

FlexFrame Specification Guide

Availability

Electronic price list updated with release 184.G (U.S.) and 148.G (Canada), dated August 21, 2017.

Spec News is available on village.steelcase.com. Search Steelcase Marketing Resources (Adstock) and download the current release's Spec News.

Tip: Steelcase Marketing Resources is a new global platform for ordering Steelcase marketing materials that replaces Adstock.

View or download Steelcase Specification Guides at <http://www.steelcase.com/en/resources/design/spec-guides/pages/specguides.aspx>.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at <http://finishlibrary.steelcase.com>.

► For a list of all trademarks, refer to the last page of this specification guide.
© 2017 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at steelcase.com/CADpricing.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Additional Resources

FlexFrame products

are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

Many Steelcase wood products are Cradle™ and/or Indoor Advantage™ certified.

FSC CoC Certification

Steelcase Wood harvesting practices are just one of the steps in achieving Forest Stewardship Council Chain of Custody (FSC CoC) certification. FSC certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

Environmental

Steelcase's proprietary Clarity ultraviolet (UV) water-borne finish is unique to the industry. In 2001, with the introduction of our first water-borne finish, we reduced our Volatile Organic Compounds by an estimated 91%. Since 2007, with virtually no emissions, the Clarity process protects the environment while providing exceptional durability and clarity.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Planning Ideas is your resource to help inspire, envision, and plan Steelcase wood solutions.

► See www.steelcase.com, resources, design center, planning ideas.

Wood Solutions

Interactive Tool has everything you need to talk about wood solutions combined in one interactive tool. www.steelcase.com/woodinteractive

Environmental Brochure

Brochure sharing the environmental story behind Steelcase wood solutions. Includes a timeline of our achievements to date and shares the story behind some of our larger accomplishments like the first LEED certified facility in the world and the recently planted Steelcase forest. Form number 09-0000201

Product Brochures

Steelcase Inc. Corporate Capabilities Brochure

This publication offers a concise overview of Steelcase including insights into the attitudes and commitments that make the corporation unique. In addition, the brochure provides an illustrated listing of all the products and services offered, and international activities are described. Form number 03-0003362

Wood Overview Brochure

Overview of the Wood Solutions available from Steelcase. Includes images and high level bullet points on aesthetics, planning, performance, and environment. Form number 09-0000206

Wood Solutions Catalog

Catalog including Walden, Garland, Elective Elements, Norfolk, and select Wood Seating products. The catalog provides images, renderings for each product with specifications and pricing, and an abbreviated statement of line. Form number 09-0000250

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Surface material selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Hard Surfaces Card

The card provides an overview of:

- Finish levels
- An explanation of Flat Cut, Rift Cut and Quarter Cut
- Veneer lay-up techniques on exterior surfaces
- Wood finishes
- Certifications

Form number 09-0000483

Integrated Technologies Specification Guide

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools — Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Instructions for planning with FlexFrame using AutoCAD are available on village.steelcase.com.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

FlexFrame General Overview

FlexFrame is a wall mounted, frame based, reconfigurable system of storage, skins, and technology components.

FlexFrame workwalls maximize storage, make information accessible, and connect people with technology.

FlexFrame workwalls are designed to blend with a variety of product lines to create complete applications.

FlexFrame workwalls create high performance private offices, collaborative spaces, project rooms, media walls, and more.

FlexFrame workwalls are designed to be applied with or without skins.

Frames come in a variety of heights and widths and can be divided into 24", 30", and 36"W sections.

Shelves, bins, and drawers are available in wood and Low-Pressure Laminate.

Skins are available in wood, Low-Pressure Laminate, fabric, and glass.

FlexFrame workwalls integrate technology with wire management, power and data distribution, and attachment of monitors.

Building Wall Requirements and Workwall Weight Capacity

Building Wall
Requirements and
Workwall Weight Capacity

CAUTION! Adequate wall construction is required to support the weight of the loaded Workwall.

Building Wall Requirements

Structural

When mounting workwall frames to hollow wall construction the following conditions must be met:

- Drywall must be at least $\frac{5}{8}$ " thick and attached securely to studs with screws
- Studs must be at least 26 gauge or thicker for metal
- Studs must be spaced 24" on center maximum

Secure workwall frame directly to wall using customer supplied $\frac{1}{4}$ " diameter Toggler brand (or equivalent) hollow wall fasteners with bolts per manufacturer's recommendations.

Building walls require additional reinforcement when a $22\frac{5}{8}$ " workwall frame is used to support:

- Bins
- 19"D double shelves
- More than one 19"D single shelf in any section
- One 19"D single shelf and two $12\frac{3}{4}$ "D shelves in any section

FlexFrame workwalls cannot attach to Privacy Wall.

Flatness

Workwalls look and work best when attached to building walls that are flat and plumb. Workwall frames except, $22\frac{5}{8}$ "H frames, can be adjusted up to maximum of $\frac{5}{8}$ " to accommodate wall conditions. When adjusted away from building wall, the wall attachment strip will be visible between the building wall and the back edge of the vertical frame pieces, and a space will be present between the horizontal frame pieces and the building wall.

Other Building Wall Considerations

Consider the location of moldings, HVAC, electrical outlets, switches, and other building features when planning workwall locations.

Workwall Weight Capacity

Shelves and bins can hold up to 200 pounds each.

When all building wall requirements above are met, maximum weight capacity per section is as follows:

- $22\frac{5}{8}$ "H workwall — 300 pounds per section
- $47\frac{15}{16}$ "H workwall — 450 pounds per section
- $64\frac{7}{16}$ "H workwall — 600 pounds per section
- $80\frac{15}{16}$ "H workwall — 700 pounds per section

A structural or building engineer should be consulted when approaching any of the upper limits outlined above or when attaching a workwall to a building wall of a construction type other than hollow wall construction.

Thought Starters and Applications

Workwall Storage With Skins

647/16"H workwall with tackable fabric skins and a mix of open and closed storage is ideal for project rooms and team spaces.

**For Canadian Pricing**

Multiply U.S. Price by the
Canadian price factor.

► See page 1 for details.

Workwall Storage With Skins**Recommended Components**

	Quantity	Style Number	Description	U.S. List Price	Total

Blending With Other Products

Height Alignment

Workwall frames can be mounted at any height on a wall. The top of the frame can be positioned to align with freestanding storage. For example a 64⁷/₁₆"H workwall mounted 1³/₁₆" off the floor will align with 65⁵/₈"H Elective Elements storage.

Elective Elements Storage and FlexFrame

Center to Center Planning

Workwall frames plan on a 6" module measured from center of vertical to center of vertical.

Perimeter frames are 7/8" wider than nominal. When placing components of the same nominal width in front of the workwall, a space may result on either side.

Wire Management

If freestanding storage is placed in front of a workwall with skins, the skins directly behind the storage may be omitted to allow for wire management.

Workwall Buildups

Order workwall and components separately to create unique configurations.

Tip: Instructions for planning with FlexFrame using AutoCAD are available on village.steelcase.com.

1. Begin by selecting the workwall perimeter frame. Next, select the configuration option which will determine the number of sections and the width of each section. The sections can be placed in any order left to right.

Tip: The workwall can be reconfigured into different sections at a later date. Additional parts may be required.

2. Order inner vertical frame pieces to separate the sections.

3. Order skins, shelves, bins, or drawers for each section.

4. Specify power if needed.

Workwall Perimeter Frames

Workwall perimeter frames define the outside dimensions of a workwall. They can be divided into multiple sections using inner vertical frame pieces, specified separately.

► Specifying, page 87

Horizontal and vertical frame pieces create the outside perimeter of workwall perimeter frames.

Workwalls are always wall mounted.

Inner vertical frame pieces are specified separately. They must be added to the workwall perimeter frame to divide the frame into sections.

Spacer brackets ensure accurate spacing of vertical frame pieces.

Corner brackets connect horizontal and vertical frame pieces.

Product Details

24"W to
144"W

22⁵/₈"H to
80¹⁵/₁₆"H

Workwall perimeter frames are available in widths from 24" to 144" and four heights from 22⁵/₈" to 80¹⁵/₁₆". Frames can be divided into 24", 30", and 36" sections.

Tip: The 24", 30", and 36"W frames do not require an inner vertical frame piece.

Overall width of workwall perimeter frame is greater than nominal. Nominal width dimensions are calculated from center of outer vertical to center of outer vertical.

Workwall perimeter frame consists of left and right outside vertical frame pieces, top and bottom horizontal frame pieces, corner brackets, spacer brackets, and wall attachment strips.

Workwalls are assembled in the field.

Workwall can accept shelves, bins, drawers, and skins in a variety of combinations.

Actual Dimensions

Depth	3 ¹ / ₈ "
Width	24 ⁷ / ₈ ", 30 ⁷ / ₈ ", 36 ⁷ / ₈ ", 48 ⁷ / ₈ ", 54 ⁷ / ₈ ", 60 ⁷ / ₈ ", 66 ⁷ / ₈ ", 72 ⁷ / ₈ ", 78 ⁷ / ₈ ", 84 ⁷ / ₈ ", 90 ⁷ / ₈ ", 96 ⁷ / ₈ ", 102 ⁷ / ₈ ", 108 ⁷ / ₈ ", 114 ⁷ / ₈ ", 120 ⁷ / ₈ ", 126 ⁷ / ₈ ", 132 ⁷ / ₈ ", 138 ⁷ / ₈ ", or 144 ⁷ / ₈ "
Height	22 ⁵ / ₈ ", 47 ¹⁵ / ₁₆ ", 64 ⁷ / ₁₆ ", or 80 ¹⁵ / ₁₆ "

Workwall can be used without skins.

Tip: If skins are not specified, use wire management cut-out covers if wire routing is needed.

Workwall frames are always wall-mounted. For specific requirements see *Building Wall Requirements* on page 7.

Section configuration is determined during specification of workwall perimeter frames. The specification determines the number of sections and the width of each section. The actual order of the sections from left to right is determined in the field.

Section widths are measured from center of vertical to center of vertical.

Inner vertical frame pieces are ordered separately depending on how many sections are selected when specifying the workwall perimeter frame. Additional inner vertical frame pieces can be ordered later to reconfigure.

Inner vertical frame pieces are available in four heights to coincide with the four heights of workwall perimeter frames.

There will always be a space between the top of the uppermost component and the frame and the bottom of the lowest component and the frame. For a 22⁵/₈"H frame the space is 2⁹/₁₆" at the top and bottom. For 47¹⁵/₁₆", 64⁷/₁₆", and 80¹⁵/₁₆"H frames the space at the top is 2⁵/₈" and the space at the bottom is 3¹/₈".

Workwall components allow for segmentation on a 8¹/₄" vertical module. Each height workwall frame can hold a specific combination of components. For more detail refer to *Shelves, Bins, Drawers, and Skins Arrangements* on page 50.

Connections

Vertical frame pieces attach to the building wall and carry the structural load of the workwall. Horizontal frame pieces attach to the vertical frame pieces and do not mechanically attach to the building wall.

T-bracket

T-shaped wall brackets attach to the building wall using customer/installer supplied fasteners.

Workwall frame verticals attach to T-shaped wall brackets using supplied set screws. The top most screw will go through a slot in the T-shaped wall bracket to serve as a safety catch.

22⁵/₈" 47¹⁵/₁₆" 64⁷/₁₆" 80¹⁵/₁₆"

Four set screws are visible on both sides of every workwall frame vertical.

Tip: Set screws may be concealed on inside edge of frame vertical by workwall components.

Base moldings should be considered when locating the workwall perimeter frame. Moldings can be removed, trimmed to fit around the workwall, or the workwall can be mounted above the base molding.

Tip: If mounted above base molding misalignment with freestanding furniture may occur.

A threaded strip comes installed in each vertical frame piece and has holes along its entire length to attach components. The threaded strip can be adjusted to level shelves. Outside vertical frame pieces have the threaded strip on the inside only.

Clearance of at least 1³/₁₆" is recommended between workwall frames and floors, walls, and ceilings.

Application Topics

A 64⁷/₁₆"H workwall mounted 1³/₁₆" off the floor will align with 65⁵/₈"H Elective Elements storage.

The maximum length of workwall is 144". Multiple workwalls can be placed side by side. A 1³/₁₆" space is recommended between the two frames to facilitate installation. *Tip: Overall width of perimeter frame is greater than nominal. Width dimension is center of outer vertical to center of outer vertical.*

Planning

Instructions for planning with FlexFrame using AutoCAD are available on village.steelcase.com.

Surface Materials

Frame

- 8043 Clear Anodized Aluminum

Corner Bracket

- 4799 Platinum Metallic

Threaded Strip

- Black

Inner Vertical Frame Pieces

Inner vertical frame pieces, ordered separately, must be added to the workwall perimeter frame to divide it into sections.

► Specifying, page 88

Wire management cut-out allows cords and cables to be routed between sections.

Product Details

Inner vertical frame pieces are available in four heights to coincide with the four heights of workwall perimeter frames.
Tip: The 24", 30", and 36"W frames do not require inner vertical frame pieces.

An inner vertical frame piece must be added at each location where sections occur.
Tip: Sections are decided when specifying workwall perimeter frames.

Spacer brackets ship with the workwall perimeter frame to assure accurate spacing between inner vertical frame pieces.
Tip: The number and width of spacer brackets is dependent on section configuration specified on the workwall perimeter frame.

Inner vertical frame pieces have threaded strips on both sides to allow installation of shelves, bins, drawers, and skins.

Actual Dimensions

Depth	3 ¹ / ₈ "
Width	7 ⁷ / ₈ "
Height	21 ⁹ / ₁₆ ", 46 ¹⁵ / ₁₆ ", 63 ⁷ / ₁₆ ", or 79 ¹⁵ / ₁₆ "

Threaded strips can be adjusted to level shelves, bins, drawers, and skins.

Connections

T-bracket

T-shaped wall brackets attach to the building wall using customer/installer supplied fasteners.

Workwall frame verticals attach to T-shaped wall brackets using supplied set screws. The top most screw will go through a slot in the T-shaped wall bracket to serve as a safety catch.

22⁵/₈" 47¹⁵/₁₆" 64⁷/₁₆" 80¹⁵/₁₆"

Four set screws are visible on both sides of every workwall frame vertical.

Tip: Set screws may be concealed on inside edge of frame vertical by workwall components.

Wiring and Cabling

Inner vertical frame pieces used with 47¹⁵/₁₆", 64⁷/₁₆", or 80¹⁵/₁₆" H workwall frames come standard with a cut-out for wire management near the bottom of the vertical frame piece.

Inner vertical frame pieces used with 22⁵/₈" H workwall frames have a smaller cut-out designed to manage LED light cords and not power cords.

Shelves, Bins, and Drawers

Shelves, bins, and drawers are available in a variety of sizes and configurations to provide storage.
► Specifying, pages 89–92

Double Shelves

Shelves, bins, and drawers have an optional wire management cut-out.

Upper Single Shelves

Painted metal blades are standard on each side of shelves, bins, and drawers.

Lower Single Shelves

Shelves, bins, and drawers are available in Low-Pressure Laminate or wood.

Drawer

Bin

Bin doors recess into the case when opened.

Product Details

Shelves, bins, and drawers are available in Low-Pressure Laminate or wood.

A painted metal blade on each side is standard on all shelves, bins, and drawers to create a consistent aesthetic with skins.

Bins and drawers come standard with a flush pull.

Shelves, bins, and drawers come standard with a wire management cut-out to route cords and cables. An option of no cut-out is available. The cut-out is not finished. An optional wire cut-out cover is available.

Tip: Double shelves, bins, and drawers have two wire cut-outs, one on the top and one on the bottom of the unit.

Actual Dimensions				
	Double Shelf	Single Shelf-Lower or Upper	Bin	Drawer
Depth	12 ³ / ₄ " or 19"	12 ³ / ₄ " or 19"	19"	19"
Width	23 ¹ / ₁₆ ", 29 ¹ / ₁₆ ", or 35 ¹ / ₁₆ "	23 ¹ / ₁₆ ", 29 ¹ / ₁₆ ", or 35 ¹ / ₁₆ "	23 ¹ / ₁₆ ", 29 ¹ / ₁₆ ", or 35 ¹ / ₁₆ "	23 ¹ / ₁₆ ", 29 ¹ / ₁₆ ", or 35 ¹ / ₁₆ "
Height	8 ¹ / ₄ " or 16 ¹ / ₂ "	8 ¹ / ₄ " or 16 ¹ / ₂ "	16 ¹ / ₂ "	8 ¹ / ₄ "

When skins are used the wire management cut-out will be concealed, but still usable for vertical routing cables behind skins.

A space will always be present when shelves are in adjacent sections.

Shelves, bins, and drawers are available as single lower, single upper, and double.

Shelves are 11/8" thick.

Back edge of shelves is unfinished.

Shelves, bins, and drawers ship knocked down and are assembled at installation.

Bins and drawers do not lock.

Sides of the bin and drawers are metal and finish must be specified.

Bin doors recess into the case when opened.

Bin doors have a soft close mechanism.

Drawers come standard with two adjustable dividers that run the depth of the drawer.

Drawers are wood construction and feature dovetail joinery.

Drawers have full extension drawer slides.

LED lights are available as an option on shelves, bins, and drawers. On double shelves lights are available on one or both shelves.

The LED lights are flush mounted on the underside of the shelves, bins, or drawers.

Lights ship installed in the shelves, bins, or drawers.

A light kit must be specified with ordering LED lights. See *Determining LED Light Wattage* chart to determine the light kit needed, on page 68.

Application Topics

With skins

Without skins

Shelves, bins, and drawers can be applied with or without skins.

If a single shelf is specified without skins, two fasteners will be visible on each blade.

The opening height of a double shelf is slightly smaller than the opening of a single shelf placed above or below another shelf.

Shelves, bins, and drawers can be arranged to create a continuous vertical strip of painted metal blades.

Shelves, bins, and drawers can be arranged to allow the frame verticals to be visible between components.

Floor

The component installed at the bottom most position will have a minimum 4 5/16" space between the bottom of the unit and the floor when the frame is installed 13 1/16" from the floor.

Do not stack shelves on top of each other so shelves are touching.

Place shelves consistently on adjacent sections of the workwall to prevent misalignment across sections.

Bins placed directly on top of each other will create a stacking appearance.

Shelves, Bins, and Drawers, continued

A drawer can be placed directly above another drawer.

Connections

Shelves, bins, and drawers attach to metal brackets through the bottom of the unit using four screws. The screws will be visible when the shelf, bin, or drawer is above eye level.

Shelves, bins, and drawers attach to the workwall frame securely and cannot be dislodged.

Shelves, bins, and drawers can be reconfigured with simple tools. The reconfiguration can be done without damaging the shelf, bin, drawer, frame, or wall.

Wiring and Cabling

Wire management cut-outs allow cord heads and connectors to pass through. A 3/4" space between back edge of shelf, bin, or drawer allows for cable and cord passage.

Skins are aligned at the front of the frame allowing 2 1/2" behind the skin for routing of cables. This will conceal the wire management cut-out. The wire management cut-out is still usable for vertical routing of cables and cords behind the skins.

A wire cut-out cover fills the wire management cut-out.

When skins are used the wire management cut-out will be concealed but still usable.

Tip: Wire cut-out cover is not needed when skins conceal wire management cut-out.

Skins

Skins finish the appearance of a workwall. Skin combinations can vary to accommodate a variety of needs. Skins also create a cable management space behind them.

► Specifying, pages 94–99

Skins come in a variety of heights and widths to fit 24", 30", and 36"W sections.

Technology skins provide connections to power, data, and LED light switches.

Cable management skins have a flexible strip to allow for easy removal and for cords and cables to pass through.

TV attachment skins support monitors up to 65" and up to 200 pounds on the workwall.

Skins are available for shelves and bins.

Product Details

Fabric

Low-Pressure Laminate

Wood

Glass

Skins are available in fabric, Low-Pressure Laminate, wood, or glass.
Tip: Glass skins are only available 33"H and 49 1/2"H.

Fabric skins are available in warp horizontal or warp vertical direction.

Fabric skins are tackable.
Tip: Fabric technology skins are not tackable.

Grain direction on wood skins is available horizontally or vertically.

Grain direction runs vertically on Low-Pressure Laminate skins.

Glass skins are back painted. Dry erase markers can be used on glass skins.

Skins that are not used in a shelf or bin come standard with painted metal blades on the sides. This is to provide a consistent aesthetic with other components.

Skins for use with shelves and bins are unique and do not have a blade. The blade is already standard on the shelf or bin.

Skins ship with attachment hardware.

Skins can be removed and reconfigured.

Skins align with the front edge of the workwall frame.
Tip: Except the skin for bin is set back an additional 1" to allow for more storage space.

Technology skins allow convenient user access to power, data, and light switches.

Technology skins are available in corded, hardwire, and modular versions.

Corded technology skins have an 8' cord with a 15 amp grounded plug.

Hardwire technology skins have an 8' length of flexible metal conduit.

Modular technology skins have an 8' length of modular harness with a male connector. Modular technology skins include an inline and H connector to allow it to connect to modular power in a variety of applications. Modular technology skins are always wired to Line 1.
▶ See *Using Modular Power* on page 61 for diagram examples.

Technology skins accommodate data and power needs. Technology skins are available with Data/Power/Power or Data/Power/Switch configurations.

Technology skins that have Data/Power/Power have space for two customer supplied Extron AAP plates and two simplex receptacles, 9 1/2"W X 27 20"H.

Technology skins that have Data/Power/Switch have space for two customer supplied Extron AAP plates, one simplex receptacle, and one opening for the LED light switch included with the light kit. The LED light switch is field installed in the technology skin.

Architectural Adapter Plates (AAPs) provide access to data, audio, video, telephone, and other technologies. AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at www.extron.com.

Cable management skins feature a 3/4"H flexible strip that allows cords and cables to be routed behind the skin. The flexible strip also allows for the skin to be easily removed without tools.

Tip: The flexible strip is on the bottom edge of the skin. A cable management skin for double shelf or bin may be flipped so the flexible strip is on the top edge of the skin.

TV attachment skins are available as centered or spanning.

Centered TV attachment skins are used to center a TV on one skin in one section.

Spanning TV attachment skins are specified as a left and right pair. This allows a TV to be centered over two skins in two adjacent sections.

Tip: Adjacent sections must be of the same width.

Cut-outs on TV attachment skins allow wires to run behind the workwall. The cut-out is not finished but will be concealed behind the TV.

TV attachment skins are available with either a small bracket for monitors 32" or smaller or a large bracket for monitors over 32" and up to 65", and up to 200 pounds. Monitors can be adjusted vertically above or below centerline. Additional adjustment is available in the TV bracket itself.

Tip: For small bracket, mounting holes cannot exceed 566 mm x 333 mm. Recommended display sizes 26"-32". For large bracket, mounting holes cannot exceed 770 mm x 485 mm. Recommended display sizes 32"-65". If a monitor does not meet these mounting hole specifications, please contact Steelcase Specials Engineering to help secure the monitor to FlexFrame.

Shrouds are available as an option on TV attachment skins to support one 32", 42", 55", or 65" monitor (not included).

Shrouds are painted aluminum and available in platinum, arctic white gloss, near black, and midnight metallic.

Shrouds connect to the TV attachment skin with included hardware and include a mount for the size monitor specified.

Connections

Skins for use with shelves fit in between the blades and attach with provided hardware.

Skins attach using spring clips and can be easily removed, replaced, and repositioned.

Skins, continued

Application Topics

Skins are aligned at the front of the frame. This allows 2 1/2" behind the skin for the routing of cables. A wire cut-out should be used when routing cords and cables behind skins.

Skins for bins are not aligned with the front edge of the workwall frame. The skins set back an additional 1" to allow for more room in the bins. Base power tray will not fit behind these skins.

Cable management skins for bins are aligned at the front edge of the workwall frame. This allows for wiring and base power trays behind the skin. Consider this when determining the storage capacities of the bins.

A painted metal top cap may be used to fill the space between the wall and the skin when the top of the skin is exposed. Thickness of the top cap matches metal blades.

Worksurface Attachment Skins

Worksurface attachment skins allow work-surfaces from a variety of product lines to attach to workwall. Worksurface attachment skins finish the appearance of a workwall.

► Specifying, pages 100

Brackets are height adjustable to accommodate a range of worksurface heights and thicknesses.

Wire management cut-out allows cords and cables to pass through.

Product Details

Worksurface attachment skins are available in fabric, Low-Pressure Laminate, or wood.

Fabric skins are available in warp horizontal or warp vertical direction.

Fabric worksurface attachment skins are not tackable.

Grain direction on wood skins is available horizontally or vertically.

Grain direction runs vertically on Low-Pressure Laminate skins.

Worksurface attachment skins come standard with painted metal blades on the sides. This is to provide a consistent aesthetic with other components.

Skins ship with attachment hardware.

Skins align at the front of the workwall frame. This allows 2 1/2" behind the skin for the routing of cables. A wire cut-out should be used when routing cords and cables behind skins.

Actual Dimensions

Width 23 1/16", 29 1/16", or 35 1/16"

Height 8 1/4"

Connections

Worksurface attachment skins are designed to support one end of a worksurface.

Worksurface must be the same width as the workwall section.

A worksurface may not be supported by multiple worksurface attachment skins.

The end of the worksurface that is not supported by the worksurface attachment skin must be supported by a leg, table base, end panel, storage, or other support.

Worksurface attachment skin has height adjustable brackets to support a range of worksurface heights and worksurface thicknesses.

Bracket is adjustable in 1/2" increments.

When workwall is installed in its lowest position, 13 1/16" above the floor, 1 1/2" thick worksurfaces can be supported between 27 1/2" and 29 1/2" worksurface height.

Worksurface will not always align with the top edge of the skin depending on worksurface height, thickness, and workwall application.

Tip: Follow guidelines for worksurface center supports and braces.

Worksurfaces supported by a worksurface attachment skin should not be used to support upper storage.

If attaching Elective Elements worksurfaces, support guidelines are equivalent to worksurfaces attached using flush mount brackets.

► Refer to *Worksurface Support Guidelines* in the *Elective Elements Specification Guide*.

Worksurfaces with a coped edge cannot connect to worksurface attachment skin.

Wiring and Cabling

Worksurface attachment skin has a wire pass through for cords and cables.

Receptacle kits should not be used directly behind worksurface attachment skins.

Application Topics

Worksurface attachment skins may be used in adjacent sections.

Worksurfaces will align with the center of workwall frame verticals.

Surface Materials

Skins

- Fabric
- Low-Pressure Laminate

Cantilever Desk and Table Attachment Skins

Desk attachment skins

provide a structural connection for cantilever desks to FlexFrame.

► Specifying, page 101

Skin pairs for cantilever table attachment

provide a structural connection for cantilever tables to FlexFrame.

► Specifying, page 101

Actual Dimensions

	Desk Attachment Skins	Table Attachment Skins
Width	35 ¹ / ₁₆ "	23 ¹ / ₁₆ ", 29 ¹ / ₁₆ ", or 35 ¹ / ₁₆ "
Height	24 ³ / ₄ "	24 ³ / ₄ "

Product Details

Desk and table attachment skins are available in fabric, Low-Pressure Laminate, or wood.

Fabric skins are available in warp horizontal or warp vertical direction.

Fabric desk and table attachment skins are not tackable.

Grain direction on wood skins is available horizontally or vertically.

Grain direction runs vertically on Low-Pressure Laminate skins.

Desk and table attachment skins come standard with painted metal blades on the sides. This is to provide a consistent aesthetic with other components.

Skins ship with attachment hardware.

Skins align at the front of the workwall frame. This allows 2 1/2" behind the skin for the routing of cables. A wire cut-out should be used when routing cords and cables behind skins.

Desk attachment skins are handed.

Skins for cantilever table attachment are specified as left and right pairs. This allows a cantilever table to be centered in two adjacent sections.
Tip: Adjacent sections must be of the same width.

Skins for cantilever table attachment include two adjustable brackets to support both corners of the worksurface attached to workwall.

Connections

TechBox connects to the desk or table attachment skin.

Skins for cantilever desk attachment include one adjustable bracket to support the corner of the worksurface attached to workwall.

Wiring and Cabling

Wire pass through is concealed by the TechBox when installed.

Receptacle kits should not be located behind desk and table attachment skins.
Tip: Refer to removable skins and access to electrical connections section.

Shrouds For Skins and Shroud Monitor Relationships

Dimensions — Shrouds For Skins

• Features	• Overall Interior Length	• Overall Height	• Overall Depth	• Overall Length With Flaps
Shrouds For Skins				
32" Shroud	29½"	23½"	6½"	35"
42" Shroud	39"	27½"	6½"	44"
46" Shroud	43½"	30½"	6½"	48½"
55" Shroud	51"	35"	6½"	56"
65" Shroud	60"	40½"	6½"	65"

Dimensions — Shroud Monitor Relationships

• Recommended Monitor Dimensions	• 32"	• 42"	• 46"	• 55"	• 65"
Shroud Monitor Relationships					
Minimum width	30¾"	39"	44"	51½"	60½"
Maximum width	32¼"	41½"	46"	53½"	62"
Minimum height	19¼"	23"	26"	31"	35½"
Maximum height	21½"	26"	28½"	33"	38"

Tip: External speakers should be included when determining dimensions.

Tip: FlexFrame does not support monitors that are larger than 65" or over 200 pounds.

Top View

Shelves, Bins, Drawers, and Skins Arrangements

Shelves, Bins, Drawers, and Skins Arrangements

Workwall components allow for segmentation on an 8 1/4" vertical module. Each height workwall frame can hold a specific combination of components. Components include shelves, bins, drawers, and skins. Workwalls can be used without skins. Heights of components are multiples of 8 1/4".

Some examples of how to fill a 16 1/2"H vertical segment

16 1/2"H Skin

16 1/2"H Single Shelf with Skin

16 1/2"H Double Shelf with Skin

16 1/2"H Bin with Skin

22 5/8"H workwall frames hold one 16 1/2"H component or any combination of two 8 1/4"H components.

16 1/2"	8 1/4"
	8 1/4"
A	B

47 15/16"H workwall frames hold two 16 1/2"H components and one 8 1/4"H component or any equivalent combination.

8 1/4"	8 1/4"	8 1/4"	33"
16 1/2"	8 1/4"	8 1/4"	
16 1/2"	16 1/2"	8 1/4"	
A	B	C	D

64 7/16"H workwall frames hold three 16 1/2"H components and one 8 1/4"H component or any equivalent combination.

8 1/4"	8 1/4"	49 1/2"	8 1/4"
16 1/2"	8 1/4"		33"
16 1/2"	8 1/4"		
16 1/2"	8 1/4"		
16 1/2"	16 1/2"	8 1/4"	16 1/2"
A	B	C	D

Shelves, Bins, Drawers, and Skins Arrangements

Workwall components allow for segmentation on an 8 1/4" vertical module. Each height workwall frame can hold a specific combination of components. Components include shelves, bins, drawers, and skins. Workwalls can be used without skins. Heights of components are multiples of 8 1/4".

80 15/16" H workwall frames hold four 16 1/2" H components and one 8 1/4" H component or any equivalent combination.

8 1/4"	8 1/4"	49 1/2"	8 1/4"
16 1/2"	8 1/4"		33"

Note: Examples shown indicate only a few possibilities.

Removable Skins and Access to Electrical Connections

Many FlexFrame skins

have been designed to allow easy removal for access to power and data connections and other features located behind the workwall. Skins use spring clips to attach, allowing them to be removed and replaced without tools in many applications.

Whenever a receptacle kit is placed behind a skin, that skin must be easily removable for easy access and code compliance.

Cable management skins

are always removable and are recommended for use in front of base power and receptacle kits. Many other skins can be easily removed when used in the bottom most position of the workwall. Consult the matrix for details.

Electrical

Workwalls are designed to support technology. Electrical needs can be solved in a variety of ways.

A modular power system includes base power trays, modular harnesses, receptacle kits, a base power infeed, and modular technology skins.
▶ Specifying, pages 103–105.

Receptacle kits are intended to provide concealed connections for devices that are plugged in for long periods of time and accessed occasionally.

Technology skins are intended to provide easy connections for devices that are connected and disconnected frequently.

Height	N.A.	1"	N.A.	33/4"	1"
Depth	N.A.	13/4"	N.A.	2"	2/3"

Product Details

Modular power cannot be used on workwalls without skins.

Tip: Plan workwalls without skins to allow access to building outlets.

► See *Removable Skins and Access to Electrical Connections*, page 52.

Hardwire power infeeds bring the power from the building power source into the workwall.

Power infeeds can connect to modular harnesses, technology skins, or 1-circuit or 2-circuit receptacle kits.

A base power tray is required whenever a receptacle kit or modular harness is used in a section.

The base power tray will hang approximately 1" below the lower most component.

Workwall wire manager does not hang below the shelf.

Receptacle kits face upward.

Receptacle kits snap into the center of the base power tray. 1-circuit receptacle kits include two duplex receptacles wired to Line 1. 2-circuit receptacle kits include one duplex receptacle wired to Line 1 and one duplex receptacle wired to Line 2.

Receptacle kits must have a removable skin installed in front of them. Cable management skins are recommended.

► See *Removable Skins and Access to Electrical Connections* on page 52. *Tip: If modular harnesses or receptacle kits are used in a section, some flexible metal conduit will be visible when skins are removed.*

Multiple receptacle kits in different workwall sections can be connected using modular harnesses.

Modular harnesses are available in lengths from 24" to 120" to accommodate connection of modular components in different workwall sections. Modular harnesses are compatible with 1-circuit and 2-circuit receptacle kits.

Technology skins allow convenient user access to power, data, and light switches.

Technology skins are available in corded, hardwire, and modular versions.

Corded technology skins have an 8' cord and a 15 amp grounded plug.

Corded technology skins can plug into a receptacle kit or into a building receptacle. Connection must be accessible.

Hardwire technology skins have an 8' length of flexible metal conduit.

Modular technology skins have an 8' length of modular harness with a male connector. Modular technology skins include an inline and H connector to allow it to connect to modular power in a variety of applications. Modular technology skins are always wired to Line 1. ► See *Using Modular Power* on page 61 for diagram examples.

Technology skins accommodate data and power needs. Technology skins are available with Data/Power/Power or Data/Power/Switch configurations.

Technology skins that have Data/Power/Power have space for two customer supplied Extron AAP plates and two simplex receptacles.

Technology skins that have Data/Power/Switch have space for two customer supplied Extron AAP plates, one simplex receptacle, and one opening for the LED light switch included with the light kit. The LED light switch is field installed in the technology skin.

Architectural Adapter Plates (AAPs) provide access to data, audio, video, telephone, and other technologies. AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at www.extron.com.

Workwall wire manager can route wires for lights and other cables through the cut-out on a 22⁵/₈" H workwall frame and prevents wires and cables from hanging below the shelf.

Workwall wire manager may be used on 47¹⁵/₁₆", 64⁷/₁₆", and 80¹⁵/₁₆" H workwall frames to prevent wires from hanging below a lower single shelf, double shelf, bin, or drawer in the lower most position on the workwall, but will not allow cords and cables to pass through the cut-out on the inner vertical frame piece.

Tip: Specify a base power tray instead to allow cords and cables to be passed through the cut-out.

Workwall wire manager must be installed on the back edge of a lower single shelf, the bottom position of a double shelf, bin, or drawer.

Workwall wire managers cannot hold receptacle kits.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

Application Topics

Base power tray should only be used in the lower most position of the workwall.

Workwall wire manager should only be used in the lower most position of a workwall.

Base power tray can be installed on the back edge of the bottom position of a double shelf, bin, or lower single shelf.

Base power tray may also be installed behind the skin of an upper single shelf.

Base power tray may be installed behind a skin.

Electrical, continued

A base power tray without a receptacle kit can be used to route modular harnesses and cords through a section.

Cords and cables can pass through the bottom of a base power tray.

Base power tray should not be used in 22⁵/₈"H workwalls because the wire management cut-out in the inner vertical frame piece cannot accommodate modular power.

Tip: Use workwall wire manager for 22⁵/₈"H workwalls.

Receptacle kits may not be placed behind a drawer.

Technology skins can not be used in front of receptacle kits.

Skins for bins are not aligned with the front edge of the workwall frame. The skins set back an additional 1" to allow for more room in the bins. Base power tray will not fit behind these skins.

Cable management skins for bins are aligned at the front edge of the workwall frame. This allows for wiring and base power trays behind the skin. Consider this when determining the storage capacities of the bins.

Inner vertical frame pieces used with 47¹⁵/₁₆", 64⁷/₁₆", or 80¹⁵/₁₆"H workwall frames come standard with a cut-out for wire management near the bottom of the vertical frame piece.

Inner vertical frame pieces used with 22⁵/₈"H workwall frames have a smaller cut-out designed to manage LED light cords and not power cords.

Lighting

Workwalls have an optional integrated lighting system.

► Specifying, page 106

LED Lights

Switch

Terminal Blocks

Power Transformer

Lights align on shelves of different depths.

Product Details

LED lights are available as an option on shelves, bins, and drawers. On double shelves lights are available on one or both shelves.

A light kit must be specified when ordering LED lights.

► See *Determining LED Light Wattage* chart to determine the light kit needed, page 68.

A technology skin must be specified to house the switch from a light kit. The switch controls the lights connected to the light kit.

When a remote control light kit is specified, a technology skin is not required because the remote control acts as the switch.

The LED lights are flush mounted on the underside of the shelves, bins, or drawers.

Lights ship installed in the shelves, bins, or drawers.

Shelves, bins, or drawers specified with LED light option include the lights, lens cover, and a 192" length of low voltage cord to plug into a light kit.

Light temperature is 4100K.

A 30-watt light kit includes one power transformer, one switch, and one terminal block that can accommodate up to eight shelves with lights. A 30-watt light kit requires one power receptacle.

A 60-watt light kit

includes two power transformers, one switch, and two terminal blocks that can accommodate up to sixteen total shelves with lights. A 60-watt light kit requires two power receptacles.

A 30-watt remote control light kit with dimmer

includes one power transformer, a remote control, a receiver, and a terminal block that accommodates up to eight shelves with lights or 30 watts, whichever comes first.

The remote control has functions for power, a dial for dimming, and preset high and low light levels.

Remote control and receivers are coded to operate as a pair to prevent interference from other light kits.

The light switch (black) controls all lights connected to the power kit. Light switches must be installed in a technology skin (ordered separately).

Dimming kits include everything included in a light kit plus an additional dimming module for each transformer. The 60-watt light dimming kit allows two groups of lights to be dimmed independently.

Dimming control has a 79" cord allowing it to be placed conveniently for periodic adjustment.

Determining LED Light Wattage

Determining LED Light Wattage

Light Wattage

LED lights are optional for shelves, bins, and drawers. A light kit must be specified to connect the shelf lights to power and switch them on and off. The light kit needed depends on the total wattage of all of the LED lights used for a workwall. Different width shelves have different wattages:

Shelf Width	Light Wattage
23 ¹ / ₁₆ "	4.8
29 ¹ / ₁₆ "	5.6
35 ¹ / ₁₆ "	7.3

To Calculate Total Wattage For A Workwall:

- Determine how many shelves of each width have been specified with LED lights.
- Multiply quantity of shelves by light wattage for each width.
- Add up total watts.
- If total watts is 30 watts or less, the 30-watt light kit should be specified. If the total watts is between 30W and 60W, the 60-watt light kit should be specified.

4 Shelves with LED Lights

4 (lights) x 5.6W = 22.4W
Use 30W light kit

9 Shelves with LED Lights

9 (lights) x 5.6W = 50.4W
Use 60W light kit

Legend

▲ = LED Light

Cantilever Desks and Tables

Cantilever desks and tables connect to FlexFrame workwall using attachment skins.

Cantilever desks and tables are not approved to be freestanding or attached to drywall without the use of a FlexFrame workwall.

Worksurface in wood or laminate is cantilevered to encourage collaboration.

Grommet features a dual direction hinged lid and has connections for power, data, and available media:scape technology.

TechBox supports the worksurface and conceals cords, cables, and media:scape electronic components.

Actual Dimensions		
	Cantilever Desks	Cantilever Tables
Depth	36"	48"
Width	72", 78", 84", or 90"	72" or 90"
Height	29½"	29½"

Product Details

Desks and tables have three main components: worksurface, TechBox, and grommet.

TechBox is 51" wide. Wider worksurfaces cantilever a great distance from the TechBox.

Desks have one cantilever bracket supporting the worksurface. The cantilever bracket is painted black.

Tables have two cantilever brackets supporting each corner of the worksurface. The cantilever brackets are painted black.

Grommets can support one Eyesite monitor arm using the FrameOne mount.

Worksurface is 1½" thick.

Connections

Cantilever desks must attach to workwall using a desk attachment skin.

Cantilever desks must attach to a 36" wide section of workwall.

Cantilever tables must attach centered on an inner vertical frame piece with sections of equal width on each side. Sections can be 24", 30", or 36" wide.

Cantilever tables must attach to workwall using a skin pair for cantilever table attachment.

Desk and tables cannot be used freestanding or attached to a building wall.

SOTO worktools and lighting can be attached to the rail. SOTO shelves interfere with the swing of the lid and should not be used.

Wiring & Cabling

Lid on grommet opens in both directions affording easy access from either side.

Lid can be completely removed for servicing of electronics.

Grommet has six power outlets. Two outlets are located on the side to accommodate large power adapters.

Grommets utilize Extron Electronics' Architectural Adapter Plates (AAPs) to provide access to data, audio, video, and telephone.

Each grommet can accommodate up to two customer provided single space AAPs.

Grommets ship with blank cover plates. AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at www.extron.com.

Power unit in grommet is available in corded, hard-wired, and modular versions.

If corded version connects to workwall base power, it must be located behind a removable skin. See skins section for details. ▶ See *Skins* page 40 for details.

Cord is 9 feet with a 15 amp grounded plug.

Modular version is a two circuit male connector designed to connect to the workwall power system only.

Modular version is always wired to circuit 1.

Grommets include an opening for the LED light switch included in workwall light kits.

If not using LED lighting, this opening can be used as an additional simplex data port.

Grommets in desks without media:scape have an accessory tray convenient for personal electronics.

- 7207 Textured Black

Cantilever Desks and Tables with media:scape

Cantilever desks and tables with media:scape create high-performance collaborative applications in private offices and meeting spaces.

Power cable to detached power cord is provided within monitor.

Scaler insures consistent image resolution to the displays. For power management, the media:scape setting will automatically go into standby mode when media:scape is not in use. The system can be reactivated by simply connecting a device to one of the PUCKs.

HDMI cable receives information from the switcher and sends that information to the scaler. *Note: When integrating with video conferencing, an additional HDMI cable and scaler is required.*

The switcher connects to the PUCKs, and controls which user's laptop content is shown on the display(s). Up to four displays can be accommodated.

PUCK (Personal User Control Key) plugs into the user's laptop and allows them to send their content to the display by touching an illuminated display number.

Integrated pulley system allows PUCKs to be fully retracted into the TechBox to manage cables and stow PUCKs safely when not in use.

Sequence

Actual Dimensions

	Cantilever Desks	Cantilever Tables
Depth	36"	48"
Width	72", 78", 84", or 90"	72" or 90"
Height	29½"	29½"

Legend

P = Power

Inputs 1-4 and inputs 5-8 support up to eight PUCKs that can be connected to the media:scape switcher. Although they look like HDMI cables inputs, plugging standard HDMI cables into these sockets can harm the switcher.

Switcher outputs are the output jacks to the monitors and projectors. The switcher can handle up to four output displays via HDMI cables.

Cantilever desks and tables with media:scape provide two specialized audio/video inputs. For integration with video conferencing, cable television, document cameras, and other devices, please refer to switcher user manual.

Cantilever Desks and Tables with media:scape, continued

Product Details

Desks and tables have three main components: worksurface, TechBox, and grommet.

TechBox is 51" wide. Wider worksurfaces cantilever a great distance from the TechBox.

Desks have one cantilever bracket supporting the worksurface. The cantilever bracket is painted black.

Tables have two cantilever brackets supporting each corner of the worksurface. The cantilever brackets are painted black.

Grommets can support one Eyesite monitor arm.

Worksurface is 1½" thick.

One scaler is included with each desk and table.

Refer to *Integrated Technologies Specification Guide* for additional scalers and HDMI cables as needed.

Cantilever desks and tables come with three PUCKs. PUCKs are available with VGA, HDMI, DisplayPort, and Mini DisplayPort connections.

PUCK plugs into the user's laptop and allows them to send their content to the display by touching an illuminated display number. The switcher connects to the PUCKs and controls which user's laptop content is shown on the display.

Virtual PUCK allows easy and efficient wireless content sharing from laptops and tablets on multiple media:scape displays.
▶ See *Integrated Technologies Specification Guide* for further details.

One retractable audio cable is included with each desk and table.

PUCK tray has space for three PUCKs and connectors.

Integrated pulley system allows PUCKs to be fully retracted into the TechBox to manage cables and stow PUCKs safely when not in use.

Indicator light on PUCK tray communicates system status.

Steelcase Maintenance Agreement

Cantilever desks and tables with media:scape include a one year Steelcase maintenance agreement to provide an enhanced support system for media:scape settings with digital components. The maintenance agreement covers:

- software/firmware enhancements
- expedited shipping for hardware replacements
- prioritized technical support

Maintenance agreement renewal options are available for one, two, and three year periods.

▶ Specifying, page 130

Connections

Cantilever desks must attach to workwall using a desk attachment skin.

Cantilever desks must attach to a 36" wide section of workwall.

Cantilever tables must attach centered on an inner vertical frame piece with sections of equal width on each side. Sections can be 24", 30", or 36" wide.

Cantilever tables must attach to workwall using a skin pair for cantilever table attachment.

Desk and tables cannot be used freestanding or attached to a building wall.

SOTO worktools and lighting can be attached to the rail. SOTO shelves interfere with the swing of the lid and should not be used.

Wiring & Cabling

Lid on grommet opens in both directions affording easy access from either side.

Lid can be completely removed for servicing of electronics.

Grommet has six power outlets. Two outlets are located on the side to accommodate large power adapters.

Grommets utilize Extron Electronics' Architectural Adapter Plates (AAPs) to provide access to data, audio, video, and telephone.

Each grommet can accommodate up to two customer provided single space AAPs.

Grommets ship with blank cover plates. AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at www.extron.com.

Power unit in grommet is available in corded, hard-wired, and modular versions.

If corded version connects to workwall base power, it must be located behind a removable skin.
▶ See *Skins*, page 40 for details.

Cord is 9 feet with a 15 amp grounded plug.

Modular version is a two circuit male connector designed to connect to the workwall power system only.

Modular version is always wired to circuit 1.

Grommets include an opening for the LED light switch included in workwall light kits.

If not using LED lighting, this opening can be used as an additional simplex data port.

Display

Victor2

Victor2 is a recycling solution that is appropriate for supporting larger work groups, conference rooms, and cafés. A mobile unit and two freestanding units are available.
► Specifying, pages 116–120

Mobile unit has three openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish, and French.

Receptacles contain features to accommodate oversized bags.

Four non-locking casters are standard. Two casters swivel, and two casters are fixed.

Soft-touch integral handle allows easy movement from one location to another.

Receptacles fit bags from 30 gallon size and larger.

Freestanding unit has four or five openings. Eight insert options are available to pick for the openings. These eight insert options contain both English, Spanish, and French.

Leveling glides are fully adjustable up to 1 1/2".

Actual Dimensions

	Mobile Unit	Freestanding Unit
Depth	18"	25"
Width	36"	48" or 60"
Height	36"	36"

Product Details

Mobile and freestanding units are standard with a metal case and top. Front and back of unit are available in wood or laminate.

Acrylic inserts etched with recycling icons are standard on mobile and freestanding units. The verbiage for each icon is in English/Spanish/French on the same insert.

Mobile unit is standard with three openings for inserts and sloped receptacles with built-in bag holding system.

Top on the mobile unit can be used for food service use or tray storage.

Hinged doors on the back are standard on the mobile unit for easy access to receptacles.

Four non-locking concealed casters, two swivel and two fixed, are standard on the mobile unit.

Receptacles in mobile unit can accommodate 12 gallons each. Receptacles in freestanding unit can accommodate 30 gallon size and larger.

Soft-touch integral handle on mobile unit allows for easy movement from one location to another.

Freestanding unit is standard with either four or five openings for inserts on the top of the unit.

Hinged doors on the front are standard on the freestanding unit for easy access to the receptacles.

Leveling glides on freestanding units are fully adjustable to 1 1/2".

Tray shelf can only be used with the freestanding unit.

Tray shelf fits most trays up to 20 3/4" x 12".

Freestanding four- or five-slot opening will accommodate two tray shelves.
Tip: A gap of 15" will separate the two tray shelves on a five-opening unit.

Maximum capacity of tray is 20 food trays with maximum size of tray 20" x 20".

Display holds two 8 1/2" x 11" papers or one 11" x 17" paper.

Tip: Paper will be between two acrylic plates. Paper can easily be replaced without tools.

Display can only be used with the freestanding unit.

Freestanding four- or five-slot opening will accommodate two displays.
Tip: A gap of 18 1/2" will separate the two displays on a five-opening unit.

One tray shelf and one display can be used on the freestanding unit.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process — the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

► See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Flat-cut open-pore finish choices

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry **E**
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple*
- 3572 FC/OP Amber on Maple **E**
- 3592 FC/OP Blonde on Maple
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3722 FC/OP Dark Mahogany on Walnut
- 3752 FC/OP Medium Walnut
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Quarter-cut open-pore finish choices

- 3042 QC/OP Ash*
- 3222 QC/OP Clear Maple*
- 3272 QC/OP Amber on Maple **E**
- 3292 QC/OP Blonde on Maple
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3322 QC/OP Dark Mahogany on Walnut
- 3352 QC/OP Medium Walnut
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

Rift-cut open-pore finish choices

- 3602 RC/OP Desert Oak
- 3612 RC/OP Warm Oak **E**
- 3692 RC/OP Espresso Oak

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood top only.

Flat-cut full-fill finish choices

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry **E**
- 3424 FC/FF Medium Cherry
- 3524 FC/FF Clear Maple*

- 3724 FC/FF Dark Mahogany on Walnut
- 3754 FC/FF Medium Walnut
- 3764 FC/FF Dark Walnut
- 3774 FC/FF Medium Mahogany on Walnut

Quarter-cut full-fill finish choices

- 3224 QC/FF Clear Maple*
- 3274 QC/FF Amber on Maple **E**
- 3294 QC/FF Blonde on Maple
- 3304 QC/FF Clear Walnut
- 3314 QC/FF Natural Walnut
- 3324 QC/FF Dark Mahogany on Walnut
- 3354 QC/FF Medium Walnut
- 3364 QC/FF Dark Walnut
- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

Rift-cut full-fill finish choices

- 3604 RC/FF Desert Oak
- 3614 RC/FF Warm Oak **E**
- 3694 RC/FF Espresso Oak

**To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.*

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Quarter-cut open-pore finish choices Wood Group 2

- 3032 QC/OP Dark Thin Line Bamboo
- 3052 QC/OP Ribbon Sapele

Wood Group 3

- 3832 QC/OP Figured Anegre
- 3842 QC/OP Figured Makore

To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000755 for 3032, form number 09-0000757 for 3052, form number 09-0000758 for 3832, and form number 09-0000759 for 3842.

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from DesignTex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for us as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Flat-cut open-pore finish choices

- 3JDX FC/OP Oak Composite
- 3JFX FC/OP Maple Composite
- 3JHX FC/OP Cherry Composite
- 3JJX FC/OP Walnut Composite

E = Established

Quarter-cut open-pore finish choices

3F8X	QC/OP European Walnut Composite
3GAX	QC/OP Gold Teak Composite
3GFX	QC/OP Rosewood Composite
3GGX	QC/OP Zebrano Composite
3HGX	QC/OP Oak Composite
3HVX	QC/OP Walnut Composite
3JEX	QC/OP Maple Composite
3JGX	QC/OP Cherry Composite

Natural Veneer

Natural veneer is available in the Select Surfaces offering. Natural veneer may have extended leadtimes. Place your order as you normally would for any other finish, calling out the appropriate finish code. Natural veneers are Graded-In as Wood Group 1 pricing.

The following finishes are available through the natural veneer offering:

Flat-cut open-pore finish choices

35A2	FC/OP Blanch Maple
37A2	FC/OP Thunder Walnut

Quarter-cut open-pore finish choices

32A2	QC/OP Blanch Maple
33A2	QC/OP Thunder Walnut

Rift-cut open-pore finish choices

36A2	RC/OP Volcanic Oak
------	--------------------

Planked Veneer

Planked veneer is available in the Select Surfaces offering. Planked veneer may have extended leadtimes. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the planked veneer offering:

Wood Group 1

3P61	OP Planked Oak
3P71	OP Planked Walnut

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain matching fee applies on all CUSTOMIZ requests. (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color.) The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges on products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 5 weeks to formulate. Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from DesignTex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Custom Surfaces**Price Group COM (Customer's Own Material)****Fabric Approval and Yardage**

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com

For additional information regarding Customer's Own Material

call 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

► See *Surface Materials Reference Manual* for a listing of available seating upholstery colors.

E = Established

Specification Guidelines for Directional Fabrics

One application direction of fabric on FlexFrame skins is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The other application direction of fabrics on FlexFrame skins is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Wood Veneer Grain and Directional Laminate Application

Wood Veneer Grain and
Directional Laminate
Application

Wood veneer and directional laminates are standard with the grain directions shown.

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. The natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on surfaces installed at a 90 degree angle with each other.

Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

Tech Box can have directional change of horizontal and vertical.

Maintenance Agreement Renewals	130
Style Number Index	132

Maintenance Agreement Renewals

About Maintenance Agreement Renewals

Steelcase maintenance agreement renewals provide an extension of our enhanced support system that features software/firmware enhancements, prioritized technical support, expedited shipping for hardware replacements, and warranty extension on technology components when outside of warranty.

Renewal Lengths and Bundling Option

Maintenance agreement renewals are available for 1, 2, and 3 year terms.

Customers with multiple maintenance agreements will be able to bundle some or all of their applicable Steelcase technology products into a single maintenance agreement.

How to Order

Maintenance agreement renewals follow a special ordering process that requires a customer specific quote generated by Steelcase. Please contact MAs@steelcase.com for complete renewal process information or with any questions.

Tip: When selecting the 2 year renewal option, the list price is 15% less per year compared to the base price. When selecting the 3 year renewal option, the list price is 30% less per year compared to the base price.

Note: A maintenance agreement renewal may be ordered for one, two, and three year periods, after original purchase as long as there is an active agreement in place. Maintenance agreement renewals cover up to four years from the unit's original shipping date.
