At the Ready

Floorspace within healthcare environments is at a premium, and it’s often difficult to provide enough seating without creating too much clutter. Light in scale and stackable, Sorrel™ adds great seating options that help maximize every square foot of a

healthcare setting. Sorrel can be used and then easily stacked and stowed out of the way until next time. Coordinating tables feature thermoform tops with unique notched corners, allowing them to nest closely with seating.

Breadth of Options

Sorrel is an elegant alternative to the traditional stack chair. Options include a maple wood back in a range of finishes, armed or armless seating, wider versions and straight or wallsaver legs.

Added Ease + Support

Bariatric and easy access chairs provide extra support and easy entrance and exit, with the same aesthetics of other Sorrel seating. Steel frame construction provides a rigid structure that lasts.
