Thread
ultra thin power distribution

Steelcase
EDUCATION

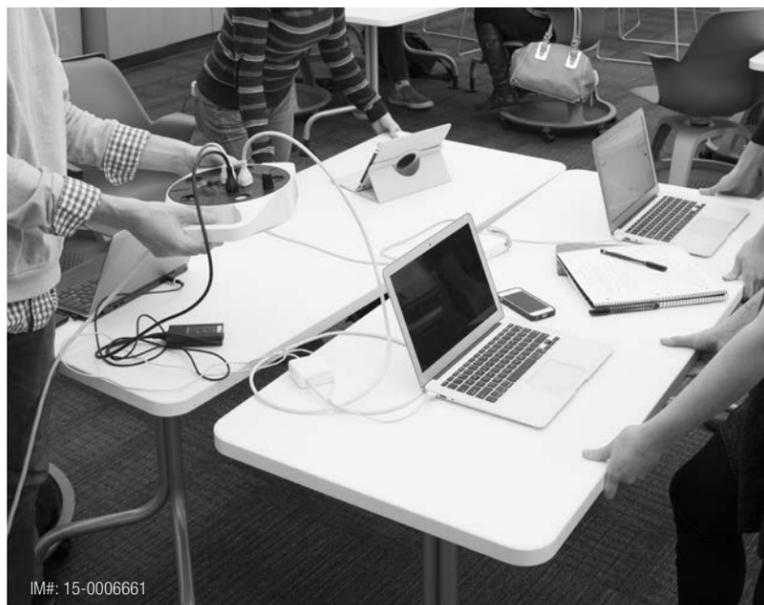

**Finally.
Power Made Simple.**

Thread™ simplifies power distribution, providing power to the devices we use and the spaces where we learn.

Students Need Technology. Technology Needs Power.

As mobile devices multiply, power needs escalate. Consequently, students sacrifice comfort and control for the needs of their devices.

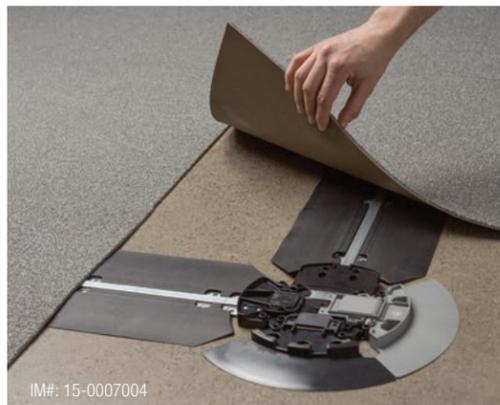

Classrooms are tethered to perimeter power, tangling students in a web of extension cords.

Unfortunately, it's not always easy.

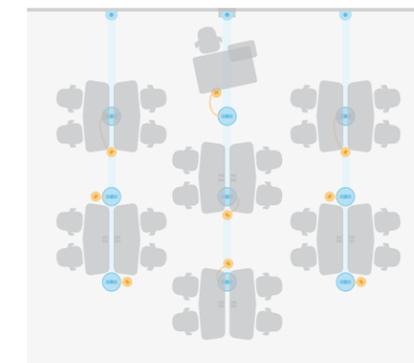

Core drilling and trenching are expensive, and damage architecture. Raised floor provides more flexibility, but isn't applicable to all spaces.

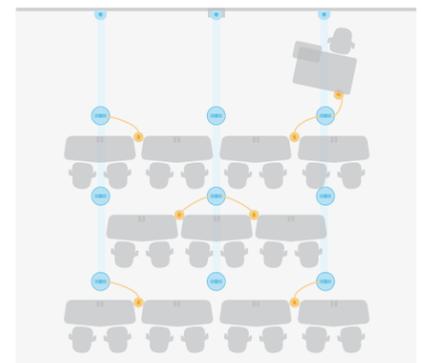

Ultra Thin.

Active learning demands active spaces. Thread's ultra thin design lays underneath the carpet. At a height of just $\frac{3}{16}$ ", Thread power track seamlessly integrates into a space, empowering active learning.

GROUP

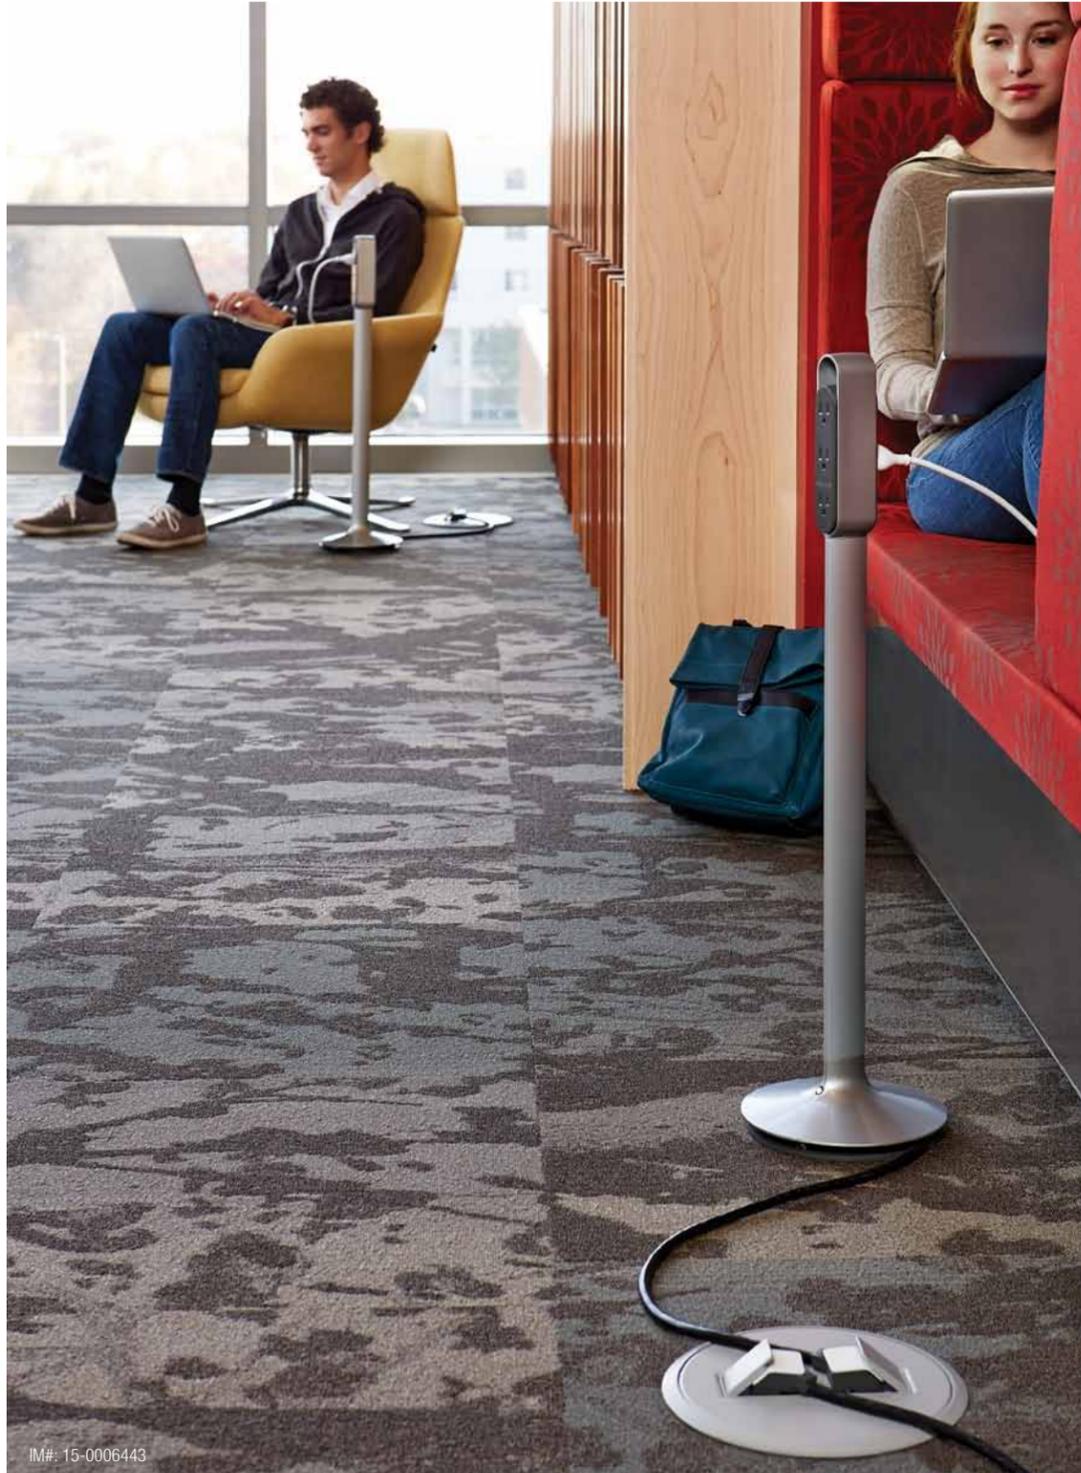

LECTURE

Thread creates a power grid beneath the carpet, while providing mobility and easy access with power hubs.

Ultra Simple.

Thread's simple kit of parts provide power to any space—whether a classroom, library or in-between space—allowing under-utilized real estate to work harder.

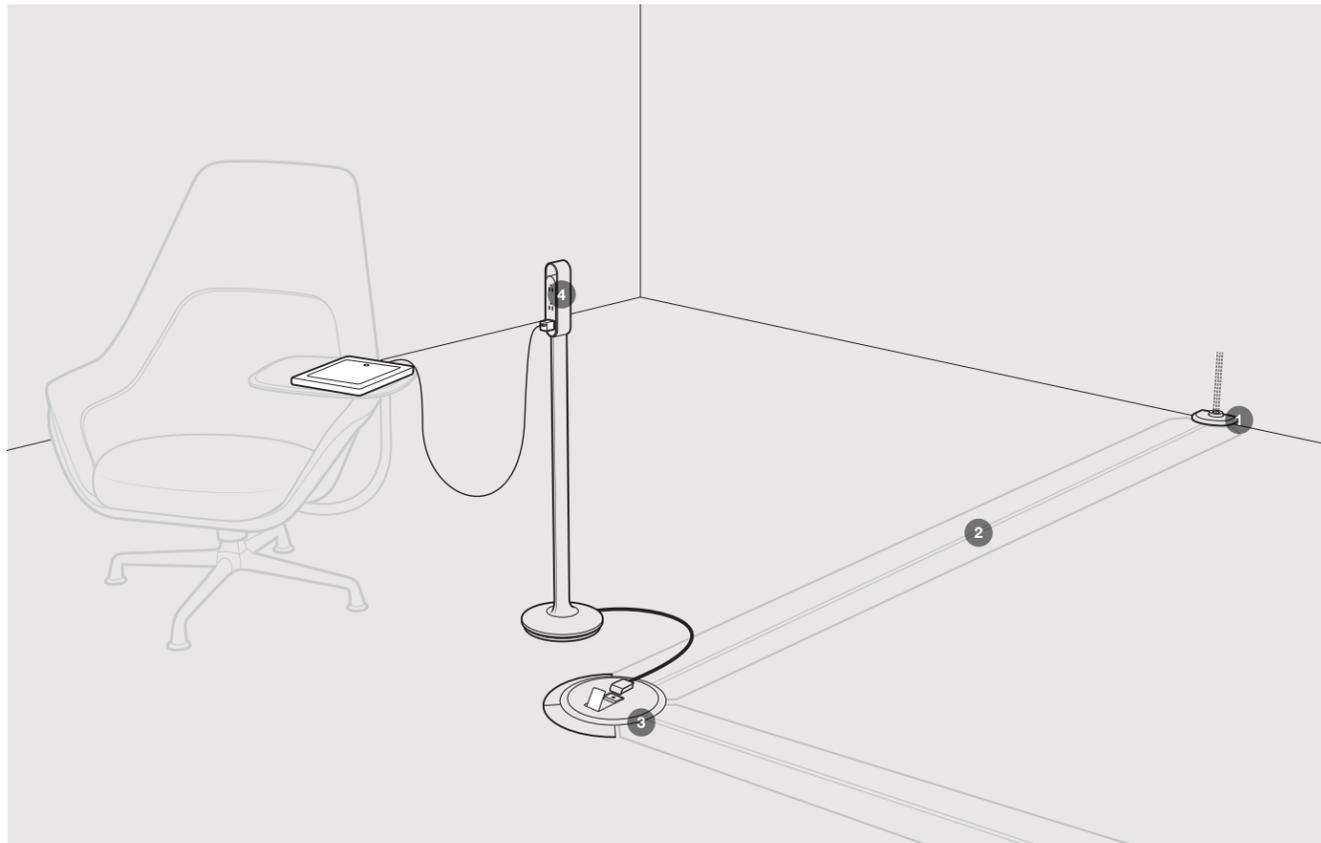

Power hubs manage and store cords, making it easy to place power precisely where it's needed.

Ultra Fast.

Installing Thread is as easy as laying carpet, with modularity that makes it easy to reconfigure. Power can easily be added to new construction or retrofitted into existing spaces.

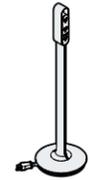

- 1** **INFEED** doesn't interfere with traffic or the workplace aesthetic. Add power without core drilling or trenching.
- 2** **TRACKS** create a remarkably thin ($\frac{3}{16}$ " design that lays under carpet tiles.
- 3** **CONNECTORS** build a grid of power that allows you to accept standard NEMA 3-prong plugs or proprietary low profile plugs.
- 4** **POWER HUBS** can be located anywhere in the space. Access power at worksurface height, seated height, or use an adapter to access power on the floor.

STATEMENT OF LINE

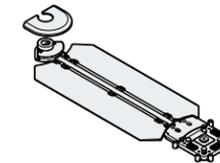

PLUG ADAPTER
8 $\frac{3}{4}$ " D x 2" W x 1 $\frac{1}{2}$ " H

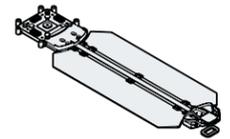

POWER HUB
30, 36" H x 8" D
Available with low profile plug or NEMA plug

POWER TRACK INFEED
8" W x $\frac{3}{4}$ " H x 24, 36, 48, 60, 72, 84, 96, 108, 120, 132, 144" L

POWER TRACK
8" W x $\frac{3}{4}$ " H x 24, 36, 48, 60, 72, 84, 96, 108, 120, 132, 144" L

CONNECTORS
Blank Low Profile: 9 $\frac{1}{2}$ " D x $\frac{3}{4}$ " H
One-Door Low Profile: 9 $\frac{1}{2}$ " D x $\frac{3}{4}$ " H
Two-Door Low Profile: 9 $\frac{1}{2}$ " D x $\frac{3}{4}$ " H
NEMA Monument: 9 $\frac{1}{2}$ " D x 2 $\frac{1}{2}$ " H

SURFACE MATERIALS

Surface materials shown in brochure:

- Merle (plastic, on Hub receptacle face plate)
- Platinum Solid (paint, on connectors)
- Platinum Metallic (paint, on Power Hubs)

Colors are representative and may vary slightly from actual material.

SUSTAINABILITY

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.

This product is PVC free.
