For the many modes of learning.

Endlessly versatile, the Node chair is unlike traditional school desks and chairs. Node is a natural fit across campus—from the classroom to the library, conference rooms to faculty offices and the many areas in between—everywhere learning happens.

Node chairs are highly mobile and support collaboration, transition and movement for all the ways students learn. And with a wide range of base, seat, color and finish options, there’s a Node for every body and every space.
A smart solution.

The Node chair is mobile and flexible and empowers seamless classroom reconfiguration. With Node, a classroom can move from a lecture-based mode to a team-based mode and back again without interruption. Node takes passive space and makes it active, supporting individual and team-based learning.
For every campus seating need.

With a range of choices, there is a Node for nearly every design concept and seating need. The steel X-base and four-leg wood base options offer a sophisticated, practical choice for a variety of campus applications, including libraries, cafés, seminar and training rooms. The optional seat cushion extends user comfort for long periods of study and work.
ELEVATING FACULTY SPACES
The faculty role can be a demanding one. On top of the core teaching role, there are administrative and advising responsibilities. As guest seating for faculty spaces, Node supports multiple modes of interaction between teacher and student. And that’s important—because when both sides are supported, the whole institution succeeds.

STUDENT LIVING AND LEARNING
In living areas, students do more than socialize and sleep—it’s where they do a large amount of learning and studying. With a variety of bases, seats and worksurfaces to choose from, Node brings student living areas alive and gives them the same energy and functionality as a high-performing classroom.

A few of Node’s flexible features.

HIGH-BACK
Supportive and flexible, Node high-back promotes active learning. A mid-back option is also available, minimizing contact when students move against walls.

CUSHION
A cushion keeps students comfortable when they sit for long stretches, and it comes in a variety of design aesthetics.

PERSONAL WORKSURFACE
Node’s personal worksurface is adjustable and non-handed, offers ample space, and has a tablet stand to support easy viewing of content. An optional cupholder rotates under the worksurface when not in use.

TRIPOD BASE
One of four dynamic base choices, keeps personal belongings safe and offers a natural footrest, a swivel seat and casters for ease of movement.
STATEMENT OF LINE

High-back
- Tripod base with worksurface and casters
- X-base with worksurface and without worksurface
- Five-arm base with worksurface and casters
- Five-arm base with worksurface and without worksurface
- Five-arm stool

Mid-back
- Tripod base with cut worksurface and casters
- X-base with worksurface and without worksurface
- Five-arm base with cut worksurface and casters
- Five-arm base with cut worksurface and without worksurface
- Five-arm stool

SUSTAINABILITY

PEOPLE. PLANET. PROFIT. PRODUCT ENVIRONMENTAL CERTIFICATIONS

By rethinking our business systems and designing our products to avoid negative impacts on humans and the environment, we contribute to a sustainable future for the planet and its people. We commit to advance our practices through continuous learning and building partnerships with our customers, business partners and environmental thought leaders to optimize our performance and contribute to the science and practice of sustainability.
