

Close at Hand

The Relay wall-mounted arm is designed to support information technology and clinician work process at the point of care. With a single touch, it brings technology tools up close, making it easy to access information – and share it with patients and families.

Relay™ provides an adjustable keyboard tray and a steady worksurface – folded up, the worksurface also serves as a markerboard. As a wall-mounted solution, Relay works well in tight spaces. It extends through a wide range of motion, stores close to the wall when not in use and manages cables discreetly.

IM#: 16-0042714

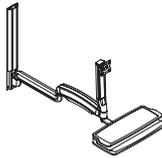

FEATURES AND BENEFITS

- Adjusts 22" in height to promote comfortable seated and standing-height work for a wide range of users
- Monitor can independently adjust 9.5" using counterbalance technology for the best ergonomic position
- Extends over 42" horizontally and stores in less than 10"
- Gas-assisted counterbalance arm makes repositioning Relay effortless
- Monitor tilts up and down and rotates left to right 180 degrees for optimal viewing
- Included pivot limiter protects surrounding surfaces
- Cable management system is integrated into the underside of the workstation arm to neatly conceal all required cables
