Think

Product Environment Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on the sustainability attributes of Think.

Think is a chair designed for the mobility of users in the workplace. It is smart, simple and sustainable.

Think is:

• **Smart**: because it does the Thinking for us. It fosters wellbeing through automatic ergonomic support thanks to its advanced weight activated mechanism and new membrane of flexors. It responds to our changing postures and body movements, allowing us to get to work faster, making the most of our valuable sit time.

• **Simple**: because it is very easy to use. It anticipates our postures, while still giving users the freedom to customize it to their own personal preferences.

• **Sustainable**: because it can be easily disassembled with common hand tools making it easy to recycle at end of life, and it has undergone materials chemistry and develop with a life cycle vision to understand and minimize its lifelong impact on the environment. In addition, its back frame and base are composed of recycled materials (PA6).

The model chosen for analysis is the most representative line (reference 465A300) from the Think range. Standard features on this model include:

• plastic base
• seat upholstery: “Atlantic”
• 4D armrests
• back upholstery without any foam: “3D”
• lumbar
Environmental Overview

Final Assembly Location

Final assembly of Think is in Reynosa, Mexico, by Steelcase, for the Americas market.

Life Cycle Performance

Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

To measure the environmental impacts of Think, Steelcase performed a Life-Cycle Assessment (ISO 14040-44), the results of which are disclosed in an Environmental Product Declaration (EPD – ISO 14025).

Materials

Materials Composition

A break down of the basic materials in Think.

Materials Chemistry

Steelcase’s materials chemistry practice aims to design products with materials that support human and environmental health, throughout all phases of the life cycle.

Recycled Materials and Recyclability

Think contains 28% recycled materials, by weight (10% pre-consumer + 18% post-consumer).

At the end of its useful life, Think is 95% recyclable by weight.

Certifications and Labels

The environmental and social performance of Think is communicated through the following voluntary labels / certifications:

- Cradle to Cradle Certified™
- SCS Indoor Advantage™ Gold
- Environmental Product Declaration (EPD)
- BIFMA level®

LEED Contribution

Think may contribute in the following areas:

- Recycled content
- Materials reuse
- Regional materials
- Rapidly renewable materials
- Low-emitting materials (in progress)
- Environmental Product Declarations
- Material Ingredients
Life Cycle Performance

Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

Materials
This phase includes raw materials extraction and transformation into material ready to be used.

- **Contains 28% recycled materials**, by weight (10% pre-consumer + 18% post-consumer).
- **Materials chemistry assessment completed for this product.**
- **Plastic parts** do not contain pigments with Cadmium, Chrome VI and Mercury.
- **Low formaldehyde & VOC emissions** / concentration according to ANSI/BIFMA X7.1 and ANSI/BIFMA e.3 VOC’s of concern.
- **Eco-labelled textiles** and rapidly renewable wool textiles available to specify with product.

Production
This phase comprises all production and assembly processes taking place at Steelcase or at their suppliers and sub-suppliers.

- **Final assembly of Think is in Reynosa, Mexico, by Steelcase, for the Americas market.**
- **This plant is ISO 14001 and OHSAS 18001 certified.**
- **Water-based adhesives used in assembly.**

Transport
This phase includes upstream and downstream transports.

- **Bulk packaging** used for this product, wherever possible, to optimize volume in shipping.

Use
During the use phase of the product - the longest phase of the life cycle - no significant environmental impacts occur.

- **Product meets** ANSI/BIFMA Standards M7.1/X7.1 for low- VOC emissions to indoor air quality - SCS Indoor Advantage™ Gold.

End of Use
Any product can become a resource itself, or be responsibly disposed of in different ways.

- **Designed to enable responsible end of use strategies** - re-selling, refurbishing, charitable donation or recycling.
- **Designed for quick and easy disassembly of materials** - with no permanent assembly.
- **Disassembly and recycling directions available upon request**, for a representative configuration.
- **95% effectively recyclable by weight**, according to the current waste disposal schemes.
- **100% effectively recyclable packaging.**
- **Primary plastic parts clearly labelled for easy sorting and effective recycling**, according to ISO 11469.

For more information
Ask for the Environmental Product Declaration (EPD) (according to ISO 14025) which communicates the estimated environmental impacts of this product throughout its life cycle, using the life cycle assessment methodology ISO 14040/14044.
Steelcase’s goal in its materials chemistry practice is to design products with materials that are ecologically sound, and that mitigate the risk to human and environmental health, throughout all phases of the life cycle. At least 75% of the materials in this product have been assessed and rated against 24 human health and environmental criteria. As a result of the assessment, this product has been Cradle to Cradle Certified™ (Bronze).

Steelcase intends to refrain from purchasing products, components, or materials containing any “Democratic Republic of the Congo (DRC) Conflict Minerals” (coltan from which tantalum is derived), cassiterite (tin), gold, wolframite (tungsten), or their derivatives, and any other minerals or derivatives which the U.S. Secretary of State determines to be financing conflict in the DRC or an adjoining country.

*The list of materials does not contain all materials used in the product (adhesives, coatings, residuals, etc.).
Recycled Materials and Recyclability

Recycled materials are determined by weight and defined in accordance with the ISO 14021. They may include pre- and post-consumer materials:

- Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.
- Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

<table>
<thead>
<tr>
<th></th>
<th>kg</th>
<th>lb</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-consumer recycled content</td>
<td>3.3</td>
<td>3.5</td>
<td>10</td>

<tr>
<td>Post-consumer recycled content</td>
<td>1.0</td>
<td>6.3</td>
<td>18</td>
</tr>
<tr>
<td>Total recycled content</td>
<td>4.3</td>
<td>9.7</td>
<td>28</td>
</tr>
</tbody>
</table>

*Calculations of recycled materials are based on data provided by professional organizations, suppliers and other available information. Recycled content figures are based off of product weight only, and exclude packaging for evaluation to LEED contribution and other purposes. This data may include industry averages, ranges or other broadly based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice.

Recyclability

Steelcase considers a material recyclable if it can be effectively collected, sorted, processed, and converted into raw materials to be used in the production of new products.* Recyclability calculation does not include packaging.

95%

According to the available waste management infrastructures, we estimate that up to 95% is recyclable by weight.

*Excludes packaging. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold.
Certificates

To show continuous improvements, Steelcase communicates the environmental and social performance of its products through voluntary labels and declarations.

**ON THE PRODUCTS**

**EPD**
This product has gone through the LCA methodology, which results have been communicated through a voluntary Type III Environmental Product Declaration, according to the objectives of ISO 14025.

**BIFMA level®**
This product is level® 3 certified, BIFMA’s sustainability certification program for furniture. This certification program assesses a product’s impact to materials, energy & atmosphere, human & ecosystem health, and social responsibility.

**Cradle to Cradle Certified™**
This product is Cradle to Cradle Certified™ Bronze, which assesses and rates products for material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

**SCS Indoor Advantage™ Gold**
This product is Indoor Advantage™ Gold certified, according to the indoor air quality emissions requirements defined by the ANSI/BIFMA M7.1-2011.

**ON THE MATERIALS**

**Cradle to Cradle Certified™**
A selection of Cradle to Cradle Certified™ textiles are available. Cradle to Cradle Certified™ products are evaluated for material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

**ON THE PLANTS**

**ISO 14001**
The plant in Reynosa, Mexico, is ISO (International Organization for Standardization) 14001 - Environmental management system certified.

**OHSAS 18001**
The plant in Reynosa, Mexico OHSAS 18001 (Occupational Health and Safety Assessment Series) management system certified.

LEED V3 – 2009

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices. Think may contribute to a project’s pursuit of LEED certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction 2009 (formerly LEED-CI)
- LEED-BD+C - Building Design & Construction 2009 (formerly LEED-NC, LEED-Core & Shell & LEED-Schools)
- LEED-O+M - Operations & Maintenance (formerly LEED-EB)

*For Potential Contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

**For LEED BD+C: New Construction, these standards do not currently apply to furniture in the IEQ credit; however, the USGBC has allowed equivalent credit for furniture / furnishings when submitted as an Innovation in Design credit.
LEED V4

LEED is a rating system that drives integrated design thinking as it relates to various aspects of green buildings. Think can contribute to a project’s pursuit of LEED Certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction
- LEED-BD+C - Building Design & Construction
- LEED-O+M - Operations & Maintenance

**Pilot Credits:**
The following credits are potential contribution areas for Steelcase products and applications

- Environmentally preferable finishes and furnishings
  - MR Pilot
  - MR Pilot
  - N/A
  - Think is level® 3 certified, which contributes to this pilot credit.

- Social equity in the supply chain
  - N/A
  - MR Pilot
  - N/A
  - Think is level® 3 certified, which contributes to this pilot credit which demonstrates compliance to ANSI/BIFMA e3 sustainability standard - social responsibility sections 8.7.2.1 and 8.7.2.2

*For Potential Contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

Refer to [www.usgbc.org](http://www.usgbc.org) for LEED Program details.

Steelcase sustainability related actions and results are communicated annually in the [Corporate Sustainability Report](http://www.usgbc.org).”
