## Global Palette Overview

A core collection of finishes that is available across multiple geographies and on relevant product lines. The palette offers materials that have been selected to coordinate with one another and are easy to specify. They are globally appropriate, familiar, and available to order on Steelcase product lines around the world.

### Why

To improve the overall experience for our global clients and allow them to create a consistent brand wherever work happens. Internal branding plays an important role in corporate spaces and our customers are motivated by a growing desire to have consistent representation of the company culture and values across all geographies - the global palette provides a consistent look and feel to help reinforce a common brand and culture.
