

Product pictured is not the exact style of the product studied in this document.

Clipper

Product Environmental Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on sustainability attributes of **Clipper**.

Clipper is a mobile, user deployable, freestanding screen that can easily transform work areas into inhabitable spaces that meet privacy needs. It has optional wings and comes in two heights.

The model chosen for analysis from the Clipper range is reference # TS6SCRN.

Final Assembly Location

Final assembly of Clipper is in Holland, Michigan, USA for Steelcase for the Americas Market.

Recycled Content ⁽¹⁾

Pre-Consumer: 26.3%

Post-Consumer: 1.2%

Recyclability ⁽²⁾: 10%

Product Certifications and Labels ⁽³⁾

- SCS Indoor Advantage™ Gold
- LEVEL® 3, BIFMA's sustainability certification program for furniture

Clipper may contribute to the following building standards and initiatives ⁽⁴⁾ in the following ways, depending on options.

Potential contribution area	LEED® Credit	The WELL Building Standard® Feature
Recycled content: Pre-Consumer: 26.3% Post-Consumer: 1.2%	BPDO - Sourcing of raw materials, Furniture and medical furnishings	
BIFMA LEVEL® 3	Certified Multi-attribute Products and Materials	
SCS Indoor Advantage™ Gold	Low-emitting materials	Feature 04
Materials Transparency	Clipper may meet the Furniture and Medical Furnishings credit of LEED.	Clipper may meet the Toxic Material Reduction Optimization feature of the WELL Building Standard.

Others		
Living Building Challenge	Clipper may meet the Red List Imperative requirements of the Living Building Challenge Materials Petal, depending on options.	
Healthier Hospitals	Clipper may meet the Healthier Interiors goal of the Safer Chemical Challenge, depending on options. Please visit Healthier Hospitals for a complete list of Steelcase products that may contribute to the Safer Chemicals Challenge.	

⁽¹⁾ Calculations of recycled materials exclude packaging and are based on data provided by professional organizations, suppliers and other available information. Recycled materials are determined by weight and defined in accordance with ISO 14021. This data may include industry averages, ranges or other broadly-based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice. Recycled content may include pre- and post-consumer materials:

Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

⁽²⁾ In locations where recycling is available. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold. Steelcase offers services to assist customers with end-of-use options including resale, refurbishment, charitable donation, and recycling.

⁽³⁾ Product Certifications and Labels

Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

⁽⁴⁾ Building standards and initiatives

LEED® —an acronym for Leadership in Energy and Environmental Design™—is a registered trademark of U.S. Green Building Council®. These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product. Refer to www.usgbc.org for LEED Program details.

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. Learn more at WELLcertified.com.

Living Building Challenge is a trademark of the International Living Future Institute.

Steelcase sustainability related actions and results are communicated annually in the **Corporate Sustainability Report**. [▶](#)
