Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics
- Shipping

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Application Topics provides additional resources relevant to the product.

Surface Materials lists what material is used for each part of the product.

Product Drawing shows you what the product looks like and points out important features.

Universal Fixed Pedestals

Actual Dimensions

Depth with front panel for 19" 1U, 2U, and 3U	Depth without front panel for 19" 1U, 2U, and 3U	Height
11.5"	10.5"	17"
23"	12"	34"
34.5"	12.5"	51"

Product Details

Connections

Surface Materials

Application Topics

Shipping

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the cable-management and cable routing capabilities of the product.

Shipping describes how the product is packaged for delivery.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes (under the dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Universal Over the Case Bins with Flat Fronts
For Use with Pathways Technology Wall, Access, Kick, Series 9000, 9000 and Montage

PRICE ADJUSTMENT: Products selected for pricing a 2% price increase is not required. The standard pricing listed is for a 2% price increase.

Specification Information

Product Drawing

Security top cannot be installed on a file with a lift-up door in the top position.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with 9250 Ember Chrome loc...

Select key number from FR305-FR4 factory installation. Specify plug and order lock cylinders separately for field installation. ▶ Page 302 Specify key consecutive and must see beginning key number from FR305-FR4. Specify master key random.

Italic typeface on specifying pages usually identifies wording that you should use in your order.

i

Tip 7

Tip: When you choose an optional interior, it will apply to all the openings in the cabinet. Order interior components for field installation separately. ▶ See page 164

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Security top cannot be installed on a file with a lift-up door in the top position.

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers. ▶ Page 291

Tip 10

Style Number	Page
2LF18422AF	118
2LF18422F	117
2LF18423AF	118
2LF18423F	117
2LF18424AF	118
2LF18424F	117
2LF18425AF	118

Refer to the style number index when you know a style number and you need to find the page that has more details about the product. ▶ Page 352

Additional Resources

Storage products are supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the AdStock web site at village.steelcase.com.

Creating Order Out of Chaos Knowledge Paper

Provides keen insights into the issues surrounding effective information management. The booklet also provides important statistics backed by extensive Steelcase research. It's a great tool to help differentiate Steelcase storage products from the competition.

Form number S11278

Planning Tools

Quick Ship Guide

This handbook describes all Steelcase, Turnstone, Details, and Coalesse products that are available for Rapid2 (ships in 2 days), Rapid5 (ships in 5-7 days), or Coalesse Rapid10 (ships in 10 days).

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steel-case.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications

If your device has a bar code reader App, scan this QR code for a direct link to the online digital publications. Utilizing this QR code allows you to search across multiple specification guides, share across social media, or print out pages. You can also access these digital publications at www.steelcase.com or village.steelcase.com.

Storage Product Training

Basic training for the majority of Steelcase filing and storage products is available as part of the Building Product Muscle (BPM) curriculum on the Steelcase University Web site at village.steelcase.com.

The Filing and Storage BPM is an interactive, Web-based course filled with photos, detailed positioning, statement of line, and feature/advantage information, as well as practice exercises designed to build salespeople's knowledge of filing and storage products. The course also contains printable job aids to provide ongoing performance support. The Filing and Storage BPM is course is SAL379.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939, or visit our Web site: www.steelcase.com.

Related Products

Steelcase and other manufacturers produce products that are ideal to use with Storage products. Some of them are listed here along with details about how to get product literature.

Huddleboard products are included with Meeting Spaces.

► See *Meeting Spaces Specification Guide*.

Details worktools

include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

TS Series Pedestals

TS Series pedestals

provide fixed and mobile storage for personal items and filing of infrequently referenced materials.

► Specifying, page 138

Top of pedestal is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on pedestals adjust to install furniture on uneven floors. Leveling glide range is 1".

Handle pull is standard. Ledge pulls are available as an option on drawers and doors.

Pedestal file drawers are made of steel with steel ball-bearing suspensions and open their full depth for total access to the contents. File drawer accommodates letter- and legal-size filing (legal filing requires the use of optional dividers).

Handle on mobile pedestal can be positioned in front or at rear to access contents of drawer. Also available without handle.

Lock is standard keyed random and controls all of the drawers. Lock cylinders must be specified separately. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.
► Lock and Keying Options, page 302

Cushions are 1³/₄" and upholstered with piping along the top and bottom edges.

Height	27"	21" and 26 ⁵ / ₈ "	21"

Product Details

Handle pull

Ledge pull

Pull Choices

Extra handle pull, available as an option on mobile pedestals, allows pedestals to be moved easily within the workstation.

Box drawer and file drawer dividers and pencil tray for use with fixed pedestals are available as optional accessories. Mobile pedestals have different dividers that are not interchangeable.

Dividers and pencil tray for use with mobile pedestals must be ordered separately. Mobile pedestal accessories are not interchangeable with under-worksurface pedestal accessories.
▶ Page 142

To file legal-size or side-to-side letter-size filing in pedestal file drawers, specify optional 15"W file rails.

Large (3/16" diameter) perforation is available as an option on mobile pedestal drawer fronts.

Counterweights are included to provide added stability. All pedestals are shipped with a factory-installed counterweight package that meets or exceeds standards for the industry.

Connections

Box, box, file and file, file pedestals attach beneath 24"D and 30"D worksurfaces. Attachment hardware is provided.

Pedestal filler, ordered separately, adds structure and fills the gap between the pedestal and panel. TS Series pedestal filler works with Kick panels only.
▶ Page 138

Application Topics

Mobile pedestal fits under 24"D and 30"D worksurfaces or can be moved wherever storage is needed.
▶ For interior dimensions, see *Storage Capacities and Dimensions* page 310.

TS Series Bins

TS Series bins can be attached to Answer and Kick with integrated hooks. These storage bins provide overhead storage in the workspace.

► Specifying, page 143

On-module attachment hooks are integral to the end supports and are used to mount bins on panels of the same width as bins.

Safety catch locks overhead storage unit to frame to prevent accidental removal.

Bin is steel and ships assembled.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Flat-front and radius-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike.

► Lock and Keying Options, page 302

Recess beneath unit can accommodate a shelf light.

► Page 274

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", and 72"

Height 16¹/₄"

Product Details

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 302

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

► Page 274

Dividers are available as an option for use on bins. Dividers ship in a package of four.

► Page 139

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module steel support hooks can be used above and adjacent to slatwall.

Width of overhead bin must match the width of the panel or panels that it is attached to. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

TS Series bins cannot be attached to upmount brackets.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.
▶ Page 46

Wall channel horizontal brace is required with wall channels to support shelves and bins that are wider than 48".
▶ Page 46

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
▶ Page 283

Surface Materials

▶ Page 56

Stability Guidelines
▶ See Answer Specification Guide.

Guidelines for Stackable Components

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

TS Series Laminate Common Shelves

► Specifying, page 145

Laminate common shelf has a wood core and is covered with Low-Pressure Laminate and High-Pressure Laminate. Plastic edge band is selectable.

Laminate common shelf

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Product Details

TS Series Laminate common shelf ships with steel support brackets. Support brackets hook into the vertical panel slots or wall channel and lock into place with a safety catch. Support brackets can be used in either orientation.

Wiring and Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

TS Series Under-Worksurface Lateral Files

► Specifying, page 146

Top of lateral file is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on lateral files adjust to install furniture on uneven floors. Leveling glide range is 1".

Tip: The actual depth of under-worksurface lateral files is 18¹/₈"D, which will not accommodate the use of the 18"D TS Series straight worksurfaces.

Lock cylinders are specified separately from the lateral file. Random, consecutive, and specific keying are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. ► Lock and Keying Options, page 302

Lateral file drawers are made of steel with steel ball-bearing suspensions and open their full depth for total access to the contents.

Lateral file drawers are standard with two side-to-side hanging file frames to file letter- or legal- size papers. Clearance is provided for two rows of filing.

Product Details

Handle pull

Ledge pull

Pull Choices

Handle pull is standard. Ledge pulls are available as an option on drawers and doors.

Large (3/16" diameter) perforation is available as an option on the 30¹/₂"W under-worksurface lateral only.

Under-worksurface lateral file drawer dividers, front-to-back file rails, and side-to-side hanging file frames, ordered separately, are available for use with under-worksurface lateral files.

Actual Dimensions

TS Series Tower Too

TS Series Tower Too accommodates paper filing, miscellaneous storage, and wardrobe storage.
 ▶ Specifying, page 148

Finished top, sides, and back allow storage cabinet to be positioned anywhere.

Shelves are fixed and can accommodate binders or other storage needs.

Lock, standard, is located on the lock bar and secures file drawers below. Lock cylinders are specified separately from the tower. Random, consecutive, and specific keying are available. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.
 ▶ Lock and Keying Options, page 302

Safety interlock system allows only one drawer to be opened at a time.

Leveling glides on lateral files adjust to install furniture on uneven floors. Leveling glide range is 3/4".

Doors open 98° for access to contents.

Drawers open their full depth for total access to the contents. Drawers have full-height sides; hanging file folder frames are not needed for front-to-back letter-size filing. Legal or side-to-side filing is accommodated using Universal filing rails. Tower Too file drawers and optional box drawers are made of steel with steel ball-bearing suspensions.
 ▶ For interior dimensions, see *Storage Capacities and Dimensions* page 314.

54"H Wardrobe left

48"H Wardrobe right

66"H Wardrobe right

54"H Wardrobe right

TS Series Tower Too is available 48"H, 54"H, or 66"H. Wardrobe storage can be left or right. 48"H is open side only.

Wardrobe interior can be specified with wardrobe hook or wardrobe rod with shelf.

Two box drawers in place of top file drawer is available as an option on 48"H, 54"H, and 66"H towers. Box drawers have $\frac{3}{4}$ extension.

Dome, field-installed only, can be added to Tower Too for a unique aesthetic.

All locking (one lock for wardrobe, second lock for drawer, third lock for cabinet if applicable), is available as an option on 48"H, 54"H, and 66"H towers.

Towers are available with open side shelving in place of the upper cabinet. Fixed shelves provide two openings (with clearance of 5"H on 48"H units, 12"H on 54"H units, and 18"H on 66"H units).

Connections

Kick plate (2"H) and lock bar align with fixed pedestals and under-work-surface lateral files.

TS 200 Series Lateral Files

TS 200 Series lateral files are ideal for high-density paper storage. They accommodate basic paper filing needs at an economical price.

► Specifying, page 150

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.

► Lock and Keying Options, page 302

Base is 3"H and is integral to the case.

Leveling glides adjust up to 7/8" to install lateral files on uneven floors.

Top is standard 1"H steel. Other top options are available.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Drawers open their full depth for total access to the contents and are standard 12"H. TS 200 Series drawers and lift-up doors have flush fronts.

Pulls on TS 200 Series drawers and receding doors are inset and full width to provide a neutral look. They are located at the top of a drawer and at the bottom of a receding door.

Product Details

TS 200 Series lateral drawer and door fronts are flush with integral pulls.

Drawer interiors include one hanging folder bar per drawer, which accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Alternative interiors are available as options; your specification will apply to all the drawers within a single lateral file. Additional bars are available and must be specified separately.

► Page 266

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities and Dimensions* page 310. Additional rails are available and must be specified separately.

Actual Dimensions

Depth	18"
Width	30", 36", and 42"
Height	28", 40", 52", and 65½"

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.

▶ Page 267

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door recesses inside the case.

Lift-up door is available with an optional roll-out shelf in place of the standard fixed shelf.

Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 302

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ¾" taller than steel tops and will add that dimension to the overall height of the lateral file.

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. Thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately.

▶ Page 270

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.

▶ Page 258

Field-installed accessories are available, including drawer accessories and counterweight packages.

▶ Page 266

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials.

Tip: Anchor bracket cannot be used with pedestals.

▶ Page 271

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.

▶ See page 254.

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

TS 200 Series Lateral Files with Lift-Up Doors and Roll-Out Shelves

TS 200 Series lateral files with lift-up doors and roll-out shelves are ideal for high-density side-tab filing. They accommodate basic paper filing needs at an economical price.
 ▶ Specifying, page 152

Finished back is standard.

Lock is standard on lateral files and secures all lift-up doors. Lock is located at top left corner of the top. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying Options, page 302

Base is 3"H and is integral to the case.

Leveling glides adjust up to 7/8" to install lateral files on uneven floors.

Top is standard 1"H steel. Other tops are available field-installed.

Lift-up doors are equipped with roll-out shelves.

Roll-out shelves open their full depth for total access to the contents and are standard 12"H. TS 200 Series lift-up doors have flush fronts.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pulls on TS 200 Series lift-up doors are inset and full width to provide a neutral look. They are located at the bottom of a lift-up door.

Product Details

Lift-up door in the top position of 65 1/2"H cases is 13 1/2"H to accommodate standard-height binders. All other doors are 12"H and accommodate side-tab files. All doors recede inside the case.

Each roll-out shelf includes one divider package to function as a back-stop. Divider package includes three dividers and one hanging folder bar. Two hanging folder bars are available as an option and replace the divider package when specified.

Safety interlock system allows only one roll-out shelf to be opened at a time.

Actual Dimensions

Depth	18"
Width	30", 36", and 42"
Height	28", 40", 52", and 65 1/2"

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 302

Counterweight packages must be specified as an option for lateral files that are not ganged to another case, attached to a worksurface, or bolted to the floor or wall. Counterweights can also be ordered separately. ▶ Page 270

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza. ▶ Page 258

Field-installed accessories are available, including roll-out shelf accessories and counterweight packages. ▶ Page 266

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet.
Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials. Tip: Anchor bracket cannot be used with pedestals. ▶ Page 271

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage. ▶ Page 254

Universal Pedestals

27"H fixed pedestals

are floor-standing and can support worksurfaces at 28½"H.

- ▶ Specifying, page 156
- ▶ Specifying *Storage Accessories*, page 255

Top is open and accommodates attachment to a worksurface. Attachment hardware is included.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

- ▶ *Lock and Keying*, page 304

Leveling glides adjust to install pedestals on uneven floors. 25½"H pedestals have a 7⁄8" adjustable glide range, and 27"H pedestals have a 17⁄8" adjustable glide range.

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary work-surface when you need more space to spread out your work.

- ▶ Specifying, page 160
- ▶ Specifying *Storage Accessories*, page 255

Finished back and sides are standard.

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/ file pedestals and concealed with the base of box/box/file and file/file pedestals.

Drawer fronts are available in steel or wood veneer. Mobile pedestals maintain drawer pull and drawer front alignment with other storage components that have a 3" base.

Pull on proud-front pedestal is available in a variety of shapes.

3"H base is integral to 27"H pedestal case.

Pull on flush-front pedestal is full width and integral. This pull is available on steel drawer fronts only. Full-width wood pull is available as an option. Wood pull, if selected, ships separately from pedestal and is field installed, attaching to the integral pull with double-sided tape.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Top on mobile pedestal is 1⁄8"H steel. Additional top options are available.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Optional handle can be extended to easily transport mobile pedestal. Available factory- or field-installed.
▶ Specifying, page 203

Product Details

Box drawers are a welded steel construction and available with proud or flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction and available with proud or flush fronts. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders.
Exception: Legal-size file folders cannot be filed in 17½"D or 18¾"D pedestals.

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Actual Dimensions

	Fixed	Box/File	Box/Box/File and File/File
Depth with flush steel front	17½", 22⁵⁄₈", and 28⁵⁄₈"	17½" and 22⁵⁄₈"	17½" and 22⁵⁄₈"
Depth with proud steel or wood front	18¾", 23½", and 29½"	18¾" and 23½"	18¾" and 23½"
Width	15"	15"	15"
Height	25½" and 27"	N.A.	N.A.
Overall height with 1⁄8"H top	N.A.	21"	27"

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Optional basic drawer interior allows box/box/file pedestals to be ordered without rails, box drawer dividers, or pencil trays.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 128 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Label holders are available through Service Parts. Label holder fits inside the integral pull of flush-front drawers and over the top edge of drawer front on proud-front drawers.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

Non-locking pedestal is available as an option.

27"H fixed pedestals have base alignment with other Universal Storage components that have a 3"H base.

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops. 1"H steel tops, 1 3/16"H laminate with square edge profile, 1 7/16"H laminate with bullnose edge profile on the front edge, and 1 3/16"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for longer distance transport. Cushion top is also available without a handle.

Mobile pedestal cushion top for field-installation can be used with mobile pedestals RPM2421CP, RPM2421CF, and RPM2421CW only.

Connections

Fixed pedestals are intended to attach under a worksurface for security and support. Three pedestal depths are available to correspond with Universal Worksurface depths. Proud-front pedestals exactly match the depth of Universal Worksurfaces. Flush-front pedestals are 7/8" shorter.

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped. *Tip: Fillers for proud front pedestals conceal a 1/2" gap. Fillers for flush front pedestals conceal a 1 3/8" gap.*

Pedestals may require counterweights when used in stand-alone desks. ▶ *See Desk Stability Guidelines*, in the *Answer Solutions Specification Guide*.

Freestanding applications that don't require attachment to a worksurface should be used with a conversion kit that includes a steel top, counterweight package, and components to convert the locking system to a safety interlock system. ▶ *Page 159*

Field-installed accessories are available, including pencil trays, stationery trays, dividers, and rails. ▶ *Page 265*

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Shipping

Pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Universal Sliding Door Bins

For Use with Answer, Kick, Series 9000, Avenir, Montage, and V.I.A.

Universal sliding door bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.
 ▶ Specifying, page 164

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.
 ▶ *Lock and Keying*, page 304

Recess beneath unit can accommodate a shelf light.
 ▶ Page 274

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:
TAK = Answer and Kick
S9 = Series 9000
AVR = Avenir
MON = Montage
VIA = V.I.A.
 If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, Montage, and V.I.A. with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	35", 36", 42", 45", 48", 60", 66", 70", 72", and 75"
Height	16 ¹ / ₄ "

Horizontal off-module brackets, optional, accommodate off-module installations of overhead bins on all widths of Montage enhanced off-module panels.

Tip: Maximum width for a horizontal off-module bin that is mounted on an enhanced off-module Montage panel is 48"W.

Tip: Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panel.

Tip: Only two pairs of off-module brackets and associated storage can be mounted per frame.

Horizontal off-module brackets cannot span a vertical frame rail or joint on enhanced off-module Montage panel only.

Upmount brackets, optional, are for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width. For Montage, upmount brackets attach near the top of a 55"H frame.

Two upmount bin brackets can be hung side-by-side in an in-line, T- or X- application.

On Montage, Universal in the case bins can be upmounted over or adjacent to a slatwall.

On Answer, bins can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent inline panel.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 304

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit. ► Page 274

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number. *Tip: Select the omit brackets option when ordering the bin.*

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. ▶ Page 46

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48". ▶ Page 46

Overhead storage components cannot be attached to Montage frames with glass tiles.

Overhead storage components cannot be attached on a 55" high Montage frame.

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage. ▶ Page 283

Surface Materials

Overhead bin

- Paint
- Wood door (optional)

Locks

- 9201 Polished Chrome
- 9250 Ember Chrome (optional)

are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", 66", and 72"

Height 16¹/₄"

Upmount brackets are optional for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side by side in an in-line, T-, or X-application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic, markerboard, or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The markerboard door insert is a e³ ceramicsteel writing surface allowing smooth writing, easy erasability, and resistance to chemicals, scratches, bacteria, and fire. If a markerboard door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal over the case bin can not exceed 10½ pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of 7 ¼ pounds to 10½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.

► See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 41

Door assist mechanism, optional, consist of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 304

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

► Page 274

Divider is available as an option on overhead bins. Dividers ship in a package of four.

► Page 183

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets

are available to attach storage bins to wall of building. Specify as a separate style number.

Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

▶ Page 46

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".

▶ Page 46

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

75"	37½" (per door)	15.933"	36.314"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

For Universal In the Case Bins

Bin Width	Door Width	Custom Picture Frame Door Inserts		
		Height +/-0.02"	Width +/-0.02"	Thickness +/-0.02"

75"	37½" (per door)	15.000"	36.664"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal Shelves and Universal Personal Shelves

For Use with Answer, Kick, Series 9000, Avenir, and Montage

Universal shelves— supported by Answer, Kick, Series 9000, Avenir, and Montage— provide overhead storage in the work space.
▶ Specifying, page 180

Universal personal shelves provide a wall-supported surface that attaches to Answer, Kick, Series 9000, and Avenir.
▶ Specifying, page 182

Metal backstop on Universal shelves prevents notebooks and equipment from damaging panel surface. Universal personal shelves do not have a backstop.

On-module attachment hooks are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Actual Dimensions		
	Universal shelves	Universal personal shelves
Depth	14 ³ / ₄ "	13 ¹¹ / ₁₆ "
Width	24", 25", 35", 30", 36", 42", 45", 48", 60", 70", and 72"	24", 25", 30", 35", 36", 42", 45", and 48"
Height	71 ¹ / ₂ " (Kick, Answer, Series 9000, and Avenir) and 11 ¹ / ₂ " (Montage)	11 ¹ / ₁₆ " (thickness of shelf)

Product Details

Shelf lights are available for use beneath shelves. Lights recess into the bottom of the overhead storage unit.
▶ Page 274

Dividers are available field installed for use on Universal shelves. Dividers ship in a package of four. Dividers cannot attach to Universal personal shelves.

A 1¹/₂" gap exists between the personal shelf and the panel to allow for cable routing.

The height dimension of the bracket (from top of personal shelf to the bottom of the bracket) is 6¹/₂" H.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Universal shelves for use on Montage panels have a taller end support to accommodate vertical slots in frame.

Universal shelves cannot mount on a 55"H Montage frame. Contact Steelcase Specials for a solution on a 55"H frame.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Overhead storage components cannot be attached to Montage frames with glass tiles.

86"H Frames

65"H Frames

65"H

20"H

45"H

Overhead storage shelves install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H.
Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.

Wall channels are available to attach shelves to concrete or block walls. Wall channels can be used to attach shelves to wood, dry wall, or plaster walls, if wall is reinforced.

Height	4½"

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case and Universal In the Case Bins

Horizontal Wall Attachment Brackets

Horizontal wall attachment brackets can attach to wall of building to accept universal sliding door, universal over the case and universal in the case storage bins. Brackets will not accept bins introduced prior to March 2007, TS Series bins or universal curved front bins.

► Specifying, page 183
Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.

Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach universal sliding door, universal over the case, and universal in the case bins to a building wall. TS Series and universal curved front bins cannot attach to horizontal wall attachment brackets.

Shelves can not hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with 5/8" thick Toggle R-type 3/16" wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksurfaces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width 24", 25", 30", 35", 36", 42", 45", 48", 60", 70", and 72".

Surface Materials

Brackets and steel back

- Paint

Wall Hang Channels and Horizontal Braces

For Use with Overhead Storage Bins and Shelves

Slotted steel channel

can attach to wall of building to accept shelves, overhead storage bins, worksurfaces, or tackboards. Channel will accept all universal bins and shelves, TS Series bins and bins and shelves introduced prior to March 2007.

► Specifying, page 187

Tip: Must specify bin or shelf with Answer, Kick, Avenir, or Series 9000 bracket to hang on wall channel.

Product Details

Wall channel can be positioned on wall at height needed.

Connections

Wall channels can be used to support shelves, overhead storage bins, worksurfaces, and tackboards. Wall channels can be shared.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}$ " thick Toggler R-type $\frac{3}{16}$ " wall anchors with countersunk flat head screw.
- Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

Anchors must be used in each screw hole location on the wall channel.

Components attach at 1" increments, but screws block some slot locations.

Component limits for each pair of wall channels are as follows:

- Two bins or shelves
- One worksurface and two shelves
- One worksurface and one bin

Horizontal brace is available to reinforce vertical wall channels that support storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All worksurfaces require horizontal braces.

Wall channel horizontal brace is required for EACH storage bin or shelf that is wider than 48". The brace should be placed at the position along the vertical wall channel where the top of the bin or shelf will be placed.

Width of horizontal brace must match width of shelf or storage bin.

Wall channel horizontal brace

is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Wall hang channels for shelves, overhead storage bins, or tackboards cannot be used with a wall start junction.

Worksurfaces may be attached to wall channels with cantilevers, subject to the following application guidelines:

- All worksurfaces must be 24"D or less.
- Worksurfaces must be supported by a cantilever or legs every 42" or 48". Cantilevers can be shared when worksurfaces are adjacent.
- Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
- Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Surface Materials

Wall channel

- Paint

Horizontal brace

- Paint

Screw hole positions

Floor

Actual Dimensions

Wall hang channels and horizontal braces

Depth	1 1/8" (28 mm)
Width	15/16" (24 mm)
Height	66" (1676 mm)

Application Topics

Reinforce wall by positioning studs where wall channels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Top view

Tip: Wall channels can be shared.

Universal Curved Front Bins

For Use with Answer, Kick, Series 9000, Avenir, and Montage

Bins, supported by frames, provide overhead storage in the work space. Bin shelf, top, and back are steel. Side panels are plastic. Door is steel or wood. Bins ship fully assembled.
 ▶ Specifying, page 190

Safety catches lock overhead storage unit to bracket and frame to prevent accidental removal.

Basic attachment brackets are used to mount bins on panels with vertical slot patterns. Bracket allows bin to be flush with the bracket or to extend beyond the bracket up to 12".

Basic and open design upmount brackets are optional. Brackets attach bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights.
Exception: Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Actual Dimensions

	Overhead storage bin
Depth	16 1/2"
Inside depth	13 3/4"
Width	30", 36", 42", 45", or 48"
Inside width	27 1/4", 33 1/4", 39 1/4", 42 1/4", or 45 1/4"
Height	15"
Height with door open	23"
Inside height	13 3/4"

Locks are standard on the bin. Lock is centered on the underside of the case and angled forward to provide a clean aesthetic, yet it is easy to access. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying, page 304

Easy open AND easy close doors open over the top of the bin.

Product Details

Lock is angled forward so it provides a clean aesthetic, yet it is easy to access. Locks are available factory- or field-installed. Factory-installed locks are standard and available randomly only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
 ▶ *Lock and Keying*, page 304

Bin has access holes in bottom of bin for wire management.

When curved front bin is in upmounted position, slotted channels are visible. A flat steel back is available through Specials.

Upmounted curved front bins can be attached above or adjacent to a slatwall as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Bookends hold books and other materials upright in bin.

Top of bin can align with the top of the frame.

Back of bin is closed.

Bin height accepts standard and A4 binders.

Top of bin cannot be loaded.

Ganging bracket is recommended on all panels. It joins adjacent overhead bins and shelves for optimal visual alignment. Ganging bracket is ordered separately.

Stationary shelves can be added to bins on site.

Stationary shelf hangs from the bottom of curved front bins with KBIN_ style numbers. Space between bottom of bin and top of stationary shelf is 5 1/2". Overall stationary shelf height dimension is 6 5/32". Specify the same width as corresponding bin. Shelf is steel with molded endcaps.
 Tip: *Stationary shelf cannot hang from an upmounted bin or shelf.*

Connections

Bin comes standard with basic attachment bracket. Upmount brackets are optional.
 ▶ See *Bracket Application Rules*, page 58.

Underline task light's 3/4" profile makes it the ideal task lighting solution for Universal bins and shelves. Underline task light includes the lamp, ballast, and 9' cord. It virtually disappears when mounted beneath these storage solutions. Underline mounts flush to the bottom of Universal bins and shelves using screws. Task light is field-installed and pre-drilled holes are provided. Spiral 9' cord option is designed to drop straight down from fixture. This option is an aesthetic alternative to the traditional cord. Housing is 24"W and 3/4"H and is available in dark champagne, pewter, and black.

For New York City, tool-free clips are required for flush mount applications within New York. Clips allow removal of Underline without use of a tool.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

Universal L-Shelves and Universal Stationary Shelves

For Use with Answer, Kick, Series 9000, Avenir, and Montage

L-shelf, supported by frames, provide overhead storage in the work space. L-shelf and back are steel. L-shelf is partially field-assembled.

► Specifying, page 192

Safety catches lock overhead storage unit to bracket and frame to prevent accidental removal.

Basic attachment brackets are used to mount bins on panels with vertical slot patterns. Bracket allows bin to be flush with the bracket or to extend beyond the bracket up to 12".

Endcaps are molded plastic.

Spacers on shelf attach back to shelf.

Basic and open design upmount brackets are optional. Brackets attach shelf near the top of 54"H panel to enable overhead storage to be used on lower panel heights.

Exception: Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Actual Dimensions

	Shelf
Depth	14 1/4"
Width	29 7/8", 35 7/8", 41 7/8", 44 7/8", or 47 7/8"
Inside width	25 3/4", 31 3/4", 37 3/4", 40 3/4", or 43 3/4"
Height	15"
Shelf thickness	5/8"

5/16" diameter rods provide an open aesthetic to the sides of the L-shelf.

Product Details

Spacers on shelf provide 1/4" gap between back and shelf. Back screws to shelf through spacers.

Bookends hold books and other materials upright on shelf.

Top of L-shelf can align with the top of the frame.

L-shelves can be mounted in front of slatwall skin or upmounted on Answer slatwall as long as there is not another bin or shelf or slatwall skin on the adjacent in-line panel.

L-shelves are intended as a companion to the Universal curved front bins. They will not align horizontally if mounted adjacent to a Universal over the case or Universal in the case bin in standard or upmount applications.

Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Stationary shelves can be added to bins on site.

Stationary shelf hangs from the bottom of L-shelves with KLSHF_ style numbers. Space between bottom of L-shelf and top of stationary shelf is 5 1/2". Overall stationary shelf height dimension is 6 5/32". Specify the same width as corresponding L-shelf. Shelf is steel with molded endcaps. *Tip: Stationary shelf cannot hang from an upmounted bin or shelf.*

Ganging bracket is recommended on all panels. It joins adjacent overhead bins and shelves for optimal visual alignment. Ganging bracket is ordered separately.

Connections

L-shelves come standard with basic attachment bracket. Upmount brackets are optional.

▶ See *Bracket Application Rules*, page 58.

Underline task light's 3/4" profile makes it the ideal task lighting solution for Universal bins and shelves. Underline task light includes the lamp, ballast, and 9' cord. It virtually disappears when mounted beneath these storage solutions. Underline mounts flush to the bottom of Universal bins and shelves using screws. Task light is field-installed and pre-drilled holes are provided. Spiral 9' cord option is designed to drop straight down from fixture. Slim Shelves

For Use with Answer, Kick, Series 9000, and Montage

Slim shelves provide a panel-supported surface that attaches to Answer, Kick, Series 9000, Avenir, and Montage with panel-specific brackets.

► Specifying, page 194

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Answer, Kick, Series 9000, Avenir, and Montage with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Answer will not support two shelves installed end to end.

Bracket Application Rules for Bins and Shelves

For TS Series Bins, Universal Sliding Door Bins, Universal Over the Case Bins, Universal In the Case Bins, and Universal Shelves

Tip: This matrix does not include universal curved front bins or universal I-shelves.

Bracket Application Matrix

Panels	TS Series Bins	Universal Bins, and Universal Shelves—On-Module	Universal Bins—Single Side Vertical Off-Module	Universal Bins—Two Sided Vertical Off-Module	Universal Bins—Horizontal Off-Module (for use with Montage only)	Universal Bins—Upmount

Series 9000		•	•	•		•
Avenir		•	•	•		•
Montage		•	•	•	•	•
V.I.A.		•	•	•		•

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and universal shelves to panels with vertical slot patterns. Answer, Kick, Series 9000, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.

Tip: See Stability Guidelines in each corresponding specification guide.

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Off-Module Brackets

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Series 9000, Avenir, Montage, and V.I.A. with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount Brackets

Upmount brackets, optional, can be used with universal sliding door, universal over the case, and universal in the case bins. Brackets attach bins near the top of 54"H panels. TS Series bins and universal shelves cannot be attached to upmount brackets.

Upmounted bin height is 66"H when installed on 54"H panels. For Montage, the overall upmounted bin height is 68⁵/₈" when installed on a 55"H frame.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Upmount brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Upmount brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Omit Brackets

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Hutch kit supports bin at 66" height.

Service module package supports bin at 65" height on Series 9000.

Bracket Application Rules

For Universal Curved Front Bin and Universal L-Shelf

Bracket Application Matrix

	Basic	Full off-module	Upmount
Answer	•		•
Avenir	•		
Kick	•		•
Montage	•		
Enhanced Off-Module Montage		•	
Series 9000	•		
V.I.A.	•		

Basic Brackets

Basic brackets are used to mount bins and shelves to panels with vertical slot patterns. Basic attachment brackets push bins and shelves 1/4" from frame.

Width of overhead bin or shelf must match or be wider than the width of the panel or panels that it is attached to.

Basic attachment brackets install in panel seams and allow bins and shelves that are wider to be attached. Total width of bin or shelf can extend 12" beyond the bracket on one side.

Upmount Brackets

Upmounted bin and shelf height is 66"H when installed on 54"H panels.

Upmount bin or shelf width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Upmounted bin or shelf can be attached in front of, above or adjacent to a slatwall as long as there is not another bin, shelf or another slatwall skin on the adjacent in-line panel.
Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Basic and open design upmount brackets, optional, attach bins and shelves near the top of 54"H panels.
Tip: Stationary shelf cannot hang from an upmounted bin or shelf.

Application Rules for Overhead Storage on Answer and Kick Panels

Answer Panel

Guidelines for Universal Bins. Applies to universal sliding door bin, universal in the case bin, or universal curved front bin on Answer and Kick panels.

The following application restrictions must be complied with when hanging universal overhead bins and universal curved front bins on Answer and Kick panels. Otherwise, standard Answer and Kick application guidelines apply.

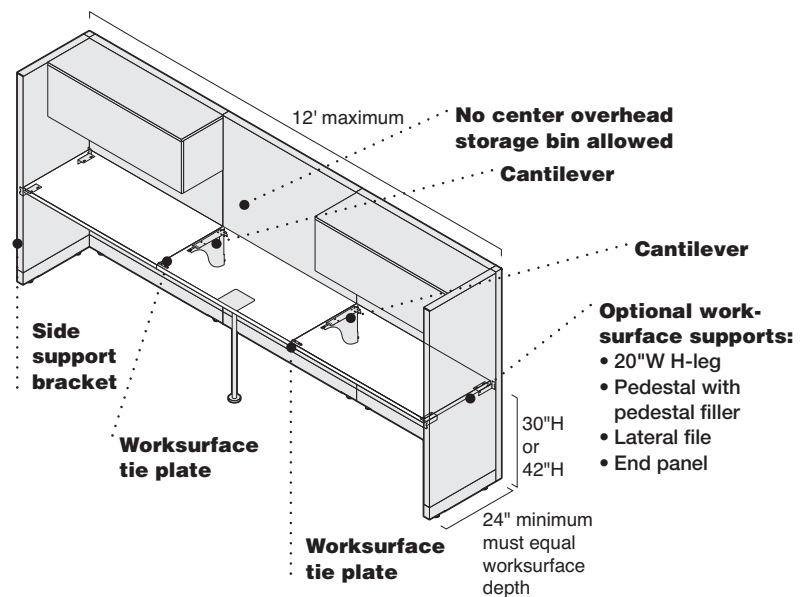

- Universal sliding door bin, universal in the case bins, and universal curved front bins cannot hang on an Answer or Kick panel above the 66"H connection point.
- The maximum panel run length when using a universal overhead bin or universal curved front bin on Answer or Kick panels is 12'.
- Top of universal sliding door bin is not designed to support the weight of a seated person. The bin may be mounted at 38"H or lower only if another panel mounted component prevents it from being seated upon.
- When ganging binder bins, the use of a tie plate is required.

CAUTION

Failure to comply to these guidelines may result in personal injury.

Tip: For panel specific stability guidelines, see the corresponding panel specification guide.

Kick Panel

Universal One-High, 1.5-High, and Two Drawer Lateral Files

One-High and Two Drawer lateral files

serve a dual purpose as high-density storage and as an inviting space for guests.

► Specifying, page 196

1.5-High lateral files

provide multi-zone storage for binders, hanging folders, and piling surfaces at a height which allows for comfortable guest seating in collaborative environments.

► Specifying, page 196

Label holders are

included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Finished back is standard.

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height.

Lock is standard on lateral files and is located at top left corner of drawer. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 304

Pulls on flush-front lateral files are full width and integral.

Pulls on proud-front lateral files are available in a variety of shapes.

Top is standard 1"H steel on units with steel fronts and standard 1³/₁₆"H wood veneer on units with wood fronts. Other top options are available.

Drawer fronts are available in steel or wood veneer.

Leveling glides adjust up to ³/₄" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawers are standard 12"H and open full depth for total access to the contents.

Actual Dimensions

Depth with flush steel or open front 18" and 23¹/₈"

Depth with proud steel or wood front 18⁷/₈" and 24"

Width 30", 36", and 42"

Height 16⁷/₈", 22", and 28"

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

Tip: All base options have same overall height.

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately. ▶ Page 266

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately. ▶ For interior dimensions, see page 310

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers per drawer, 12"H file drawers also include one hanging folder bar per drawer. Additional dividers are available and must be specified separately. ▶ Page 267

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

Individual drawer locks are available as an option for an application that would limit access to each drawer. Lateral files include a security shield between drawers to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying are available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

No-top lateral files are available for use with cushion top or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1"

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

FrameOne top matches the height of a FrameOne bench. A 3/4"H wood or laminate top floats above a painted steel security top using six black plastic spacers. FrameOne top can be specified on 28"H files only, making the overall height 28 1/2"H.

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. Thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately. Ganging side-by-side now requires a counterweight package. ▶ Page 270

Connections

Intermediate support is used with Universal One-High or 1.5-High storage as a worksurface support allowing for nesting of low storage. ▶ Page 201

Tether bracket is used with One-High and 1.5-High storage to add stability and eliminate the need for a counterweight when used with the c:scape beam.

Cushion top is ordered separately for use on one-high lateral files without top.

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor or wall for stability.

Storage to panel bracket connects One-High, 1.5-High, 2-High, 3-High laterals and cabinets to panel to provide added stability to panels and eliminate the need for return panels. ▶ See page 256

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza. ▶ Page 258

Field-installed accessories are available, including drawer accessories and counterweight packages. ▶ Page 266

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials. **Tip: Anchor bracket cannot be used with pedestals.** ▶ Page 271

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage. ▶ See Storage Specification Guide

Storage Capacities and Dimensions

▶ Page 310

Universal Towers and Workstation Verticals

Towers provide storage of a variety of work and personal items for an individual, including paper, binders, books, and coats.
 ▶ Specifying, page 204, 214, 218, and 222.

Finished back is standard.

Interior of tower is available in a variety of configurations combining coat storage, fixed and adjustable shelves, and file drawers.

Pull on flush-front tower is integral and full height on doors and full width on drawers.

Locks are standard on door and drawers. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike.
 ▶ *Lock and Keying*, page 304

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height. All other universal towers are available with the universal 3" base only.

Drawers open their full depth for total access to the contents.

Leveling glides adjust up to $\frac{3}{4}$ " for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install tower on uneven floors.

Top is standard 1"H steel. Other top options are available.

Door is available in steel or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior. Door is available hinged on left or right.

Locker space is 9" wide and standard with a coat rod.

Pull on proud-front tower is available in a variety of shapes.

Drawer fronts are available in steel or wood veneer.

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

All base options have same overall height. FrameOne foot base and c:scape glide base are only available on 18"D and 24"D open side and dual door towers.

Actual Dimensions

Depth with flush steel front	18", 23 $\frac{1}{8}$ ", and 29 $\frac{1}{8}$ "
Depth with proud steel or wood front	18 $\frac{7}{8}$ ", 24", and 30"
Width	24"
Height	47 $\frac{1}{2}$ ", 52", and 65 $\frac{1}{2}$ "

Interior of tower combines coat storage, box and file drawers, fixed and adjustable shelves.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Door pull is 192 mm and drawer pulls are 128 mm. Proud-front pulls are available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Lift-up door is standard on 65½"H vertical drawer towers and workstation verticals, and includes a fixed shelf. Flush-front door recedes into the case and proud-front door lifts above case.

Adjustable shelves on 52"H and 65½"H open side towers are recessed from the front and side of the tower. Shelves adjust in 2½" vertical increments. Opening on 47½"H tower is 13½"H and does not come with an adjustable shelf.

Frosted glass adjustable shelves are available as an option on open side towers. *Tip: If glass shelves are selected, they will replace all steel shelves in the unit.*

Post on open side towers supports adjustable shelves and is painted to match the case.

Adjustable shelves in dual door and full front towers can be positioned in the interior of the tower in ¾" vertical increments using a reversible bracket. The first shelf above a file drawer is a fixed shelf.

Drawer accessories include one divider and one pencil tray in each box drawer. File drawers can accommodate front-to-back filing of letter-size hanging folders without the use of additional accessories.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawer locks are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

Drawer lock in open side tower is located in the top file drawer.

Drawer lock in dual door tower, full front tower, vertical drawer tower, and workstation vertical tower is located approximately 36" from the floor and also secures the lift-up door on 65½"H units.

Individual drawer locks are available as an option on workstation verticals for applications where you want to limit access to each drawer. Workstation verticals include a security shield above each drawer to prevent unauthorized access. In 65½"H towers, the lift-up door is controlled by the lock in the drawer directly below. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304
Exception: Individual drawer locks are not available on towers with 6"H drawers.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ¾" taller than steel tops and will add that dimension to the overall height of the tower.

Top will default to steel on towers with proud wood fronts since the door overlaps and partially conceals the top. Wood top is available as an option.

Counterweight packages must be specified for certain towers that are not ganged to another tower or bolted to the floor or wall. Counterweights can also be ordered separately. ▶ Page 111

Door on full front towers is full height and can be hinged on the left or right. Coat storage space is always located on the same side as the door hinge.

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Towers can also be bolted to the floor or wall for stability.

High storage to panel connector provides added stability to panels and eliminates the need for return panels.
▶ See page 256

Worksurface to tower connector eliminates the need for other work surface supports such as legs or end supports next to the tower.
▶ See page 256

Worksurface to tower alignment. Proud front towers align with 23½"D, 24"D, 29½"D, and 30"D worksurfaces. Flush front towers extend 7/8" beyond 24"D and 30"D worksurfaces, and 1/8" beyond 23½"D and 29½"D worksurfaces.

Field-installed accessories are available, including drawer accessories and shelf bookends.
▶ Page 265

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact *Specials*.

Tip: Anchor bracket cannot be used with pedestals.

Shipping

Towers are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field installed.

Universal Lateral Files

Lateral files are ideal for high-density paper storage.
 ▶ Specifying, page 224

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.
 ▶ Lock and Keying, page 304

Base is 3"H and is integral to the case.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawer and lift-up door fronts are available in steel or wood veneer.

Pulls on proud-front lateral files are available in a variety of shapes. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Top is standard 1"H steel on units with steel fronts and standard 1¾"H wood veneer on units with wood fronts. Other top options are available.

Product Details

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Drawers open their full depth for total access to the contents are standard 12"H.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pull on flush-front lateral file is full width and integral.

Actual Dimensions

Depth with flush steel front	18" and 23½"
Depth with proud steel or wood front	18⅞" and 24"
Width	30", 36", and 42"
Height	40", 52", and 65½"

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Tip: Your specification for optional drawer interiors will apply to all the drawers within a single lateral file.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately.

▶ Page 109

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.

▶ Page 109

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.

▶ Page 110

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door on lateral files with flush-front recesses inside the case; door on proud-front case lifts up above the case.

Lift-up door on flush-front cases is available with an optional roll-out shelf in place of the standard fixed shelf. Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 304

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Lateral files include a security shield above each drawer to prevent unauthorized access. In 65½"H cases, the lock in the drawer below controls the lift-up door in the top position. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 304

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ¾" taller than steel tops and will add that dimension to the overall height of the lateral file.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case, attached to a worksurface, or bolted to the floor or wall. Units that are ganged side-by-side still require a counterweight package. Counterweights can also be ordered separately.

▶ Page 111

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Storage-to-panel connectors are used with One-High, 1.5-High, 2-High, 3-High laterals and cabinets to provide added stability to panels and eliminate the need for return panels.

Universal Combination Cabinets

Combination cabinets

offer storage of paper and other objects in one cabinet and are suitable for use by an individual or group.

► Specifying, page 228

Pull on proud-front cabinet is available in a variety of shapes.

Finished back is standard.

Locks are standard on doors and drawers. Door lock on right-hand door secures both doors. Drawer lock secures all drawers. On units with three or more drawers, lock is located at top left corner of drawer that is third from the bottom. On units with two drawers, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike.

► *Lock and Keying*, page 304

Drawer fronts are available in steel or wood veneer.

Doors are available in steel or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior.

Leveling glides adjust up to 3/4" to install cabinet on uneven floors.

Base is 3"H and is integral to the case.

Top is standard 1"H steel on units with steel fronts and standard 13/16"H wood veneer on units with wood fronts. Other top options are available.

Interior of cabinet includes adjustable shelves. Shelves can be positioned in 3/4" vertical increments using a reversible bracket.

Drawers open their full depth for total access to the contents.

Pull on flush-front cabinet is integral and full height on doors and full width on drawers.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Product Details

Cabinets are available with doors to cover the shelves, or shelves can be open.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Actual Dimensions

Depth with flush steel front	18" and 23 1/8"
Depth with proud steel or wood front	18 7/8" and 24"
Width	30", 36", and 42"
Height	52", 65 1/2", and 83 1/2"

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Tip: Your specification for optional drawer interiors will apply to all the drawers within a single cabinet.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size file folders. Additional bars are available and must be specified separately.

► Page 109

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.

► Page 109

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.

► Page 110

Frosted glass hinged doors are available as an option on certain configurations. Glass doors do not lock. Pulls on glass doors are available in the same finishes as proud-front pulls. On flush-front cabinets, glass door pull finish must be specified. On proud-front cabinets, glass door pull finish will default to finish selected for drawer pulls. Doors ship separately from the case and are field-installed.

Tip: Pull on glass doors is not the same design as drawer pulls.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawers are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 304

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Combination cabinets include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 304

No-top cabinets are available for installations where cabinet will be installed beneath a common top shared among several cabinets. Hardware is included to attach case to worksurface. No-top option reduces height of cabinet by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are $\frac{3}{16}$ " taller than steel tops and will add that dimension to the overall height of the cabinet.

Counterweight packages must be specified as an option for cabinets that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately.

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Combination cabinets can also be bolted to the floor or wall for stability.

Wood veneer with square edge profile

Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual cabinet, or larger tops can be used to connect cabinets.

► Page 258

Field-installed accessories are available, including shelf bookends, drawer accessories, and counterweight packages. ▶ Page 108

Anchor bracket secures file, cabinet, or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet. *Note: **Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials.* *Tip: Anchor brackets cannot be used with pedestals.* ▶ Page 112

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage. ▶ Page 100

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors. c:scape pulls (200 mm) are available on steel only.

Interior of cabinet includes adjustable shelves. Shelves can be positioned in the interior of the storage cabinet in 3/4-inch vertical increments using a reversible bracket.

Pull on flush-front cabinet is full height and integral.

Actual Dimensions

Depth with flush steel front	18" and 23 1/8"
Depth with proud steel or wood front	18 7/8" and 24"
Width	30", 36", and 42"
Height	28", 40", 52", 65 1/2", and 83 1/2"

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

No-top cabinets are available as an option for installations where cabinet will be installed under a worksurface or beneath a common top shared among several cabinets. Hardware is included to attach case to worksurface. No-top option reduces height of cabinet by 1".

Security top is available as an option for installations where the cabinet will be installed beneath a worksurface, but not physically attached. A thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can only be specified on 28"H cabinets. Security top reduces overall height of cabinet to approximately 27"H.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the cabinet.

Counterweights are not required on storage cabinets.

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Storage cabinets can also be bolted to the floor or wall for stability.

Universal Wardrobe Cabinets

Wardrobe cabinets

offer coat and other flexible storage for an individual or group.

► Specifying, page 238

Doors are available in steel or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior.

Finished back is standard.

Coat rod runs full length of the wardrobe or is 9" in cabinets with partition.

Pull on flush-front cabinet is full height and integral.

Base is 3"H and is integral to the case.

Leveling glides adjust up to 3/4" to install wardrobe on uneven floors.

Top is standard 1"H steel on units with steel fronts and standard 1 3/16"H wood veneer on units with wood fronts. Other top options are available.

Interior of cabinet is available in a variety of configurations.

Pull on proud-front cabinet is available in a variety of shapes.

Lock is standard on all wardrobes and secures both doors. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 304

Product Details

Interior of wardrobe is available in two different configurations:

- Side-to-side coat rod in 24"D wardrobe
- Combination interiors with adjustable shelves and a coat rod in 24"D wardrobes

Tip: Coat space is 6"W and is always on the left-hand side of wardrobes with combination interiors.

Combination interiors

contain three adjustable shelves in each 52"H wardrobe and four adjustable shelves in each 65 1/2"H. Shelves can be positioned in 3/4" vertical increments using a reversible bracket.

Fixed shelf is standard in 83 1/2"H wardrobes at approximately the 61 1/2"H position with the coat rod or combination interior just below that position.

Actual Dimensions

Depth with flush steel front	23 1/8"
Depth with proud steel or wood front	24"
Width	30" and 36"
Height	52", 65 1/2", and 83 1/2"

Flush-front pull is full height and integral with the door. Pull is available on steel doors only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors. c:scape pulls (200 mm) are available on steel only.

Shipping

Wardrobes are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Universal Bookcases

Bookcases offer convenient storage for binders, books, and other objects.
 ▶ Specifying, page 242

Leveling glides adjust up to 3/4" to install bookcase on uneven floors.

Product Details

Bookcases are available with adjustable shelves. Shelves can be repositioned without using tools. Additional shelves can be ordered separately and installed on site.

Number of adjustable shelves per bookcase

depends on case height:

28"H	1 adjustable shelf
40"H	2 adjustable shelves
53 1/2"H	3 adjustable shelves
65 1/2"H	4 adjustable shelves
83 1/2"H	5 adjustable shelves

Adjustable shelf is the same for standard and display installations; standard and display brackets are different. Shelf is used in reverse position for use with display brackets.

Actual Dimensions

Depth	15"
Width	24", 30", 36", and 42"
Height	28", 40", 53 1/2", 65 1/2", and 83 1/2"

Standard-size binders will fit in bookcases with adjustable shelves. Space between adjustable shelves is 11⁷/₈".

Exception: Bottom space is 12"H and top space varies depending upon the overall case height:

- 28"H 12⁵/₈" top space
- 40"H 11⁷/₈" top space
- 53¹/₂"H 11⁵/₈" top space
- 65¹/₂"H 11⁷/₈" top space
- 83¹/₂"H 17¹/₈" top space

Frosted glass hinged doors are available as an option on all bookcases. Glass doors do not lock. Pulls on glass doors are available in four finishes. Doors ship separately from the bookcase and are field-installed.

No-top bookcases are available for installations where bookcase will be installed under a work surface or beneath a common top shared among several bookcases. Hardware is included to attach case to work surface. No-top option reduces height of bookcase by 1".

Security top is available as an option for installations where the bookcase will be installed beneath a work surface, but not physically attached. Security top is not structural and can only be specified on 28"H bookcases. Security top reduces overall height of bookcase to approximately 27"H.

Tip: Security top must not be used with frosted glass hinged doors.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel top. Laminate and wood veneer tops are ³/₁₆" taller than steel tops and will add that dimension to the overall height of the bookcase.

Counterweights are available as an option for 65¹/₂"H and 83¹/₂"H bookcases. Counterweights must be specified for bookcases that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately.
▶ Page 112

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Bookcases can also be bolted to the floor or wall for stability.

Understanding 900 Series Products

When ordered and installed in accordance with Steelcase specification and installation guidelines, these products meet applicable ANSI/BIFMA standards.

900 Series Lateral Files	84
900 Series Lateral Files with Lift-Up Doors and Roll-Out Shelves	88
900 Series Buildup Lateral Files	90
Buildup Options and Rules	92
Buildup Tips and Examples	96

900 Series Lateral Files

900 Series lateral files

are ideal for high-density paper storage.
 ▶ Specifying, page 246

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.
 ▶ *Lock and Keying*, page 304

Base is 3"H and is integral to the case.

Leveling glides adjust up to 7/8" to install lateral files on uneven floors.

Top is standard 1"H steel. Other top options are available.

Drawers open their full depth for total access to the contents and are standard 12"H. 900 Series drawers and lift-up doors have flush fronts.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pulls on 900 Series drawers and lift-up doors are full width and integral. They complement Series 9000 systems furniture and Universal Storage flush front products. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Product Details

Drawer interiors include one hanging folder bar per drawer, which accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Alternative interiors are available as options; your specification will apply to all the drawers within a single lateral file. Additional bars are available and must be specified separately.
 ▶ Page 109

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.
 ▶ Page 109

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.
 ▶ Page 110

Actual Dimensions

Depth	18"
Width	30", 36", and 42"
Height	28", 40", 52", and 65½"

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door recesses inside the case.

Lift-up door is available with an optional roll-out shelf in place of the standard fixed shelf.

Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Posting shelf is available on five-high file cabinets. The shelf is factory installed at approximately 36"H in standard files.

Tip: When a posting shelf is specified, the height of the top lift-up door is reduced to 12" and does not accommodate standard-height binders.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Lateral files include a security shield above each drawer to prevent unauthorized access. In 65½"H cases, the lock in the drawer below controls the lift-up door in the top position. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 304

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. This steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Counterweight packages must be specified as an option for lateral files that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately. ▶ Page 111

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza. ▶ Page 258

Field-installed accessories are available, including drawer accessories and counterweight packages. ▶ Page 108

Anchor bracket secures file to floor in compliance with the California Office of Statewide Health Planning and Development (OSHPD) rules to reduce the risk of hazards during earthquakes. To comply, all files which have the bottom of their top opening at 60"H or higher must use an anchor bracket. **Note: Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. ▶ Page 112

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage. ▶ Page 100

900 Series Lateral Files with Lift-Up Doors and Roll-Out Shelves

900 Series lateral files with lift-up doors and roll-out shelves are ideal for high-density side-tab filing.

► Specifying, page 248

Finished back is standard.

Lock is standard on lateral files and secures all lift-up doors. Lock is located at top left corner of the top. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 304

Base is 3"H and is integral to the case.

Leveling glides adjust up to $\frac{7}{8}$ " to install lateral files on uneven floors.

Top is standard 1"H steel. Other tops are available field-installed.

Lift-up doors are equipped with roll-out shelves.

Roll-out shelves open their full depth for total access to the contents and are standard 12"H. 900 Series lift-up doors have flush fronts.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pulls on 900 Series drawers and lift-up doors are full width and integral. They complement Series 9000 systems furniture and Universal Storage flush front products. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Product Details

Lift-up doors on 65½"H units with five doors and no posting shelf are two different heights. The top door is 13½"H to accommodate standard-height binders. All other doors are 12"H to accommodate side-tab files. On 65½"H units with five lift-up doors and 1½"H posting shelf, all doors are 12"H to accommodate side-tab files. On 65½"H units with four lift-up doors, all doors are 15"H to accommodate standard-height binders. All doors recede inside the case.

Each roll-out shelf includes one divider package to function as a backstop. Divider package includes three dividers and one hanging folder bar. Two hanging folder bars are available as an option and replace the divider package when specified.

Actual Dimensions

Depth	18"
Width	30", 36", and 42"
Height	28", 40", 52", and 65½"

Posting shelf is available on five-high file cabinets. The shelf is factory installed at approximately 36"H in standard files. On units with four 15"H openings, the posting shelf or filler is located in the middle of the four openings.

Tip: When a posting shelf is specified, the height of the top lift-up door is reduced to 12" and does not accommodate standard-height binders.

Safety interlock system allows only one roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 304

Counterweight packages must be specified as an option for lateral files that are not ganged to another case or bolted to the floor or wall. Counterweights can also be ordered separately.
▶ Page 111

Connections

Ganging hardware is included to increase stability and maintain alignment by joining adjacent components side by side, back to back, or both. Lateral files can also be bolted to the floor, or attached to a worksurface or wall for stability.

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.
▶ Page 258

Field-installed accessories are available, including roll-out shelf accessories and counterweight packages.
▶ Page 108

Anchor bracket secures file to floor in compliance with the California Office of Statewide Health Planning and Development (OSHPD) rules to reduce the risk of hazards during earthquakes. To comply, all files which have the bottom of their top opening at 60"H or higher must use an anchor bracket.
Note: Local seismic requirements vary.
Compliance with local code requirements is the responsibility of the customer or their authorized agent.
▶ Page 112

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

900 Series Buildup Lateral Files

Buildups are a way of creating your own configuration of storage components within a lateral file cabinet and having the factory assemble it for you.

Special storage requirements that are beyond the capabilities of standard lateral files can be accommodated by buildups. Oversized objects, electronic media, and small files or cards are all good candidates for lateral file buildups.

Choosing the Cabinet and Components for a Buildup

1 Choose a cabinet that has enough vertical space to accommodate everything that you want to store—four interior heights and three widths are available. All cabinets are 18"D.

2 Specify paint color.

3 Specify posting shelf option if desired (65 1/2"H units only). This will reduce available interior space to 60"H.

4 Specify top.

5 List the components that you want to fill the cabinet in order from top to bottom.

Tip: Some rules restrict certain combinations.
▶ See page 92 for specific rules.

6 Specify counterweight option to prevent accidental tipping in applications where lateral files are not ganged.

Buildup Options and Rules

Insides of lateral file cabinets are based on a 3" module to accommodate 6"H, 12"H, and 15"H components interchangeably.

Choose any combination of storage components that exactly equals the *interior* height of the cabinet. Descriptions of specific components and the rules that apply to them are listed below.

Drawers

Components

Heights Available
15"H, 12"H, 6"H

15"H drawers are designed for filing printouts, X-rays, and other oversized files. Both side-to-side and front-to-back filing can be accommodated. 15"H drawers consist of a 15"H drawer front on a standard 12"H file drawer body.

12"H drawers are designed for filing letter-size, legal-size, and A4 international-size documents. Both side-to-side and front-to-back filing can be accommodated.

6"H drawers are designed for filing cards, roll film, and cassettes. Disks and other larger materials can be stored flat.

Rules

15"H and 12"H drawers can be used in any position.

6"H drawers cannot be installed below a 15"H or 12"H fixed shelf that is in the top position of a 65½"H lateral file, or below a 15"H fixed shelf that is in the top position of a 28"H, 40"H, or 52"H lateral file.

Options of all the standard drawer interiors are available.

For the file cabinet to lock, at least one drawer must be included. The factory will determine the exact lock location.

Receding Doors

Components

Heights Available
15"H, 13½"H, 12"H

Receding doors cover roll-out shelves and fixed shelves.

Doors flip up and recede out of the way when shelves are in use.

Rules

Combined height of shelf components installed behind receding door can be less than or equal to the door height.

13½"H door can be specified only in the top opening of a 61½"H cabinet interior.

Units specified with no drawers will not include a lock.

Security top cannot be installed on a file with a lift-up door in the top position.

Roll-Out Shelves

Components

Heights Available
12"H, 6"H

12"H shelves accommodate side-to-side filing of letter-size, legal-size, and A4 international-size files.

6"H shelves can be used for filing disks, magnetic tape reels, and other miscellaneous items.

Rules

Can be used in any position. Must be installed behind a receding door.
Tip: 12"H roll-out shelves accept standard binders only when specified with a 13½"H or 15"H receding door.

Two 6"H roll-out shelves can be installed behind a receding door.
Tip: Install two 6"H roll-out shelves behind a 15" lift-up door to create spine-up compact disk storage.

Options of all the standard shelf interiors are available.

Fixed Shelves

Components

Heights Available
15"H, 13½"H, 12"H

Provide space for files, ring binders, and miscellaneous storage.

Available two ways— without a door or with a receding door.

15"H and 13½"H fixed shelves will accept standard binders.

12"H fixed shelves will not accept standard binders regardless of whether a door is used.

Rules

Fixed shelves cannot be installed below drawers or roll-out shelves due to safety interlock requirements. Opening with a lift-up door and roll-out shelf can be installed below drawers or roll-out shelves.

Fixed shelves can be open or installed behind a receding door.

13½"H fixed shelf can be specified only in the top opening of a 61½"H cabinet interior.

Bookends or a shelf divider assembly can be used to divide space on fixed shelves.

1 1/2"H Posting Shelf

Components

Heights Available
1 1/2"H

Provides a surface to hold materials that are being filed or retrieved from the file.

Pulls out 11 5/8".

Rules

Available in 65 1/2"H cabinets only.

Posting shelf takes up 1 1/2" of vertical clearance. Storage components must add up to *exactly* 60"H when this option is selected.

Position determined by the factory for optimum stability. The posting shelf will be installed in the first available opening above 27"H. It is usually installed at approximately 36"H. Only one posting shelf may be specified per cabinet.

1 1/2"H Filler

Components

Heights Available
1 1/2"H

Takes up extra space if other components do not fill the entire cabinet interior and a posting shelf is not required.

Rules

Available in 48"H and 61 1/2"H cabinet interiors only.

One filler is added automatically to any 61 1/2"H cabinet interior (without a posting shelf) that has only 60" of storage components.

Position determined by the factory for optimum stability. The 1 1/2"H filler will generally be installed in the first available opening above 27"H. It is usually installed at approximately 36"H.

Two fillers are added automatically to any 48"H cabinet interior that has only 45" of storage components (for example, three 15" drawers).

Buildup Tips and Examples

Specifying Steps

Step 1

Choose buildup style number.

▶ Cabinets for factory-assembled buildups are listed on page 250.

Step 2

Specify paint color.

Step 3

Specify posting shelf option

if desired (65½"H units only). This will reduce available interior space to 60"H.

Step 4

Specify top.

Step 5

Specify the storage components

that will fill the cabinet in order from top to bottom. When a receding door will cover one or more roll-out shelves, specify the door first and then the storage components that are behind it.

Tip: When calculating the total height of the storage components in the cabinet, include the height of the doors, but don't add in the height of the storage components that are behind the door. Remember, doors are not standard with roll-out shelves but are required. You must specify them.

▶ See page 92 for *Buildup Options and Rules*

Step 6

Specify a counterweight package option

to prevent accidental tipping in applications where lateral files are not ganged.

Example 1

40"H cabinet (36"H interior) for use in a workstation

Combines a 12"H drawer for files, two 6"H drawers for supplies, and a 12"H drawer for files and/or oversized items.

Tip: Following cabinet description, list components in order from top to bottom.

Style Number

9BU18363F

Quantity	Option
1	12"H drawer with 1 hanging folder bar
2	6"H drawers with 3 dividers
1	12"H drawer with 1 hanging folder bar
1	Counterweight
36" total height of components	

Example 2**52"H cabinet (48"H interior) for mixed-media storage**

Combines a 15"H fixed shelf with receding door for binders; two 6"H rollout shelves for CD storage behind a 15"H receding door, a 6"H drawer for supplies, and a 12"H file drawer.

Tip: Specify door and all components behind the door as a single item.

Style Number**9BU18364F****Quantity Option**

1	15"H with receding door with:
1	15"H fixed shelf
1	15"H receding door with:
2	6"H roll-out shelf with 3 dividers
1	6"H drawer with 3 dividers
1	12"H drawer with 1 hanging folder bar
48" Total height of components	

Example 3**65½"H cabinet (61½"H interior) for oversized file storage**

Combines a 12"H rollout shelf behind a 15"H receding door and three 15"H drawers. 1½"H posting shelf option included for easy reference to files.

Tip: Factory will determine posting shelf position.

Style Number**9BU18425F****Specify** with 1½"H posting shelf option**Quantity Option**

1	15"H receding door with:
1	12"H roll-out shelf with 3 dividers and one hanging folder bar
3	15"H drawer with 2 rails
60" total height of components	

Understanding Overfile Cabinets

When ordered and installed in accordance with Steelcase specification and installation guidelines, these products meet applicable ANSI/BIFMA standards.

Overfile Cabinets

100

Overfile Cabinets

For Use with Universal, 900, TS 200, and 800 Series Storage Products

Overfile cabinets provide additional storage on top of Universal, 900, TS 200, and 800 Series storage products. Overfile cabinets can also be added to Universal and 800 Series combination cabinets and to Universal storage and wardrobe cabinets to accommodate file folders, ring binders, and miscellaneous storage.

► Specifying, page 254

Adjustable shelf is included in 31 1/2"H overfile cabinet. The shelf adjusts in 3/4" increments.

1" H steel top is standard.

Full-height, integral door pulls complement 200, 800, and 900 Series lateral files and combination cabinets, and Universal flush-front storage products.

Lock secures both doors in the overfile cabinet. Lock is standard factory-installed, keyed random only. Factory-installed master-keyed locks are also available.

► Lock and Keying, page 304

Product Details

Two overfile cabinet styles are available—without doors or with steel, sliding doors.

Two heights are available. Models with one shelf have a fixed shelf on the bottom. Models with two shelves have a fixed shelf on the bottom and an adjustable shelf. The adjustable shelf adjusts at 3/4" increments.

Additional adjustable shelves are available.

Bookends are available for use in overfiles and are ordered separately.

► Page 110

Actual Dimensions

Depth	18"
Width	30", 36", or 42"
Height	18" or 31 1/2"

Connections

Overfiles can be mounted on top of units with a 1" steel top, security top, laminate top, or wood top only. They cannot be mounted on units with no top.

Field-Installed Tops

For Use with Universal, TS 200, 800, and 900 Series Storage Products

Steel Security Tops with flush or proud front

► Specifying, page 257

Product Details

Flush front Proud front

Steel security tops are available as an option on select 28"H storage products. They can also be ordered separately for field installations.

Security top is available for installations where a lateral file, storage cabinet, or bookcase will be installed beneath a worksurface, but not physically attached. Security top is not structural.

Security top cannot be installed on a file with a lift-up door in the top position.

Connections

Not all top sizes are intended for use on all furniture. See *Specifying* pages to determine the appropriate-sized top for your furniture.

Steel security tops with flush fronts can be used on the following:

- Lateral files
- Storage cabinets
- Bookcases

Steel security tops with proud fronts can be used on the following:

- Lateral files
- Storage cabinets

Attachment hardware ships with the file cabinet. *Tip: Additional screws can be ordered from Service Parts: 855010126MP (quantity of 100).*

Width	30", 36", or 42"
Height	1 ¹ / ₁₆ "

Square Edge Tops with flush or proud front

► Specifying, page 258

Product Details

Flush front Proud front

Square edge tops can be specified as an option on most storage products. They can also be ordered separately for field installation.

Edge profile is plastic on laminate top and is specified separately from laminate color.

Connections

Not all top sizes are intended for use on all furniture. See *Specifying* pages to determine the appropriate sized top for your furniture.

Square edge tops with flush fronts can be used on the following:

- Lateral files
- Combination cabinets
- Storage cabinets
- Wardrobe cabinets
- Bookcases

Square edge tops with proud fronts can be used on the following:

- Lateral files
- Combination cabinets
- Storage cabinets
- Wardrobe cabinets

Attachment hardware ships with the top.

Contact Specials for common tops placed over group storage and placed back-to-back to ensure correct sizing for the application.

Storage Accessories

Rails for Pedestals, Towers, and Workstation Verticals

► Specifying, page 139

Product Details

Rails accommodate side-to-side filing of letter-, A4 international-, and legal-size hanging folders.
Tip: 17½"D and 18⅞"D pedestals do not accommodate legal-size hanging folders.

Rail packages are available in quantities of two rails.

Rails can be used for side-to-side filing in 12"H file drawers of the following:

- Open side towers
- Dual door towers
- Full front towers
- Vertical drawer towers
- Workstation verticals
- Fixed pedestals (manufactured after February 22, 2004)
- Mobile pedestals (manufactured after February 22, 2004)

Tip: For pedestals manufactured on or before February 22, 2004, see Service Parts catalog.

Tip: Fixed pedestals and mobile pedestals require a set of two rails for side-to-side filing.

Surface Materials

Rails

Pencil Tray and Reference Shelf for Pedestals, Towers, and Workstation Verticals

► Specifying, page 139

Product Details

Pencil tray and reference shelf are used in:

- Open side towers
- Dual door towers
- Full front towers
- Vertical drawer towers
- Workstation verticals
- Fixed pedestals (manufactured after February 22, 2004)
- Mobile pedestals (manufactured after February 22, 2004)

Tip: For pedestals manufactured on or before February 22, 2004, see Service Parts catalog.

Pencil tray is available to hold small office supplies. One pencil tray is shipped standard with each pedestal tower, or workstation vertical that is equipped with one or more 6"H box drawers.

Reference shelf protects reference papers in box drawers. Shelf rests on top of drawer edges and can slide the entire depth of the drawer. A clear plastic insert is standard with each reference shelf.

Hanging Folder Bars for Lateral Files, Combination Cabinets, 900 Series, 800 Series, and TS 200 Series

► Specifying, page 266

Product Details

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders.

Hanging folder bars can be used in 12"H and 15"H lateral file drawers and 12"H roll-out shelves of the following:

- Lateral files
- Combination cabinets

Tip: For legal-size filing, hanging file folder frames are not needed in drawers because drawer edges support folders.

Surface Materials

Hanging folder bars ship individually in a package of one.

Connects file to Series 9000 panel to enhance panel stability. Attaches to file with screws.

Connects file to Avenir panel to enhance panel stability. Attaches to file with screws.

Attaches to top and bottom of Avenir panel that is perpendicular to file that is the same height or taller than panel (excluding the top cap). Attaches to file with screws.

Specifying

Must be ordered separately for field installation.

Surface Materials

Bracket

- Black paint only

Anchor Bracket Package

► Specifying, page 271

Product Details

Anchor bracket secures file, cabinet or tower to floor in seismic zones to reduce the risk of hazards during earthquakes. Four bracket packages are required for each cabinet. Note: **Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Specials. Tip: Anchor brackets cannot be used with pedestals.

Anchor bracket package includes brackets and attachment hardware.

Surface Materials

Anchor brackets

- Black

Underworksurface Lateral File Fillers

► Specifying, page 272

Product Details

Lateral file filler can be used in applications where a 27"H lateral file or storage cabinet with no top is used underneath a worksurface. Filler conceals the gap between the face of a panel and the back of the lateral file or storage cabinet. Filler connects to the panel to provide stability for configurations that are not panel-wrapped; use the same application rules as a pedestal with filler. Fillers are available for use with proud-front or flush-front lateral files or storage cabinets.

24"D filler is used with 18"D storage. 30"D filler is used with 18"D or 24"D storage. Order filler to match nominal depth of worksurface.

Connections

Lateral file fillers can be used with the following:

- Answer panels
- Turnstone Kick panels
- Turnstone Kick worksurfaces
- Universal Systems worksurfaces
- Answer worksurfaces

Surface Materials

Lateral file filler and filler brackets

- Paint

Shelf Lights

Standard and Utility2

► Specifying, pages 274–277

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Daisy chain cords have modular connectors to link Standard shelf lights together. 78" daisy chain jumper cord is standard with select Utility2 lights.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Daisy chain starter light with cord must be ordered when Utility2 shelf lights are used in a daisy chain application.

Actual Dimensions

	Standard	Utility2
Depth	9 ¹ / ₄ " (235 mm)	6 ⁷ / ₈ " (175 mm)

48 ⁵ / ₈ "	48"	32 watts	F32T8-TL735

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath over-head storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet. Utility2 light daisy chaining allows up to 10 fixtures.
▶ Page 128

Starter cord for Standard and starter light for Utility2 powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power-factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard and Utility2.

Normal-power-factor electronic ballasts are available on Utility2 shelf lights.

Batwing lens is available as an option on Utility2 shelf lights for applications where moderate improvement to light distribution is needed.

LED Shelf Lights

► Specifying, page 281

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

Power supply for LED daisy chain starter light uses a 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light. A 15 watt power supply is used on the LED standard light, it is 9' long with a two prong driver plug.

Tip: Energy saving mini-LEDs greatly reduce power use.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood or aluminum shelves.

Wiring & Cabling

Shelf light includes the lamp and power supply with cord set. Daisy chain starter light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

Power supply for LED daisy chain starter light uses a 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light. A 15 watt power supply is used on the LED standard light, it is 9' long with a two prong driver plug.

Tip: Daisy chain starter light comes with a 60 watt power supply to support up to three lights. Daisy chain secondary lights do not come with a power supply, but instead come with a daisy chain cord set.

LED Personal Task Lights

► Specifying, page 282

Plastic cover finish in Arctic White only.

Soft on and soft off light activation.

Illuminated soft touch switch has continuous dimming.

Cord exists from under the stanchion.

Product Details

Personal task light includes the lamp and power supply with cord set. Rail-mounted version includes rail brackets. Non rail-mounted version includes Universal Mounting brackets.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Tip: Energy saving mini-LEDs greatly reduce power use.

Connections

LED personal task light mounts directly to the rail systems of c:scape, Frame-One, Elective Elements, Impact, Turnstone Campfire Big Table, and Details SOTO rail.

Non rail-mounted LED personal task lights will not work on worksurfaces with knife edge that is longer than 1 1/4", or with modesty panels or modesty screens closer than 6" from the back edge.

Wiring & Cabling

Personal task light includes the lamp and power supply with cord set.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Daisy Chaining

For Standard, Utility2, and Bottomline Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

For Utility2 lights, connect the power cord **1** between the first light and the wall receptacle. Connect the jumper cord **2** between the lights. Maximum distance between receptacles for 78" jumper is 74".

Tip: Connect up to 10 fixtures maximum. Voltage and current rating of fixture is 120 volt, .75 amps.

Starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

For Bottomline lights, starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

Daisy Chaining

For Underline Lights

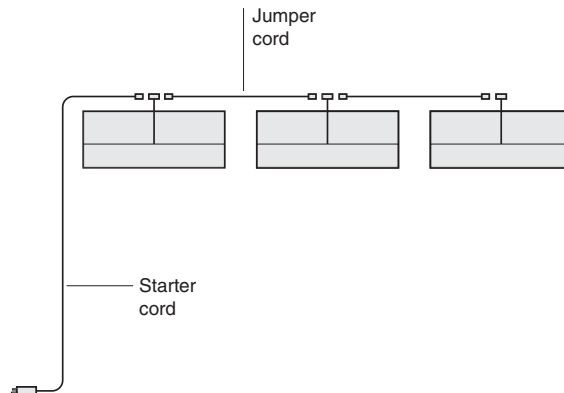

Daisy chaining lights together extends power from one shelf lights to another within workstations to help keep receptacles clear for other uses.

Starter cord is required on shelf lights with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Jumper cord is required to connect daisy chain lights.

Power will not be interrupted in a chain, even if one of the shelf lights is turned off or its lamp has burned out; because the path of power through the chain does not pass through the lamps or switches.

Additions to a chain are possible at any time by adding a jumper cord.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead bins and full-height shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Vertical Wire Manager

Vertical wire manager

conceals cords and cables that are routed vertically outside of the panels.

► Specifying, page 283

Cover conceals cords or cables.

Hooks fit into vertical channel at edge of panel.

Product Details

Wire manager is available for use between the bottom of a shelf or overhead storage bin and a worksurface. Wire manager can be cut in the field to suit specific application.

Wire manager can also be used below the worksurface.

Power cords and cables can be routed from the wire manager and the 1/2" gap along the back edge of the worksurface.

Connections

Snaps into the slotted channel of the junction.

Display

Victor2

Victor2 is a recycling solution that is appropriate for supporting larger work groups, conference rooms, and cafés. A mobile unit and two freestanding units are available. ▶ Specifying, pages 286-290

Mobile unit has three openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish, and French.

Receptacles contain features to accommodate oversized bags.

Four non-locking casters are standard. Two casters swivel, and two casters are fixed.

Soft-touch integral handle allows easy movement from one location to another.

Receptacles fit bags from 30 gallon size and larger.

Freestanding unit has four or five openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish and French.

Leveling glides are fully adjustable up to 1 1/2".

Actual Dimensions

	Mobile Unit	Freestanding Unit
Depth	18"	25"
Width	36"	48" or 60"
Height	36"	36"

Product Details

Mobile and freestanding units are standard with a metal case and top. Front and back of unit are available in wood or laminate.

Acrylic inserts etched with recycling icons are standard on mobile and freestanding units. The verbiage for each icon is in English/Spanish/French on the same insert.

Mobile unit is standard with three openings for inserts and sloped receptacles with built-in bag holding system.

Top on the mobile unit can be used for food service use or tray storage.

Hinged doors on the back are standard on the mobile unit for easy access to receptacles.

Four non-locking concealed casters, two swivel and two fixed, are standard on the mobile unit.

Receptacles in mobile unit can accommodate 12 gallons each. Receptacles in freestanding unit can accommodate 30 gallon size and larger.

Soft-touch integral handle on mobile unit allows for easy movement from one location to another.

Freestanding unit is standard with either four or five openings for inserts on the top of the unit.

Hinged doors on the front are standard on the freestanding unit for easy access to the receptacles.

Leveling glides on freestanding units are fully adjustable to 1 1/2".

Tray shelf can only be used with the freestanding unit.

Tray shelf fits most trays up to 20 3/4" x 12".

Freestanding four- or five-slot opening will accommodate two tray shelves.
Tip: A gap of 15" will separate the two tray shelves on a five-opening unit.

Maximum capacity of tray is 20 food trays with maximum size of tray 20" x 20".

Display holds two 8 1/2" x 11" papers or one 11" x 17" paper.
Tip: Paper will be between two acrylic plates. Paper can easily be replaced without tools.

Display can only be used with the freestanding unit.

Freestanding four- or five-slot opening will accommodate two displays.
Tip: A gap of 18 1/2" will separate the two displays on a five-opening unit.

One tray shelf and one display can be used on the freestanding unit.

TS Series Laminate Common Shelves

TS Series Laminate
Common Shelves

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.

Standard Includes		Required to Specify

Tip: Security top reduces overall height by approximately 1"

Tip: Laminate and wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Premium Wood Pricing: For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: One hanging folder bar and three dividers are included with each lift-up door with roll-out shelf.

Tip: Counterweight packages are recommended based on case size and interior options.
▶ See *Specification Information* at right.

Tip: Counterweight option should be specified if the cabinet is not ganged to adjacent cabinets or bolted to the floor or wall.

Tip: Counterweight packages ship separately from case and must be installed on site.

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RPF1827A__ becomes RPF1827AP for proud steel front).

Tip: Use 27"H pedestals to align with Universal Storage with 3" base. 27"H pedestals support worksurfaces at 28½"H.

Tip: Only 22⅝"D, 23½"D, 28⅝"D, and 29½"D pedestals can accommodate legal-size filing.

Tip: 25½"H fixed pedestals are for use in the following application: as fixed pedestals when used underneath worksurfaces installed at lower than standard heights (for example, 27"H).

Universal Curved Front Bins with Steel and Wood Doors

Tip: Basic attachment bracket allows only 12" off-module configurations on panels with vertical attachment. Bin must be the same width or up to 12" wider than the panel.

Premium Wood Pricing:
For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Bin is upmountable on Answer panel. Specify with suffix "NON" and choose the upmount bracket option.

Tip: Universal curved front bins can be upmounted on Answer slatwall skins as long as there is not another slatwall skin on the adjacent in-line panel.

Tip: Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Tip: 45"W is only available for Series 9000.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Standard Includes	Required to Specify

Universal L-Shelves and Stationary Shelves

For Universal Curved Front Bin and L-Shelf

Tip: Universal L-shelf does not align with Universal overhead bin when mounted side by side.

Tip: Basic attachment bracket allows only 12" off-module configurations on panels with vertical attachment. L-shelf must be the same width or up to 12" wider than the panel.

Tip: L-shelf is upmountable on Answer panel. Specify with suffix "NON" and choose the upmount bracket option.

Tip: Universal L-shelves can be mounted in front of slatwall skin or upmounted on Answer slatwall skins as long as there is not another bin, shelf or slatwall skin on the adjacent in-line panel.

Tip: Open design upmount bracket cannot be used when double-pane window is in top position of panel.

Tip: 45"W is only available for Series 9000.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Tip: Stationary shelf hangs from the bottom of curved front bins with KBIN_ style numbers and L-shelves with KLSHF_ style numbers. Space between bottom of bin or L-shelf and top of stationary shelf is 5½". Overall stationary shelf height dimension is 6⅝". Specify the same width as corresponding bin or L-shelf.

Tip: Stationary shelf cannot hang from an upmounted bin or shelf.

Tip: Shelf is steel with molded endcaps.

Universal One-High, 1.5-High, and Two Drawer Lateral Files

with Flush Steel, Proud Steel, Proud Wood, or Open Fronts

▶ Need help?
Product details,
page 60

Standard Includes

- Lateral file: paint price group 1
- 1"H top on units with flush steel or proud steel fronts: paint to match file
- 1³/₁₆"H top and drawer fronts on units with proud wood fronts: wood veneer
- Base (see below under required selections)
- Pulls: metal
- Integral pulls on units with flush steel fronts
- Central lock, keyed random: 9201 Polished Chrome
- One label holder per drawer: clear plastic
- Drawer body: black only
- Drawer suspensions: black only
- One hanging folder bar per drawer on 18"D units
- Two rails per drawer on 24"D units
- Four adjustable leveling glides
- Counterweight package, if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - W** Proud wood front
 - 2 Paint color number for file
 - 3 Wood color number for drawer fronts and top, if proud wood front selected
 - 4 Base (see below under required selections)
 - 5 Pull (see below under required selections)
 - 6 Metal color number for pulls, if proud steel or proud wood front selected
 - 7 Options, if selected (see below)
- ▶ See *Surface Materials*, page 292.

	Required Selections	U.S. Price	Required to Specify
Bases	• Universal 3" base	No cost	Specify with <i>Universal 3" base</i> , painted to match tower.

	• Package J	+\$280	Specify with counterweight.

► Options, continued on next page

Tip: Wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Tip: FrameOne tops are available on 28"H lateral files only. FrameOne top will add 1/2" to the overall height.

Premium Wood Pricing:
For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Full-fill finish (option) is available on field-installed tops only.

► Page 258

Tip: Security top reduces overall height by approximately 1".

Tip: 6"H box drawers come standard with a divider package.

Tip: Some cabinets with the c:scape glide base or FrameOne foot base require a different counterweight than the Universal 3" base. Please specify accordingly.

Tip: Counterweight packages are recommended based on case size and interior options.

Tip: Counterweight option should be specified if the cabinet is not ganged back-to-back to adjacent cabinets or bolted to the floor or wall. Cabinets ganged side-to-side require a counterweight.

Tip: A tether bracket is now available to attach universal units to the c:scape beam.
► Page 202

Tip: Counterweight packages ship separately from case and must be installed on site.

Universal One-High, 1.5-High, and Two Drawer Lateral Files with Flush Steel, Proud Steel, Proud Wood, or Open Fronts, continued

Tip: Laminate and wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Tip: Counterweight packages are recommended based on case size and interior options.
► See *Specification Information* on next page.

Tip: Counterweight option should be specified if the cabinet is not ganged back-to-back with another cabinet or bolted to the floor or wall. Cabinets bolted side-to-side now require a counterweight.

Tip: Counterweight packages ship separately from case and must be installed on site.

Tip: 65½"H files with individual lock option do not have a lock in the lift-up door. Lift-up door is locked by the drawer below.

Universal Combination Cabinets

with Flush Steel, Proud Steel, or Proud Wood Fronts

► Need help?
Product details,
page 72

Standard Includes

- Combination cabinet: paint price group 1
- 1"H top on units with flush steel or proud steel front: paint to match cabinet
- 1³/₁₆"H top and drawer fronts on units with proud wood front: wood veneer
- Integral pulls on units with flush steel front
- Pulls: metal
- Hinged doors on units with flush steel or proud steel front, if selected: paint to match
- Hinged doors on units with proud wood fronts, if selected: wood veneer to match cabinet
- Individual lock on door, keyed random: 9201 Polished Chrome
- Central lock on drawers, keyed random: 9201 Polished Chrome
- One label holder per drawer: clear plastic
- Adjustable shelves: paint to match cabinet
- Brackets for adjustable shelves: black
- Drawer body: black only
- Drawer suspensions: black only
- One hanging folder bar per drawer on 18"D units
- Two rails per drawer on 24"D units
- Four adjustable leveling glides
- Counterweight package, if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - W** Proud wood front
 - 2 Paint color number for cabinet
 - 3 Wood color number for drawer fronts, hinged door fronts, and top, if proud wood front selected
 - 4 Pull (see below under required selections)
 - 5 Metal color number for pulls, if proud steel or proud wood front selected
 - 6 Options, if selected (see below)
- See *Surface Materials*, page 292.

Premium Wood Pricing:
For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Laminate and wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Tip: Glass doors ship separately and must be installed on site.

Tip: Glass door pulls are not the same design as drawer pulls. On flush-front cabinets, glass door pull color must be specified. On proud-front cabinets, glass door pull color will default to color selected for drawer pulls.

Tip: Counterweight packages are recommended based on case size and interior options.
► See Specification Information on next page.

Tip: Counterweight option should be specified if the cabinet is not ganged to adjacent cabinets or bolted to the floor or wall.

Tip: Counterweight packages ship separately from case and must be installed on site.

 **For Canadian Pricing**
Multiply U.S. Price by the Canadian price factor.

Premium Wood Pricing:
For Premium wood 2 or Premium wood 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Security top reduces overall height by approximately 1".

Tip: Laminate and wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RSC18302A__ becomes RSC18302AF for flush steel front).

 **For Canadian Pricing**
Multiply U.S. Price by the Canadian price factor.
► See page 1 for details.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surfacematerials.

Surface Materials Binders

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$65 U.S. per work surface or top, plus the cost of the laminate.

When processing orders for Open Line laminate on Universal work surfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Universal Storage tops and fronts
- Overhead storage
- 900 Series tops
- TS 200 Series tops

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces**Veneer**

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

▶ See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Flat-cut open-pore finish choices

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry **E**
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple*
- 3572 FC/OP Amber on Maple **E**
- 3592 FC/OP Blonde on Maple
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3722 FC/OP Dark Mahogany on Walnut
- 3752 FC/OP Medium Walnut
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

E = Established

Quarter-cut open-pore finish choices

- 3042 QC/OP Ash*
- 3222 QC/OP Clear Maple*
- 3272 QC/OP Amber on Maple **E**
- 3292 QC/OP Blonde on Maple
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3322 QC/OP Dark Mahogany on Walnut
- 3352 QC/OP Medium Walnut
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

Rift-cut open-pore finish choices

- 3602 RC/OP Desert Oak
- 3612 RC/OP Warm Oak **E**
- 3692 RC/OP Espresso Oak

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Flat-cut full-fill finish choices

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry **E**
- 3424 FC/FF Medium Cherry
- 3524 FC/FF Clear Maple*
- 3544 FC/FF Blonde on Maple
- 3574 FC/FF Amber on Maple **E**
- 3704 FC/FF Clear Walnut
- 3714 FC/FF Natural Walnut
- 3724 FC/FF Dark Mahogany on Walnut
- 3754 FC/FF Medium Walnut
- 3764 FC/FF Dark Walnut
- 3774 FC/FF Medium Mahogany on Walnut

Quarter-cut full-fill finish choices

- 3224 QC/FF Clear Maple*
- 3274 QC/FF Amber on Maple **E**
- 3294 QC/FF Blonde on Maple
- 3304 QC/FF Clear Walnut
- 3314 QC/FF Natural Walnut
- 3324 QC/FF Dark Mahogany on Walnut
- 3354 QC/FF Medium Walnut
- 3364 QC/FF Dark Walnut
- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

Rift-cut full-fill finish choices

- 3604 RC/FF Desert Oak
- 3614 RC/FF Warm Oak **E**
- 3694 RC/FF Espresso Oak

*Because no stain is used in the clear-coat process, a sign-off will be required prior to orders being accepted for this finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.

Steelcase Surfaces**Composite Veneer**

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Flat-cut open-pore finish choices

- 3JDX FC/OP Oak Composite
- 3JFX FC/OP Maple Composite
- 3JHX FC/OP Cherry Composite
- 3JXX FC/OP Walnut Composite

Quarter-cut open-pore finish choices

- 3HGX QC/OP Oak Composite
- 3JEX QC/OP Maple Composite
- 3JGX QC/OP Cherry Composite

Note: To understand more about composite ordering, leadtimes, and pricing, please consult the composite sign-off sheet available through Steelcase advertising stock, form number 14-0000141. A sign-off sheet is required prior to orders being accepted for composite projects.

Steelcase Surfaces

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Quarter-cut open-pore finish choices

Wood Group 2

- 3032 QC/OP Dark Thin Line Bamboo
- 3052 QC/OP Ribbon Sapele

Wood Group 3

- 3832 QC/OP Figured Anegre
- 3842 QC/OP Figured Makore

Note: Full-fill finish is not available on Premium veneers as a standard. To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000755 for 3032, form number 09-0000757 for 3052, form number 09-0000758 for 3832, and form number 09-0000759 for 3842.

E = Established

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$425 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$425 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$425 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$5,000 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$5,000 initiation fee was paid. If the finish is not reactivated within five years after the \$5,000 initiation fee was paid, the finish will be culled and the customer will need to pay the \$5,000 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plastic

Steelcase Surfaces

Applies to:

- 1 mm square edge profile on Universal Storage laminate tops
- Square edge laminate top on TS 200 Series and 900 Series

- 6000 Black*
- 6001 Coffee*
- 6009 Arctic White*
- 6034 Natural Cherry
- 6036 Medium Cherry
- 6037 Winter on Maple
- 6038 Blonde on Maple
- 6041 Natural Walnut
- 6045 Medium Mahogany on Walnut **E**
- 6052 Milk*
- 6053 Seagull*
- 6231 Graphite Walnut**
- 6234 Clear Cherry
- 6237 Clear Maple**

Custom Surfaces

Price Group COM

(Customer's Own Material)

Fabric Approval and Yardage

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com
- For additional information regarding Customer's Own Material,** call 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com

The standard application direction of fabric is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The optional application direction of fabrics is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Recommended Edge Colors for Universal Products—High-Pressure Laminate (continued)

Edges

The recommended edge color will complement the laminate color you specify. Edge color is specified separately.

Laminate Color	Recommended 3 mm or 1 mm Edge Color
-----------------------	--

Turnstone laminate Collection

2535 Virginia Walnut	6242 Virginia Walnut
2536 Blackwood	6243 Blackwood
2612 Marbled Maple	6676 Marbled Maple
2614 Chocolate Walnut	6677 Chocolate Walnut
2615 Marbled Cherry	6678 Marbled Cherry

*A selection of laminates and edge bands in this collection are available on Steelcase brand products. This collection is available with standard leadtimes and supported like standard laminates to help make ordering easy.

Lock and Keying Options

TS Series Storage

► See page 304 for TS 200 Series lateral file keying options.

Front-removable lock cylinders can be installed or removed in the field with a special tool. This feature allows you to field install lock cylinders after the furniture is installed.

All locks are designated with key numbers. You can specify a key number; however, if you don't specify a key number, the locks in your order will be keyed random.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Standard Keying

All products are standard keyed random.

Step 1

Furniture will be shipped with a plastic shipping plug. Specify lock cylinder and keying options separately. Only products with factory-installed lock mechanisms can accept lock cylinders in the field.

Tip: Be sure to specify a lock color number (9201 Polished Chrome or 9250 Ember Chrome) for the lock face ring.

Step 2

Order enough lock cylinders to fill each lock location. You must also order a lock tool. *Tip: Lock tools are reusable. You don't need to order additional lock tools with every furniture order.*

Lock cylinders and the installation tool will be shipped separately so that you can install the locks when you are ready.

To specify lock cylinders, list the total number of lock cylinders that you want with the appropriate style number. If you are specifying key numbers, list the breakdown of the quantity of each key number.

An example of how your order should look is shown below:

Example:

10 LOCK9201FR FR320
5 LOCK9201FR FR350
15 LOCK9201XF XF1100

30 Total

1 877102003SR standard lock tool
1 877102002SR master lock tool

Keying Options

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Key specific means that you can specify any key number from FR305 to FR454. This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454.

Master key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

Master key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from XF1001 to XF1150. All XF locks can be opened with a master key.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Master key specific means that you can specify any key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes	Required to Specify
-------------------	---------------------

- | | |
|--|--|
| <ul style="list-style-type: none"> Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome Two keys | <ul style="list-style-type: none"> 1 Style number 2 Options, if selected (see below) |
|--|--|

Options	U.S. Price	Required to Specify
---------	------------	---------------------

Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR454.
Master key random	+\$23 each	Specify <i>master key random</i> .
Master key specific	+\$23 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$23 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF1150.

Specification Information

Color	Style Number	U.S. Base Price

FR Series (Standard Keying System) – Lock Cylinder

Polished Chrome	LOCK9201FR	No cost
Ember Chrome	LOCK9250FR	No cost

Standard Lock Tool

	877102003SR	\$23

XF Series (Master Keying System) – Lock Cylinder

Polished Chrome	LOCK9201XF	No additional cost. Price included in price of furniture with master-keyed locks.
Ember Chrome	LOCK9250XF	No additional cost. Price included in price of furniture with master-keyed locks.

Master Lock Tool

	877102002SR	\$23

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Lock and Keying Options

Universal Storage, TS 200 Series Lateral Files, 900 Series Storage, and Overfile Cabinets

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exceptions: Individual locking drawers are only available with field-installed locks. Overfiles are only available with factory-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

▶ See below.

Key Random

Required to Specify

Master key random	+\$23	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Exception: Overfiles are only available with factory-installed locks.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100

	42"W overfile cabinets	16 $\frac{1}{4}$ "	40 $\frac{1}{2}$ "	16" or 29 $\frac{1}{2}$ "

Note: Height of adjustable shelf is $\frac{3}{4}$ ".

Universal Storage and Lateral Files

Stability of unit is assured if they are properly installed and loaded. To avoid personal injury, each unit with roll-out components is standard with an interlock system that allows only one drawer or roll-out shelf to be opened at a time. In addition, there are steps that must be followed to prevent the tipping of a unit.

Gang unit with adjacent units, either side-by-side or back-to-back, or bolt unit to the floor or wall for stability. Ganging hardware is included with each unit.

Order a counterweight package option if recommended on specifying page and freestanding unit is not ganged to adjacent units or bolted to the floor or wall.

Counterweight packages prevent accidental tipping when an upper drawer or shelf is opened. They are ordered as an option, shipped separately and field-installed.

Load files starting with the bottom drawers or shelves. The upper drawers or shelves should be loaded last. Load units with the heaviest contents at the bottom.

Follow the instructions that are shipped with the units to ensure that they are properly installed to provide safe performance.

Complete instructions for the safe installation and use of universal storage products are taped to the inside of the unit. Instructions include information about:

- Leveling files
- Ganging files together
- Counter-balancing files
- Removing and reinstalling drawers and shelves
- Moving files

A temporary, peel-off caution label is affixed to the front of the top drawer or door exterior.

A permanent caution label is affixed to the left side of the top drawer or roll-out shelf and is visible when the drawer or shelf is opened.

Safety information for storage cabinets, bookcases, and over-files is included with the installation instructions that are shipped with the products.
