# INTERCONNECTED WORKPLACE

## A Palette of Places

### OPTIMIZE EVERY SQUARE FOOT

- Design settings for multiple functions.
- Consider alternative workplace strategies.

### ENHANCE COLLABORATION

- Support both physical and virtual collaboration.
- Allow for transparency which builds trust – the heart of collaboration.

### ATTRACT, DEVELOP, AND ENGAGE

- Provide choice and control over where and how people work.

### BUILD THE COMPANY BRAND

- Create spaces that communicate your brand to both internal and external audiences.

### HELP IMPROVE

- A person's wellbeing

## Top 5 Factors Determining Job Satisfaction

Enhance people's connections, wellbeing and safety by designing for the human factor.

Increasingly, patient rooms are more than just a place for a bed and medical equipment. They are multifunctional environments—a temporary home for a healing patient and family members, a destination for visitors, and a workspace for clinical team members who need easy access to deliver care. When hosting, comfort and communication are integrated throughout safe and efficient patient room design, a better and safer experience of care can be anticipated.

# SITE LOCATION

- 5601 6th Ave South (4th Floor)  
Seattle, Washington 98108
- Located in Seattle's vibrant Georgetown neighborhood

## BLOCKING DIAGRAM

Based on Steelcase research dealing with interconnected workplace and clinical spaces adjacency and blocking diagram was created.

To create **interconnected workplace** by providing a range setting for multiple functions, give employees choices and control over where and how they work. Create a place for people to gather, or get away.

The **clinical spaces** that focus on improving the experience for all participants. Providing a range of private and semiprivate spaces to give them choices and control of their environment. Keep exam rooms away from office area, to enhance their privacy and communication. Glasses door maintaining visibility to the patient without disturbing them, and receive most sunlight.

## DESIGN PRINCIPLE

**“ That oblique and elliptic lines are dynamic, and by their very nature posses an emotive power a thousand times stronger than perpendiculars.”**

Antonio Sant'Elia  
Key member of Futurism Movement

Today's health care facility is integrated one for patients, for their family members and doctors. The design focus is on efficiency, comfort and safety, space that is used to humanize for good health connection between patients and doctors.

The **design concept**: using geometry, circulation to promote an atmosphere of flexible, comfort and relaxation. Cleanliness, freshness and simplicity to create a calm environment. The function of space influences the final form.
