Steelcase Series 1

Product Environmental Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on sustainability attributes of Steelcase Series 1.

Steelcase Series 1 makes high-quality seating attainable for everyone and everywhere. It delivers performance, style and choice, unprecedented in its class of seating. Best in class. A new class. By Steelcase.

The model chosen for analysis from the Steelcase Series 1 range is reference # 435A00. Standard features for Steelcase Series 1 include:

• Integrated LiveBack Technology
• Adjustable Lumbar
• Adjustable Arm options
• Adjustable Seat Depth
• Full range of fabric offering
Environmental Overview

Final Assembly Location

Final assembly of Steelcase Series 1 is in Kentwood, Michigan, USA for Steelcase for the Americas Market.

Life Cycle Performance ❌

Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

To measure the environmental impacts of Steelcase Series 1, Steelcase performed a Life-Cycle Assessment (ISO 14040-44), the results of which are disclosed in an Environmental Product Declaration (EPD – ISO 14025).

Materials ❌

Materials Composition

A break down of the basic materials in Steelcase Series 1.

Materials Chemistry

Steelcase's materials chemistry practice aims to design products with materials that support human and environmental health, throughout all phases of the life cycle.

Recycled Materials and Recyclability

Steelcase Series 1 contains 23.0% recycled materials, by weight (8.0% pre-consumer + 15.0% post-consumer).

At the end of its useful life, Steelcase Series 1 is 76.0% effectively recyclable by weight.

Certifications and Labels ❌

The environmental and social performance of Steelcase Series 1 is communicated through the following voluntary labels/certifications:

- Environmental Product Declaration (EPD)
- Cradle to Cradle Certified™
- SCS Indoor Advantage™ Gold
- BIFMA level®

LEED Contribution ❌

Steelcase Series 1 may contribute in the following areas:

- Recycled content
- Materials reuse
- Regional materials
- Low-emitting materials
- Interiors life-cycle impact reduction
- Building product disclosure and optimization - material ingredients
- Daylight and views
- Building product disclosure and optimization - sourcing of raw materials
- Quality Views
- Construction & Demolition Waste Planning & Management
- Environmentally Preferable finishes and furnishings
- Social equity in the supply chain
Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

Materials
This phase includes raw materials extraction and transformation into material ready to be used.

- **Steelcase Series 1 contains 23.0% recycled materials**, by weight (8.0% pre-consumer + 15.0% post-consumer).
- **Materials chemistry assessment** in progress for this product.
- **Eco-labelled textiles** OekoTex / EU Ecolabel / Cradle to Cradle Certified™ and rapidly renewable wool textiles available to specify with product.
- **Steelcase Series 1 contains 0.0% new wood by weight**. FSC certified wood is available as a special for some product lines.

Production
This phase comprises all production and assembly processes taking place at Steelcase or at their suppliers and sub-suppliers.

- This plant is ISO 14001 certified.
- Final assembly of Steelcase Series 1 is in Kentwood, Michigan, USA for Steelcase for the Americas Market.

Transport
This phase includes downstream transports.

- **Optimized packaging** to keep transportation volumes as low as possible and improve filling rates.
- Flat / Optimized packaging.
- Lightweight and delivered stacked.
- **Bulk packaging used for this product**, wherever possible, to optimize volume in shipping.
- **Product is shipped knocked down 7 pieces in all possible scenarios** - allowing for optimization of transport volume.
- Made in North America

Use
During the use phase of the product - the longest phase of the life cycle - no significant environmental impacts occur.

- **Designed for a long product life**, with replaceable parts that are easy to change.
- Cleaning instructions available.
- Maintenance information available upon request.

End of Use
Any product can become a resource itself, or be responsibly disposed of in different ways.

- **Designed to enable responsible end of use strategies** - re-selling, refurbishing, charitable donation or recycling.
- **76% recyclable by weight**, according to the current waste disposal schemes.
- **Designed for quick and easy disassembly of materials** - with no permanent assembly.
- **Primary plastic parts clearly labelled for easy sorting and effective recycling**, according to ISO 11469.
- **Disassembly and recycling directions available upon request**, for a representative configuration.
- **The Steelcase Phase 2 Program provides end-of-use, end-of-need and end-of-life disposition solutions that align with your Corporate Social Responsibility Goals**. For more information, and to see if this service is available in your area, please contact your Steelcase sales representative for more information.

For more information
Ask for the Environmental Product Declaration (EPD) (according to ISO 14025) which communicates the estimated environmental impacts of this product throughout its life cycle, using the life cycle assessment methodology ISO 14040/14044.
Materials Chemistry

Steelcase’s goal in its materials chemistry practice is to design products with materials that have been evaluated or assessed for several human and environmental health criteria – all in an effort to understand and optimize the products throughout their life cycle.

At least 75% of the materials in this product are currently in the process of being assessed and rated against 24 human health and environmental criteria.

Steelcase intends to refrain purchasing products, components, or materials containing any “Democratic Republic of the Congo (DRC) Conflict Minerals” (coltan from which tantalum is derived), cassiterite (tin), gold, wolframite (tungsten), or their derivatives, and any other minerals or derivatives which the U.S. Secretary of State determines to be financing conflict in the DRC or an adjoining country.

*The list of materials does not contain all materials used in the product (adhesives, coatings, residuals, etc.).
Recycled Materials and Recyclability

Recycled materials are determined by weight and defined in accordance with the ISO 14021. They may include pre- and post-consumer materials:

• Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

• Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

* Excludes packaging. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold.

Recyclability

Steelcase considers a material recyclable if it can be effectively collected, sorted, processed, and converted into raw materials to be used in the production of new products.* Recyclability calculation does not include packaging.

76%

According to the available waste management infrastructures, we estimate that 76% is recyclable.

*Excludes packaging. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold.
Certificates

To show continuous improvements, Steelcase communicates the environmental and social performance of its products through voluntary labels and declarations.

ON THE PRODUCTS

EPD
This product is currently going through the LCA methodology, which results will be communicated through a voluntary Type III Environmental Product Declaration, according to the objectives of ISO 14025.

BIFMA level®
This product is targeted for BIFMA level® certification. BIFMA level® is the sustainability certification program for furniture. This certification program assesses a product's impact to materials, energy & atmosphere, human & ecosystem health, and social responsibility.

Cradle to Cradle Certified™
This product is targeted for Bronze Cradle to Cradle™ certification (2) which assesses and rates products for material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

SCS Indoor Advantage™ Gold
This product is targeted for SCS Indoor Advantage™ Gold certification (1) according to the indoor air quality emissions requirements defined by the ANSI/BIFMA M7.1-2011.

ON THE MATERIALS

Cradle to Cradle Certified™
A selection of Cradle to Cradle Certified™ textiles are available. Cradle to Cradle Certified™ products are evaluated for material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

ON THE PLANTS

ISO 14001
The plant in Kentwood, Michigan, USA is ISO (International Organization for Standardization) 14001 - Environmental management system certified.

---

(1) Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

(2) Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.
LEED V3 – 2009

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices. Steelcase Series 1 may contribute to a project’s pursuit of LEED certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction 2009 (formerly LEED-CI)
- LEED-BD+C - Building Design & Construction 2009 (formerly LEED-NC, LEED-Core & Shell & LEED-Schools)
- LEED-O+M - Operations & Maintenance (formerly LEED-EB)

</tbody>
</table>

**Materials & Resources**

- **Recycled content**
  - MRc4: Steelcase Series 1 contributes to the project recycled content criteria: post-consumer (15.0)% + ½ pre-consumer (8.0)% = 19.0%.
- **Healthcare:**
  - MRc5 Option 3: If chosen for reuse, this product can contribute to the 30% valuation of the furniture & furnishings budget.

- **Materials reuse**
  - MRc3.2: Steelcase Series 1 is assembled in Kentwood, Michigan, USA for NA orders. Projects <500 miles (800 km) from this location qualify.

- **Regional materials**
  - MRc5: Steelcase Series 1 is targeted for SCS Indoor Advantage™ Gold certification (depending on options) for indoor air quality in NA.

**Indoor Environmental Quality**

- **Low emitting materials**
  - EQc4.5: Steelcase Series 1 is targeted for SCS Indoor Advantage™ Gold certification (depending on options) for indoor air quality in NA.

- **Daylight and views**
  - EQc8.1 & 8.2: Steelcase offers a range of products and application thought starters to assist customers in achieving these credits.

*For Potential Contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

**For LEED BD+C: New Construction, these standards do not currently apply to furniture in the IEQ credit; however, the USGBC has allowed equivalent credit for furniture / furnishings when submitted as an Innovation in Design credit.
LEED V4

LEED is a rating system that drives integrated design thinking as it relates to various aspects of green buildings. Steelcase Series 1 can contribute to a project’s pursuit of LEED Certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction
- LEED-BD+C - Building Design & Construction
- LEED-O+M - Operations & Maintenance

### Other Potential LEED V4 Contributions

#### Pilot Credits:
The following credits are potential contribution areas for Steelcase products and applications

| Environmentally preferable finishes and furnishings | MR Pilot | MR Pilot | N/A | | Steelcase Series 1 is targeted for level™ certification, which contributes to this pilot credit. |
| Social equity in the supply chain | N/A | MR Pilot | N/A | | Steelcase Series 1 is targeted for level™ certification, which contributes to this pilot credit which demonstrates compliance to ANSI/BIFMA e3 Sustainability Standard – Social Responsibility sections 8.7.2.1 and 8.7.2.2 |

*For Potential Contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

Refer to [www.usgbc.org](http://www.usgbc.org) for LEED Program details.

Steelcase sustainability related actions and results are communicated annually in the [Corporate Sustainability Report](#).
