Change is good. Research has shown that having a palette of posture can alleviate fatigue, help avoid chronic workplace injuries, and increase wellbeing and productivity. With Height-Adjustable Worksurfaces, employees can quickly and easily adjust their worksurface height, giving them the ability to change their posture efficiently without interrupting their busy work lives.
SERIES 3
Seated height-adjustability. Designed to help organizations react to change, Series 3 reduces facility costs by eliminating the need to modify fixed height worksurfaces. The crank-based Series 3 can be adjusted from 22” to 34” to fit individual needs. Load-bearing capacity is 220 lbs.

SERIES 5
Sit-to-stand height-adjustability. The simple up/down electronic push-button control of the Series 5 allows workers to adjust their worksurface from 25½” to 52”, offering a range of sitting or standing heights. Load-bearing capacity is 220 lbs.

SERIES 7
Enhanced sit-to-stand height-adjustability. Controller options (3-preset, 3-preset with digital display or flush-mounted up/down button) allow individuals to electronically adjust their worksurface to a new or preprogrammed height, ranging from 24¼” to 52”. Load-bearing capacity is 360 lbs. (2-leg) or 540 lbs. (3-leg).

AIRTOUCH®
Collaborative height-adjustability. With a light touch, workers can effortlessly and quietly adjust their worksurface from 26” to 43” to fit their personal or task-related needs, be it sitting, standing, collaborative or solo. And because Airtouch doesn’t have any electrical components, it can be used anywhere. Load-bearing capacity is 150 lbs.
WALKSTATION™

Get moving. A fully integrated combination of a Series 7 height-adjustable worksurface with an exclusively engineered, low-speed commercial-grade treadmill, the Walkstation incorporates low-impact physical activity into the workday for individuals or entire departments.

SIT-TO-WALKSTATION

Multiple postures, one workstation. Ideal for a personal workspace, the Sit-to-Walkstation incorporates all the technology of the Walkstation with a larger worksurface and seating capability designed for individual use.
