supports the space definition and technology access needs of individual users and teams.
 ▶ Specifying, pages 112–138

Horizontal overhead beam trough provides horizontal power and cable management at the overhead beam location.

Beam filler trough manages cables where cross beams are not present.

Beam spans between posts and can be used in either overhead or fence applications.

Screens can be mounted above or below beams for privacy or modesty.

Integral T-slots on beams support Huddleboards (with Huddleboard adapter brackets), shelves, and power and cable management.
 ▶ See *Meeting Spaces Specification Guide*.

Premium whiteboard infill is a two-sided high-performance writing surface made of e³ ceramicsteel.
 ▶ Specifying, page 116

Corner troughs attach to beams at intersections to provide a smooth visual transition for cables and power harnesses when bridging beams.

Top caps are provided with 33"H and 40½"H posts only. Top caps must be ordered separately for 93½"H posts.

Post attaches to beams in in-line, L-, T-, X-, or Y- (120°) configurations.

Infill is a fabric screen that stretches from overhead beam to floor, from overhead beam to desk-height fence beam, or from desk-height fence beam to floor.

Posts must be used at each connection of two beams.

Technology hubs deliver power and cable access to the user.

Hub mounts are required to attach hubs to 33"H or 40½"H posts.

Horizontal fence tubes provide power and cable management at the fence beam locations.

Vertical post tubes provide power and cable management at the post.

Shelves are additional storage surfaces that sit above the worksurface. Shelf sits 2¼" above a fence beam.

Actual Dimensions

	Post	Beam
Depth (thickness)	4"	1⅜"
Width	4"	3¼", 4", 5', 6', 7', 8', 9', 10', 11', 12', 13', 14', 15', or 16'
Height	33", 40½", or 93½"	8½"
Leveling mechanism range	3"	N.A.

Product Details

Beams are interchangeable for use in overhead or fence applications. Beams connect at desk height or standing height to form fence applications. Fence applications require the beam to be inverted from an overhead application prior to connection with a post. T-slots should be oriented at the bottom of the beam when used in overhead applications. They should be oriented at the top of the beam when used in fence applications. Beams can be attached to any location on the post. Maximum load rules vary by location.

Overhead and desk-height fence beam

Overhead and standing-height fence beam

Overall height of post and beam is 93 1/2" with the leveling mechanism in the lowest position. Clearance from floor to underside of beam is 85"H.

Integral T-slots on beams accept accessory mounting bracket, style number BAMB, or customer supplied 12 mm T-nuts for attachment of customer supplied accessories. T-slots should be oriented at the bottom of the beam when used in overhead applications. They should be oriented at the top of the beam when used in fence applications.

Maximum load on all widths of overhead beams is 100 pounds. Maximum load on fence beams is 1000 pounds. Maximum load on shelves is:
 30" shelf—83 pounds
 36" shelf—99 pounds
 42" shelf—116 pounds
 48" shelf—132 pounds

Beams have integral T-slots on the sides. The side slots accommodate Huddleboard attachment. Specify attachment bracket, style number BHAB, to hang Huddleboard from beams.

Large post base is 8 1/2" in diameter. Small post base is 4 1/2" in diameter. Small bases can not be bolted to the floor.

Leveling capability is provided by 3" adjustability between the post and base extension (included with post).

Post base shims, ordered separately, can be used under large post base to raise to the appropriate carpet level.

Posts may be field cut to any dimension. Posts cannot be stacked. Field cutting may require filing to smooth rough or uneven edges.

Beams may be field cut to any dimension. An anchor block drilling fixture must be ordered through Service Parts (946800102SR) to place new anchor block holes in the correct position after cutting. Field cutting may require filing to smooth rough or uneven edges.

When attaching screens to fence height beams, remember to order attachment hardware separately.

Fence dust covers can be inserted into top T-slot on fence beam. Dust covers come in 10-foot lengths and can be cut to size in the field.

Curtain hooks are used to hang a privacy curtain from a beam.
 ▶ See page 25 for *Instructions to Create a Post and Beam Curtain*.

No hubs

One hub

Two hubs

Infill width in overhead beam-to-floor applications is determined by number of hubs. Infill is fixed within the opening; it cannot move. Overhead beam-to-floor infill attaches to post.

Infills in overhead beam-to-desk-height fence applications may be any width smaller than the beam width. Overhead beam-to-desk-height beam infill attaches to fence.
Tip: There is no standard infill for overhead beam-to-standing-height fence applications.

Infill hardware packages are available to support custom fabric and custom graphic fabric infills, ordered separately from Designtex. Various infill options are available via Designtex (Fusion, acrylics, fabrics, plastics, etc.) Call Designtex at 1.800.221.1540, contact your local Designtex representative or visit Designtex.com.

Connections

Wall start bracket can be used to attach an overhead beam to a building wall or column. Wall start brackets allow for 90° connections only. Wall start protrudes 2 1/8" from wall. Consult with the project's architect or structural engineer to determine wall construction. The architect or engineer will have to specify the proper attachment hardware.

Posts and beams connect to form in-line, L-, T-, X-, or Y- (120°) connections.

Maximum beam length for fence applications is 10'.

Connection of two beams requires the use of a post.

Tether bracket connects to products.

Capsule table bracket connects to capsule work surfaces.

Wiring and Cabling

Technology hub comprises nine simplex receptacles available in multiple circuits. The system has a standard 8-wire, 4-circuit electrical system available in wiring configurations of 3+1, 2+2, and separate neutrals. Hubs are 12 1/4" in diameter. Maximum of four hubs are allowed per feed. Communication Ports must be supplied and installed by the customer. Hubs can be modular connections or hardwired. Hubs are either terminating (end of run) or pass through (middle of run).

Modular and hardwired feeds have varying lengths.

Hub mounts are required to attach a hub to the top of a 33"H or 40 1/2"H post.

Multiple inserts on technology hubs handle all cable routing situations. All possible combinations of inserts are provided with each hub.

Post and Beam is designed to accommodate modular power or a hardwired circuit. Hardwired circuits are needed for lights and all Post and Beam applications in the city of Chicago.

Two hubs may be installed on one post for increased capacity. Vertical post tubes must be field cut.

Technology hubs with modular power connect to each other using standard 8-wire, 4-circuit modular harnesses, feeds, and connectors. *Tip: Remember to order connectors which must be used between harnesses.*

Hardwire connections can take place via junction boxes. Specify junction box connector brackets for these applications.

Power and data strips attach to the side slot on fence and include three simplex receptacles and space for two data or communication ports (to be supplied by the customer). They are available with an 8'-long cord with plug, in wiring configuration of 3+1, 2+2, and separate neutrals. ▶ Page 69

All power and communication distribution is external to the posts and beams. A series of vertical cable tubes work in conjunction with horizontal troughs to route power and cables.

Vertical post tubes must be used to conceal power harnesses and communication cables routed to technology hubs. The height of the vertical tube is dictated by the location of the hub. Branching harness-to-harness connectors do not fit in vertical tubes.

Cord/cable manager clips are available for low-capacity cable management under a fence-height beam. Maximum capacity of the clips is two standard power cords and two standard data cables.

Beam filler troughs are used to manage cables where cross beams are not present.

Cable capacity for troughs is 30 category 5 cables with two power harnesses or 50 category 5 cables with one harness. Cable capacity for fence tubes and vertical post tubes is 30 category 5 cables with one power harness or 50 category 5 cables with no harness.

Power and data strips can be used in freestanding or panel applications.

Cable management for technology hubs is supported by vertical tubes in two positions: desk height (33") or standing height (40 1/2"). Hubs may be installed at any height, but vertical tubes must be field cut.

Horizontal fence tubes provide horizontal power and cable management at fence beam locations. Specify tube to match width of fence beam. The bottom of the fence tube is 6 3/4" below the bottom of the beam. *Tip: Remember to order vertical post tube (BXP THF11 or BYPTHF11) to manage cables between a horizontal fence tube and a hub.*

Horizontal overhead beam troughs provide horizontal power and cable management at the overhead beam location. Overhead beam troughs must always connect to a corner trough on each end.

To route cables from an overhead beam to a vertical post, specify a trough, corner trough, and vertical post tube.

Two power and data strips with modular harness can be attached in-line using a branching harness to harness connector.

Modular harnesses may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Corner troughs attach to overhead beams at intersections to provide a smooth visual transition for cables and power harnesses.

To route cables overhead in 90° applications on the outside of the corner, specify three 90° corner troughs and two beam filler troughs.

To close beam ends, make sure to specify enough corner troughs and beam filler troughs.

Beam-to-beam cable routing is possible in applications where cross beams are present. Beam filler troughs are not required. Cables pass over the top of the beam.

Ceiling infeed tubes bring power and cabling from the ceiling to the top of a 93½"H post. Corner troughs must be specified for a smooth transition to adjacent tube or troughs.

Multipurpose power infeeds may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

An in-line post junction cover is used to protect and cover cables routed around a post in a fence-to-fence application.
Tip: The in-line post junction cover will only attach to X-posts.

Communication access is supported through the use of Decora mounting strap style faceplates which can be installed underneath the hub cover. The faceplates must be installed by the communications contractor. A hub can house three faceplates if power and cabling is routed into the top of the hub—or four faceplates if no power and cabling is routed into the top of the hub. The number of jacks (two or three) per faceplate varies by manufacturer.

Decora mounting strap-style faceplates are typically used for application within an electrical junction box and covered with Decora style electrical faceplates.

Post and Beam assembly instructions can be found on the Steelcase dealer Web site, village.steelcase.com.

In-line post junction cover

- 4799 Platinum paint only

Application Topics

Post and Beam dimensioning must be thoroughly understood for proper planning. Nominal dimensions are center-to-center of post. Worksurface space is less than nominal. Full overall width dimension is more than nominal (see drawing).

Check ceiling height when planning for Post and Beam. Overall height of Post and Beam is 93½" with the leveling mechanism in the lowest position and 96½" in the highest position. Clearance is 85" with the leveling mechanism in the lowest position, and 88" in the highest position.

Power and Data Strip

Powerstrip with cord and worksurface bracket

Powerstrip with cord and Post and Beam fence bracket

Powerstrip with cord and slatwall bracket

Powerstrip with modular harness with Post and Beam fence bracket

Powerstrip includes three simplex receptacles and space for customer-supplied voice/data outlets.

Bracket attaches to slatwall.

Product Details

Power and data strip provides additional electrical and voice and data receptacles.

Power and data strips are field-installed on post and beam fence, a worksurface, or on slatwall. Specify appropriate attachment bracket depending on application.

Power and data strip worksurface bracket attaches to worksurfaces $5\frac{9}{64}$ " to $1\frac{5}{8}$ " thick.

Wiring & Cabling

Available with either an 8'-long cord with plug or with a 6'-long modular harness with wiring configurations of 3+1, 2+2, and separate neutral.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Height	3"

Stability Guidelines

Post and Beam, when properly installed, is designed to be a very stable furniture system. Adherence to the guidelines presented here will allow you to efficiently plan stable solutions. To ensure safe performance and maximum stability, the installation instructions that accompany each furniture shipment must be followed.

Post and Beam requires a minimum of an L-configuration (90° or 120°) for stability, consisting of three posts and two beams.

Small post base applications require a minimum of 5 foot beams in each direction for stability. Maximum length is 16 feet and then another return is required.

Large post base applications require a minimum of 3' 4" beams in each direction. Maximum length is 16 feet and then another return is required.

"L" configurations with shelves on the outside of the "L" or capsule workspace must use large foot and be attached to the floor. Consult with project's architect or structural engineer to determine floor construction and proper attachment hardware.

Beam attachment to Answer, Montage, and Kick is at desk height. See each panel solution's specification guide for fence connector and stability guidelines.

Exception: Fence connector and stability guidelines for use on Kick are not included in the Turnstone Specification Guide. Use connector CFENCELC or CFENCERC and Answer stability guidelines when attaching fence to Kick.

Building Code Compliance. Consult with local building code officials for specific code requirements applicable to your installation. Some jurisdictions may have seismic or other requirements that make it necessary to attach Post and Beam to the building's structure. Consult with the project architect or structural engineer to determine building construction and proper attachment means. Steelcase has obtained an engineering report from a structural engineering firm, Critical Structures, calculating seismic demands for certain applications. This report is available to aid project architects and structural engineers.

Minimum of two 5 foot returns are required at the posts using premium white-board infill, for both small and large post base applications.

Wiring Schematics

Details for the Electrician

Wiring Schematics

Post and Beam

Post and Beam offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

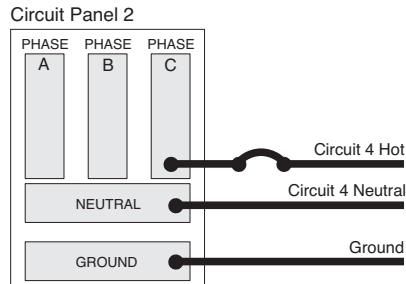

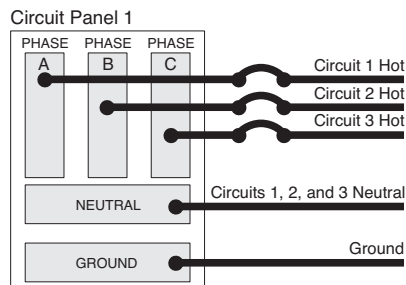

Rust = Three-circuit, separate neutrals (3SN)

Shared neutrals = 10 gauge

Non-shared neutrals = 12 gauge

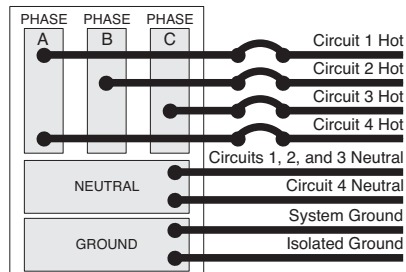

Hot wires = 12 gauge

Four-Circuit, 3+1

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase
Circuit Panel

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate Neutrals

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase
Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 10 receptacles on each 15-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in and 40 receptacles for each 4-circuit power-in.

Each Post and Beam technology hub includes nine simplex receptacles.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) or 80 amps (20 amps times 4 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Requirements of Office Equipment in Amps

General Equipment (Typical Amperage)

A.C. adapter	0.05
Adding machine	0.05
Answering machine	0.08
Calculator	0.025
Clock	0.03
Coffee pot	10.00
Copy machine	15.00
Desk-top copiers	7.00 to 10.00
Electric eraser	0.25
Fan	0.50
Manuscript holder	0.75
Microwave	8.00 to 12.00
Pencil sharpener	0.25
Radio	0.05
Space heater, 1000 watts	8.50
Space heater, 1500 watts	12.50
Stand-alone copiers	15.00

Electronic Equipment (Typical Amperage)

Desk-top memory storage devices	0.08 to 0.15
Desk-top printers	1.20 to 2.00
DVD players	0.13 to 0.20
Flat-panel screens	3.50
Laptops	3.50 to 5.00
Modems	0.15
Stand-alone printers	1.50 to 2.50

Dimensions for Harnesses

Dimensions for Harnesses

Termination hub at desk height

Termination hub at standing height

Pass-through hub at desk height

Pass-through hub at standing height

Termination hub to fence
27" harness on hub extends 12" into adjacent fence

Pass-through hub to fence
33" harness on pass-through hub extends 18" into adjacent fence and 27" harness extends 12"

Overhead beam to floor
Allow 93" of harness from beam to floor

Overhead beam to desk-height fence
Allow 70" of harness from beam to fence at desk height

Overhead beam to standing-height fence
Allow 62" of harness from beam to fence installed at standing height

Passing over a perpendicular beam requires an extra 1" of harness length.

Passing from an overhead beam trough to a vertical post tube reduces the harness length by 1".

How to Calculate Modular Harnesses for Post and Beam Installations

Implementing Post and Beam requires careful planning. To ensure you have the most effective installation, with the appropriate length of harnesses, follow the steps outlined below.

1

First, you'll need a drawing that shows the layout of the Post and Beam components with accurate dimensions of individual posts, beams, and fences and the locations of any hubs.

2

Find the fixed points in your layout—the points you're trying to connect. In this example, the infeed from the building and the two hubs are fixed points.

3

Calculate the total distance between each pair of fixed points. Include both the horizontal and the vertical dimensions.

- ▶ See page 12 for post and beam dimensions.
- ▶ See page 17 for harness dimensions.

4

Determine power route strategy. You can bring power to the hubs by linking modular harnesses. There may be several alternative ways to route power to the hubs. Plan your run to minimize the distance harnesses must travel.

Tip: If you have the freedom to move the infeed point, you may be able to reduce the travel distance. Although it did not help in this example, it was worth considering.

5

Take advantage of branching connectors to shorten the route. Branching can eliminate the need to double back and cover the same path twice.

Tip: Avoid branching too soon since that can double the harness lengths required. Branching connectors do not fit in vertical post tubes.

6

Determine the number of infeeds needed. A single power infeed can accommodate only four hubs and 36 outlets. Plan additional infeeds for large installations.

7

Calculate harness lengths.

8

Specify multipurpose power infeed.

9

Specify harness lengths that slightly exceed the lengths required in your calculations. For example, if your calculations say you need a 72" harness, you'll generally round up to the next available size—76".

You may find it useful to draw a picture of each segment of the route.

10

The longest harness length available is 12' (144"). For longer runs, you can link multiple harnesses together. As a general rule, you'll want to minimize connections. Remember that you'll need to specify and use harness-to-harness connectors to make these links. The harness-to-harness connector has no effect on the length of the harness you'll need.

11

Specify harness connectors to connect to hubs.

12

You may want to calculate the cost of components for two or more alternative layouts to determine which will cost less. This approach is especially useful for large or repetitive installations where simplifying the route can have a big effect.

Utility Planning Example

1

Complete layout.

See drawing above.

2

Find fixed points.

In this example, the fixed points are the infeed point and the three hubs.

3

Determine the number of infeeds needed.

In this example, because there are only three hubs, it is possible to use a single infeed.

Tip: If you have more than four hubs, plan additional infeeds.

4

Determine overall strategy.

To minimize the distance harnesses must travel to bring power to the hubs, try to run harnesses from the infeed point to hubs near the center of your installation, then use branching connectors to allow harnesses to reach outlying hubs.

In this example, the infeed point is near hub 1, which is toward the center of the installation. Hub 1 should be a pass-through hub to allow the power run to continue. Then, to minimize cost, you should take harness run 2 down the center beam as far as possible and then use a branching connector to create two separate runs—one from the branching connector to hub 2 and the other in the opposite direction to hub 3. If you avoid branching too soon, a branching connector can help you minimize redundant harnesses. Hubs 2 and 3 can be termination hubs.

5

Calculate harness run 1.

To reach hub 1, the first harness run must be 174" ($48" + 96" + 30"$ = beam + beam + vertical distance) to reach the 27" hub harness. Combine any number of harnesses that add up to this number or slightly greater. Example: 12' (144") harness + 32" harness = 176". You will need two harness-to-harness connectors. The first harness-to-harness connector joins the two harnesses, and the other connector connects to the 27" hub harness.

► See *Dimensions for Harnesses*, page 17

To specify the components in harness run 1, order:

Quantity	Style Number	Description
1	GSGUFMH12X	12' hardwire multipurpose power infeed
1	GSGUH32X	32" modular harness
2	BHHCX	Connector
1	BPMFH123XX	Pass-through hub

6

Calculate harness run 2.

Harness run 2 is a special calculation. Ideally, this harness would run from hub 1 to the branching point (B), then split to run in opposite directions to the remaining hubs. That ideal path would require a 16' (192") harness ($24" + 168"$ = vertical distance + beam), but no modular harness is that long. Instead, use a 12' (144") harness and a 50" harness followed by a branching harness-to-harness connector. A connector is needed between the 32" hub harness and the 12' harness and another between the 12' harness and the 50" harness.

► See *Dimensions for Harnesses*, page 17

To specify the components in harness run 2, order:

Quantity	Style Number	Description
1	GSGUH144X	144" (12') modular harness
1	GSGUH50X	50" modular harness
2	BHCCX	Connector
1	GQTUHCX	Branching connector

7

Calculate harness run 3.

To reach hub 2 from the branching connector, the second harness run must be 168" ($138" + 30"$ = beam + vertical distance) to reach the 27" hub harness. Start with a 12' (144") modular harness. The remaining distance is 24". Order a 28" harness. You will need two harness-to-harness connectors. The first harness-to-harness connector joins these two harnesses together and the other connects to the 27" hub harness.

► See *Dimensions for Harnesses*, page 17

To specify the components in harness run 3, order:

Quantity	Style Number	Description
1	GSGUH144X	144" (12') modular harness
1	GSGUH28X	28" modular harness
2	BHCCX	Connector
1	BTMPH123X	Termination hub

8

Calculate harness run 4.

To reach hub 3 from the branching connector, the third harness run must be $252''$ ($144'' + 84'' + 24'' = \text{beam} + \text{beam} + \text{vertical distance for standing-height termination hub}$) to reach the 27" hub harness. Start with a 12' (144") modular harnesses. The remaining distance is 108". Order a 120" harness. You will need two harness-to-harness connectors. The first harness-to-harness connector joins the two harnesses together and another connector connects the harness to the hub harness.

► See *Dimensions for Harnesses*, page 17

To specify the components in harness run 4, order:

Quantity	Style Number	Description
1	GSGUH144X	144" (12') modular harness
1	GSGUH120X	120" modular harness
2	BHCCX	Connector
1	BTMPH123XX	Termination hub

9

Specify cable management components.

Beam troughs, post tubes, and corner troughs are needed to accommodate modular harnesses and cables routed vertically and horizontally throughout each installation. In the example, the following components would be specified:

Quantity	Style Number	Description
1	BWSTK	Wall start kit for trough
1	BBPT048	Horizontal overhead beam trough
1	BBPT084	Horizontal overhead beam trough
1	BBPT096	Horizontal overhead beam trough
2	BBPT144	Horizontal overhead beam trough
1	BBPT168	Horizontal overhead beam trough
11	BTJ090	90° corner trough
3	BTJI	Beam filler trough
2	BXTLHT52	Vertical post tube for desk-height hub to trough applications
1	BXTHHT45	Vertical post tube for standing-height hub to trough applications

Thought Starters

Planning with Power Strips

The following illustration is provided to assist in planning of Post and Beam products with power strips.

► Specifying power strips, page 179

Instructions to Create a Post and Beam Curtain

Instructions to Create a Post and Beam Curtain

► Specifying, page 136

Measuring

Determine the width of the curtain by measuring the distance between the two posts where the curtain will be installed. Add 4" to this width measurement to allow for 1" double side seams on both sides.

Determine the height of the curtain by measuring the distance from the underside of the beam to the floor. Add 13" to allow for a 2½" top double heading and a 4" bottom double hem. From the resulting number, deduct 2" to arrive at the finished height. This allows 1" of space between the top of the curtain and the underside of the beam and approximately 1" from the bottom of the curtain to the floor. This 1" measurement will align the bottom of the curtain with the bottom of the post.

Tip: If you want the bottom of the curtain to be at some other height, adjust these dimensions accordingly. A full-length curtain is 82.5".

Items Needed

- Curtain hooks ordered from Steelcase. Style number **BCH** includes 20 hooks. Allow at least one hook every 6".
Note: There is a three-pound maximum weight per curtain hook.
- ½" inside diameter grommets. Allow one for each hook.
- Sausage bead weights, if necessary
- Medium-weight drapery crinoline, 2½" wide
- Drapery fabric

Production Steps

1. Joining fabric

If the curtain must be wider than the fabric you are using, join pieces together with flat felt seams.

2. Side hems

Double fold and sew a 1" straight-stitch hem for each side.

3. Bottom hem

Double fold a 4" hem, install sausage bead weights, if necessary, and sew using a blind-stitch seam.

4. Top heading

Double fold a 2½" top heading and install a 2½" crinoline stiffening band.

5. Grommets

- Mark the positions of all grommets as described below and make any spacing adjustments before you begin installing them.
- Install all grommets 1¼" from the top of the finished curtain to the center of the grommet.
- Install the first and last grommet 1½" from the side of the curtain to the center of the grommet.
- Install the remaining grommets equally spaced approximately 6" apart.

Legs and Tether Bracket for Universal Tables

Universal Tables

Universal tables can be used in a variety of individual and team settings. ▶ Specifying tables, pages 142–163

Table top has a wood core with a High-Pressure Laminate or wood veneer surface and is 1³/₁₆" thick.

Radius corner eliminates sharp edges and is appropriate for freestanding, mobile furniture.

Edge profile is continuous around all edges of the table.

Product Details

High-Pressure Laminate Tables

Continuous edge profile is available in two shapes.

3 mm edge profile P-edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and 7 wood grain finishes. See surface material listing in this book for specific PVC-free availability.

P-edge profile rises slightly above the laminate surface and curves into a 3/8" radius, which optimizes ergonomic benefit for the user.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Tables

Edges of worksurfaces are available in square (3 mm) profile.

Square (3 mm) edge profile

Square (3 mm) edge profile is achieved by adding wood veneer surfaces to table core. This technique can be applied to tables that are straight or curved.

Connections

Universal Tables are freestanding and are supported by legs or bases, which are ordered separately and installed in the field.

Use the Table and Base Combinations matrix to determine the type and number of bases you need to order for the table you choose. Not all sizes and shapes of tables can be supported by bases.
▶ Page 48

Use the Table and Base Combinations matrix to determine the type and number of legs you need to order for the table you choose.
▶ Page 48

Most Universal Tables can be tethered to Post and Beam fence.
▶ See *Tether Bracket Locations*, page 51.

Reinforcing channels are available to support tables that are wider than 60"W and supported by legs. When installed, the channels add 1" below the table. Channels are available as an option on larger tables and are field installed. Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table will be supported by T- or X-bases.

Underside of table has inset locations that support slip-fit and nesting applications. Cabby legs can be positioned in a 45° or 90° orientation. Post legs are positioned in 45° orientation only.
▶ See *Table Leg Positions*, page 50.

Legs installed in a 90° orientation allow for greater storage and knee-space below the table.

45° leg orientation is a preferred aesthetic for many customers. Cabby legs installed at a 45° orientation will appear to have more curvature when viewed from the front edge of table.

Legs may be installed inset from the edge of the table to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the table to the edge of the leg. Amount of slip-fit varies by table shape and size.
▶ See *Table Leg Positions*, page 50.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Table with 28 1/2"H legs installed at 6" or 9" inset can slip over adjacent table that are supported with 26"H legs.

Adjustable-height legs adjust 25 1/2"H to 31 1/2"H in 3/4" increments. Legs can be used to support the table in a standard height or nesting application.

26"H legs allow tables to nest underneath an adjacent table with 28 1/2"H legs or a panel-mounted worksurface.

Universal Tables, continued

Spanner table enables conferencing at the end of two tables that are placed back-to-back.

52"W or 64"W spanners should be used when tables are separated by a panel or Post and Beam. These widths are designed to create a 4" gap. Answer, Montage, and Kick panels may be used, but will result in a more loose fit between components.

Surface Materials

High-Pressure Laminate Tables

- Laminate
 - ▶ See *Surface Materials Reference Manual*.
 - Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.

▶ See *Surface Materials Reference Manual*.

Wood Veneer Tables

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match table

Application Topics

Table Fit in Panel Environments:

Dimensions on straight and transition tables are 1/4" less than nominal dimension. This allows for an easy fit of Universal tables in panel-wrapped environments and allows tables to move in and out of the area with ease.

Example: A 48"W x 72"W corner is actually 47³/₄"W x 71³/₄"W.

Mobile pedestals up to 24¹/₂"H will fit under 26"H tables without reinforcing channels.

Mobile pedestals up to 27"H will fit under 28¹/₂"H tables without reinforcing channels.

Tables with reinforcing channel will reduce the available space by 1".

Screens can be used on corner, 120° tables.

- 24"W screens can be used on tables with dimensions C and D each equal to 43".
- 24"W and 30"W screens can be used on tables with dimensions C and D each equal to 49".

Tip: Corner, 120° tables with dimensions C and D each equal to 37" cannot accommodate screens.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized (replace worksurface with table as appropriate).

Tethered Capsule Tables

For Use with Post and Beam

Tethered capsule

tables are for use with Post and Beam products only in transaction and teaming applications.

► Specifying tethered capsule tables, page 157

Table has a wood core with a High-Pressure Laminate or wood veneer surface and is 1³/₁₆" thick.

Edge profile is continuous around outside edges.

Tip: Specify two hub spanners for mobile teaming environments when a permanent connection is not desired.

Actual Dimensions

Tethered Capsule Tables

Tethered Capsule Tables, continued

Application Topics

Specify two hub spanners for mobile teaming environments when a permanent connection around a Post and Beam column and hub are not desired.

► Page 42

Tethered capsule tables can be used in Post and Beam applications with different-height posts or same-height posts.

Tables with one cutout are recommended for use with the following beams in different-height post applications:

Table Style Number	Corresponding Beam Width (minimum)
BFFF661	3½"W (BB042)
BFFF721	4"W (BB048)
BFFF841	5"W (BB060)
BFFF961	6"W (BB072)

For same-height post applications, tables with one cutout are recommended for use with the following beams:

Table Style Number	Corresponding Beam Width (minimum)	Clearance Gap
BFFF661	5"W (BB060)	3.1"
BFFF721	6"W (BB072)	9.1"
BFFF841	7"W (BB084)	9.1"
BFFF961	8"W (BB096)	9.1"

Tables with one cutout can also be used in applications where the beam width exceeds the worksurface width.

Tables with two cutouts are for use on 6"W beams only (style number BB072).

► Page 48

Shipping

Bases are shipped knocked down (K.D.) and will require assembly.

Legs and Tether Bracket for Universal Tables

Legs attach to a table to make it freestanding or tethered to Post and Beam.
 ▶ Specifying, page 159

Alignment tab helps installers locate proper leg position under the table.

Cabby leg and adjustable-height legs are available with locking casters or glides.

Tether bracket is an individual support and must be specified when a work-surface will be tethered to Post and Beam.

Adjustable-height leg adjusts from 25½"H to 31½"H in ¾" increments.

Elliptical leg is available in glide version, either nesting or desk-height.

Post legs are available with non-locking casters or glides.

Double post C-leg is an individual support and is used at the ends of a table.

Leveling glides, included, allow table height to be adjusted on uneven floors.

Product Details

Legs support tables at 26"H or 28½"H overall, including table thickness.

Table legs and tether brackets are ordered separately and installed on site.
 ▶ See *Table and Leg Combinations*, page 49.

Table legs and tether brackets are non-handed to accommodate left- and right-hand applications.

Table legs cannot be used in a shared application with two tables. Radiuses corners do not provide enough attachment space for leg plate. When a shared leg application is required, order Universal Systems Worksurfaces.

Actual Dimensions

Tether bracket	Cabby leg leg	Adjustable-height leg	C-leg	Elliptical	Post leg	Double post
Height* (standard)	N.A.	26" or 28½"	25½"–31½"	26" or 28½"	26" or 28½"	28½"
Glide range, for legs equipped with glides	N.A.	¾"	¾"	5/8"	¾"	5/8"

*Height dimensions include the thickness of a table.

Cabby legs can be installed in either a 45° or 90° orientation on most tables. Elliptical leg installed in the first inset position may only be in a 45° orientation. Post legs can only be installed in a 45° orientation.

► See *Table Leg Positions*, page 50.

Legs installed in a 90° orientation allow for greater storage and knee-space below the table.

45° leg orientation is a preferred aesthetic for many customers. Cabby legs installed at a 45° orientation will appear to have more curvature when viewed from the front edge of table.

Legs may be installed inset from the edge of the table to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the worksurface to the edge of the leg.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Alignment tab corresponds to under worksurface alignment slots in tables. Alignment features ensure legs are installed in the proper 45° or 90° orientation and slip-fit position.

Table with 28½"H legs installed at 6" or 9" inset can slip over adjacent tables that are supported with 26"H legs.

Adjustable-height legs adjust 25½"H to 31½"H in ¾" increments. Legs can be used to support the table in a standard height or nesting application.

26"H legs allow tables to nest underneath an adjacent table with 28½"H legs or a panel-mounted worksurface.

For Montage applications with a combination of panel-mounted and tethered or free-standing worksurfaces with legs, the worksurface(s) supported by legs will not reach the same height as the cantilevered worksurface if panel glides are extended more than ¼". Standard Montage worksurface height is 28⅝"H when panel glides are at zero. Legs adjust up to 28⅞"H.

Capsule Tables	④ 	
Peninsula Tables	④ 	
Tapered Peninsula Tables	④ 	
Bubble Jetty Tables	⑤ 	<i>Tip: Double post C-leg can only be applied to the square end of bubble jetty tables.</i>
Oval Tables, up to 36"D x 72"W <i>Tip: Oval tables 21"D x 42"W and 30"D x 42"W may only use legs with glides. Legs with casters may not be used on these table sizes.</i>	④ 	

► See *Post and Beam Solutions Specification Guide* for tethered capsule tables support information.

Tip: Hex conference tables and oval tables 42"D x 78"W and larger, can only be supported with T-bases.

① = Number of legs to order.
Blank spaces in matrix designate table and leg combinations that are not valid.

Table Leg Positions

Table leg positions

allow for slip-fit and nesting capabilities. Both 45° and 90° angled leg positions are available on most tables.

However, certain tables accommodate either 45° or 90° angled positions only. Leg positions on the underside of tables are shown at right.

Legs installed in positions 1, 2, or 3 will vary in their distance from the work-surface edge:

Position 1 is 3" from edge

Position 2 is 6" from edge

Position 3 is 9" from edge

Tip: Positions 2 and 3 are not available on every table.

Tether Bracket Locations

For Post and Beam

Tether bracket pilot holes are indicated on the tables below. Some tables are available with tether holes only on certain widths.

Table can span the junction of two beams connected by a post.

Round tables cannot tether to Post and Beam fence.

Tables tethered to Post and Beam fence are shown next to each tether bracket pilot hole illustration. Leg locations are also shown.

Gap between table and beam allows cables to pass from table to horizontal trough.

• = Tether bracket pilot hole location

Straight Tables

Planning with Post and Beam

Post and Beam dimensioning must be thoroughly understood for proper planning. Nominal dimensions are center-to-center of post. Table space is less than nominal. Full overall width dimension is more than nominal (see drawing below).

For example, a 72"W table will not fit the span of a 6' beam. Use a 66"W table in this space.

The connector is handed to make this attachment on either the left- or right-hand side of the frame.

Connector occupies vertical slots in the frame 32 1/2" measured up from the bottom edge of the base trim.

Connector is mounted within the module width of the frame. Horizontal space within that frame is reduced by 1 1/2".

Width of panel-mounted worksurfaces is affected by this change in module.

Beam attachment to Answer, Montage, and Kick is at desk height. See each panel solution's specification guide for fence connector and stability guidelines. *Exception: Fence connector and stability guidelines for use on Kick are not included in the Turnstone Specification Guide. Use connector CFENCELC or CFENCERC and Answer stability guidelines when attaching fence to Kick.*

Tether brackets can be used to side support tables.

Use of tether brackets as side supports further reduces horizontal space available by 1 1/2" each side and affects planning of mounted tables.

Use of connector and tether brackets reduce horizontal space available by 3" on one side (same side as handedness of connector, i.e. right-hand connector causes right side table to be 3" shorter). The adjacent (left side) table would need to be only 1 1/2" shorter.

Gap between beam and table is 1 1/2" and allows cords and cables to drop behind the table.

For Montage applications with a combination of panel-mounted worksurfaces and tethered tables with legs, the table(s) supported by legs will not reach the same height as the cantilevered worksurface if panel glides are extended more than 1/4". Standard Montage worksurface height is 28 5/8" H when panel glides are at zero. Legs adjust up to 28 7/8" H.

Posts do not interfere with the location of a table since tables can span a post.

Vertical post tubes prevent a table with a 2" or 4" radius edge, such as a straight table from fitting tightly into the corner of a Post and Beam application.

To achieve a tight fit in the Post and Beam application:

- Relocate the vertical post tube to outside of the workstation.

Extended corner tables are recommended for applications where there must be a vertical post tube in the workstation.

Understanding Workspace Screens

	
Statement of Line	58

Workspace Screens	60

Statement of Line

Worksurface Screens

15"H Knit Screen

Understanding
▶ Page 60
Specifying
▶ Page 166

	20 ¹ / ₄ "W	26 ¹ / ₄ "W	32 ¹ / ₄ "W	38 ¹ / ₄ "W
15"H	●	●	●	●

Worksurface Screens

Screens provide light-weight space division. All screens mount in two positions for either desktop privacy or below worksurface modesty. Available in four widths.

► Specifying screens, page 166

Foot mounts to top of clamp for desktop privacy, or mounts to underside of clamp for modesty. Clamps are ordered separately.

Product Details

15"H screens mount to worksurfaces in privacy position or below the worksurface for modesty. In privacy applications, the overall height of the screen from the floor is 43 1/2"H.

Actual Dimensions

15"H Knit Screen

Screen width	20 1/4", 26 1/4", 32 1/4", or 38 1/4"
Overall width	21 1/2", 27 1/2", 33 1/2", or 39 1/2"
Height	15"

Tip: Overall width includes the width of both clamps.

Gap between 15"H screen to top of worksurface is 1".

Gap between bottom of worksurface to 15"H screen is 1 1/2".

Connections

Clamps allow attachment to worksurfaces 1 1/8" to 1 3/16" thick, which include Universal Worksurfaces, Tables, Answer and Ellipse worksurfaces. Clamps cannot be used with Series 9000 and Avenir 1 1/2" thick worksurfaces.

Clamps are specified as a pair and ordered separately from the screen.

15"H screen mounts to the top or bottom of the clamp.

Multiple screens can share clamps that attach to a worksurface.

Three clamps can be used to support screens of various sizes.

15"H screens can be applied to the side of a worksurface.

For corner privacy applications where 15"H screens are desired on the back and side of the worksurface, the screen for use on the side of the worksurface should be specified 6" smaller. For example, a 30"D x 42"W worksurface with a 38 1/4"W x 15"H screen on the back, requires a 20 1/4"W x 15"H screen on the side.

Screens can be planned to match the width of the worksurface. However, if worksurfaces are slip-fit, screen sizes must be planned accordingly.

For corner, 120° worksurface applications, the following screens can be used:

- 20 1/4"W screens can be used on worksurfaces with dimensions C and D each equal to 43".
- 20 1/4"W and 26 1/4"W screens can be used on worksurfaces with dimensions C and D each equal to 49".

Tip: Corner, 120° worksurfaces with dimensions C and D each equal to 37" cannot accommodate screens.

Surface Materials

Vertical surface fabric

Applies to knit screen:

- B902 Soft White
- B903 Fog
- B904 Sand

Screen frame and foot

- 4799 Platinum only

Clamp

- 4799 Platinum only

Clamp adjustment knob and cover

- 7237 Slate only

Application Topics

15"H screens can be used on fences in Post and Beam applications. For attachment hardware style number and additional information.

Internode Power and Communication Components

Internode components

provide external routing and access of power and communication to core units.

► Specifying, page 168

Mounting bracket

attaches power or communication modules to the underside of a worksurface.

Convenience tri-receptacle

houses three black receptacles. It is designed to sit on a worksurface or attach beneath it.

Power module is a power block inside a metal housing. It accepts modular receptacles.

Modular harness connects power modules.

Receptacles are ordered separately and installed on site. They are coded to indicate which circuit and type of ground they engage.

Block-to-block connector joins adjacent power modules.

Cover closes the opening when receptacles are not used.

Communication module accommodates any NEMA or modular furniture faceplate.

Actual Dimensions

	Mounting bracket	Power module	Modular harnesses	Block-to-block connector	Communication module	Convenience communication outlet housing	Convenience tri-receptacle
Depth	4"	3"	N.A.	13/16"	3"	23/4"	23/4"
Width	10"	10"	N.A.	15/8"	5"	51/4"	51/4"
Height	11/2"	31/2"	N.A.	115/16"	4"	21/2"	21/2"
Harness length	N.A.	N.A.	12" to 144"	N.A.	N.A.	N.A.	72"
Power cord length	N.A.	N.A.	N.A.	N.A.	N.A.	N.A.	96"

Product Details

Power module accommodates up to four duplex receptacles—two on each side. Covers are included for each side to fill the openings when receptacles are not used. Available in 4-circuit, 3+1; 4-circuit, 2+2; and 3-circuit, separate neutrals.

Tip: Power module is attached to the mounting bracket or another power module.

Receptacles for power modules snap into power blocks. Tools are not required for installation. Specify a specific circuit, either line 1, 2, 3, or 4.

Communication module is a metal housing that supports NEMA or modular furniture faceplates. Faceplates are located on one side of the module.

Tip: The communication module can be attached to a power module, mounting bracket, or directly onto underside of worksurface.

Convenience tri-receptacle with modular harness draws power from the end of a power module or a power block. Above-worksurface clamp kit is included for attachment to the worksurface. Below-worksurface mounting bracket can be ordered separately. Specify a specific circuit, either line 1, 2, 3, or 4.

Convenience tri-receptacle with cord and plug has an 8' cord to draw power. Order mounting hardware separately.

Convenience communication outlet housing supports customer-supplied modular furniture faceplates. It is designed to sit on a worksurface using the above-worksurface clamp kit (accessory rail pins) or attach beneath the worksurface using the below-worksurface mounting bracket. Order mounting hardware separately.

Modular harness must be specified to route power between two power modules.

Power can branch in up to three directions from a power module.

Harness-to-harness connector is available to join harnesses and extend the length of a run. It can join up to four modular harnesses.

Block-to-block connector joins adjacent power modules.

Connections

Mounting bracket

attaches power or communication modules to the underside of a worksurface. Power module can be ordered with or without a mounting bracket. Communication module is standard without a mounting bracket. Mounting bracket can be ordered separately.

Tip: Communication module can also be installed directly to the underside of a worksurface without using a mounting bracket.

Vertically stack power and communication modules to increase the number of receptacles and communication outlets beneath a worksurface. Order a 22" modular harness to extend power to the stacked module.

Tip: Two communication modules can be attached beneath a power module.

Tip: If two power modules are stacked, it is recommended the communication modules are placed beside the power modules instead of adding them below.

Horizontally connect power and communication modules to increase the number of receptacles and communication outlets beneath a worksurface. Order a block-to-block connector to join adjacent modules.

Attach convenience tri-receptacles separately to worksurface with above-worksurface clamp kit.

Cord and cable manager attaches to the underside of a worksurface or the mounting bracket to help organize and store cords and cables.

Harness clip attaches to the underside of a worksurface to route and manage modular harnesses. Clips can also help keep excess harness or multipurpose power infeed length off the floor.

Below-worksurface mounting bracket mounts convenience tri-receptacle or a convenience communication outlet housing to the underside of a worksurface.

Multipurpose power infeed brings power from the ceiling, wall, column, or floor and connects to a power block.

Wiring & Cabling

Internode floor power infeed includes flexible liquid-tight harness that brings power from the monument in the floor of the building to an Internode power module.

Tip: Floor power infeed cannot be used in New York City. Use a multipurpose power infeed instead.

Power and Data Strip

**Powerstrip with cord
and worksurface
bracket**

Powerstrip includes three simplex receptacles and space for customer-supplied voice/data outlets.

**Powerstrip with cord
and slatwall bracket**

Bracket attaches to slatwall.

Product Details

Power and data strip provides additional electrical and voice and data receptacles.

Power and data strips are field-installed on either a worksurface or on slatwall. Specify appropriate attachment bracket depending on application.

Power and data strip worksurface bracket attaches to worksurfaces $59/64$ " to $15/8$ " thick.

Wiring & Cabling

Available with an 8'-long cord with plug.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power and data strip

- 8043 Clear Anodized Aluminum cover with black faceplate

Attachment brackets

- 4799 Platinum paint only

Actual Dimensions

Depth	2 $\frac{1}{4}$ "
Width	10 $\frac{1}{4}$ "
Height	3"

Power and Communication Spheres and Port

Power and communication spheres and port

provide convenient desktop access to power outlets and data jacks. Spheres and ports are field installed only.

Power spheres have four electrical outlets and two 6' cords with plug or conduit for hardwired applications.

► Specifying, page 180

Power and communication spheres provide two electrical outlets, faceplates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.

► Specifying, page 180

Communication sphere includes faceplate for four customer-supplied voice/data jacks.

► Specifying, page 181

Power and communication port has a low-profile cover that is almost flush with worksurface.

► Specifying, page 181

Power and communication port includes two outlets and two adapters to accommodate customer-supplied standard voice/data jacks.

Product Details

Power and communication spheres are field installed. Use a 3"-diameter drill to cut mounting hole at desired location.

Power and communication port contains an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Port is field installed. Use a 3 1/2"-diameter drill to cut mounting hole at desired location.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Hardwired version of power and communication sphere is available with 6' Greenfield conduit.

Tip: Hardwiring must be done by a licensed electrician.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power spheres, communication spheres, and round power and communication port

- Black plastic only

Power/Data Boxes

► Specifying, page 182

Product Details

Power data boxes, ordered separately, provide additional electrical outlets and voice and data receptacles where needed. Power/power, power/data, and data/data versions are available. Boxes are field-installed and can be mounted to the underside of worksurface anywhere access to power and data is needed.

Surface Materials

Box

- Black paint

Actual Dimensions

Depth	3"
Width	3"
Height	1"

Field-Installed Round Grommet

► Specifying, page 182

Product Details

Field-installed round grommet, ordered separately, provides wire and cable management for worksurfaces.

Surface Materials

Round grommet

- Black paint
- 4799 Platinum
- 9201 Polished Chrome
- 9211 Nickel

Actual Dimensions

Depth	2 1/2"
Width	2 1/2"

Vertebral Cable Riser and Extension

► Specifying, page 183

Product Details

Vertebral cable riser, ordered separately, attaches to underside of worksurface to accommodate wires vertically. Extension can be added for increased wire management. Extension does not include attachment hardware or floor plate.

Surface Materials

- Riser: black plastic
- Floor plate: Metallic Aluminum only

Actual Dimensions

Length	31 1/2"
Extension length	15 3/4"

Cable and Fiber Reel

Cable and fiber reel is available to store excess fiber-optic cable lengths. It is also suitable for storing power cables.

► Specifying, page 183

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the kneespace of free-standing desks or panel-supported worksurfaces.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Reel

- Black plastic only

Actual Dimensions

Depth	1 1/4"
Width	8"
Height	8 5/16"

Termination Plate

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.

► Specifying, page 183

Bracket allows termination plate to be connected to worksurface.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Opening provides access to a termination device.

Actual Dimensions

Depth	3/4"
Width	7 1/8"
Height	7 1/8"
Center opening	2 3/4" diameter

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Termination plate

- Black plastic only

Cord Reels

► Specifying, page 184

Product Details

Cord reels, field installed under the worksurface, take up excess cord or cable.

Surface Materials

Cord reel
• Black paint

Cable Storage Tray

► Specifying, page 184

Product Details

Cable storage trays, field installed under the worksurface, hold cables out of the way.

Surface Materials

Cable storage tray
• Black paint

Wire Guide Clips and Wire Clips

► Specifying, pages 184–185

Product Details

Wire guide clips and wire clips have an adhesive back to allow them to stick to painted metal components under a worksurface for routing and managing cords. Double clip can be screwed to the underside of a worksurface.

Surface Materials

Wire guide clips and wire clips
• Black plastic

Wire Manager

► Specifying, page 185

Product Details

Wire manager, ordered separately, organizes cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.

Surface Materials

Wire manager
• Black plastic

Actual Dimensions

Depth	1"
Width	3/4"
Height	25"

Understanding Universal Storage Products

When ordered and installed in accordance with Steelcase specification and installation guidelines, these products meet applicable ANSI/BIFMA standards.

Universal Pedestals

27"H fixed pedestals

are floor-standing and can support worksurfaces at 28½"H.

► Specifying, page 188

► Specifying *Storage Accessories*, page 231

Top is open and accommodates attachment to a worksurface. Attachment hardware is included.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 256

Leveling glides adjust to install pedestals on uneven floors. 25½"H pedestals have a 7⁄8" adjustable glide range, and 27"H pedestals have a 17⁄8" adjustable glide range.

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary work-surface when you need more space to spread out your work.

► Specifying, page 192

► Specifying *Storage Accessories*, page 231

Finished back and sides are standard.

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/ file pedestals and concealed with the base of box/box/file and file/file pedestals.

Drawer fronts are available in steel or wood veneer. Mobile pedestals maintain drawer pull and drawer front alignment with other storage components that have a 3" base.

Pull on proud-front pedestal is available in a variety of shapes.

3"H base is integral to 27"H pedestal case.

Pull on flush-front pedestal is full width and integral. This pull is available on steel drawer fronts only. Full-width wood pull is available as an option. Wood pull, if selected, ships separately from pedestal and is field installed, attaching to the integral pull with double-sided tape.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Top on mobile pedestal is 1⁄8"H steel. Additional top options are available.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Optional handle can be extended to easily transport mobile pedestal. Available factory- or field-installed.

► Specifying, page 194

Product Details

Box drawers are a welded steel construction and available with proud or flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction and available with proud or flush fronts. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders.

Exception: Legal-size file folders cannot be filed in 17½"D or 18¾"D pedestals.

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Actual Dimensions

	Fixed	Box/File	Box/Box/File and File/File
Depth with flush steel front	17½", 22½", and 28½"	17½" and 22½"	17½" and 22½"
Depth with proud steel or wood front	18¾", 23½", and 29½"	18¾" and 23½"	18¾" and 23½"
Width	15"	15"	15"
Height	25½" and 27"	N.A.	N.A.
Overall height with 1⁄8"H top	N.A.	21"	27"

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Optional basic drawer interior allows box/box/file pedestals to be ordered without rails, box drawer dividers, or pencil trays.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 128 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Label holders are available through Service Parts. Label holder fits inside the integral pull of flush-front drawers and over the top edge of drawer front on proud-front drawers.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 256

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 256

Non-locking pedestal is available as an option.

27"H fixed pedestals have base alignment with other Universal Storage components that have a 3"H base.

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops. 1"H steel tops, 1 3/16"H laminate with square edge profile, 1 7/16"H laminate with bullnose edge profile on the front edge, and 1 3/16"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for longer distance transport. Cushion top is also available without a handle.

Mobile pedestal cushion top for field-installation can be used with mobile pedestals RPM2421CP, RPM2421CF, and RPM2421CW only.

Connections

Fixed pedestals are intended to attach under a worksurface for security and support. Three pedestal depths are available to correspond with Universal Worksurface depths. Proud-front pedestals exactly match the depth of Universal Worksurfaces. Flush-front pedestals are 7/8" shorter.

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped.

Tip: Fillers for proud front pedestals conceal a 1/2" gap. Fillers for flush front pedestals conceal a 1 3/8" gap.

Pedestals may require counterweights when used in stand-alone desks. ▶ *See Desk Stability Guidelines*, in the *Answer Solutions Specification Guide*.

Freestanding applications that don't require attachment to a worksurface should be used with a conversion kit that includes a steel top, counterweight package, and components to convert the locking system to a safety interlock system.

▶ Page 190

Field-installed accessories are available, including pencil trays, stationery trays, dividers, and rails.

▶ Page 231

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Shipping

Pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Universal One-High and Two Drawer Lateral Files

One-High and Two Drawer lateral files serve

a dual purpose as high-density storage and as an inviting space for guests.

► Specifying, page 196

Finished back is standard.

Pulls on proud-front lateral files are available in a variety of shapes.

Drawer fronts are available in steel or wood veneer.

Lock is standard on lateral files and is located at top left corner of drawer. Locks are standard factory-installed, keyed random.

► Lock and Keying, page 256

Leveling glides adjust up to 3/4" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawers are standard 12"H and open full depth for total access to the contents.

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height.

Actual Dimensions

Depth with flush steel or open front	18" and 23 1/8"
Depth with proud steel or wood front	18 7/8" and 24"
Width	30", 36", and 42"
Height	16" and 28"

Top is standard 1"H steel on units with steel fronts and standard 1 3/16"H wood veneer on units with wood fronts. Other top options are available.

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

Tip: All base options have same overall height.

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Pulls on flush-front lateral files are full width and integral.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel only.

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately.
► Page 232

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.
► Page 231

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.
► Page 233

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
► *Lock and Keying*, page 256

Individual drawer locks are available as an option for an application that would limit access to each drawer. Lateral files include a security shield between drawers to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying are available. Field-installed lock cylinders must be specified separately.
► *Lock and Keying*, page 256

No-top lateral files are available for use with cushion top or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

FrameOne top matches the height of a FrameOne bench. A 3/4"H wood or laminate top floats above a painted steel security top using six black plastic spacers. FrameOne top can be specified on 28"H files only, making the overall height 28 1/2"H.

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. Thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately.
► Page 236

Connections

Tether bracket is used with One-High storage to add stability and eliminate the need for a counterweight when used with the c:scape beam.

Cushion top is ordered separately for use on one-highs without top.

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor or wall for stability.

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.

► Page 228

Field-installed accessories are available, including drawer accessories and counterweight packages.

► Page 231

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet. **Note: Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHDP) approved anchor bracket, contact Specials.

Tip: Anchor bracket cannot be used with pedestals.

► Page 236

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.

► See *Storage Specification Guide*

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent Connect
- Cricket
- Elmosoft Leather
- Hampstead
- Regis2
- Leather
- Vinyl

Cushion top will be manufactured in a two seam pattern on all standard upholstery not listed under the four seam pattern. All COMs including pattern or textured leather and vinyl, will be manufactured in a two seam pattern.

Application Topics

Storage Capacities and Dimensions

► See *Storage Specification Guide*

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

Universal Lateral Files

Lateral files are ideal for high-density paper storage.
 ▶ Specifying, page 202

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying, page 256

Base is 3"H and is integral to the case.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawer and lift-up door fronts are available in steel or wood veneer.

Pulls on proud-front lateral files are available in a variety of shapes. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Top is standard 1"H steel on units with steel fronts and standard 1⅜"H wood veneer on units with wood fronts. Other top options are available.

Drawers open their full depth for total access to the contents are standard 12"H.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pull on flush-front lateral file is full width and integral.

Product Details

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Actual Dimensions

Depth with flush steel front	18" and 23⅛"
Depth with proud steel or wood front	18⅞" and 24"
Width	30", 36", and 42"
Height	40", 52", and 65½"

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Tip: Your specification for optional drawer interiors will apply to all the drawers within a single lateral file.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately. ▶ Page 232

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately. ▶ Page 231

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately. ▶ Page 233

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door on lateral files with flush-front recesses inside the case; door on proud-front case lifts up above the case.

Lift-up door on flush-front cases is available with an optional roll-out shelf in place of the standard fixed shelf. Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 256

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Lateral files include a security shield above each drawer to prevent unauthorized access. In 65½"H cases, the lock in the drawer below controls the lift-up door in the top position. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 256

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case, attached to a worksurface, or bolted to the floor or wall. Counterweights can also be ordered separately. ▶ Page 236

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Wood veneer with square edge profile

Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza. ▶ Page 187

Field-installed accessories are available, including drawer accessories and counterweight packages. ▶ Page 231

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet. **Note: Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact *Specials*. *Tip: Anchor bracket cannot be used with pedestals.* ▶ Page 236

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

Universal Towers and Workstation Verticals

Towers provide storage of a variety of work and personal items for an individual, including paper, binders, books, and coats. ► Specifying, pages 206-225.

Finished back is standard.

Interior of tower is available in a variety of configurations combining coat storage, fixed and adjustable shelves, and file drawers.

Pull on flush-front tower is integral and full height on doors and full width on drawers.

Locks are standard on door and drawers. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike. ► *Lock and Keying*, page 256

Three base options are available on the Open Side Towers: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height. All other universal towers are available with the universal 3" base only.

Drawers open their full depth for total access to the contents.

Leveling glides adjust up to $\frac{3}{4}$ " for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install tower on uneven floors.

Top is standard 1"H steel. Other top options are available.

Door is available in steel or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior. Door is available hinged on left or right.

Locker space is 9" wide and standard with a coat rod.

Pull on proud-front tower is available in a variety of shapes.

Drawer fronts are available in steel or wood veneer.

Product Details

Depth with proud steel or wood front	18 $\frac{7}{8}$ ", 24", and 30"
Width	24"
Height	47 $\frac{1}{2}$ ", 52", and 65 $\frac{1}{2}$ "

Interior of tower combines coat storage, box and file drawers, fixed and adjustable shelves.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Door pull is 192 mm and drawer pulls are 128 mm. Proud-front pulls are available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Lift-up door is standard on 65½"H vertical drawer towers and workstation verticals, and includes a fixed shelf. Flush-front door recedes into the case and proud-front door lifts above case.

Adjustable shelves on 52"H and 65½"H open side towers are recessed from the front and side of the tower. Shelves adjust in 2½" vertical increments. Opening on 47½"H tower is 13½"H and does not come with an adjustable shelf.

Frosted glass adjustable shelves are available as an option on open side towers. *Tip: If glass shelves are selected, they will replace all steel shelves in the unit.*

Post on open side towers supports adjustable shelves and is painted to match the case.

Adjustable shelves in dual door and full front towers can be positioned in the interior of the tower in ¾" vertical increments using a reversible bracket. The first shelf above a file drawer is a fixed shelf.

Drawer accessories include one divider and one pencil tray in each box drawer. File drawers can accommodate front-to-back filing of letter-size hanging folders without the use of additional accessories.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawer locks are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 256

Drawer lock in open side tower is located in the top file drawer.

Drawer lock in dual door tower, full front tower, vertical drawer tower, and workstation vertical tower is located approximately 36" from the floor and also secures the lift-up door on 65½"H units.

Individual drawer locks are available as an option on workstation verticals for applications where you want to limit access to each drawer. Workstation verticals include a security shield above each drawer to prevent unauthorized access. In 65½"H towers, the lift-up door is controlled by the lock in the drawer directly below. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 256

Exception: Individual drawer locks are not available on towers with 6"H drawers.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ¾" taller than steel tops and will add that dimension to the overall height of the tower.

Top will default to steel on towers with proud wood fronts since the door overlaps and partially conceals the top. Wood top is available as an option.

Counterweight packages must be specified for certain towers that are not ganged to another tower or bolted to the floor or wall. Counterweights can also be ordered separately.

► Page 236

Door on full front towers is full height and can be hinged on the left or right. Coat storage space is always located on the same side as the door hinge.

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Towers can also be bolted to the floor or wall for stability.

Worksurface to tower alignment. Proud front towers align with 23½"D, 24"D, 29½"D, and 30"D worksurfaces. Flush front towers extend 7/8" beyond 24"D and 30"D worksurfaces, and 1/8" beyond 23½"D and 29½"D worksurfaces.

Field-installed accessories are available, including drawer accessories and shelf bookends.
▶ Page 231

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet. **Note: Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials. *Tip: Anchor bracket cannot be used with pedestals.*

Shipping

Towers are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field installed.

Universal Storage and Lateral Files

Stability of unit is assured if they are properly installed and loaded. To avoid personal injury, each unit with roll-out components is standard with an interlock system that allows only one drawer or roll-out shelf to be opened at a time. In addition, there are steps that must be followed to prevent the tipping of a unit.

Gang unit with adjacent units, either side-by-side or back-to-back, or bolt unit to the floor or wall for stability. Ganging hardware is included with each unit.

Order a counterweight package option if recommended on specifying page and freestanding unit is not ganged to adjacent units or bolted to the floor or wall.

Counterweight packages prevent accidental tipping when an upper drawer or shelf is opened. They are ordered as an option, shipped separately and field-installed.

Load files starting with the bottom drawers or shelves. The upper drawers or shelves should be loaded last. Load units with the heaviest contents at the bottom.

Follow the instructions that are shipped with the units to ensure that they are properly installed to provide safe performance.

Complete instructions for the safe installation and use of universal storage products are taped to the inside of the unit. Instructions include information about:

- Leveling files
- Ganging files together
- Counter-balancing files
- Removing and reinstalling drawers and shelves
- Moving files

A temporary, peel-off caution label is affixed to the front of the top drawer or door exterior.

A permanent caution label is affixed to the left side of the top drawer or roll-out shelf and is visible when the drawer or shelf is opened.

Safety information for storage cabinets, bookcases, and overfiles is included with the installation instructions that are shipped with the products.

Duo Tall Storage

Product Details

Two interior configurations of Tall Storage are available. Individual box has a ledge on one side and space for binder storage on the opposite side. Shared box is divided down the center with half ledge and half binder storage on each side.

Duo Tall Storage is non-handed. Orientation is determined at time of installation.

66"W and 78"W individual boxes have a center divider on the binder storage side for additional support.

Column height at shortest level is 29 7/8"H. Column will then adjust upward 3" for leveling.

Height from floor to top of box is approximately 45" in fence application.

Actual Dimensions

Box exterior height	15"
Box exterior depth	18"
Box exterior width	54", 66", and 78"
Box interior height	13 3/8"
Box interior depth (binder storage area)	13 5/8"
Box interior depth (ledge)	3 1/2"
Box interior width	52 3/8", 64 3/8", and 76 3/8"
Leg height	29 7/8"

Connections

Attaches perpendicular (90°) to Post and Beam 33"H fence height beam. Box can attach anywhere along beam.

Attaches between two Post and Beam 93 1/2"H posts.

In Post-to-Post applications, a 54"W Duo Tall Storage is used with a 5"W beam. 66"W Duo Tall Storage is used with a 6"W beam. 78"W Duo Tall Storage is used with a 7"W beam.

To attach Duo Tall Storage to Post and Beam fence in seismic zones, order the Duo seismic package for use with Duo Tall Storage-to-Post and Beam fence. One package contains hardware for 10 units.

In seismic zone 3 and 4, consult with local building code officials for specific code requirements applicable to your installation.

Duo Overhead Storage

Product Details

Two interior configurations of overhead storage are available. Individual box has a ledge on one side and space for binder storage on the opposite side. Shared box is divided down the center with half ledge and half binder storage on each side.

Duo overhead storage is non-handed. Orientation is determined at time of installation.

66"W and 78"W individual boxes have a center divider on the binder storage side for additional support.

Height from top of fence to bottom of box is approximately 15 3/4". Height from floor to top of box is approximately 64".

Actual Dimensions

Box exterior height	15"
Box exterior depth	18"
Box exterior width	54", 66", and 78"
Box interior height	13 3/8"
Box interior depth (binder storage area)	13 5/8"
Box interior depth (ledge)	3 1/2"
Box interior width	52 3/8", 64 3/8", and 76 3/8"
Stanchion leg height	15 3/4"
Width between stanchions	
On 54"W Duo	34 3/4"
On 66"W Duo	46 3/4"
On 78"W Duo	58 3/4"

Connections

Attaches to Post and Beam seated height (33") fence only.

Duo overhead storage can be used in panel environments by attaching Post and Beam fence at a 90° angle to Series 9000, Avenir, Kick, Montage, and Answer.

For additional privacy use Post and Beam knit screens mounted between Duo overhead stanchions.

Overhead storage box is always centered (side-to-side) on stanchion legs.

Width of box cannot exceed length of fence beam it is attached to.

In seismic zone 3 and 4, consult with local building code officials for specific code requirements applicable to your installation.

Duo Slim Storage

Wood core construction with laminate surface.

Duo Slim Storage provides storage of piles and other flat objects.

Brackets attach Slim Storage to fence beam. Six brackets are included for each Slim Storage box.

Product Details

Slim Storage is only available in shared configuration. Divider is centered providing access to half the depth of the box on each side.

Height to top of Slim Storage on top of fence is approximately 42".

Slim Storage interior height can accommodate two stacked Details letter trays.

Actual Dimensions

Box exterior height	7½"
Box exterior depth	25"
Box exterior width	54", 66", and 78"
Box interior height	6"
Box interior depth (each side)	12"
Box interior width	52⅜", 64⅜", and 76⅜"

Connections

Attaches to Post and Beam seated height (33") fence only.

Duo slim storage can be used in panel environments by attaching Post and Beam fence at a 90° angle to Series 9000, Avenir, Kick, Montage, and Answer.

Slim Storage is always centered (side-to-side) on Post and Beam fence.

In seismic zone 3 and 4, consult with local building code officials for specific code requirements applicable to your installation.

Stability Guidelines

Stability Guidelines for Duo Tall Storage—Post-to-Post Application

A maximum of three boxes can be placed between two posts.

When Duo is installed in a post-to-post application, two perpendicular beams must be attached to a wall to provide stability.

Duo Tall Storage cannot attach to a wall.

When two boxes are inline, a post must be placed between the two boxes.

When Duo is installed in a post-to-post application, two perpendicular beams must be attached to a wall to provide stability.

Boxes cannot be attached to each other.

No more than 16' of beams may be placed inline without a 90° or 120° return.

For L-configurations, a minimum of a 6' return is required at 90° or 120°.

If less than a 6' return is used, the configuration must have a minimum of 3'-4" returns on both sides, creating a Y- or T-configuration.

A maximum of two boxes per side can be used if boxes are used on adjacent sides of a configuration. Boxes must be staggered.

Stability Guidelines for Duo Tall Storage—Fence Application

Duo Tall Storage cannot be used as a return. Fence applications must have a minimum of three posts and two beams that create an L-configuration.

If run is over 16'W, a minimum of 3'-4" return is required mid-run.

Duo Tall Storage can attach centered on a post or anywhere along the beam.

Stability Guidelines for Duo Tall Storage-to-Post and Beam Fence Application in Seismic Zones

- Follow traditional planning guidelines.
- Tall Storage leg base must be bolted to the floor.
- Additional seismic package must be installed.

Stability Guidelines for Duo Overhead Storage

On a single fence, no more than one overhead box can be attached. There are three ways to anchor the end of a fence run:

- A 3/4" minimum return at 90° or 120°
- Large footplate bolted to the floor
- Worksurface tethered to fence that is supporting Duo Overhead Storage

If run is over 16'W, a minimum of 3/4" return is required mid-run.

If two overhead boxes are used inline on fence beams, a 90° or 120° return is required in four directions, creating an H-configuration.

Stability Guidelines for Duo Slim Storage

On a single Post and Beam fence, no more than one Slim Storage box can be attached. There are three ways to anchor the end of a fence run:

- A 3'4" minimum return at 90° or 120° in two directions
- Large footplate bolted to the floor
- Worksurface tethered to fence that is supporting Duo Slim Storage

If a run is over 16'W, a minimum of a 3'4" return is required mid-run.

If two Slim Storage boxes are used inline on a Post and Beam fence, a 90° or 120° return is required in four directions, creating an H-configuration.

Corner, 120° Tables

Laminate or Wood Veneer

► Need help?
Product details,
page 38

Standard Includes

- Table: High-Pressure Laminate or wood veneer
- Laminate table: plastic 3 mm edge profile or P-edge profile on all sides
- Wood table: wood square 3 mm edge profile on all sides

Required to Specify

- 1 Style number with appropriate edge profile suffix
P Laminate with plastic P-edge
SW Wood with square edge
► See edge profiles below.
- 2 High-Pressure Laminate or wood color number for table
- 3 Plastic color number for edge on laminate table, if selected
- 4 Options, if selected (see below)
► See *Surface Materials*, page 244.

Premium Wood

Pricing: For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Legs to support Universal tables must be specified separately.

Tip: For leg and support guidelines, see Table and Leg Combinations.
► Page 49

Tip: Tether brackets to attach to Post and Beam fence must be specified separately.

Tip: To specify 3 mm edge profile, no suffix is required. For other edge profiles, add suffix to the style number. (For example, BFB223636 becomes BFB223636SW for wood square edge profile.)

Tip: Screens can be used on corner, 120° tables.

- 24"W screens can be used on tables with dimensions C and D each equal to 43"
- 24"W and 30"W screens can be used on tables with dimensions C and D each equal to 49"

Tip: Corner, 120° tables with dimensions C and D each equal to 37" cannot accommodate screens.

	• Package 3	+\$106	Specify with counterweight.
	• Package 4	+\$139	Specify with counterweight.

► Options, continued on next page

Tip: Wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Tip: FrameOne tops are available on 28"H lateral files only. FrameOne top will add 1/2" to the overall height.

Tip: Full-fill finish (option) is available on field-installed tops only.
► Page 228

Premium Wood Pricing: For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Security top reduces overall height by approximately 1".

Tip: Some cabinets with the c:scape glide base or FrameOne foot base require a different counterweight than the Universal 3" base. Please specify accordingly.

Tip: Counterweight packages are recommended based on case size and interior options.

Tip: Counterweight option should be specified if the cabinet is not ganged back-to-back to adjacent cabinets or bolted to the floor or wall. Cabinets ganged side-to-side require a counterweight.

Universal One-High and Two Drawer Lateral Files with Flush Steel, Proud Steel, Proud Wood, or Open Fronts, continued

Tip: Counterweight packages ship separately from case and must be installed on site.

Tip: A tether bracket is now available to attach universal units to the c:scape beam.
▶ Page 199

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RLF18362_ becomes RLF18362F for flush steel front).

Universal Dual Door Towers

with Flush Steel, Proud Steel, or Proud Wood Fronts

► Need help?
Product details,
page 92

Standard Includes

- Tower: paint price group 1
- 1"H top: paint to match tower
- Door and drawer fronts on units with proud wood fronts: wood veneer
- Lock, keyed random: 9201 Polished Chrome
- Base (see below under required selections)
- Pulls: metal
- Integral pulls on units with flush steel fronts
- Drawer body: black only
- Adjustable shelves on 52"H and 65½"H: paint to match tower
- Brackets for adjustable shelves: black
- Post to support adjustable shelf: paint to match tower
- One box drawer divider and one pencil tray: black only
- Coat rod: black
- Four adjustable leveling glides
- Counterweight package, if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - W** Proud wood front
 - 2 Paint color number for tower
 - 3 Wood color number for door and drawer fronts, if proud wood front selected
 - 4 Base (see below under required selections)
 - 5 Pull (see below under required selections)
 - 6 Metal color number for pulls, if proud steel or proud wood front selected
 - 7 Options, if selected (see below)
- See *Surface Materials*, page 243.

	Required Selections	U.S. Price	Required to Specify
Bases	• Universal 3" base	No cost	Specify with <i>Universal 3" base</i> , painted to match tower.
	• FrameOne foot base	+\$174	Specify with <i>FrameOne foot base</i> , painted to match tower.
	• c:scape glide base	+\$174	Specify with <i>c:scape glide base</i> , 4799 Platinum only.

Universal Vertical Drawer Towers

With Flush Steel, Proud Steel, or Proud Wood Fronts

► Need help?
Product details,
page 92

Standard Includes

- Tower: paint price group 1
- 1"H top: paint to match tower
- Integral pulls on units with flush steel fronts
- Pulls: metal
- Hinged door on units with flush steel or proud steel fronts: paint to match tower
- Hinged door on units with proud wood fronts: wood veneer to match tower
- Lift-up door with fixed shelf on 65½"H units with flush steel fronts: paint to match tower
- Lift-up door with fixed shelf on 65½"H units with proud wood fronts: wood veneer to match tower
- Lock, keyed random: 9201 Polished Chrome
- Drawer body: black only
- Drawer suspensions: black only
- Two box drawer dividers and one pencil tray in units with 6"H box drawers: black only
- Coat rod: black
- Four adjustable leveling glides
- Counterweight package; if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - W** Proud wood front
- 2 Paint color number for tower
- 3 Wood color number for door and drawer fronts, if proud wood front selected
- 4 Pull (see below under required selections)
- 5 Metal color number for pulls, if proud steel or proud wood front selected
- 6 Options, if selected (see below)

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surfacematerials.

Turnstone Laminate Collection

A selection of laminates and edge bands in this collection are available on Steelcase brand products. This collection is available with standard leadtimes and supported like standard laminates to help make ordering easy. Please see the Turnstone section of village.steelcase.com for swatching information.

- 2535 Virginia Walnut
- 2536 Blackwood
- 2612 Marbled Maple
- 2614 Chocolate Walnut
- 2615 Marbled Cherry

Tip: Turnstone Collection Laminates are not available on bullnose laminate storage tops.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$65 U.S. per work surface or top, plus the cost of the laminate.

When processing orders for Open Line Laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Tip: Standard laminates being used in the Open Line Laminate program to obtain a different edge detail will be charged the Open Line laminate upcharge; however, no additional charges for the laminate will be applied.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Vertical Surface Fabric

Steelcase Surfaces

Applies to:

- Infill
- 5477 Tech White

Applies to:

- Screens
- B902 Soft White
B903 Fog
B904 Sand

Ⓔ = Established

Wood

Applies to:

- Universal wood veneer tables
- Universal Storage fronts and tops

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut.

Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Flat-cut open-pore finish choices

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry Ⓔ
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple*
- 3572 FC/OP Amber on Maple Ⓔ
- 3592 FC/OP Blonde on Maple
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3722 FC/OP Dark Mahogany on Walnut
- 3752 FC/OP Medium Walnut
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Quarter-cut open-pore finish choices

- 3042 QC/OP Ash*
- 3222 QC/OP Clear Maple*
- 3272 QC/OP Amber on Maple Ⓔ
- 3292 QC/OP Blonde on Maple
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3322 QC/OP Dark Mahogany on Walnut
- 3352 QC/OP Medium Walnut
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

Rift-cut open-pore finish choices

- 3602 RC/OP Desert Oak
- 3612 RC/OP Warm Oak Ⓔ
- 3692 RC/OP Espresso Oak

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood work surface or field-installed top only.

Flat-cut full-fill finish choices

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry Ⓔ
- 3424 FC/FF Medium Cherry
- 3524 FC/FF Clear Maple*
- 3544 FC/FF Blonde on Maple
- 3574 FC/FF Amber on Maple Ⓔ
- 3704 FC/FF Clear Walnut
- 3714 FC/FF Natural Walnut
- 3724 FC/FF Dark Mahogany on Walnut
- 3754 FC/FF Medium Walnut
- 3764 FC/FF Dark Walnut
- 3774 FC/FF Medium Mahogany on Walnut

Quarter-cut full-fill finish choices

- 3224 QC/FF Clear Maple*
- 3274 QC/FF Amber on Maple Ⓔ
- 3294 QC/FF Blonde on Maple
- 3304 QC/FF Clear Walnut
- 3314 QC/FF Natural Walnut
- 3324 QC/FF Dark Mahogany on Walnut
- 3354 QC/FF Medium Walnut
- 3364 QC/FF Dark Walnut
- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

Rift-cut full-fill finish choices

- 3604 RC/FF Desert Oak
- 3614 RC/FF Warm Oak Ⓔ
- 3694 RC/FF Espresso Oak

**To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, 05-0001370 for 3222 or 3224.*

Steelcase Surfaces

Composite Veneers

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosing because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Flat-cut open-pore finish choices

- 3JDX FC/OP Oak Composite
- 3JFX FC/OP Maple Composite
- 3JHX FC/OP Cherry Composite
- 3JJX FC/OP Walnut Composite

Quarter-cut open-pore finish choices

- 3HGX QC/OP Oak Composite
- 3JEX QC/OP Maple Composite
- 3JGX QC/OP Cherry Composite
- 3HVX QC/OP Walnut Composite

Note: To understand more about composite ordering, leadtimes, and pricing, please consult the composite sign-off sheet available through Steelcase advertising stock, form number 14-0000141. A sign-off sheet is required prior to orders being accepted for composite projects.

Steelcase Surfaces

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Quarter-cut open-pore finish choices

Wood Group 2

3032 QC/OP Dark Thin Line Bamboo
3052 QC/OP Ribbon Sapele

Wood Group 3

3832 QC/OP Figured Anegre
3842 QC/OP Figured Makore

Note: Full-fill finish is not available on Premium veneers as a standard.

To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000755 for 3032, form number 09-0000757 for 3052, form number 09-0000758 for 3832, and form number 09-0000759 for 3842.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$425 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$425 fee does not apply on matches to Colesse standard finishes or for a low-gloss finish request on a standard color). The \$425 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$5,000 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$5,000 initiation fee was paid. If the finish is not reactivated within five years after the \$5,000 initiation fee was paid, the finish will be culled and the customer will need to pay the \$5,000 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Ⓔ = Established

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plastic

Steelcase Surfaces

Applies to:

- Infill end cap
- Attachment clips for horizontal fence tube and horizontal overhead beam trough
- Wall start cover for beam
- Accessory mounting bracket collar
- Post top cap
- 6694 Slate

Applies to:

- Huddleboard adapter bracket
- 6643 Fusion Light

Applies to:

- Technology hub cover
- Horizontal fence tube
- Overhead corner trough and beam filler trough
- Vertical post tube
- Ceiling infeed tube
- Shelf cable management tray
- 6644 Fusion Dark

Applies to:

- Connector
- Black

Applies to:

- 3 mm edge profile on Universal tables, except tethered capsule tables
- 1 mm edge profile on Universal Storage laminate tops
- 6000 Black*
- 6001 Coffee*
- 6009 Arctic White*
- 6034 Natural Cherry
- 6036 Medium Cherry
- 6037 Winter on Maple
- 6038 Blonde on Maple
- 6039 Medium Oak
- 6041 Natural Walnut
- 6045 Medium Mahogany on Walnut Ⓔ
- 6052 Milk*
- 6053 Seagull*
- 6213 Acacia
- 6219 Clear Oak
- 6231 Graphite Walnut*
- 6234 Clear Cherry*
- 6237 Clear Maple*
- 6242 Virginia Walnut*
- 6243 Blackwood*
- 6245 Clear Walnut*
- 6246 Warm Oak * Ⓔ
- 6249 Platinum Solid*
- 6615 Grey Value 5*
- 6619 Ice* Ⓔ
- 6631 Cream*
- 6635 Dawn* Ⓔ
- 6636 Mist*
- 6654 Sand*

- 6677 Chocolate Walnut
- 6678 Marbled Cherry
- 6694 Slate*
- 6695 Midnight*
- 6697 Fog*
- 6698 Fieldstone*
- * These solid color and woodgrain edge colors are a polyolefin blend, PVC-free material for 3 mm and 1 mm edge bandings.

Applies to:

- P-edge profile on Universal laminate tables, except tethered capsule tables
- 6000 Black
- 6009 Arctic White
- 6052 Milk
- 6053 Seagull
- 6249 Platinum Solid
- 6654 Sand
- 6694 Slate
- 6695 Midnight
- 6697 Fog
- 6698 Fieldstone

Applies to:

- 3 mm edge profile, P-edge profile, and inner edge profile on Universal tethered capsule tables
- 6000 Black
- 6009 Arctic White
- 6654 Sand
- 6694 Slate
- 6695 Midnight
- 6697 Fog
- 6698 Fieldstone

Note: Light color plastic edges are

susceptible to degradation due to normal wear and tear. Staining (e.g., ball point pen or clothing dyes such as blue jeans) and dirt effects are more pronounced in light colors and are not considered defects.

Applies to Internode components:

- Receptacles
- Modular infeed cover
- Convenience communication outlet and tri-receptacle housings
- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6651 Tungsten Ⓔ
- 6652 Titanium Ⓔ
- 6653 Solar Black Ⓔ
- 6654 Sand
- 6681 Grotto

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Universal Tables—Wood Veneer

Lock and Keying	256
Style Number Index	258

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

► See below.

Key Random

Required to Specify

Master key random	+\$23	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify “plug” when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

► See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

Key Consecutive

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
<ul style="list-style-type: none"> Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome Two keys 		1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR454.
Master key random	+\$23 each	Specify <i>master key random</i> .
Master key specific	+\$23 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$23 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF1150.

Specification Information

Color	Style Number	U.S. Base Price

FR Series (Standard Keying System) – Lock Cylinder

Polished Chrome	LOCK9201FR	No cost
Ember Chrome	LOCK9250FR	No cost

Standard Lock Tool

	877102003SR	\$23

XF Series (Master Keying System) – Lock Cylinder

Polished Chrome	LOCK9201XF	No additional cost. Price is included in price of furniture with master-keyed locks.
Ember Chrome	LOCK9250XF	No additional cost. Price is included in price of furniture with master-keyed locks.

Master Lock Tool

	877102002SR	\$23

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

For Canadian Pricing
 Multiply U.S. Price by the Canadian price factor.
