

Benching Specification Guide

Availability

Electronic price list updated with release 190.B (U.S.) and 151.B (Canada), dated June 17, 2019.

Spec News is available on village.steelcase.com. Search Steelcase Marketing Resources (Adstock) and download the current release's Spec News.

Tip: Steelcase Marketing Resources is a new global platform for ordering Steelcase marketing materials that replaces Adstock.

View or download Steelcase Specification Guides at [https://www.steelcase.com/resources/documents?tax-\[doctype\]=spec-guide](https://www.steelcase.com/resources/documents?tax-[doctype]=spec-guide).

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at <http://finishlibrary.steelcase.com>.

► For a list of all trademarks, refer to the last page of this specification guide.

© 2019 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at steelcase.com/CADpricing.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes
(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify
(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information
(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Standard Horizontal Frame Packages—Thin Trim	No cost	Specify with side edge

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.

Additional Resources

Benching products are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

Printed Materials

Other Specification Guides

Steelcase offers a comprehensive portfolio of furniture and solutions. For the full offering of products, refer to the individual product specification guides. These can be accessed at the www.steelcase.com web site or at village.steelcase.com.

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Overview of FrameOne with Rail

Dual-sided base units

include an integrated rail and legs. Overall depths are 48"D or 60"D. Widths range from 48"W to 96"W. Dual-sided base units can be used independently or combined with dual-sided extensions to lengthen the bench.

Dual-sided extension

units include an integrated rail and an intermediate leg, and connect to dual-sided base units. Dual-sided extensions can be added to each other to lengthen the bench. Dual-sided extensions are offered in the same dimensions as the dual-sided base units.

End counters can be placed at either end of a dual-sided base or extension unit, and allow a place for printers, additional touch-down space for users, etc. End counters are available 18"D or 24"D and 48"W or 60"W.

Single-sided base units

include an integrated rail and legs, and are available in two depths – 25½"D or 31½"D. Widths range from 48"W to 96"W. Single-sided base units can be used independently or combined with single-sided extensions to lengthen the bench. Single-sided base units can also be used between dual-sided units to get around a column.

Single-sided extension units

include an integrated rail and an intermediate leg, and connect to a single-sided base unit. Single-sided extensions can be added to each other to lengthen the bench. Dimensions are the same as single-sided base units.

Centered screens

are mounted to the rail on both dual- and single-sided base and extension units. 12"H and 19½"H screens have widths of 48"W to 84"W. 24"H screens have widths of 48"W to 72"W.

Universal screens

are mounted with bayonets to the rail on both dual- and single-sided base and extension units. 13½"H and 19½"H screens have widths of 24"W-96"W.

Overview of FrameOne without Rail

Dual-sided base units

include two end legs. Overall depths are 48"D or 60"D. Widths range from 48"W to 96"W. Dual-sided base units can be used independently or combined with dual-sided extensions to lengthen the bench.

Dual-sided extension units

include an intermediate leg and connect to dual-sided base units. Dual-sided extensions can be added to each other to lengthen the bench. Dual-sided extensions are offered in the same dimensions as the dual-sided base units.

End counters can be placed at either end of a dual-sided base or extension unit, and allow a place for printers, additional touch-down space for users, etc. End counters are available 18"D or 24"D and 48"W or 60"W.

Universal screens

are mounted with bayonets to the dual-sided base and extension units. 13½"H and 19½"H screens have widths of 24"W-96"W.

Stability Guidelines

Maximum run of dual-sided base and extensions is 32'.

If dual-sided run is longer than 32', a base is required mid run. One connection kit (base leg to base leg) must be ordered to connect the two post (or loop) legs together.

Maximum run of single-sided base and extensions is 32'.

If single-sided run is longer than 32', a base is required mid run. One connection kit (base leg to base leg) must be ordered to connect the two post (or loop) legs together.

If specifying a 24"D single-sided unit with a glass screens, you must specify a run with all base units. No extension units are permitted with 24"D single-sided units with glass screens.

A single-sided base allows efficient planning, providing the ability to work around architectural obstructions. Two connection kits (base leg to base leg) must be ordered to connect the dual-sided post (or loop) legs to the single-sided post (or loop) legs.

Horizontal Sight Lines

Sight lines are the imaginary lines that run through the vertical space, creating the horizontal continuity that relates the different components to one another and the system as a whole. There are three significant sight lines in the horizontal visual field of aesthetic. The height of the bench at 28½", the height with the 12" screen/organizer shelf at 40½", and the height with the 19½" screen/tall mid storage at 48".

Dual-Sided Bases, Dual-Sided Extensions, and End Counters with Rail

Dual-sided bases and extensions connect together to create benching applications. Overall depths are 48"D or 60"D. Surfaces are ¾"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.

► Specifying, page 74

Post or loop legs are available with dual-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28½"H.

Cutout is optional on dual-sided base and extension units.

Integrated rail is located in center of dual-sided base and extension units and allows for the mounting of centered screens, monitor arms, lights, power strips, and other worktools.

Power and data access door is optional on dual-sided base and extension units.

Intermediate leg is included with dual-sided extension units. Leg is fixed-height with the top of surface at 28½"H. Leg supports adjacent surface.

½" gap between rail and surface accommodates worktools and cords.

End counters are available in 18"D or 24"D, and widths of 48"W and 60"W. They can be added to the end of a dual-sided bench to provide additional surface space for printers, additional touchdown space for users, etc.

Leg glides have 1⅜" of adjustment for uneven floors.

Actual Dimensions

A	24" or 30" (to centerline of integrated rail)
B	48", 60", 66", 72", 78", 84", or 96"
C	48" or 60"
Thickness	¾"

Tip: Actual worksurface depths are 22" and 28".

Product Details

Two leg types are available on dual-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on dual-sided extension units. Leg covers are available to provide a different visual and to conceal power/data infeeds at this location. Lower trays or simple trays are recommended when leg covers are used.

24\"/>D desks have 13³/₄\"/> clearance to intermediate leg. 30\"/>D desks have 19³/₄\"/> clearance.

Dual-sided base units include two legs. The second leg is used at the end of the bench or when 32' has been reached.

► See *Stability Guidelines*, page 18, for more information.

Power and data access door is optional on all dual-sided base and dual-sided extension surfaces. One door is centered on the surface and allows user access to power and data outlets as well as cord management. When optioned on 96\"/>W surfaces, two doors are provided in each surface.

Cutouts are optional on all dual-sided base and dual-sided extension surfaces. One cutout is centered on the surface and allows user access to power and data outlets, as well as cord management. When optioned on 96\"/>W surfaces, two cutouts are provided in each surface.

Trays are available on dual-sided base and extension units. There are three tray options.

Upper tray is standard and provides under the surface cord management, data termination, and conceals the power blocks and conduit.

The lower tray is optional and always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables creating a clean visual.

Dual-sided extension units include an extension tray when lower tray is optioned.

Simple tray is optional in place of upper or upper and lower trays. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles. Power covers are available for dual- and single-sided applications.

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

End caps can be added to simple trays and are sold in pairs. End caps are painted metal.

Extension trays conceal conduit or wires between two extensions, or a base and an extension, using simple trays. They also allow for wires or conduit to be brought up through the bottom. Extension trays can be added to 96\"/>W dual-sided base, specified with simple tray and can be used with or without intermediate leg covers.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Omit trays is an option if trays are not needed. However, if power and data access door or cutout is selected, a tray is required. *Tip: It is not recommended to mix tray types within one run of benches.*

Dual-sided base

Dual-sided extension

96"W dual-sided base and extension units include two 48"W frames and two 96"W surfaces. If power and data access door is selected, each 96"W surface will have two doors.

Storage must be at least 6" from centerline when trays are used.

Storage can nest under the bench. The clearance is 25 1/2". Except when within 3" of an intermediate leg, the clearance is 25".

Storage can nest under end counters. There is 25" of clearance under cantilever.

Connections

Floor anchor brackets (FMFA) are available to secure a dual-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. Brackets are typically only used when the dual-sided unit is not connected to an extension.

Base leg to base leg connection kit

is required when two dual-sided base legs are adjacent to each other or when transitioning from a dual-sided base unit to a single-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

Wiring and Cabling

Modular power, in a dual-sided base or extension unit without trays, must be secured with a strain relief bracket. Order style number FMVBK for each unit.

Power components are ordered separately.

Dual-Sided Bases, Dual-Sided Extensions, and End Counters without Rail

Dual-sided bases and extensions connect together to create benching applications. Overall depths are 48"D or 60"D. Surfaces are $\frac{3}{4}$ "-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.

► Specifying, page 74

Post or loop legs are available with dual-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28½"H.

Power and data access door is optional on dual-sided base and extension units.

End counters are available in 18"D or 24"D, and widths of 48"W and 60"W. They can be added to the end of a dual-sided bench to provide additional surface space for printers, additional touchdown space for users, etc.

Actual Dimensions

A	24" or 30" (to centerline of bench)
B	48", 60", 66", 72", 78", 84", or 96"
C	48" or 60"

Thickness $\frac{3}{4}$ "

Tip: Actual worksurface depths are 23" and 29".

Scallop is standard on dual-sided base and extension units and allows for surface mounting of monitor arms, lights, power strips, and other worktools.

Cutout is optional on dual-sided base and extension units.

Intermediate leg is included with dual-sided extension units. Leg is fixed-height with the top of surface at 28½"H. Leg supports adjacent surface.

Leg glides have $1\frac{3}{8}$ " of adjustment for uneven floors.

Scallop with power and data access door is optional on dual-sided base and extension units.

Product Details

Two leg types are available on dual-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on dual-sided extension units. Leg covers are available to provide a different visual and to conceal power/data infeeds at this location. Lower trays or simple trays are recommended when leg covers are used.

24\"D desks have 13 3/4\" clearance to intermediate leg. 30\"D desks have 19 3/4\" clearance.

Dual-sided base units include two legs. The second leg is used at the end of the bench or when 32' has been reached.

► See *Stability Guidelines*, page 18, for more information.

Power and data access door is optional on all dual-sided base and dual-sided extension surfaces. One door is centered on the surface and allows user access to power and data outlets as well as cord management. When optioned on 96\"W surfaces, two doors are provided in each surface.

Scallops are standard on all dual-sided base and dual-sided extension surface without a rail. One scallop is centered on the surface and allows surface mounting of monitor arms, lights, power strips, and other worktools. When optioned on 96\"W surfaces, two scallops are provided for each worksurface.

Cutouts are optional on all dual-sided base and dual-sided extension surfaces. One cutout is centered on the surface and allows user access to power and data outlets, as well as cord management. When optioned on 96\"W surfaces, two cutouts are provided in each surface.

Simple tray is standard on dual-sided base and extension units without rail. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles. Power covers are available for dual- and single-sided applications.

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

End caps can be added to simple trays and are sold in pairs. End caps are painted metal.

Extension trays conceal conduit or wires between two extensions, or a base and an extension, using simple trays. They also allow for wires or conduit to be brought up through the bottom. Extension trays can be added to 96\"W dual-sided base, specified with simple tray and can be used with or without intermediate leg covers.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Omit trays is an option if trays are not needed. However, if power and data access door or cutout is selected, a tray is required. *Tip: It is not recommended to mix tray types within one run of benches.*

Dual-sided base

Dual-sided extension

96"W dual-sided base and extension units include two 48"W frames and two 96"W surfaces. If power and data access door is selected, each 96"W surface will have two doors.

Storage must be at least 6" from centerline when trays are used.

Storage can nest under the bench. The clearance is 25 1/2". Except when within 3" of an intermediate leg, the clearance is 25".

Storage can nest under end counters. There is 25" of clearance under cantilever.

Connections

Floor anchor brackets are available to secure a dual-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. Brackets are typically only used when the dual-sided unit is not connected to an extension.

Base leg to base leg connection kit is required when two dual-sided base legs are adjacent to each other or when transitioning from a dual-sided base unit to a single-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

Dual-Sided Bases and Extensions with Continuous Top

Dual-sided bases and extensions with continuous top are ideal for collaborative applications, like project teams and meeting rooms.

Dual-sided bases and extensions with continuous top connect together to create benching applications. Overall depths are 48"D or 60"D. Surfaces are 3/4"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.

► Specifying, page 82

Post or loop legs are available with dual-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28½"H.

Power and data access doors are standard on dual-sided base and extension units with continuous top.

End counters are available in 18"D or 24"D, and widths of 48"W and 60"W. They can be added to the end of a continuous top bench to inset the leg and accommodate a larger group.

Actual Dimensions

A	24" or 30" (to centerline)
B	48", 60", 66", 72", 78", 84", or 96"
C	48" or 60"
Thickness	3/4"

Dual-sided bases and extensions with continuous top do not have a center rail.

Intermediate leg is included with dual-sided extension units. Leg is fixed-height with the top of surface at 28½"H. Leg supports adjacent surface.

Leg glides have 1⅜" of adjustment for uneven floors.

Product Details

Two leg types are available on dual-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on dual-sided extension units. Leg covers are available to provide a different visual and to conceal power/data infeeds at this location.

24\"D desks have 13³/₄\" clearance to intermediate leg. 30\"D desks have 19³/₄\" clearance.

Dual-sided base units include two legs. The second leg is used at the end of the bench or when 32' has been reached.
► See *Stability Guidelines*, page 18, for more information.

Power and data access door is standard on all dual-sided base and dual-sided extension surfaces with continuous top. Two doors are centered on the surface and allow user access to power and data outlets as well as cord management. When optioned on 96\"W surfaces, four doors are provided in each surface.

Simple tray is standard on benches with continuous top and includes power covers. Bases include one pair of end caps. Extensions include extension tray.

Simple tray accommodates standard capacity power only.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Storage must be at least 6\" from centerline when trays are used.

Storage can nest under the bench. The clearance is 25 1/2\". Except when within 3\" of an intermediate leg, the clearance is 25\".

Storage can nest under end counters. There is 25\" of clearance under cantilever.

Connections

Floor anchor brackets (FMFA) are available to secure a dual-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. Brackets are typically only used when the dual-sided unit is not connected to an extension.

Base leg to base leg connection kit is required when two dual-sided base legs are adjacent to each other or when transitioning from a dual-sided base unit to a single-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

96\"W dual-sided base and extension units with continuous top include two 48\"W frames and one 96\"W surface with four power and data access doors.

Value Package Benches with and without Rail

Value package

benches offer FrameOne bench features at a lower price than when selected individually.

Value package

benches are available in four or six packs with and without the rail. Benches are dual sided in overall depths of 48" or 60".

Benches include a base with legs, and the appropriate number of extensions and intermediate legs.

► Specifying, page 86

Simple tray is standard on value package benches and does not include power covers, end caps, or extension trays. These can be specified separately.

Modular power is specified separately.

Cutouts are standard on value package bench surfaces. One cutout is centered on each side of the surface and allows user access to power and data outlets, as well as cord management.

Actual Dimensions

A 24" or 30" (to centerline of integrated rail)

B 96", 120", 144", 180", or 216"

C 48" or 60"

Thickness 3/4"

Tip: Actual worksurface depths are 22" and 28" with rail, and 23" and 29" without rail.

Product Details

Two leg types are available on benches. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg(s) is included and used on benches. A leg cover is available, ordered separately, to provide a different visual and to conceal power/data infeeds at this location.

24"D desks have 13 3/4" clearance to intermediate leg. 30"D desks have 19 3/4" clearance.

Cutouts are standard on value package bench surfaces. One cutout is centered on each surface and allows user access to power and data outlets, as well as cord management.

Simple tray is standard and does not include power covers, end caps, or extension trays. These can be specified separately. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles.
► Specifying, page 100

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

Benches with media:scape

Benches with media:scape are available in 4-, 6-, or 8-packs. Benches are dual-sided in overall depths of 48"D or 60"D. Surfaces are $\frac{3}{4}$ "-thick with a wood core. Benches include a base with legs, and the appropriate number of extensions and intermediate legs.

► Specifying, page 88

Tip: 4-pack bench includes a 4x2 media:scape switcher. 6- and 8-pack benches include an 8x4 media:scape switcher.

One shroud is standard with each media:scape bench. Select shroud to accommodate a 40" or 42" monitor. Maximum weight is 55 lbs. Bottom of monitor is positioned 12" above 28½"H worksurface. Additional shroud can be placed at opposite end. Each shroud will add 4" to the overall dimension of the bench. Omit shrouds is an option, assuming wall-mounting of monitors.

► See *Smart and Connected Specification Guide* for wall-mount options.

Power and data access doors are standard. A media:scape PUCK and holder are included in each door location.

End counters are ordered separately. When using end counters, neither a shroud nor a utility pole can be used at this end.

Actual Dimensions

A	24" or 30" (to centerline of integrated rail)
B	128", 144", 180", 192", or 216"
C	48" or 60"
Thickness	$\frac{3}{4}$ "

Tip: Actual worksurface depths are 22" and 28".

Product Details

Two leg types are available on benches. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg(s) is included and used on benches. A leg cover is available, ordered separately, to provide a different visual and to conceal power/data infeeds at this location.

24\"/>

Power and data access doors are standard on each worksurface within the bench.

Upper tray is standard and provides under the surface cord management, data termination, conceals the power blocks and conduit, and houses the media:scape PUCKs.

Lower tray is standard on FrameOne benches with media:scape and always used in conjunction with an upper tray. It provides a clean visual when voice/data cables are being routed. It houses the media:scape switcher and routing of PUCKs.

Storage must be at least 6\"/>

Storage can nest under the bench. The clearance is 25 1/2\"/>

Storage can nest under end counters. There is 25\"/>

Benches with media:scape include all the FrameOne and media:scape components to create a 4-, 6-, or 8-pack bench with attached shroud(s).
Tip: 4-pack bench includes a 4x2 media:scape switcher. 6- and 8-pack benches include an 8x4 media:scape switcher.

Each bench, depending on size, will include a switcher box (which is housed in the lower tray) and the appropriate number of PUCKs (Personal User Control Key) and extension cables. PUCK placement will be at each power and data access door.

PUCK plugs into the user's laptop and allows them to send their content to the display by touching an illuminated display number. The switcher connects to the PUCKs and controls which user's laptop content is shown on the display.

When wall mounting monitors, up to four displays, either monitors or projectors can be accommodated.

► See *Smart and Connected Specification Guide* for further details.

PUCKs are available in VGA, HDMI, DisplayPort, or mini DisplayPort. Number of PUCKs depends on size of unit. 4-pack has four PUCKs. 6-pack has six PUCKs. 8-pack has eight PUCKs. All PUCKs connect back into the media:scape switcher. Two audio cables are included with each bench.

- VGA has been the standard analog output on most devices for the past decade. Many of today's enterprise laptops have both a VGA and a digital output.

- HDMI is the common digital output on consumer devices. Most consumer laptops have HDMI outputs today.

- DisplayPort is the common digital output on enterprise devices. Most enterprise laptops have DisplayPort outputs today.

- mini DisplayPort is the common digital output on Apple™ devices. All MacBooks™ have mini DisplayPort outputs today.

Virtual PUCK allows easy and efficient wireless content sharing from laptops and tablets on multiple media:scape displays.
 ► See *Smart and Connected Specification Guide* for further details.

PUCKs can be specified all the same or mixed.

To determine PUCK selection, contact the customer's IT department.

Steelcase Maintenance Agreement

Benches with media:scape include a one year Steelcase maintenance agreement to provide an enhanced support system for media:scape settings with digital components. The maintenance agreement covers:

- software/firmware enhancements
- expedited shipping for hardware replacements
- prioritized technical support

Wiring & Cabling

Power components are ordered separately. High capacity power is recommended at the location where switcher and monitors are plugged in. Data can be terminated and accessed in the upper tray.

Single-Sided Bases and Single-Sided Extensions

Single-sided bases and extensions connect together to create benching applications. Two depths are available—25½"D or 31½"D. Surfaces are ¾"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.

► Specifying, page 94

Post or loop legs are available with single-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28½"H.

Intermediate leg is included with single-sided extension units. Leg is fixed-height with the top of surface at 28½"H.

Power and data access door is optional on single-sided base and extension units.

Cutout is optional on single-sided base and extension units.

Integrated rail is located at the back of single-sided base and extension units and allows for the mounting of centered screens, monitor arms, lights, power strips, and other worktools.

½" gap between rail and surface accommodates worktools and cords.

Leg glides have 1⅜" adjustment for uneven floors.

Actual Dimensions

A 25½" or 31½" (to back edge of integrated rail)

B 48", 60", 66", 72", 78", 84", or 96"

Thickness ¾"

Tip: Actual worksurface depths are 22" and 28".

Product Details

Two leg types are available on single-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on single-sided extension units. A leg cover is available to provide a different visual and to conceal a power/data infeed at this location.

24"D desks have 5 1/4" clearance to intermediate leg. 30"D desks have 11 1/4" clearance.

Tip: 96"W single-sided bases and extensions include an intermediate leg. The 96"W single-sided base or extension is recommended to be used as a two person workstation. It should not be used as a single person work, as the intermediate leg may cause interference with the user. This is only applicable on the single-sided application.

Single-sided base units include two legs. The second leg is used at the end of the bench or when 28' has been reached.

► See *Stability Guidelines*, page 18, for more information.

Power and data access door is optional on all single-sided base and single-sided extension surfaces. One door is centered on the surface and allows user access to power and data outlets as well as cord management. When optioned on 96"W surfaces, two doors are provided.

Cutouts are optional on all single-sided base and single-sided extension surfaces. One cutout is centered on the surface and allows user access to power and data outlets, as well as cord management. When optioned on 96"W surfaces, two cutouts are provided in each surface.

Single-sided bases and extensions are standard with both an upper and lower tray to provide a clean visual.

Single-sided base

Single-sided extension

96"W single-sided base and extension units include two 48"W frames and one 96"W surface. If power and data access door is selected, 96"W surface will have two doors.

Trays are included on single-sided units. When nesting storage, note that trays occupy 6" of space.

Simple tray is optional in place of upper and lower trays. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles. Power covers are available for dual- and single-sided applications.

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

End caps can be added to simple trays and are sold in pairs. End caps are painted metal.

All single-sided extensions and single-sided 96"W bases and extensions, specified with simple tray, include the extension tray.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Storage can nest under the bench. The clearance is 25 1/2". Except when within 3" of an intermediate leg, the clearance is 25".

Connections

Floor anchor brackets (FMFA) are available to secure a single-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. They are typically only used when the single-sided base unit is not ganged to an extension.

Base leg to base leg connection kit is required when two single-sided base legs are adjacent to each other or when transitioning from a single-sided base unit to a dual-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

Base leg to base leg connection kit is required when a run of 24"D single-sided units have glass screens.

Mid storage cannot mount parallel to a single-sided base or extension.

24"D single-sided units with glass screen cannot connect to extension units.

Wiring and Cabling

Power components are ordered separately.

48"W and 96"W single-sided base and extension units accommodate standard-capacity power only.

Data can be terminated and accessed in the upper tray.

Surface Materials

Surfaces

- Laminate
- Veneer

Edge

- Plastic

Leg

- Paint

Power and data access door

- Paint
- Anodized aluminum

Infills are available in laminate and veneer and are positioned at the ends of the bench.

► Specifying, page 102

Infills are available for use with post or loop legs, and also where an end counter is positioned over the leg at the ends of a bench.

Product Details

Infills can be used on both dual- and single-sided benches.

Wiring and Cabling

When building infeed is positioned outside the footprint of the bench and at the end, an infill should not be used.

When using a utility pole or a shroud on a media:scape bench, an infill cannot be used at that end.

Surface Materials

Surfaces

- Laminate
- Veneer

Actual Dimensions

Width 24", 30", 48", or 60"

Returns

Returns attach to both dual- and single-sided benches for additional surface space. Four depths are available – 18", 24", 30", and 36". Surfaces are ¾" thick with a wood core. Widths are 36", 48", and 60".
► Specifying, page 103

Returns attach to the bench with a hat channel and two brackets allowing users clear knee swing space.

Post or loops legs are included with returns. Legs are fixed height with top of surface at 28½".

Leg glides on returns have 2⅜" of adjustment for uneven floors.

Actual Dimensions

Depth	18", 24", 30", or 36"
Width	36", 48", or 60"

Product Details

Post

Loop

Two leg types are available on returns. Post is the standard and loop is optional.

Storage can nest under the return. The clearance is 26³/₄".

Returns can be placed flush to the end of the bench or anywhere along the bench.

Returns can not attach to end counters.

Wiring and Cabling

Power strips can be mounted on the return using a SOTO rail. Power strip has 8' cord, so confirm length requirements.

Mid Storage

Mid storage accommodates standard binders and worktools. It is available in tall and slim versions. The storage allows for easy visual management and access to information. Mid storage can be mounted parallel or perpendicular to the dual-sided bench and perpendicular to the single-sided bench.

► Specifying, page 104

Stanchions, columns, and peds are kitted and ordered separately.

Inline sliders, optional, provide closure to tall mid storage. Inline sliders are standard non-locking. Locking is available as an option.

Tall storage provides a place for binders or other objects.

Integral pull is recessed and made of plastic. Pull is available in three finishes.

Parallel storage provides privacy and personal storage.

Top is standard with 1/2"H steel. Veneer is available as an option.

Slim storage provides storage of piles and other flat objects including trays. Personal and shared slim storage is available.

High ped is available as an option on mid storage supports, and can be used with both tall and slim storage. High ped depth must match depth of mid storage.

Leveling glides have 2" of adjustment for uneven floors.

Actual Dimensions

	Mid Storage	High Ped
Depth	17" or 24"	17" or 24"
Width	30", 36", 42", 48", 60", 66", 72", or 78"	18"
Height	7 ⁷ / ₈ " or 15 ³ / ₈ "	33"

Product Details

Two configurations of tall mid storage are available. Personal storage provides storage on one side only. Shared storage is divided down the center, with half storage on one side and half storage on the opposite side. Personal storage has a center divider.

Shared slim storage divider is centered, providing access to half the depth on each side.

Slim storage interior height can accommodate two stacked landscape boxes.

High ped is available 17"D or 24"D and must match depth of mid storage. 17"D high peds are open on one side. 24"D high peds have openings on both sides.

High ped shelf can be located in center of high ped with two additional locations, both up and down in 2 3/4" increments, for a total of five possible shelf locations.

A hinged door (left or right) is available as an option on 17"D high peds. Integral pull is recessed and made of plastic. All doors are locking. Pull is available in four finishes.

Locks are available factory or field installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 392

Height from floor to top of tall storage mounted perpendicular to bench is approximately 48".

Height from floor to top of slim storage mounted perpendicular to bench is approximately 40 1/2".

Column height at shortest level is 33". Column will adjust upward 2" for leveling.

Veneer tops with square edge profiles are available.

Mid storage is always centered on the dual-sided bench.

Connections

Mid storage attaches to the top of the integrated rail in infinite locations. Storage can span over a dual-sided base and extension. Stanchions are inset 8" from edge of storage unit.

Mid storage cannot attach to benches with continuous top.

Mid storage ganging bracket is recommended to increase rigidity and maintain alignment of joining adjacent units when parallel to the dual-sided bench.

Multi-color paint option on storage provides a unique design by allowing several color combinations to be chosen. Paint for case, drawer, slider, and interior can be specified separately if multi-color paint option is selected.

► See *c:scape Specification Guide*.

Application Topics

Mirrored mid storage share a pair of stanchions. Supports for mirrored application include one pair of stanchions and two columns or two high peds.

Application Rules:

- **30"W and 36"W mid storage** cannot be mounted perpendicular to a bench.
- **42"W mid storage** can be mounted perpendicular to a 48"D bench using a column.
- **48"W mid storage** can be mounted perpendicular to a 48"D bench using a column or high ped. A column must be used in a 60"D bench.

Overhead Cabinets and Organizer Shelves

For FrameOne Applications

Elective Elements storage for FrameOne

creates benching applications that support a range of storage and privacy needs. Single-high overhead cabinets and organizer shelves are available in several configurations.

► Specifying, pages 110-116

Product Details

Elective Elements storage for FrameOne is available for several applications.

Overhead cabinets for end counter below applications are used at the end of a FrameOne bench.

Overhead cabinets and organizer shelves for above applications may be used in end counter above, parallel, and perpendicular applications by selecting optional brackets.

Actual Dimensions

Single-High Overhead Cabinet with Sliding Door

Depth	15 ³ / ₄ "
Width	36", 42", 48", 60", 66", 72", or 78"
Height	15"

Single-High Overhead Cabinet with Open Storage Area

Depth	15"
Width	30", 36", 42", 48", 60", 66", 72", or 78"
Height	15"

Organizer Shelf

Depth	15"
Width	30", 36", 42", 48", 60", 66", 72", or 78"
Height	7 ¹ / ₂ "

Storage for above mount applications is available in personal and shared configurations.

Shared storage is divided down the center with half storage on one side and half storage on the opposite side.

Open shared overheads and organizers come standard with a tackboard for the back of each opening.

Shared storage is available with non-locking sliding doors on each side of the unit.

Shared storage with sliding doors will not include tackboards. The rear of each opening will be finished to match the case.

Shared storage with sliding door cannot be used in end counter above applications.

Sliding door is available on single-high overhead cabinets. It does not have a pull. Safety stops are positioned on both ends of the cabinet. The door covers half of the cabinet width. *Tip: Dry erase markers can be used on glass doors.*

One fixed divider on sliding door and open units is standard on 36"W, 42"W, 48"W, 54"W, 60"W, and 66"W overhead cabinets. The 84"W, 90"W, and 96"W overhead cabinets have three fixed dividers. The 72"W and 78"W sliding door units have one fixed divider and the open units have three fixed dividers. Exception: The 30"W overhead cabinet does not have a divider.

End counter below storage has an overlay top with 3 mm edge band on the sides that is flush with the bench worksurface.

Personal overheads and organizer shelves come standard with a tackboard on the back of the unit.

Wood veneer grain direction runs vertically on overhead cabinets. Door faces have coordinating veneer grain.

► See *Elective Elements Specification Guide*

Connections

End counter below storage attaches to the end of a dual-sided FrameOne bench with included brackets.

End counter below or above storage may be used on any dual-sided base that is 60"W or greater or any combination of base and extension units.

End counter below storage cannot attach to a leg if an infill is used.

The storage width must match the width of the FrameOne bench in end counter below applications.

If perpendicular application is desired, specify the no bracket option. The FrameOne perpendicular application kit must be specified separately.

Storage for above mount applications specified with optional end counter above brackets attaches to end of a dual-sided FrameOne bench using included brackets.

The storage unit width must match the depth of a dual-sided FrameOne bench in end counter above applications.

When used in parallel application kit, shared storage less than 60"W includes two stanchions. Shared storage 60"W and greater includes three stanchions. Personal storage in all sizes includes two stanchions.

When used in parallel applications, storage attaches to the top of the integrated rail in infinite locations. Storage can span over a dual-sided base and extension.

Storage is always centered on the dual-sided bench when used in parallel application.

Surface Materials

Overhead Cabinet

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Door option on select models

- Glass

End counter below brackets

- 6730 Slate

End counter above brackets

- Paint finishes to match the FrameOne leg

Parallel stanchions

- 4799 Platinum Metallic paint

Organizer shelf

- Wood case
- Laminate case
- Customiz stain (option on wood)

Environmental

Elective Elements products are produced in a LEED certified manufacturing facility. Many Steelcase wood products are Cradle to Cradle™ and/or Indoor Advantage™ certified. Please refer to Steelcase.com for the latest information.

Application Topics

Mirrored perpendicular storage

share a pair of stanchions. Supports for mirrored applications include one pair of stanchions and two columns.

Tip: Elective Elements storage cannot be used with c:scape high pedestal.

30"W and 36"W overhead storage cannot be mounted perpendicular to a bench.

42"W overhead storage can be mounted perpendicular to a 48"D bench using a column.

48"W overhead storage can be mounted perpendicular to a 48"D bench using a column. A column must be used in a 60"D bench.

Elective Elements storage for FrameOne

cannot be used in Elective Elements hutch mounted storage, suspended, panel-mounted, or wall-mount applications.

Parallel and perpendicular above applications cannot attach to benches with continuous top.

End counter below and end counter above storage can be used on benches with continuous tops.

FrameOne without rail does not allow for upper storage.

Centered Screens

Centered Screens

Centered screens provide a boundary element along the bench. They are available in three heights to accommodate varying levels of privacy.

► Specifying, page 118

Product Details

Centered screens with fabric infill are tackable and available in 12"H, 19"H, and 24"H. 12"H and 19"H screens have widths from 48"W to 84"W. 24"H screens have widths ranging from 48"W to 72"W. Frosted glass is also available in heights of 12"H and 19"H and widths from 48"W to 84"W.

Brackets are included with screens. Two brackets are used on 48"W screens. All other widths require three brackets.

Centered screen custom insert kit

allows for use of other infill materials. 48"W screens require the two bracket kit. Screens 60"W to 84"W require the three bracket kit. Infill should not exceed 18½" in height.

Gap is 1" between centered screen and mounting surface.

Connecting a 24"D single-sided FrameOne unit with glass screens base unit cannot connect to a FrameOne single-sided extension unit.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Surface Materials

- Frosted glass

Fusion

Contact your Designtex representative or go to www.designtex.com.

Fabric without a pattern

is recommended when using a COM fabric to provide a consistent visual. Fabric with patterns could result in the above visual.

FrameOne

Actual Dimensions

Height	11", 18½", or 23"
Overall Height	12", 19½", or 24"
Width	48", 60", 66", 72", 78", or 84"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: Custom insert kit can accommodate inserts that are ¼", ⅜", or ½" thick.

Universal Screens for Use with FrameOne with Rail

Universal screens provide a boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 120

Product Details

Universal screens are tackable and available in 13½"H and 19½"H. These screens are available in widths from 24"W-96"W.

Brackets are included with screens. Two brackets are used on all screens. Brackets also include a plastic cap that slides over the bayonet before installing the screen.

Gap is 1" between Universal screen and mounting surface.

When screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Tip: Boundary screen widths are available parametric in $\frac{1}{16}$ " increments. See Statement of Line pages for available ranges.

Tip: Boundary screen clearance from floor is available parametric from 0"H–15"H in $\frac{1}{16}$ " increments.

Tip: A $\frac{3}{8}$ " allowance is deducted from the height shown above to allow for floor variation.

Product Details

Boundary screens attach to single- or dual-sided bases and are available in three different versions; spanning, split, and single-sided.

Modular

Parametric

Spanning boundary screen is a single segment screen that attaches to the frame leg of a 48"D or 60"D dual-sided base. Spanning boundary screens can match the width of the bench or overhang past user edge by 18" on each side. For spanning, the overhang must be equal on both sides.

Modular

Parametric

Split boundary screen is a two segment screen that attaches to the frame leg of a 48"D or 60"D dual-sided base. Split screens may extend past user edge by 18" on each side. Split screens can be different widths on each side.

Split boundary screens can also be used when returns are present on one or both sides of the dual-sided base. Split screen segments are not required to be equal width on both sides of the split. Each segment must be 96"W or less.

If overhang is desired when application includes a return surface, use the parametric option.

Tip: Overhang cannot extend more than 18" from final connection point.

Modular

Parametric

Single-sided boundary screens use one screen segment matching the width of a 25½"D or 31½"D single-sided base. Overhang option is available and can be specified with a modular overhang of 18" or parametric overhang up to 18" in ¼" increments.

Modular

Parametric

Single-sided boundary screens can be used on single-sided base units with attached returns. Screen must be specified as left or right. If overhang is desired, use parametric option.

Greater than 18"

Overhang cannot extend more than 18" from the final connection point on the base.

Connections

Boundary screens come standard with attachment bracket and hardware used for mounting in predrilled locations on the screen. Leg mounting brackets require drilling of pilot holes in FrameOne leg.

Bracket attachment locations are predrilled based on the specified installed height, the clearance from the bottom of the screen to the bottom of the leg, width, and return, if selected. Bracket location assumes worksurface is at 28½" above floor.

Surface Materials

Boundary Screens

- Laminate
- Wood veneer

Edge

- Plastic

Open Line Laminate can be applied with vertical grain direction only. Open Line laminates are not allowed on screens that are 60"W or wider. Open Line Laminate is only available when specifying modular screens.

Directional and wood grain laminate can be applied horizontally on spanning and single-sided boundary screens up to 96"W and vertically up to 60"W. Directional and wood grain laminate can only be applied vertically on split boundary screens.

Wood veneer grain direction can be specified horizontal or vertical for all spanning and single-sided boundary screens. Wood veneer can only be applied vertically on split boundary screens.

Application Topics

Modular boundary screen installed heights align with FrameOne sight lines of 28½"H, 40½"H, or 48"H. Parametric boundary screen installed heights are available 28½"H–48"H in ¼" increments.

Clearance at the bottom of screen is 0"H or 15"H above the bottom of the leg for the modular option. Clearance at the bottom of the screen for parametric option is 0"H–15"H in ¼" increments.

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 149

Magnetic body accommodates magnets for visual display.

21 1/2" of the screen sits on the worksurface. The depth allows the side screen to work on any 24"D or deeper worksurface.

Finger trigger makes it simple for the end user to move the screen to allow for expansion, compression, increased privacy, or collaboration.

Overhang provides greater peripheral privacy.

Clamp can accommodate 3/4"- to 1 1/2"-thick worksurfaces.

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For work-surfaces 1" thick or less; c:scape, FrameOne, Ology, Migration, a #10 x 3/4" countersunk screw is recommended. For work-surfaces over 1", a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)
Width	1 1/4"
Height	14 1/4" (total), 11 5/8" (above worksurface)

Benches with media:scape

► Need help?
Product details,
page 42

Standard Includes

- Desk frame: slate
- Integrated rail: anodized aluminum
- High-Pressure Laminate price group 1 surfaces with plastic edges:
3 mm plastic edge on front, 1 mm on sides and back
- Post legs: paint
- Intermediate leg(s): paint
- Upper and lower trays, and end caps: slate
- Power and data access doors: paint
- One shroud: paint
- Electronics package with PUCKs and two audio cables

Required to Specify

- 1 Style number
 - 2 Laminate color number for surface
 - 3 Plastic color number for edges on laminate surface
 - 4 Paint color number for legs
 - 5 Paint color number for shroud
 - 6 Paint color number for power and data access doors
 - 7 Maintenance agreement (see below under Required Selections)
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 378.

Tip: 4-pack bench includes a 4x2 media:scape switcher. 6- and 8-pack benches include an 8x4 media:scape switcher.

	Required Selections	U.S. Price	Required to Specify

Single-Sided Bases

48"W to 84"W

96"W

Tip: Two cable hangers are included with 48"W to 66"W units, three cable hangers are included with 72"W units, and four cable hangers are included with 78"W to 96"W units.

Tip: 96"W single-sided bases and extensions include an intermediate leg. The 96"W single-sided base or extension is recommended to be used as a two person workstation. It should not be used as a single person work, as the intermediate leg may cause interference with the user. This is only applicable on the single-sided application.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

► Need help?
Product details,
page 46

Standard Includes

- Desk frame: slate
- Integrated rail: anodized aluminum
- High-Pressure Laminate price group 1 surface with plastic edges:
3 mm plastic edge on front, 1 mm on sides and back
- Two post legs: paint
- Two post legs and intermediate leg on 96"W units: paint
- Upper and lower trays, and end caps: slate
- Cable hangers: slate

Required to Specify

- 1 Style number
 - 2 Laminate color number for surface
 - 3 Plastic color number for edges on laminate surface
 - 4 Paint color number for legs
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 378.

Mid Storage—Tall and Slim

► Need help?
Product details,
page 52

Standard Includes

- Tall or slim storage case: paint price group 1
- 1/2" top: paint to match case
- Integral pull on inline slider, if selected
- Lock, keyed random, if selected: finish to default based on pull finish

Required to Specify

- 1 Style number
- 2 Paint color number for storage case
- 3 Color number for pulls, if inline slider selected:
 - 4140 Arctic White Gloss
 - 4144 Black Gloss
 - 4799 Platinum
- 4 Mounting brackets, if wall-mounted storage selected
- 5 Options, if selected (see below)
 - See *Surface Materials*, page 378.

Tip: Specify multi-color paint finish option to get the interior or inline slider a different paint finish than the case.

Centered Screen Custom Insert Kits and Aligners

Centered Screen Custom
Insert Kits and Aligners

FrameOne

Centered Screen Custom Insert Kits

Tip: FMSK2 is for use with screens up to 48"W.

Tip: FMSK3 is for use with screens wider than 48"W.

Tip: These kits are available to accommodate additional materials for centered screens. Infills can be 18½"H or less. For actual dimensions of centered screens, see page 59.

Tip: Custom insert kit can accommodate inserts that are ¼", ⅜", or ½" thick.

Tip: To order a fusion screen, contact your Designtex representative.

Spanning Boundary Screens

For Use with Dual-Sided Bases

► Need help?
Product details,
page 64

Standard Includes

- Screen: High-Pressure Laminate price group 1 or wood group 1 veneer
- Edge on laminate screen, if selected: plastic
- Height: 13½"H–48"H
- Height installed: 28½"H–48"H
- Width: 48"W–96"W
- Brackets: paint group 1

Required to Specify

- 1 Style number
 - 2 Screen size type (see below under Required Selections)
 - 3 Height installed (see below under Required Selections)
 - 4 Screen clearance (see below under Required Selections)
 - 5 High-Pressure Laminate or wood veneer color number for screen
 - 6 Plastic color number for edge on laminate screen, if selected
 - 7 Bench depth
 - 8 Grain direction
 - 9 Paint color number for brackets
 - 10 Options, if selected (see below)
- See *Surface Materials*, page 378.

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tip: Open Line laminate is only available when specifying modular screens, and can be applied with vertical grain direction only.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Split Boundary Screens

For Use with Dual-Sided Bases

► Need help?
Product details,
page 64

Standard Includes

- Screen: High-Pressure Laminate price group 1 or wood group 1 veneer
- Edge on laminate screen, if selected: plastic
- Height: 13½"H–48"H
- Height installed: 28½"H–48"H
- Width: 48"W–96"W
- Brackets: paint group 1

Required to Specify

- 1 Style number
 - 2 Screen size type (see below under Required Selections)
 - 3 Height installed (see below under Required Selections)
 - 4 Screen clearance (see below under Required Selections)
 - 5 High-Pressure Laminate or wood veneer color number for screen
 - 6 Plastic color number for edge on laminate screen, if selected
 - 7 Bench depth
 - 8 Grain direction
 - 9 Paint color number for brackets
 - 10 Options, if selected (see below)
- See *Surface Materials*, page 378

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tip: Open Line laminate is only available when specifying modular screens.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Single-Sided Boundary Screens

For Use with Single-Sided Bases

► Need help?
Product details,
page 64

Standard Includes

- Screen: High-Pressure Laminate price group 1 or wood group 1 veneer
- Edge on laminate screen, if selected: plastic
- Height: 13½"H–48"H
- Height installed: 28½"H–48"H
- Width: 24"W–96"W
- Brackets: paint group 1

Required to Specify

- 1 Style number
 - 2 Screen size type (see below under Required Selections)
 - 3 Height installed (see below under Required Selections)
 - 4 Screen clearance (see below under Required Selections)
 - 5 High-Pressure Laminate or wood veneer color number for screen
 - 6 Plastic color number for edge on laminate screen, if selected
 - 7 Bench depth
 - 8 Grain direction
 - 9 Paint color number for brackets
 - 10 Options, if selected (see below)
- See *Surface Materials*, page 378

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tip: Open Line laminate is only available when specifying modular screens, and can be applied with vertical grain direction only.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tips: Open Line laminate is only available when specifying modular screens, and can be applied with vertical grain direction only.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Height-Adjustable Benching

Workstation Design Guidelines and Requirements	152
Basics of Ergonomic Seating	153
Basics of Standing and Monitor Arm Positioning	154
Height-Adjustable Benching Comparison Chart	156
Ology Height-Adjustable Benching	159
Series 5 and 8 Height-Adjustable Benching	255

Workstation Design Guidelines and Requirements

Overview

Designed for movement with dynamic seating, adjustable worktools and height-adjustable benches are important for today's office workers. To determine the best height-adjustable solution, consider these four criteria:

1. **Adjustability Needed**
What is the height range requirement? (seated or sit-to-stand)
2. **Worksurface Size Needed**
What does the physical space look like?
3. **Equipment/Tools Used**
What type of computer equipment and other worktools are being used on the worksurface? (weight capacity)
4. **Use**
What is the height-adjustable desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

⚠ WARNING

Risk of Serious Injury. If not used as intended, moving worksurfaces can pinch or injure people, or damage property. Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

Tips

Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of height-adjustable desks.

Weight

The maximum allowable load (varies by height-adjustable bench) should be evenly distributed and must not be exceeded.

Width

Specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a height-adjustable desk and a fixed object.

Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the height-adjustable desk is not impeded because of cables.

Power

Plan easy and unobstructed access to power for users at worksurface height through the use of the power access door or power strip.

⚠ WARNING

Risk of serious injury.

Bases-only warranty limitations and potential for injury: The use of worksurfaces that do not comply with the Steelcase defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all Steelcase Warranties, expressed or implied.

The use of worksurfaces that do not comply with Steelcase criteria voids any Steelcase claims of compliance with ANSI/BIFMA, UL, LEED, or other applicable requirements. The use of non-Steelcase worksurfaces on Steelcase adjustable-height bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. Steelcase is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-Steelcase worksurface, and assumes no liability for their compliance with standards when height adjustable bases are used without a Steelcase worksurface as intended.

Worksurface Criteria and Limitations

The use of non-Steelcase worksurfaces is not recommended. Any use of a non-Steelcase worksurface requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected worksurface construction and attachment means. The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen worksurface.

Tips

Height-adjustable bases include fasteners intended for use with Steelcase worksurfaces. These fasteners may be suitable for worksurfaces meeting the following criteria:

- Medium-density or higher particleboard or fiberboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater (Ology and Migration)
- Thickness of 1³/₁₆" or greater (Series 5 and 8 bases)
- Fasteners located a minimum distance of 1" from any edge

A well-designed, ergonomically advanced chair that allows a full range of healthy postures throughout the day and can contribute to worker wellness and productivity.

Neck is straight or slightly forward.

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces.

Lower back fits into curved lumbar support.

Tension is adjusted so backrest reclines easily, yet provides smooth, even support, and encourages postural change.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes. Screen is at eye level slightly lower and directly in front of worker so head is not turned.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

Thighs are parallel to the floor.

Feet are flat on the floor or on a footrest.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a footrest.

Basics of Standing and Monitor Arm Positioning

Height-adjustable benches, when combined with monitor arms, allow a full range of healthy postures throughout the day and can contribute to worker wellbeing and productivity.

Avoid locking knees to help maintain good posture.

Feet should be flat on the floor or use foot rest or foot pad.

Top of monitor should be 0° to 20° below horizontal line of sight.

Height

Top of the monitor should be positioned at or slightly below eye level.

Distance

Monitor should be 20" to 30" from the eyes or approximately an arm's length away.

Alignment

Proper alignment is the key to preventing strain. Computer monitor, keyboard, and mouse should be centered to allow user to see the display without looking downward or to either side. Mouse should be accessible without twisting or reaching. Reference documents should never be flat on desk and should be at the same height as or aligned with the monitor or above keyboard and below the monitor.

Dual Monitor Alignment

If using two monitors, position the monitor used more often closer. If equally used, center monitors directly in front and angle them in a slight inward "V" shape.

Height-Adjustable Benching Comparison Chart

The chart will help you determine which product line best meets your needs.

Ology

Extended Height

Basic Height

Performance sit-to-stand height-adjustability

Intuitive controllers (Simple Touch and Active Touch) deliver electric adjustability at 1½" per second. Base supports a maximum distributed weight capacity of 314 pounds per side. When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options.

► See *Worksurface Weights*, page 183.

Bench Comparison Chart

	Ology Performance Sit-to-Stand
Range of Adjustment	Extended height: 22 ³ / ₅ " – 48 ⁷ / ₁₀ " Basic height: 27 ³ / ₁₀ " – 46 ² / ₅ " Fixed height: 28½"
Type of Adjustment	Electric
Distributed Weight Capacity	314 lb
Wire Management Included	Yes
Controller	Simple Touch, Active Touch

Frequency and Phase	60 Hz, Single Phase
Adjustability Speed	1½"/sec.

The chart will help you determine which product line best meets your needs.

Series 5

Sit-to-stand height-adjustability

A simple push button delivers electric adjustability at 17¹⁰/₁₀" per second. Base supports a maximum distributed weight capacity of 195 pounds per side. When calculating lifting capacity, subtract the weight of the worksurface and options.
▶ See *Worksurface Weights*, page 267.

Series 8

Enhanced sit-to-stand height-adjustability

A push button delivers electric adjustability at 17¹⁰/₁₀" per second. Includes two controller options:

- Presets
- Digital Presets

Base supports a maximum distributed weight capacity of 295 pounds per side. When calculating lifting capacity, subtract the weight of the worksurface and options.
▶ See *Worksurface Weights*, page 277.

Ology Height-Adjustable Dual-Sided Benches and Bases

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers. The integrated rail offers today's workers a range of ergonomic tools. Ology provides Bactiblock antimicrobial protection on frequently touched areas of the bench.

► Specifying, pages 197-200 and 220-222.

Simple touch controller

allows for intuitive adjustments by lifting or pressing down on the controller. Available in an antimicrobial option to support a more health conscious environment.

Bench has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Cable manager is standard on all dual-sided benches and is used to route cords or cables from the cable tray to the worksurface.

Height-adjustable bases come in fixed height, basic height, and extended height. The fixed height bases are 28½"H, basic height base adjusts from 27¾"H to 46¾"H, and the extended height base adjusts from 22¾"H to 48¾"H in any increment.

Leveling glides adjust 2" to install bench on uneven floors.

Integrated rail, available as an option, supports space division, lighting, worktools, and monitor arms to give users choice and control for their physical wellbeing.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W and is centered on bench.

Edge is available in 3 mm edge profile.

Base supports a maximum distributed weight capacity of 314 pounds (2-leg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 183 for worksurface weights.

Access door and tray with power, available as option, provides user access to 120V and USB power and data as well as cord management. Available as an option.

Active touch controller includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

Connection kit is required to connect dual-sided units to each other. Kit includes data tray extensions.

Product Details

High-Pressure Laminate Benches

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 378.

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1¼" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

When radius corners are specified in applications with integrated rail, the front corners of the bench will be radius and the back corners will be square.

Wood Veneer Benches

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for bench. Corner style for wood veneer benches are square corners.

Basic Height

Extended Height

Fixed Height

Ology benches have two height-adjustable bases that come in basic height and extended height. The basic height base adjusts from 27³/₁₀"H to 46²/₅"H and the extended height base adjusts from 22³/₅"H to 48⁷/₁₀"H. These two bases can adjust in any increment. Fixed height bases are also available. Worksurface height is 28¹/₂"H.

Ology combo benches and bases are also available, where height position on one side of the bench will be different than the other side. A height position must be selected for each side, allowing positions to be mixed and matched in any adjustment variation. Example, in combo benches and bases one leg will have basic height and the other leg will have extended height.

Simple touch controller

is available as an option and easily adjusts height of bench, at a rate of 1½" per second, by lifting or pressing down on the controller.

Tip: Available with an antimicrobial option.

Active touch controller

includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

Tip: When specifying the active touch controller on a dual-sided bench, a centered screen is required. The screen prevents an inadvertent safety concern when user A adjusts the desk and user B does not have both feet flat on the floor.

An obstruction sensor is standard with all Ology benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Integrated rail, available as an option, allows for the mounting of personal screens, monitor arms, lights, power strips, and other worktools.

The overall dimension of the worksurface, with-out the integrated rail is 23"D, 28"D, and 34"D.

Integrated rail is optional on dual sided bench units and must be optioned on initial order. It cannot be added after install. Worksurface depth is shortened by 1¾" to accommodate the integrated rail so the overall footprint remains 23"D, 28"D, or 34"D.

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface.

Soft edge, available as an option, is polyurethane and is offered with Bactiblock antimicrobial protection. Soft edge is available on benches that are 58" or wider.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at $1\frac{1}{2}$ " per second. Motor is 110V and includes a $10\frac{1}{2}$ ' power cord. Motor has 0.1W standby power.

Chicago requires that benches shipping into Illinois ship with a 9' power cord.

Ology benches are listed by ETL.

Tip: Ology base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
► See page 152

Simple/active touch controller must be located next to the control box. The control box can be placed on either the right or left side of the bench and is field-installed.

Power and data access door and tray with USB is available as an option. The door is $16\frac{1}{2}$ "W and centered on the surface, providing user access to power, data, and USB, as well as cord management.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs and are available as an option. They can help manage cable/cords going from the top of bench to the underside. Grommet inside dimensions are $3\frac{1}{4}$ "W X $3\frac{3}{4}$ "D.
Tip: When a grommet is specified, power and data access door cannot be applied.

Cable manager supports cable management vertically between the cable tray and the underside of the bench. It is available in 6527 Merle. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified.
► Specifying, page 238

Cable manager parallel option is available to mount the cable manager parallel to the cable tray.

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.
► Specifying page 238.

Cable baskets inside dimensions are 6"D x $17\frac{3}{4}$ "W x $4\frac{1}{4}$ "H and the overall width is 18"W with a height of $4\frac{3}{4}$ "H.

Inside dimensions of cable brackets are 6"D x $2\frac{1}{4}$ "W x $\frac{1}{16}$ "H.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Dual-to-dual application

Dual-to-single application

Single-to-single application

Connection kits are available in dual-to-dual, dual-to-single and single-to-single applications.

Cable tray covers have an opening to allow cords and cables to enter the cable tray.

Cable tray is standard and provides cord management and data termination.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables. The data kit, **OLBVDK**, which terminates data must be ordered separately.

► See page 339

End-of-run tray covers, for dual-sided benches, can be added to cover the ends of the cable tray and data tray. The tray covers are painted metal and are sold in pairs.

Infills, available for dual-sided benches are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Intermediate

End of Run

Shared Intermediate

Universal screens are attached and centered on the cable tray. Screens are always full width. Aligner clips are available as a separate style number.

► See page 284

Tip: For Ology benches and bases surface materials and applications topics.

► see page 178

Ology Height-Adjustable Single-Sided Benches and Bases

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers. Single-sided applications can be used to work around building columns or to create runs along an aisle way.

► Specifying, pages 204 and 224.

Bench has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

End-of-run trim kit, specified as a separate style number, is used to finish the end of run.

Stabilizer post, specified as a separate style number, is required to support units that have monitor arms or custom insert brackets.

► See *Application Topics for Ology Bench Stabilizer Post*, page 179

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Base supports a maximum distributed weight capacity of 314 pounds (2-leg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for *worksurface weights*.

Height-adjustable bases come in fixed height, basic height, and extended height. The fixed height bases are 28½"H, basic height base adjusts from 27¾"H to 46½"H, and the extended height base adjusts from 22¾"H to 48¾"H in any increment.

Access door and tray with power, available as option, provides user access to 120V and USB power and data as well as cord management. Available as an option.

Integrated rail, available as an option, supports space division, lighting, worktools, and monitor arms to give users choice and control for their physical wellbeing.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W and is centered on bench.

Active touch controller includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

Simple touch controller allows for intuitive adjustments by lifting or pressing down on the controller. Available in an antimicrobial option to support a more health conscious environment.

Edge is available in 3 mm edge profile.

Cable manager is standard on all dual-sided benches and is used to route cords or cables from the cable tray to the worksurface.

Leveling glides adjust ½" to install bench on uneven floors. 1" glides are available as an option.

Connection kit is required to connect single-sided units to each other. Kit includes data tray extensions.

Product Details

High-Pressure Laminate Benches

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 378.

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1 1/4" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

When radius corners are specified in applications with integrated rail, the front corners of the bench will be radius and the back corners will be square.

Wood Veneer Benches

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for bench. Corner style for wood veneer benches are square corners.

Extended Height

Basic Height

Fixed Height

Ology benches have two height-adjustable bases that come in basic height and extended height. The basic height base adjusts from 27 3/10"H to 46 2/5"H and the extended height base adjusts from 22 3/5"H to 48 7/10"H. These two bases can adjust in any increment. Fixed height bases are also available. Worksurface height is 28 1/2"H.

Simple touch controller is available as an option and easily adjusts height of bench, at a rate of 1 1/2" per second, by lifting or pressing down on the controller. *Tip: Available with an antimicrobial option.*

Active touch controller includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

An obstruction sensor is standard with all Ology benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Integrated rail, available as an option, allows for the mounting of personal screens, monitor arms, lights, power strips, and other worktools.

23"

28"

34"

The overall dimension of the worksurface, without the integrated rail is 23"D, 28"D, and 34"D.

20 1/4"

26 1/4"

32 1/4"

34"

Integrated rail is optional on dual sided and single-sided bench units and must be optioned on initial order. It cannot be added after install. Worksurface depth is shortened by 1 3/4" to accommodate the integrated rail so the overall footprint remains 23"D, 28"D, or 34"D.

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface.

Soft edge, available as an option, is polyurthane and is offered with Bactiblock antimicrobial protection. Soft edge is available on benches that are 58" or wider.

Stabilizer post is required when mounting monitor arms on a single sided bench. When benches are connected in a run, one stabilizer post is required at the each end.
► See *Application Topics for Ology Bench Stabilizer Post*, page 179

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10½' power cord. Motor has 0.1W standby power.

Chicago requires that benches shipping into Illinois ship with a 9' power cord.

Ology benches are listed by ETL.
Tip: Ology base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
► See page 152

Simple/active touch controller must be located next to the control box. The control box can be placed on either the right or left side of the bench and is field-installed.

Power and data access door and tray with USB is available as an option. The door is 16½"W and centered on the surface, providing user access to power, data, and USB, as well as cord management.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs and are available as an option. They can help manage cable/cords going from the top of bench to the underside. Grommet inside dimensions are 3¼"W X 3¼"D.
Tip: When a grommet is specified, power and data access door cannot be applied.

Cable manager supports cable management vertically between the cable tray and the underside of the bench. It is available in 6527 Merle. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified.
► Specifying, page 238

Cable manager parallel option is available to mount the cable manager parallel to the cable tray.

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.
► Specifying page 238.

Cable baskets inside dimensions are 6"D x 17¾"W x 4¼"H and the overall width is 18"W with a height of 4¼"H.

Inside dimensions of cable brackets are 6"D x 2¼"W x ¼"H.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Dual-to-dual application

Dual-to-single application

Single-to-single application

Connection kits are available in dual-to-dual, dual-to-single and single-to-single applications.

Cable tray covers have an opening to allow cords and cables to enter the cable tray.

Cable tray is standard and provides cord management and data termination.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables. The data kit, OLBVDK, which terminates data must be ordered separately.

► See page 339

End-of-run tray covers, for single-sided benches, can be added to cover the ends of the cable tray and data tray. The tray covers are painted metal and are sold in pairs.

End-of-run trim kit, ordered separately, is used to cover the cross tubes. Trim kit includes a left-hand and right-hand trim piece. Trim kit is painted metal.

Universal screens are attached to the cable tray. Screens are always full width. Aligner clips are available as a separate style number.

► See page 284

Ology Height-Adjustable 120° Corner Benches and Bases

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers.

► Specifying, pages 208–216 and 226–230.

Integrated rail, available as an option, supports space division, lighting, worktools, and monitor arms to give users choice and control for their physical wellbeing.

Bench has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Cable manager is standard on all dual-sided benches and is used to route cords or cables from the cable tray to the worksurface.

Height-adjustable bases

come in fixed height, basic height, and extended height. The fixed height bases are 28½"H, basic height base adjusts from 27¾"H to 46¾"H, and the extended height base adjusts from 22¾"H to 48¾"H in any increment.

Base supports a maximum distributed weight capacity of 471 pounds (3-leg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 179 for worksurface weights.

Access door and tray with power, available as option, provides user access to 120V and USB power and data as well as cord management. Available as an option.

Edge is available in 3 mm edge profile.

Active touch controller includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

Simple touch controller allows for intuitive adjustments by lifting or pressing down on the controller. Available in an antimicrobial option to support a more health conscious environment.

Connection kit is required to connect 120° units to each other. Kit includes data tray extensions.

Leveling glides adjust 2" to install bench on uneven floors.

Product Details

High-Pressure Laminate Benches

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 387.

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1½" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

When radius corners are specified in applications with integrated rail, the front corners of the bench will be radius and the back corners will be square.

Wood Veneer Benches

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for bench. Corner style for wood veneer benches are square corners.

Extended Height

Basic Height

Fixed Height

Ology benches have two height-adjustable bases that come in basic height and extended height. The basic height base adjusts from 27¾"H to 46½"H and the extended height base adjusts from 22¾"H to 48¾"H. These two bases can adjust in any increment. Fixed height bases are also available. Worksurface height is 28½"H.

Simple touch controller is available as an option and easily adjusts height of bench, at a rate of 1½" per second, by lifting or pressing down on the controller.
Tip: Available with an antimicrobial option.

Active touch controller includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.
Tip: When specifying the active touch controller on a dual-sided bench, a centered screen is required. The screen prevents an inadvertent safety concern when user A adjusts the desk and user B does not have both feet flat on the floor.

An obstruction sensor is standard with all Ology benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Integrated rail, available as an option, allows for the mounting of personal screens, monitor arms, lights, power strips, and other worktools.

The overall dimension of the 120° worksurface is 23"D and 28"D.

Integrated rail is optional on 120° corner benches and must be optioned on initial order. It cannot be added after install. Worksurface depth is shortened by 1¾" to accommodate the integrated rail so the overall footprint remains 23"D or 28"D.

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10½' power cord. Motor has 0.1W standby power.

Chicago requires that benches shipping into Illinois ship with a 9' power cord.

Ology benches are listed by ETL.
Tip: Ology base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
► See page 152

Simple/active touch controller must be located next to the control box. The control box can be placed on either the right or left side of the bench and is field-installed.

Power and data access door and tray with USB is available as an option. The door is 16½"W and centered on the surface, providing user access to power, data, and USB, as well as cord management. 120° corner benches can support the access door on either side of the worksurface, or on both sides and will have a cord drop on opposite side when an integrated rail is specified.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs. 120° corner offer pairs of grommets on the left side, right side, or both sides. They can help manage cable/cords going from the top of bench to the underside. Grommet inside dimensions are 3¼"W x 3¾"D. *Tip: When grommet is optioned, power and data access door cannot be applied on the same side of the worksurface.*

Cable manager supports cable management vertically between the cable tray and the underside of the bench. It is available in 6527 Merle. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified. ▶ Specifying, page 238

Cable manager parallel option is available to mount the cable manager parallel to the cable tray.

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface. ▶ Specifying page 238.

Cable baskets are available on 120° benches 40⅞"W or larger.

Cable baskets inside dimensions are 6"D x 17¾"W x 4¼"H and the overall width is 18"W with a height of 4¾"H.

Inside dimensions of cable brackets are 6"D x 2¼"W x ⅞"H.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Connection kits are available in dual-to-dual, dual-to-single and single-to-single applications.

Cable tray covers have an opening to allow cords and cables to enter the cable tray.

Cable tray is standard and provides cord management and data termination.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables. The data kit, OLBVDK, which terminates data must be ordered separately. ▶ See page 339

End-of-run tray covers, for 120° benches, can be added to cover the ends of the cable tray and data tray. The tray covers are painted metal and are sold individually.

Infills, available for 120° corner triple-sided and dual-sided benches are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Intermediate

End
of Run

Shared
Intermediate

120° corner triple-sided center infill is painted. Center infill can be specified to conceal power/data infeed.

Universal screens are attached and centered on the cable tray. Screens are always full width. Aligner clips are available as a separate style number.
▶ See page 238

Ology Height-Adjustable Benches and Bases Surface Material and Application Topics

Tip: The following information applies to all Ology benches and bases.

Surface Materials

High-Pressure Laminate Bench

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

3 mm edge profile

- Plastic

Wood Veneer Bench

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square 3 mm edge profile

- Wood veneer to match bench

Height-adjustable base

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle

Soft edge and grommet

- 6527 Merle

Power and Data Access Door and Tray Door

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle
- Anodized aluminum

Door bezel

- 6527 Merle

Application Topics

Moving benches can collide with other components. Do not install overhead storage, bench-height power, or bench accessories in the path of height-adjustable benches.

Fixed privacy screens mount on the integrated rail above for privacy only. Screens cannot be mounted in the modesty position.

On the extended height base, any storage higher than 19" will impede height range of bench worksurface. On the basic height base, any storage higher than 23⁷/₁₀" will impede height range of bench worksurface. *Tip: Do not place storage underneath controller.*

When the centered power access door is optioned on extended height bases, any storage taller than 16¹/₂" will impede the height range of the bench worksurface. On basic height bases, any storage higher than 21¹/₅" will impede the height range of the bench worksurface. *Tip: Do not place storage underneath controller.*

When optioning the integrated rail, without the power access door, flat panel monitor arms may be attached with a c:scape bracket or c-clamped. **If rail mounting an Eyesite monitor arm**, the "rail mount bracket" option should be included when ordering Ology bracket (FPCOL).

▶ See *Steelcase Worktools Specification Guide*

When optioning both the integrated rail and power access door, flat panel monitor arms cannot be c-clamped 5¹/₂" on either side of the power door.

When optioning the integrated rail and using a cable basket, there will not be enough room to C-clamp behind the basket.

When optioning both the integrated rail and power access door, Eyesite and CF Series flat panel monitor arms with c:scape brackets may attach behind the power door. If rail mounting the Eyesite monitor arm, the "rail mount bracket" option should be included when ordering Ology bracket (FPCOL).

▶ See *Steelcase Worktools Specification Guide*
Tip: FYI monitor arms with c:scape brackets may not be attached behind the power door, and have to mount to either side.

When attaching SOTO worktools, lighting, c:scape screens, or flat panel monitor arms to the integrated rail, there is a 5¹/₄" mounting free zone on each end of the rail.

When using or installing a dash or SOTO LED light on Ology bench, the light cannot be plugged into the base or integrated power tray without the 90° mini extension cord.
▶ See page 239

When installing SlatRail with a power door only, do not C-clamp the stanchions 5¹/₂" on either side of the power door. **All assemblies** meet or exceed ANSI/BIFMA standards.

WARNING

Read base only warranty limitations.

▶ See page 152 for *Workstation Design Guidelines and Requirements*.

Keyboard assemblies are not recommended for use on height-adjustable benches.

Installation

Benches ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Application Topics for Ology Bench Stabilizer Post

Application Topics for Ology
Bench Stabilizer Post

23"D stand alone single-sided unit require stabilizer posts on both sides of the bench.

Stand alone single-sided rectangle units with monitor arms and/or custom insert kits with glass insert require stabilizer posts on both sides of the bench.

Run of two or more single-sided rectangle units with monitor arms require stabilizer post at the ends of the run. Up to two monitors with focal adjustment can be mounted per bench. Up to three monitors without focal adjustment can be mounted per bench.
Tip: 23"D benches can support one monitor with focal adjustment and up to two monitors without focal adjustment.

Run of two or more single-sided rectangle units with custom insert kit with glass insert require stabilizer post at the ends of the run.

When a single-sided bench with monitor arms and/or custom insert kits with glass insert is connected to a dual-sided bench or 120° bench, stabilizer posts are not required.

Stabilizer post is not required on 28"D or 35"D stand alone single-sided units.

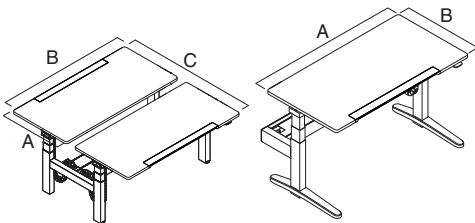

Stabilizer post is not required on a run of two or more 23"D single-sided units.

Worksurface Weights

Base supports a maximum distributed weight capacity of 314 pounds (2-leg) and 471 pounds (3-leg) per worksurface.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options (i.e. integrated rail, power and data access door or soft edge).

Tip: A label applied to the underside of the worksurface will include the load-capacity for each bench.

Infills for Ology Benches and Bases

Infills are painted steel and can be positioned at the end of a run or in-line using an intermediate infill, or intermediate shared infill. Infills provide privacy and can be used to conceal power/data infeeds.

End-of-run infills provide aisle way privacy and can conceal power/data infeeds.

Intermediate infills are used to close the space between two legs at a connection and can conceal a power/data infeed. To conceal the space between each set of legs at a connection, two pairs of intermediate infills would be required.

Intermediate shared infills can be used to close the space between all four legs at a connection in order to conceal large amounts of power and data entering the bench.

Wiring and Cabling

When building infeed is positioned outside the footprint of the bench and at the end, an infill should not be used.

Surface Materials

Universal Centered Screens

For Use with Ology Benches

Universal centered screen provide a boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

Universal screen is pin tackable.

Actual Dimensions

Width	42", 48", 54", 60", 66", 72", and 78"
Height	26" and 32"
Thickness	3/4"

Tip: Universal screens can also be specified parametrically in width and height in 1/16" increments.

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The width of the screen must match the width of the bench.

Universal screens are tackable and available in 26"H and 32"H. Screens range in size from 42"W-78"W.

Universal screens are mounted on the cable tray. The 26"H screen has an overall height of 42"H from the floor. The 32"H screen has an overall height of 48"H from the floor.

Universal screens will be mounted flush with no gap.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Surface Materials

Sarto Centered Screens

For Use with Ology Benches

Sarto Centered Screens

Sarto centered screens

provide a light scale boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 244

Sarto screen is pin tackable.

Actual Dimensions

Width	42", 48", 54", 60", 66", 72", and 78"
Height	26" and 32"
Thickness	9/16"

Product Details

The width of the screen must match the width of the bench.

Sarto screens are tackable and available in 26"H and 32"H. Screens range in size from 42"W-78"W.

Sarto screens are mounted on the cable tray. The 26"H screen has an overall height of 42"H from the floor. The 32"H screen has an overall height of 48"H from the floor.

Brackets and hard stops are included with screens. Two brackets are used on screens 54"W and smaller. Three brackets are used on screens 60"W and larger.

Sarto screens will be mounted flush with no gap.

Custom Insert Kit for Use with Ology Benches

Custom insert kits support customer supplied inserts to provide a boundary element along the bench.

Product Details

Custom insert bracket can support panel thickness ranging from 1/4" - 1/2" thick.

Maximum insert height is 31.83"H. Insert must be 31.83"H to hit a 48"H datum and 25.65"H to hit a 42"H datum.

60" wide
planning module
58" wide
bench

Insert width must be between 1/4" and 4" narrower than the bench plan width. Example: insert width must be between 56"W and 59 3/4"W for a 60"W planning module.

Insert material flammability: Check with local building/fire code authorities.

Glass, if used, must be 3/8" thick tempered glass with chamfered, beveled, or radius edges and meet ANI Z97.1 Class A requirements.

Insert must be free of contact hazards (i.e. sharp edges).

Maximum panel weight formula:

maximum weight (pounds) allowed per bench = 1.24 x plan width (inches)
i.e. if the plan width is 78", the max weight = 1.24 x 78 = 96.7 pounds.

Maximum surface area formula:

maximum surface area (square inches) = 31.83 x plan width (inches)
i.e. If the plan width is 78", the max surface area is = 2482.7 square inches.

Tip: Failure to comply with these restrictions will void the Steelcase warranty on this bracket assembly and could also introduce safety and code compliance issues.

Application Topics

Stabilizer posts are required when custom insert kits are used on single-sided Ology benches.

► See *Application Topics for Ology Bench Stabilizer Post*, page 178.

Surface Materials

Brackets (plastic)

- 6000 Black
- 6009 Arctic White
- 6527 Merle
- 6899 Platinum Metallic

The **parametric connection kit** can be used in place of the connection kit or a single-sided bench to work around building columns or other structures. Parametric widths are available in 1/16" increments from 2 1/16"-36"W.

Parametric connection kit is available from 2 1/16"-36"W.

Product Details

Parametric connection kits are used in place of connection kits to connect two benches together.

The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Parametric connection kits are available in dual-to-dual, dual-to-single, and single-to-single application. *Tip: 1" pinch point clearance per worksurface is built into dimension of the parametric connection kit.*

Fixed Personal Screens

Personal screens

are tackable and provide variable privacy when and where it is needed. The screens can be used on integrated rail.

► Specifying, page 244

Fixed personal screens

are available in three heights, 12", 19½", and 24", and four widths to accommodate varying levels of privacy. Height is measured from the top of the mounting surface to the top of the screen.

Brackets are attached to the screens.

Product Details

12"H screen

19½"H screen

24"H screen

Personal screens can be mounted on the integrated rail. The overall height from the floor will vary depending on the height of the adjustable worksurface.

Gap is 1" between personal screen and integrated rail.

Surface Materials

Infill

- Fabric

Brackets

- 4799 Platinum paint

front

back

Fabric without pattern is recommended when using a COM fabric to provide a consistent visual. Fabric with patterns could result in the above visual.

Application Topics

When mounting the dash LED light to integrated rail, it must be mounted adjacent to the personal screen. dash cannot be mounted in front of screen.

Fixed personal screens cannot be used in the modesty position on benches, when table is lowered due to lack of clearance.

Actual Dimensions

Width	30", 36", 42", or 48"
Height	11", 18½", or 23"
Overall height	12", 19½", or 24"
Thickness	¾"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Ology Bench Boundary Screens

Boundary screens provide light scale space division and privacy for a variety of work settings.

Boundary screens attach to the end of a single- or dual-sided bench to provide aisle way boundary/privacy.
 ▶ Specifying, pages 246–248

Boundary screens are $1\frac{3}{16}$ " thick. Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of $1\frac{1}{2}$ ". The glides are located $11\frac{1}{2}$ " from the outside of each edge.

Product Details

Boundary screens attach to single- or dual-sided benches and are available in three heights: $28\frac{1}{2}$ ", 42", and 48"H.

Modular

Parametric

Dual-sided boundary screen width matches the bench depth. Overhang option is available and can be specified with a modular overhang of 12" or 18" or parametric overhang up to 18" in $\frac{1}{16}$ " increments.
Tip: A maximum of 12" overhang per side is available on 72"W screens.

Actual Dimensions

Height	$28\frac{1}{2}$ ", 42", or 48"
Spanning Screen Width for Dual-Sided Bench without 18" Overhang	$50\frac{31}{32}$ ", $60\frac{31}{32}$ ", $72\frac{31}{32}$ "
Spanning Screen Width for Dual-Sided Bench with 18" Overhang	$86\frac{31}{32}$ " or $96\frac{31}{32}$ "
Single-Sided Screen Width for Single-Sided Bench without 18" Overhang	$27\frac{5}{32}$ " or $32\frac{5}{32}$ "
Single-Sided Screen Width for Single-Sided Bench with 18" Overhang	$45\frac{5}{32}$ " or $50\frac{5}{32}$ "
Thickness	$1\frac{3}{16}$ "

Tip: Boundary screen overhang widths are available parametric in $\frac{1}{16}$ " increments. See Statement of Line pages for available ranges.

Modular

Parametric

Single-sided boundary screens use one screen segment that spans from the back of the cable tray to the front of the worksurface. Overhang option is available and can be specified with a modular overhang of 12", or parametric overhang up to 18" in $\frac{1}{16}$ " increments.

A maximum of 12" overhang is available on 34"W screens.

Connections

Boundary screens come standard with attachment bracket and hardware used for mounting in predrilled locations on the screen.

Edge

- Plastic

Open Line laminate can be applied with vertical grain direction only. Open Line laminates are not allowed on screens that are 60"W or wider. Open Line laminate is only available when specifying modular screens.

Directional and wood grain laminate can be applied horizontally on spanning and single-sided boundary screens up to 96"W and vertically up to 60"W. Directional and wood grain laminate can only be applied vertically on split boundary screens.

Wood veneer grain direction can be specified horizontal or vertical for all spanning and single-sided boundary screens.

Application Topics

Boundary screen installed heights align with centered screen heights of 42"H or 48"H.

FrameOne End Panels

For Use with Ology Bench

FrameOne end panels or end panels with utility pole attach to dual-sided or single-sided benches to add a refined, consistent aesthetic to the space.

► Specifying, pages 250-252

1" gap between work-surface and end panel provides pinch point clearance.

Legs are fixed height at 27¹/₄".

Loop leg

Infills are High-Pressure Laminate or veneer.

Post leg

Product Details

Two **FrameOne end panel leg types** are available. Ordered as a single leg with infill.

Post leg with utility pole

Loop leg with utility pole

Post leg without utility pole

Loop leg without utility pole

FrameOne end panels can be ordered with or without the utility pole.

Connections

FrameOne end panel ships with mounting bracket that connects to the cross tube on Ology bench.

When specifying FrameOne end panel with utility pole, connection occurs at the infill and includes a cutout to route cables. FrameOne end panel ships with both connection bracket and utility pole.

Utility pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

FrameOne end panel attachment allows for 1" gap to the adjacent bench eliminating any pinch points.

FrameOne end panel width aligns with overall worksurface depth of the dual-sided bench.

FrameOne end panel width aligns with the back of the cable tray on a single-sided bench. End panels are handed and must be specified for use on left or right.

Bench footprint increases by 3 1/4" for each FrameOne end panel without utility pole that is added.

Connection bench footprint increases by 9 3/8" for each FrameOne end panel with utility pole that is added.

Ology Height-Adjustable Dual-Sided Benches

High-Pressure Laminate or Wood Veneer

34"D will be available Summer 2019.

Tip: On extended height bases, any storage higher than 19", or 16½" if the power access door is optional, will impede lowest height range of bench work surface. On basic height bases, any storage higher than 23⅞", or 21⅞" if the power access door is optional, will impede lowest height range of bench work surface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the work surface, understructure, and options selected.

► See page 180 for work surface weights.

Tip: Fixed height does not have a controller option.

Tip: Antimicrobial can be specified only when specifying simple touch controller and/or soft edge.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Product details,
page 166

Standard Includes

- Two work surfaces: High-Pressure Laminate price group 1 with 3 mm plastic edge or wood group 1 veneer
- Two electric height-adjustable sit-to-stand bases: paint
- 2" adjustable glides
- Two power cords: 9'
- Attachment hardware
- Two perpendicular cable managers
- Cable tray and covers: paint to match base

Required to Specify

- 1 Style number
 - 2 Bench depth and width
 - 3 High-Pressure Laminate or wood color for work surface
 - 4 Plastic color number for profile edge on laminate work surfaces, if selected
 - 5 Bench corner style, if laminate bench selected (see below under Required Selections)
 - 6 Paint color number for base:
4799 Platinum Metallic
7207 Black
7241 Arctic White
7360 Merle
 - 7 Controller (see below under Required Selections)
 - 8 Integrated rail (see below under Required Selections)
 - 9 Antimicrobial or non-antimicrobial surface, if simple touch controller selected (see below under Required Selections)
 - 10 Options, if selected (see below)
- See *Surface Materials*, page 378.

Ology Height-Adjustable Combo Dual-Sided Benches

High-Pressure Laminate or Wood Veneer

34"D benches will be available Summer 2019.

Tip: On extended height bases, any storage higher than 19", or 16½" if the power access door is optioned, will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⅞", or 21⅞" if the power access door is optioned, will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for worksurface weights.

Tip: Fixed height does not have a controller option.

Tip: If selecting the same leg type position for both sides of the bench, the non-combo style benches should be used.

Tip: Antimicrobial can be specified only when specifying simple touch controller and/or soft edge.

Ology Height-Adjustable 120° Corner Triple-Sided Benches

High-Pressure Laminate or Wood Veneer

Parametric width benches will be available
Summer 2019.

Tip: On extended height bases, any storage higher than 19", or 16½" if the power access door is optioned, will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⅞", or 21⅞" if the power access door is optioned, will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 471 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for worksurface weights.

Tip: Fixed height does not have a controller option.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Product details,
page 174

Standard Includes

- Three worksurfaces: High-Pressure Laminate price group 1 with 3 mm plastic edge or wood group 1 veneer
- Three electric height-adjustable sit-to-stand bases: paint
- 2" adjustable glides
- Three power cords: 9'
- Attachment hardware
- Three perpendicular cable managers
- Cable tray and covers: paint to match base

Required to Specify

- 1 Style number
 - 2 Bench depth and width
 - 3 High-Pressure Laminate or wood color for worksurface
 - 4 Plastic color number for profile edge on laminate worksurfaces, if selected
 - 5 Bench corner style, if laminate bench selected (see below under Required Selections)
 - 6 Paint color number for base:
4799 Platinum Metallic
7207 Black
7241 Arctic White
7360 Merle
 - 7 Controller (see below under Required Selections)
 - 8 Integrated rail (see below under Required Selections)
 - 9 Antimicrobial or non-antimicrobial surface, if simple touch controller selected (see below under Required Selections)
 - 10 Options, if selected (see below)
- See *Surface Materials*, page 378.

Ology Height-Adjustable Dual-Sided Bases

34"D bases will be available Summer 2019.

Tip: On extended height bases, any storage higher than 19" will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⁷/₁₀" will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Fixed height does not have a controller option.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for worksurface weights.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

► Need help?
Product details,
page 174

Standard Includes

- Two electric height-adjustable sit-to-stand bases: paint
- 2" adjustable glides
- Two power cords: 9'
- Attachment hardware
- Two perpendicular cable managers
- Cable tray and covers: paint to match base

Required to Specify

- 1 Style number
- 2 Bench depth and width
- 3 Paint color number for bases:
 - 4799 Platinum Metallic
 - 7207 Black
 - 7241 Arctic White
 - 7360 Merle
- 4 Controller (see below under Required Selections)
- 5 Antimicrobial or non-antimicrobial surface, if simple touch controller selected (see below under Required Selections)
- 6 Options, if selected (see below)

► See *Surface Materials*, page 378.

Ology Height-Adjustable Combo Dual-Sided Bases

34"D bases will be available Summer 2019.

Tip: On extended height bases, any storage higher than 19" will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⁷/₁₀" will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Fixed height does not have a controller option.

Tip: If selecting the same leg type position for both sides of the bench, the non-combo style benches should be used.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for worksurface weights.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Tip: Prices at right are shown only for one base. You must add the price of leg type position one and two for the total price of the bench.

Ology Height-
Adjustable Benching

For Canadian Pricing

Multiply U.S. Price by the
Canadian price factor.

► See page 1 for details.

Ology Height-Adjustable 120° Corner Dual-Sided Bases

Parametric width bases will be available
Summer 2019.

Tip: On extended height bases, any storage higher than 19" will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⁷/₁₀" will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Fixed height does not have a controller option.

Tip: Base supports a maximum distributed weight capacity of 471 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 180 for worksurface weights.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Standard Includes	Required to Specify
<p>► Need help? Overview of Series Height-Adjustable Benches

Dual-sided base benches include an integrated rail and a choice of height-adjustable base options. Overall depth is 60"D. Widths range from 47"W to 71"W. Dual-sided base benches can be used independently or combined with dual-sided bases or connection benches to lengthen the overall bench.

Dual-sided connection benches include an integrated rail and a variety of height-adjustable base options, and connect to dual-sided base benches. Dual-sided connection benches can be added to each other to lengthen the overall bench. Dual-sided connection benches are offered in the same dimensions as the dual-sided base benches.

Wire manager is standard on all dual-sided benches to route cables from the base to each worksurface.

Dual-sided connection kit includes an integrated rail extension, power and data tray extensions, and is required to attach dual-sided bases or connection benches to one another.

FrameOne end panels attach to dual-sided Series 5 or 8 connection benches to add a refined, consistent aesthetic to a space. Overall width is 60" to provide additional modesty for the bench run.

Fixed personal screens are tackable and provide variable privacy when and where it is needed. The screens are used on SOTO rail for additional privacy.

Centered screens are mounted to the integrated rail on both dual-sided base and connection benches. 19½"H and 24"H screens have widths from 36"W to 72"W.

Series 5 Height-Adjustable Benches

Dual-sided bases and connection benches

connect together to create benching applications. The electric-based worksurface can easily be raised or lowered to an optimal height to provide users a highly personalized and productive workspace.

► Specifying, page 266

Worksurface has a wood core with a High-Pressure Laminate surface and is $1\frac{3}{16}$ " thick.

Each wire manager cleanly routes cables from the tray to the worksurface.

Each height-adjustable base adjusts independently from $25\frac{1}{2}$ "H to 52"H in any increment.

Each height-adjustable base independently supports a maximum distributed weight load of 195 pounds. When calculating lifting capacity, subtract the weights of the worksurface and options (power access door).

Leveling glides adjust 1" to install benches on uneven floors.

Actual Dimensions

A	30" (to centerline of integrated rail)
B	47", 53", 59", 65", or 71"
C	60"

Tip: Actual worksurface depths are $28\frac{1}{2}$ " or $26\frac{3}{4}$ " (with SOTO rail option).

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes. Universal tables have a continuous edge profile available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

PVC-free, knife edge with 3 mm edge profile are proprietary blend for solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

Universal tables have 2" radius corners on all four sides with a continuous user's edge. Radius corners eliminate sharp edges.

Universal tables with SOTO rail have 2" radius corners on the two front (user's) corners and 90° corners on the rear two corners.

Knife edge work surfaces have 90° corners on all four sides with a front user's edge.

The overall dimension of the work surface is 28 1/2".

SOTO rail is optional on dual-sided base and connection bench units. The overall dimension of the work surface is 28 3/4"D.

SOTO rail must be ordered as an option and cannot be added after install. Work surface depth is shortened to accommodate the SOTO rail in overall footprint.

SOTO rail supports several SOTO shelf and work tool combinations.
Tip: Flat panel monitor arms must be C-clamped to series bench. Do not mount to SOTO rail.

SOTO rail provides 1" clearance between work surface and rail for cable management.

SOTO rail is flush with top of work surface.

SOTO rail clamps require 2" footprint above the work surface. Clamp mounting brackets are included.

SOTO rail clamps are standard with rubber feet to ensure a tight fit without marring work surface.

SOTO rail supports a maximum weight of 125 pounds.

Work surface widths are listed in actual dimensions to allow for 1" gap to adjacent benches eliminating any pinch points.

Series 5 worksurfaces adjust 25 1/2"H to 52"H in any increment.

Push button controller is standard and easily adjusts work surface height by pushing control up and down arrows.

Open exterior shroud

Open interior shroud

Closed exterior shroud

Closed interior shroud

Open interior shroud for utility pole

Closed interior shroud for utility pole

Base and connection benches are differentiated only by shroud types. Base benches ship with a minimum of one exterior shroud. Connection benches ship with two interior shrouds.

Two shroud types are available on dual-sided base and connection benches. Open shrouds are the standard.

Closed shrouds provide a different visual and provide some concealment.

Dual-sided base benches have four different shroud options when specifying four-packs or larger.

- Exterior Open/Interior Open (standard)
- Exterior Open/Interior Closed
- Exterior Closed/Interior Open
- Exterior Closed/Interior Closed

Dual exterior shrouds should be ordered if specifying a two-pack only.

- Exterior Open/Exterior Open
- Exterior Closed/Exterior Closed

Dual-sided connection benches have two shroud options when specifying without the FrameOne end panel without the utility pole:

- Interior Open/Interior Open
- Interior Closed/Interior Closed

Dual-sided connection benches have three shroud options when specifying a utility pole only:

- Interior Open/Interior Open
- Interior Closed/Interior Open
- Interior Closed/Interior Closed

Dual-sided connection benches have one shroud option when specifying FrameOne end panel or FrameOne end panel with utility pole only:

- Interior Open / Interior Open

Dual-sided base benches are used at the end of each run when not specifying a FrameOne end panel or utility pole.

Dual-sided connection benches are used at the end of the run when specifying a FrameOne end panel. *Tip: This includes when specifying a FrameOne end panel with utility pole.*

Dual-sided connection benches are used at the end of the run when specifying a utility pole.

Dual-sided connection benches are also used in the interior of a run.

Integrated rail is located in center of dual-sided base and connection benches, 18" from the floor, and allows mounting for centered screens.

Two wire managers are standard with every dual-sided base or connection bench. Attaches from the worksurface to the top of the upper tray cover for cable feed through.

Cables and cords are routed into the opening of the wire manager. The inside dimensions are 1 $\frac{7}{8}$ "W and 1 $\frac{1}{4}$ "H.

Wire manager always mounts on the left-hand side of the worksurface. Products with C-clamps cannot be mounted in this 1 $\frac{1}{2}$ "W zone. For 47"W worksurface, the zone is located 11 $\frac{1}{2}$ " from the edge. For 53"W worksurface, the zone is located 14 $\frac{1}{2}$ " from the edge. For 59"W worksurface, the zone is located 17 $\frac{1}{2}$ " from the edge. For 65"W worksurface, the zone is located 20 $\frac{1}{2}$ " from the edge. For 71"W worksurface, the zone is located 23 $\frac{1}{2}$ " from the edge.

Wiring and Cabling

Low surge electric motor with whisper quiet operation adjusts at 1 $\frac{7}{10}$ " per second. Motor is 110V and includes a 9' power cord. Motor also has 4.5W standby power.

Push button up/down controller must be located near the master motor. The master motor can be placed on either the right- or left-hand side of the table.

Base Power and Data

Modular power in a dual-sided base or connection bench is ordered separately.

Trays are standard on dual-sided base and connection benches. *► See Distribution and Access, page 326.*

Upper tray is standard and provides cord management and data termination. *► See Distribution and Access, page 326.*

Upper tray cover is standard and conceals the power blocks. Upper tray cover provides access for cables and cords to pass into the attached wire manager.

Flexible receptacles may be necessary depending on plug size and orientation. Overall height of upper tray is 2 $\frac{1}{8}$ ".

The lower tray is standard and always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables creating a clean visual.

► See *Distribution and Access*, page 326.

Data can be terminated and accessed in the upper tray.

Filler packages are available to fill unused data cutouts. Order separately in packages of 20.

Worksurface Power

Power and data access door is optional, and must be ordered separately, on all dual-sided base connection benches. One door is centered on the worksurface and allows user access to power and data outlets as well as cord management.

► See *Worksurface Power and Data*, page 331.

Data cutout in trays can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate. Data cutout trays are ordered separately.

► See *Distribution and Access*, page 326.

Access holes in tray allow power and data to be routed into the wire manager.

Height of tray is $4\frac{3}{4}$ " so lower storage height must be accounted for when used adjacent to tray.

10' cord with plug is standard. Cord and plug option can only be used with height-adjustable tables.

Cord and plug version has an integrated overload circuit breaker.

Connections

Connection kit is required to attach dual-sided bases to dual-side bases or connection benches. Connection occurs at the integrated rail (beam) and includes the upper and lower tray to route cables.

Leveling glides adjust 1" to install on uneven floors.

Maximum run of dual-sided base and connection benches is limited by floor height. When floor height difference is greater than 1" a new run needs to start.

Application Topics

Mobile pedestals or other storage taller than 20" will impede height range of worksurface.

Storage can nest under the bench. The depth clearance is $23\frac{1}{2}$ " to the upper tray.

Storage can be aligned with an adjacent bench if mounted in front of the lifting column. The depth clearance is $14\frac{3}{4}$ ".

If the SOTO rail option is not specified with order, and added in the field, it cannot be used with centered screens due to lack of clearance.

Acrylic privacy screens and Universal screens cannot be used on dual-sided base or connection benches in combination with centered screens because there isn't enough clearance at the back of the worksurface or underneath, and it would hit the tray.

Cableways and modesty screens should not be used on dual-sided base or connection benches. When table is lowered there is no clearance.

Flat panel monitor arms must be C-clamped. Do not mount to SOTO rail.

Flat panel monitor arms cannot be mounted behind the power and data tray cutout. It must be C-clamped to the side of the cutout.

Monitor power cords should be 9' in length to route through the wire manager and plug into base power.

Products cannot be C-clamped on the left-hand side of a worksurface with SOTO rails. When worksurface is at the lowest position the wire manager creates a clamp-free zone.

Clamp-free Zone Dimensions

Worksurface Width	A	B
47"	9"	4"
53"	9"	7"
59"	9"	10"
65"	9"	13"
71"	9"	16"

When ordering dash or SOTO LED lights, you must specify flexible receptacles. ▶ Page 337.

Maximum distributed weight load is 195 pounds. When calculating lifting capacity, subtract the weights of the worksurface and options (power access door).

All assemblies meet or exceed ANSI/BIFMA standards.

Surface Materials

High-Pressure Laminate Worksurface

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

3 mm or knife edge profile

- Plastic

Shrouds

- Paint

Height-adjustable base

- 0835 Black
- 4799 Platinum
- Tip: When specifying 0835 Black height-adjustable bases, select 7207 Black shrouds to match.*

Upper trays, upper tray covers, and lower tray

- Paint
- Tip: Upper and lower trays and upper tray covers were previously defaulted to paint finish 7237 Slate.*

Installation

Worksurfaces ship with pre-drilled holes for mounting bases.

Height-Adjustable base requires attachment to the worksurface and integrated rail.

Upper and lower tray require attachment to integrated rail.

Exterior and interior shrouds requires attachment to the base.

Series 5 Height-Adjustable Benches

High-Pressure Laminate

Tip: Upper and lower trays and upper tray covers were previously defaulted to paint finish 7237 Slate.

Tip: Maximum run of dual-sided base and connection benches is limited by floor height. When floor height difference is greater than 1"H, a new run of benches is required.

Tip: Maximum distributed weight load is 195 pounds. When calculating lifting capacity, subtract the weights of the worksurface and options (power access door).

Tip: Mobile pedestals or other storage taller than 20" will impede the lowest height range of worksurface.

Tip: For all edge profiles, add a suffix to the style number. (For example, A5BDS4728 becomes A5BDS4728U for Universal table edge profile.)

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Dual-sided base benches are used at the ends of a run.

Tip: Dual-sided connection benches are used at the end of run to attach a FrameOne end panel or utility pole.

Tip: Dual-sided connection benches are used in the interior of a run.

Product details,
page 260

Standard Includes

- High-Pressure Laminate price group 1
- High-Pressure Laminate worksurface edges:
 - Universal Tables: plastic 3 mm edge profile on all sides
 - Universal Table with SOTO rail: plastic 3 mm edge profile on three sides; 1 mm plastic on back
 - Knife edge worksurfaces: plastic 3 mm edge profile on front edge with matching 1 mm plastic on sides and back
- Worksurface corners:
 - Radius corners on Universal Tables, if selected
 - 90° corners on knife edge, if selected
 - Radius corners on front (user's edge) and 90° corners on back of Universal Table with SOTO rail, if selected
- Two electric height-adjustable sit-to-stand bases: paint price group 1
- Two push button up/down controllers
- Two shrouds to encase height-adjustable bases: paint price group 1
- Two upper trays, two upper tray covers, and lower tray: paint price group 1
- End caps: slate
- Integrated rail: anodized aluminum
- 1" adjustable glides
- Two wire managers: black
- Two drive shaft covers
- Two power cords: 9'
- Attachment hardware

Required to Specify

- 1 Style number with appropriate edge profile suffix:
U Universal Tables
K Knife edge
- 2 High-Pressure Laminate color number for worksurface
- 3 Plastic color number for profile edge on laminate worksurface
- 4 Paint color for base:
0835 Black
4799 Platinum
- 5 Shroud Selections (see below)
- 6 Paint color number for shroud
- 7 Paint color number for trays
- 8 Options, if selected (see below)
► See *Surface Materials*, page 378.

	Options	U.S. Price	Required to Specify

Series 8 Height-Adjustable Benches

Dual-sided bases and connection benches

connect together to create benching applications. The electric-based worksurface can easily be raised or lowered to an optimal height to provide users a highly personalized and productive workspace.

► Specifying, page 276

Worksurface has a wood core with a High-Pressure Laminate surface and is 1³/₁₆" thick.

Each wire manager cleanly routes cables from the tray to the worksurface.

Lift column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Each height-adjustable base adjusts independently from 23³/₄"H to 49³/₄"H in any increment.

Each height-adjustable base independently supports a maximum distributed weight load of 295 pounds. When calculating lifting capacity, subtract the weights of the worksurface and options (power access door).

Leveling glides adjust 1" to install benches on uneven floors.

Actual Dimensions

A	30" (to centerline of integrated rail)
B	47", 53", 59", 65", or 71"
C	60"

Tip: Actual worksurface depths are 28¹/₂" or 26³/₄" (with SOTO rail option).

5" gap between back-to-back worksurfaces accommodates centered screens and cords.

1" gap between side-to-side worksurfaces provides pinch point clearance.

Connection kit is required to attach dual-sided bases to dual-side base or connection benches.

Three pre-set programmable controller is standard and mounted under the worksurface. Controller adjusts height at a rate of 1⁷/₁₀" per second. Three pre-set programmable controller with digital display is available as option.

Edge is available in 3 mm or knife.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes. Universal tables have a continuous edge profile available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

PVC-free, knife edge with 3 mm edge profile are proprietary blend for solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

Universal tables have 2" radius corners on all four sides with a continuous user's edge. Radius corners eliminate sharp edges.

Universal tables with SOTO rail have 2" radius corners on the two front (user's) corners and 90° corners on the rear two corners.

Knife edge work surfaces have 90° corners on all four sides with a front user's edge.

The overall dimension of the work surface is 28 1/2".

SOTO rail is optional on dual-sided base and connection bench units. The overall dimension of the work surface is 28 3/4"D.

SOTO rail must be ordered as an option and cannot be added after install. Work surface depth is shortened to accommodate the SOTO rail in overall footprint.

SOTO rail supports several SOTO shelf and work tool combinations. *Tip: Flat panel monitor arms must be C-clamped to series bench. Do not mount to SOTO rail.*

SOTO rail provides 1" clearance between work surface and rail for cable management.

SOTO rail is flush with top of work surface.

SOTO rail clamps require 2" footprint above the work surface. Clamp mounting brackets are included.

SOTO rail clamps are standard with rubber feet to ensure a tight fit without marring work surface.

SOTO rail supports a maximum weight of 125 pounds.

Work surface widths are listed in actual dimensions to allow for 1" gap to adjacent benches eliminating any pinch points.

Series 8 worksurfaces adjust 23 3/4"H to 49 3/4"H in any increment.

Three pre-set programmable controller is standard and easily adjusts the work surface by simply pushing the up and down arrows. Three pre-set programmable buttons allow user to set the seated and standing height positions or pre-set heights for multiple users.

Three pre-set programmable controller with digital display is available as an option and easily adjusts the work surface by simply pushing the up and down arrows. Three pre-set programmable buttons allow user to set the seated and standing height positions or pre-set heights for multiple users. Digital display will show the height of the work surface.

Open exterior shroud

Open interior shroud

Closed exterior shroud

Closed interior shroud

Open interior shroud for utility pole

Closed interior shroud for utility pole

Base and connection benches are differentiated only by shroud types. Base benches ship with a minimum of one exterior shroud. Connection benches ship with two interior shrouds.

Two shroud types are available on dual-sided base and connection benches. Open shrouds are the standard.

Closed shrouds provide a different visual and provide some concealment.

Dual-sided base benches have four different shroud options when specifying four-packs or larger.

- Exterior Open/Interior Open (standard)
- Exterior Open/Interior Closed
- Exterior Closed/Interior Open
- Exterior Closed/Interior Closed

Dual exterior shrouds should be ordered if specifying a two-pack only.

- Exterior Open/Exterior Open
- Exterior Closed/Exterior Closed

Dual-sided connection benches have two shroud options when specifying without the FrameOne end panel without the utility pole:

- Interior Open/Interior Open
- Interior Closed/Interior Closed

Dual-sided connection benches have three shroud options when specifying a utility pole only:

- Interior Open/Interior Open
- Interior Closed/Interior Open
- Interior Closed/Interior Closed

Dual-sided connection benches have one shroud option when specifying FrameOne end panel or FrameOne end panel with utility pole only:

- Interior Open/Interior Open

Dual-sided base benches are used at the end of each run when not specifying a FrameOne end panel or utility pole.

Dual-sided connection benches are used at the end of the run when specifying a FrameOne end panel.
Tip: This includes when specifying a FrameOne end panel with utility pole.

Dual-sided connection benches are used at the end of the run when specifying a utility pole.

Dual-sided connection benches are also used in the interior of a run.

Integrated rail is located in connection of dual-sided base and connection benches, 18" from the floor, and allows mounting for centered screens.

Two wire managers are standard with every dual-sided base or connection bench. Attaches from the worksurface to the top of the upper tray cover for cable feed through.

Cables and cords are routed into the opening of the wire manager. The inside dimensions are 1 $\frac{7}{8}$ "W and 1 $\frac{1}{4}$ "H.

Wire manager always mounts on the left-hand side of the worksurface. Products with C-clamps cannot be mounted in this 1 $\frac{1}{2}$ "W zone. For 47"W worksurface, the zone is located 11 $\frac{1}{2}$ " from the edge. For 53"W worksurface, the zone is located 14 $\frac{1}{2}$ " from the edge. For 59"W worksurface, the zone is located 17 $\frac{1}{2}$ " from the edge. For 65"W worksurface, the zone is located 20 $\frac{1}{2}$ " from the edge. For 71"W worksurface, the zone is located 23 $\frac{1}{2}$ " from the edge.

Wiring and Cabling

Low surge electric motor with whisper quiet operation adjusts at 1 $\frac{7}{10}$ " per second. Motor is 110V and includes a 9' power cord. Motor also has 0.1W standby power.

Soft stop DC motor eliminates abrupt stops and starts and is housed inside the lifting column.

Built-in limiter switch is standard.

Base Power and Data

Modular power in a dual-sided base or connection bench is ordered separately.

Trays are standard on dual-sided base and connection benches.

► See *Distribution and Access*, page 326.

Upper tray is standard and provides management and data termination.
► See *Distribution and Access*, page 326.

Upper tray cover is standard and conceals the power blocks. Upper tray cover provides access for cables and cords to pass into the attached wire manager.

Flexible receptacles may be necessary depending on plug size and orientation. Overall height of upper tray is 2¹/₈".

The lower tray is standard and always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables creating a clean visual.

► See *Distribution and Access*, page 326.

Data can be terminated and accessed in the upper tray.

Filler packages are available to fill unused data cutouts. Order separately in packages of 20.

Worksurface Power

Power and data access door is optional, and must be ordered separately, on all dual-sided base and connection benches. One door is centered on the worksurface and allows user access to power and data outlets as well as cord management.

► See *Worksurface Power and Data*, page 331

Data cutout in trays can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate. Data cutout trays are ordered separately.

► See *Distribution and Access*, page 326.

Access holes in tray allow power and data to be routed straight back.

Height of tray is 4³/₄" so lower storage height must be accounted for when used adjacent to tray.

10' cord with plug is standard. Cord and plug option can only be used with height-adjustable tables.

Cord and plug version has an integrated overload circuit breaker.

Connections

Connection kit is required to attach dual-sided bases to dual-side bases or connection benches. Connection occurs at the integrated rail (beam) and includes the upper and lower tray to route cables.

Leveling glides adjust 1" to install on uneven floors.

Maximum run of dual-sided base and connection benches is limited by floor height. When floor height difference is greater than 1" a new run needs to start.

Application Topics

Mobile pedestals or other storage taller than 22¹/₄" will impede height range of worksurface.

Storage can nest under the bench. The depth clearance is 23¹/₂" to the upper tray.

Storage can be aligned with an adjacent bench if mounted in front of the lifting column. The depth clearance is 15 1/8".

Cableways and modesty screens should not be used on dual-sided base or connection benches. When table is lowered there is no clearance.

Products cannot be C-clamped on the left-hand side of a worksurface with SOTO rails. When worksurface is at the lowest position the wire manager creates a clamp-free zone.

Clamp-free Zone Dimensions

Worksurface Width	A	B
47"	12"	1"
53"	12"	4"
59"	12"	7"
65"	12"	10"
71"	12"	13"

Flat panel monitor arms must be C-clamped. Do not mount to SOTO rail.

Flat panel monitor arms behind the power and data tray cutout must be C-clamped to the side of the cutout.

Upper trays, upper tray covers, and lower tray

• Paint
Tip: Upper and lower trays and upper tray covers were previously defaulted to paint finish 7237 Slate.

If the SOTO rail option is not specified with order, and added in the field, it cannot be used with centered screens due to lack of clearance.

Acrylic privacy screens and Universal screens cannot be used on dual-sided base or connection benches in combination with centered screens because there isn't enough clearance at the back of the worksurface or underneath, and it would hit the tray.

Monitor power cords should be 9' in length to route through the wire manager and plug into base power.

When ordering dash or SOTO LED lights, you must specify flexible receptacles.
▶ Page 337.

Maximum distributed weight load is 295 pounds. When calculating lifting capacity, subtract the weights of the worksurface and options (power access door).

All assemblies meet or exceed ANSI/BIFMA standards.

Centered Screens

For Use with Series 5 and 8 Benches

Centered screens provide a boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 284

Actual Dimensions

Height	18½" or 23"
Overall Height	19½" or 24"
Width	36", 42", 48", 60", 66", or 72"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: Custom insert kit can accommodate inserts that are ¼", ⅜", or ½" thick.

Product Details

Centered screens are mounted to the integrated rail. The 19½"H screen has an overall height of 37½"H from the floor and a 24"H screen has an overall height of 42"H from the floor.

Centered screens with fabric infill are tackable and available in 19½"H and 24"H. Screens range in size from 36"W to 72"W. Frosted glass is also available in 19½"H and widths from 36"W to 72"W.

Brackets are included with screens. Two brackets are used on 36"W and 48"W screens. All other widths require three brackets.

Centered screen custom insert kit allows for use of other infill materials. 36"W and 48"W screens require the two bracket kit. Screens 60"W to 72"W require the three bracket kit. Infill should not exceed 18½" in height.

Centered screens will have a minimum 3" gap at the end of the bench run. The integrated rail does not run the full worksurface width.

► See *Series Bench Centered Screens Compatibility Charts* for recommendation on screen sizes to achieve the open, full, or closed condition, page 282.

When specifying a base bench, screen must be 6" to 12" shorter than worksurface.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Fixed Personal Screens

Personal screens

are tackable and provide variable privacy when and where it is needed. The screens can be used on SOTO rail.

► Specifying, page 287

Fixed personal screens

are available in three heights, 12", 19½", and 24", and four widths to accommodate varying levels of privacy. Height is measured from the top of the mounting surface to the top of the screen.

Brackets are attached to the screens.

Product Details

12"H screen

19½"H screen

24"H screen

Personal screens can be mounted on the SOTO rail. The overall height from the floor will vary depending on the height of the adjustable worksurface.

Gap is 1" between personal screen and SOTO rail.

Surface Materials

Infill

- Fabric

Brackets

- 4799 Platinum paint

front

back

Fabric without pattern is recommended when using a COM fabric to provide a consistent visual. Fabric with patterns could result in the above visual.

Application Topics

When mounting the dash LED light to SOTO rail, it must be mounted adjacent to the personal screen. dash cannot be mounted in front of screen.

Fixed personal screens should not be used on dual-sided base or connection benches, when table is lowered due to lack of clearance.

Actual Dimensions

Width	30", 36", 42", or 48"
Height	11", 18½", or 23"

FrameOne Dual-Sided End Panels

For Use with Series 5 and 8 Benches

FrameOne end panels or end panels with utility pole

attach to dual-sided Series 5 or 8 connection benches to add a refined, consistent aesthetic to the space. Overall width is 60" to provide additional modesty for bench run.

► Specifying, page 290

FrameOne end panels attach to dual-sided Series 5 or 8 connection benches with open shrouds only.

Legs are fixed height at 27¹/₄".

Infills are High-Pressure Laminate.

1" gap between work-surface and end panel provides pinch point clearance.

Post leg

Loop leg

Product Details

Post leg

Loop leg

Two FrameOne end panel leg types are available to attach to a dual-sided connection bench. Ordered as a single leg with infill.

Post leg
with utility pole

Loop leg
with utility pole

Post leg
without utility pole

Loop leg
without utility pole

FrameOne end panels can be ordered with or without the utility pole.

Connection bench with an open interior shroud must be specified for use with the FrameOne end panel.

Connections

When specifying FrameOne end panel without utility pole, connection occurs at the infill and includes a tray to route power infeed. FrameOne end panel ships with connection bracket.

When specifying FrameOne end panel with utility pole, connection occurs at the infill and includes a tray to route cables. FrameOne end panel ships with both connection bracket and utility pole.

Utility pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

FrameOne end panel attachment allows for 1" gap to the adjacent bench eliminating any pinch points.

FrameOne end panel width of 60" aligns with overall worksurface depth of the bench.

Connection bench footprint increases by 3¹/₄" for each FrameOne end panel without utility pole that is added.

Connection bench footprint increases by 9³/₈" for each FrameOne end panel with utility pole that is added.

Power and Data Wiring Schematics

Details for the Electrician

Power and Data Wiring
Schematics

Height-adjustable series benching offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

Rust = Three-circuit, separate neutral (3SN)

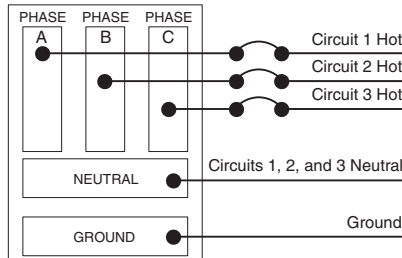

Shared neutral = 10 gauge

Non-shared neutral = 12 gauge

Hot wires = 12 gauge

Four-Circuit, 3+1

Circuit Panel 1

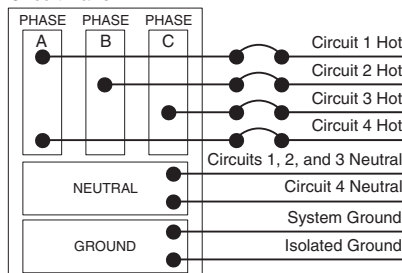

Circuit Panel 2

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

Circuit Panel 1

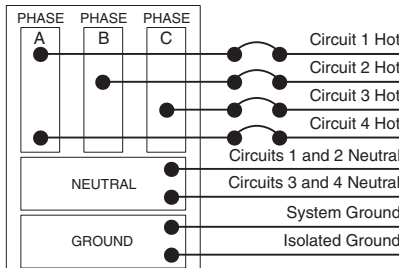

Circuit Panel 2

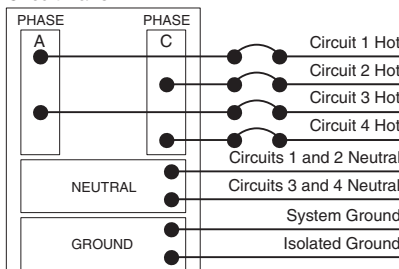

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and are supported by their own shared neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase
Circuit Panel

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate neutral

Circuit Panel 1

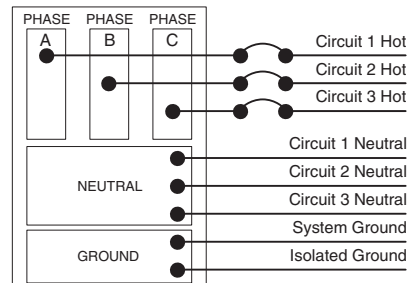

Circuit Panel 2

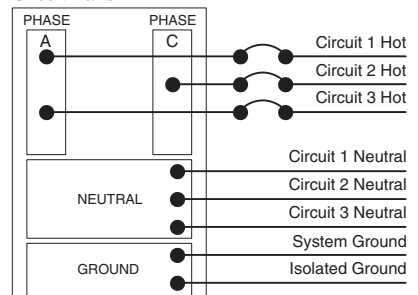

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase
Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in and 40 receptacles for each 4-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) or 80 amps (20 amps times 4 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	13.6	110	1
Microwave (low)	150	5.5	110	3
Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Cable Capacities

FrameOne Bench

Single-Sided

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power
A Cable hanger, single-sided unit	96	96	48	48
B Infeed at intermediate leg, single-sided unit	72	64	36	32
C Infeed opening at ends of lower tray, single-sided unit	72	64	36	32
D Infeed with end cap removed from lower tray, single-sided unit	96	N.A.	48	N.A.
I Vertebral riser	48	40	24	20
K Single-sided unit utility pole	72	64	28	24

Tip: Cable hangers have a separate routing area for power. Capacity is not affected.

Tip: The TIA recommends a maximum fill rate of 40%.

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Tip: On 48"W and 96"W desks, data opening is positioned to the right.

Dual-Sided

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power
E Cable hanger, dual-sided unit	96	N.A.	48	N.A.
F Infeed at intermediate leg, dual-sided unit	96	88	48	44
G Infeed opening at ends of lower tray, dual-sided unit	96	88	48	44
H Infeed with end cap removed from lower tray, dual-sided unit	96	N.A.	48	N.A.
I Vertebral riser	48	40	24	20
J Dual-sided unit utility pole	96	88	48	44

Tip: Cable hangers have a separate routing area for power. Capacity is not affected.

Tip: The TIA recommends a maximum fill rate of 40%.

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Tip: On 48"W and 96"W desks, data opening is positioned to the right.

Tray Comparison

FrameOne

Tray Availability

FrameOne offers three types of trays to support a range of power distribution and wiring and cabling needs.

Tray Type	Dual-Sided Bases and Extensions with Rail	Dual-Sided Bases and Extensions without Rail	Single-Sided Bases and Extensions	Bases and Extensions with Continuous Top	Value Package Benches	Benches with media:scape
Simple Tray	Available	Available	Available	Available	Available	Not Available
Upper Tray	Available	Not Available	Not Available	Not Available	Not Available	Not Available
Upper and Lower Tray	Available	Not Available	Available	Not Available	Not Available	Available

Tray Feature Comparison

Simple Tray	Available	Not Available	Separate Style Number	Separate Style Number	Separate Style Number
Upper Tray	Available	Available	Not Available	Available	Available
Upper and Lower Tray	Available	Available	Available	Available	Available

Simple Tray Feature Comparison

To provide the best possible appearance and value, the simple tray is configured differently depending on application.

Application	Power Covers	Extension Tray	End Caps
Dual-Sided Bases and Extensions with Rails	Separate Style Number	Separate Style Number	Separate Style Number
Dual-Sided Bases and Extensions without Rails	Separate Style Number	Separate Style Number	Separate Style Number
Single-Sided Bases and Extensions	Separate Style Number	Standard	Separate Style Number
Bases and Extensions with Continuous Top	Standard	Standard	Standard
Value Package Benches	Separate Style Number	Separate Style Number	Separate Style Number

Distribution and Access

FrameOne

Power blocks can be placed on the underside of the integrated rail. Modular harnesses are used to distribute power through the bench.

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power block includes two power blocks and a block-to-block connector, provides back-to-back power, and accepts four receptacles per side.

Power strips can be placed above the work surface by connecting to the integrated rail. Power and data or power only are available.

Voice/data access occurs in the upper tray and can be positioned left or right of the power blocks. Both modular furniture and NEMA faceplates can be used. On 48"W and 96"W desks, data opening is positioned to the right.

Modular harness is used to connect power blocks and distribute power through the bench.

Wiring and Cabling

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power includes two power blocks and a block-to-block connector. It provides back-to-back power, and accepts four receptacles per side.

High-capacity power cannot be used in simple trays.

Chicago hardwire box is available. It accommodates two receptacles per side.

Duplex receptacles are available in 15- and 20-amps, isolated or system ground, with multiple line options. Receptacles have two outlets and are ordered separately.

Modular flexible receptacles are available in 15-amp, isolated or system ground, with multiple line options. Flexible receptacles offer easy access to three outlets. Receptacles are ordered separately.

USB receptacles are available in three wiring schematics with multiple line options. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Modular harnesses are used to connect power blocks.

► See *Power Routing Harness Chart*, page 300, to determine lengths needed.

Power and data access door is optioned on base and extension units. It is centered on the surface and provides user access to power and data as well as cord management. When optioned on 96"W units, two doors are provided in each surface.

If **door or cutout** is not optioned, power and data is maintenance accessible by sliding the surface open. Devices are then plugged in and the surface is closed and locked. High-capacity power cannot be used in simple trays. Application is intended for those devices that will remain plugged in.

Cable hangers attach to the underside of the integrated rail to manage the routing of voice/data cables. They are included with all dual- and single-sided base and extension units.

Trays are available on dual-sided base and extension units. There are three tray options. The standard includes an upper tray which provides under the surface cord management, data termination, and conceals the power blocks and conduit.

Data can be terminated and accessed in the upper tray—either left or right of the power. Exception: On 48"W and 96"W desks, data opening is positioned to the right. Both modular furniture and NEMA faceplates can be used.

The lower tray is optional and is always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables, creating a clean visual.

Simple tray is optional in place of upper or upper and lower trays. Simple tray accommodates standard capacity power only.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Omit trays is an option if trays are not needed. However, if power and data access door or cutout is selected, a tray is required.

Block-to-block connector is included with high-capacity power. It can also be ordered separately, along with another power block, to convert standard-capacity power to high-capacity.

Modular power in a dual-sided base or extension unit, without trays, must be secured with a strain relief bracket. Order style number FMVBK for each unit.

Power infeed in a dual-sided base or extension unit without rail, must be secured with a strain relief bracket. To order one use the style number FMVBK for each unit.

48"W and 96"W single-sided bases and extensions accommodate standard-capacity power only.

Filler packages are available to fill unused power or data options. Order separately in packages of 20.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Building Interface

FrameOne

Building power and data

can interface with the bench from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

Infeeds can enter the bench at either end or at an intermediate leg. If lower trays are not being used, the infeed can enter anywhere along the bench.

A vertebral riser is available to conceal the power and data.

Hardwire-to-modular power infeed is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 6, 12, and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a $4\frac{1}{16}$ " square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

New York power infeeds are available. The junction box is mounted to the underside of the desk. A 50" harness is included to reach the first power block in the bench. If a shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

Base power infeeds are not available.

Vertebral riser can attach to the lower tray or simple tray. Its position is approximately 18" from either end of the desk unit. Length is 30".

Extension vertebral riser can be used to conceal conduit and cables along the floor. Length is 15". Risers can be linked to each other for longer length requirements.

Power and data can enter the bench through the end of the lower tray or simple tray. The opening is approximately 14" from the end of the desk.

► See *Cable Capacities*, page 308.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Utility pole connects to simple tray or lower tray.

Utility poles, for dual-sided benches, include a connector piece to conceal cables between the utility pole and tray.

Utility poles, for single-sided benches, do not include the connector piece.

Utility pole cannot be used with continuous top bases or extensions.

Cable Capacities

Ology Bench

Cable manager supports cable management vertically between the cable tray and the underside of the bench. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified.

► Specifying, page 181.

Tray Dimensions

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power
A Infeed at intermediate leg, dual-sided unit	96	88	48	44
B Cable manager	30	20	14	7
C Connection kit	96	88	48	44

Tip: The TIA recommends a maximum fill rate of 40%.

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Distribution and Access

Ology Bench

Power blocks can be placed on the inside of the cable tray.

Modular harness is used to connect power blocks and distribute power through the bench.

Wiring and Cabling

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power includes two power blocks and a block-to-block connector. It provides back-to-back power, and accepts four receptacles per side.

Chicago hardwire box is available. It accommodates two receptacles per side.

Duplex receptacles are available in 15- and 20-amps, isolated or system ground, with multiple line options. Receptacles have two outlets and are ordered separately.

USB receptacles are available in three wiring schematics with multiple line options. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Modular harnesses are used to connect power blocks.

► See *Power Routing Harness Chart*, page 300, to determine lengths needed.

Hardwire-to-modular power infeed is available in 12 and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 12 and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4¹/₁₆" square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

New York power infeeds are available. The junction box is mounted to the cross tube at the end of the cable tray.

A 50" harness is included to reach the first power block in the bench. If shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

End-of-run infills, intermediate infills, boundary screens, or FrameOne end panels cannot be used when New York infeed is present. Shared intermediate infills can be used when New York infeed is located in the middle of a run.

Base power infeeds are not available.

Power and data access door and tray with USB is available as an option. The door is 16¹/₂"W and centered on the surface, providing user access to power, data, and USB, as well as cord management. Corner desks can support the access door on either side of the desk or on both sides and will have a cord drop on the opposite side when an integrated rail is specified.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs and are available as an option. They can help manage cable/cords going from the top of bench to the underside. 120° corners offer pairs of grommets on the left side, right side, or both sides. Grommet inside dimensions are 3¹/₄"W X 3³/₄"D. *Tip: When a grommet is specified, power and data access door cannot be applied.*

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable manager supports cable management vertically between the cable tray and the underside of the bench. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified. ► Specifying, page 233

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.

Cable baskets are available on benches 46"W or larger.

Cable baskets inside dimensions are 6"D x 17 3/4"W x 4 1/4"H and the overall width is 18"W with a height of 4 3/4"H.

Inside dimensions of cable brackets are 6"D x 2 1/4"W x 1/16"H.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables.

Data can be terminated and accessed in the data kit which mounts to the cable tray. The data kit can be positioned on either the left or right side of the cable tray.

Data kit, ordered separately, provides voice/data termination. A data termination box and two pieces of wire manager are included. Both modular furniture and NEMA faceplates can be used, which are provided by the data installer. For a dual-sided bench, two data kits should be ordered, one for each.

Block-to-block connector is included with high-capacity power. It can also be ordered separately, along with another power block, to convert standard-capacity power to high-capacity.

Filler packages are available to fill unused power or data options. Order separately in packages of 20.

Power and data can enter the bench through the end of the tray. The opening is approximately 8 1/4" from the end of the desk.

► See *Base Power and Cable Capacities*, page 324.

Infills, available for dual-sided benches are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Center infill for triple-sided 120° corner bench can be used to close the space between all three corner legs to conceal large amounts of power and data entering the bench.

Building Interface

Ology Bench

Building power and data can interface with the bench from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

Hardwire-to-modular power infeed is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 6, 12, and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4 $\frac{1}{16}$ " square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

Base power infeeds are not available.

New York power infeeds are available. The junction box is mounted to the cross tube at the end of the cable tray.

A 50" harness is included to reach the first power block in the bench. If shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

End-of-run or intermediate infills cannot be applied at the same location as the New York infeed. New York infeed can be used with shared intermediate infills.

Power and data can enter the bench through the end of the cable tray. The opening is approximately 8 $\frac{1}{4}$ " from the end of the bench.

► See *Cable Capacities*, page 308.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Utility pole connects to the cross tube on a dual-sided or single-sided bench.

Cable Capacities

Series Bench

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power
A Cable hanger, dual-sided unit	96	N.A.	48	N.A.
B Connection kit	96	88	48	44
C Infeed opening at ends of lower tray, dual-sided unit	96	88	48	44
D Vertebral riser	48	40	24	20
E Wire manager	30	20	14	7
F Dual-sided utility pole	96	88	48	44

Tip: Cable hangers have a separate routing area for power. Capacity is not affected.

Tip: The TIA recommends a maximum fill rate of 40%.

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Tip: On 47"W benches, data opening is positioned to the right.

Distribution and Access

Series Bench

Power blocks can be placed on the underside of the integrated rail. Modular harnesses are used to distribute power through the bench.

Power strips can be placed above the worksurface by connecting to the integrated rail or mounting to the worksurface. Power and data or power only are available.

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

Modular harness is used to connect power blocks and distribute power through the bench.

High-capacity power block includes two power blocks and a block-to-block connector, provides back-to-back power, and accepts four receptacles per side.

Voice/data access occurs in the upper tray and can be positioned left or right of the power blocks. Both modular furniture and NEMA faceplates can be used. On 47"W benches, data opening is positioned to the right.

Actual Dimensions

Power and Data Access Door and Tray

Depth	4 ³ / ₄ "
Width	24 ¹ / ₄ "
Height*	N.A.

*Above worksurface.

Wiring and Cabling

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power includes two power blocks and a block-to-block connector. It provides back-to-back power, and accepts four receptacles per side.

Chicago hardwire box is available. It accommodates two receptacles per side.

Duplex receptacles are available in 15- and 20-amps, isolated or system ground, with multiple line options. Receptacles have two outlets and are ordered separately.

Modular flexible receptacles are available in 15-amp, isolated or system ground, with multiple line options. Flexible receptacles offer easy access to three outlets. Receptacles are ordered separately.

Tip: Specify a flexible receptacle ordering a dash or SOTO LED light.

Modular harnesses are used to connect power blocks.
▶ See *Power Routing Harness Chart*, page 306 to determine lengths needed.

Data can be terminated and accessed in the upper tray—either left or right of the power. Exception: On 47"W benches, data opening is positioned to the right. Both modular furniture and NEMA faceplates can be used.

Cable hangers attach to the underside of the integrated rail to manage the routing of voice/data cables. They are included with all dual-sided base and connection benches.

Upper tray is standard and provides cord management and data termination.

Flexible receptacles may be necessary depending on plug size and orientation. Overall height of upper tray is 2 1/8".

The lower tray is standard and is always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables, creating a clean visual.

Extension vertebral riser can be used to conceal conduit and cables along the floor. Length is 15". Risers can be linked to each other for longer length requirements.

Upper tray cover is standard and conceals the power blocks. Upper tray cover provides access for cables and cords to pass through the attached wire manager. Power and data is maintenance accessible by removing the upper tray cover. Devices are plugged in and the cables are routed through the wire manager to the worksurface. This application is intended for those devices that will remain plugged in and are not managed by users.

Block-to-block connector is included with high-capacity power. It can also be ordered separately, along with another power block, to convert standard-capacity power to high-capacity.

Filler packages are available to fill unused power or data options. Order separately in packages of 20.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color coded to make it impossible to connect mismatched parts.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Application Topics

When ordering dash or SOTO LED lights, you must specify flexible receptacles.

▶ Page 337.

Building Interface

Series Bench

Building power and data can interface with the bench from the floor, wall, add ceiling or column. Both modular and hardwire infeeds are available.

Utility poles connect to dual-sided Series 5 or 8 connection benches. Pole attaches to the integrated rail on the bench. Pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

A vertebral riser is available to conceal the power and data.

Infeeds can enter the bench at either end or in between benches at the connection kit.

The infeed can enter between the FrameOne end panel and bench utilizing connection bracket.

When infeed enters at the connection kit or end-of-run, conduit and cables will be visible for 9¼" until entering the lower tray.

Wiring and Cabling

Hardwire-to-modular power infeed is available in 12 and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 12 and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4 $\frac{1}{16}$ " square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

New York power infeeds are available. The junction box is mounted to the connection kit.

A 50" harness is included to reach the first power block in the bench. If shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

Base power infeeds are not available.

Extension vertebral riser can be used to conceal conduit and cables along the floor. Length is 15". Risers can be linked to each other for longer length requirements.

Lower tray is located 9 $\frac{1}{4}$ " from the floor.

Power and data can enter the bench through the end of the lower tray. The opening is approximately 8 $\frac{1}{4}$ " from the end of the desk.

► See *Base Power and Cable Capacities*, page 324.

Power and data can enter the bench through the connection bracket when attaching a FrameOne end panel. The opening is approximately 3" from the end of the end panel.

Power and data can enter through the lower tray of the connection kit. The center line is between two benches.

The lower tray is interchangeable either right- or left-hand on the connection kit. Placement determined at install.

Closed shrouds are cosmetic and will not fully conceal conduit and cables. Shrouds encase individual lifting columns and only allow 2" inside width clearance.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

- Paint

Tip: Connection kit trays were previously defaulted to paint finish 7237 Slate.

Floor Base Power Location

Power infeeds can enter into the lower tray in multiple locations:

- Two locations on a base or connection bench
- Connection kit center line
- Connection bracket center line, if specifying a FrameOne end panel

USB Two-Outlet Powerstrip with Clamp Mount

► Specifying, page 350

Product Details

USB two-outlet powerstrip with clamp mount is standard with two USB ports, two power outlets, and a 9' cord.

USB two-outlet powerstrip clamps onto worksurfaces $\frac{1}{2}$ " to $1\frac{1}{2}$ " thick.

Each USB port can utilize up to 2.1 amps. Each port is independent of the other.

Weight 0.77 lb

Product Details

Power and data access door is available on all dual-sided benches. Specify with worksurface cutout and order the power door style separately. One door is centered on the worksurface and allows user access to power and data outlets as well as cord management.

Data cutout in trays can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate. Data cutout trays are ordered separately.
► See *Distribution and Access*, page 312.

Access holes in tray allow power and data to be routed straight back.

Height of tray is 4 3/4" so lower storage height must be accounted for when used adjacent to tray.

10' cord with plug is standard. Cord and plug option can only be used with height-adjustable tables.

Cord and plug version has an integrated overload circuit breaker.

Three power strips are available—power only with rail attachment, power and data with rail attachment, and power and data with worksurface attachment.

Upper tray cover is standard and conceals the power blocks. Upper tray cover provides access for cables and cords to pass through the attached wire manager. Power and data is maintenance accessible by removing the upper tray cover. Devices are plugged in and the cables are routed through the wire manager to the worksurface. This application is intended for those devices that will remain plugged in and are not managed by users.

The lower tray is standard and always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables creating a clean visual.

Wiring & Cabling

Available with an 8' or 10'-long cord with plug, depending on option.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Application Topics

Flat panel monitor arms cannot be mounted behind the power and data tray cutout. It must be C-clamped to the side of the cutout.

Lighting and Worktools

Statement of Line **356**

LED Personal Task Lights **360**

LED Personal Task Lights **362**

Worktools **363**

Statement of Line

Personal task lights

offer end users added control and adjustability to place the proper amount of personal lighting to create a holistic worksetting. Ideally suited for rail-mount, desk, or freestanding applications.

LED Lights

Rail-Mounted and Non Rail-Mounted

LED Personal Task Lights

Mounting

- Rail-mounted attaches directly to rail systems in Ology, c:scape, FrameOne, Elective Elements, turnstone Campfire big table, and SOTO Rail. The non rail-mounted version attaches to most freestanding desks and tables. *Tip: Non rail-mounted LED personal task lights will not work on worksurfaces with knife edge that is longer than 1 1/4", or with modesty panels or modesty screens closer than 6" from the back edge.*

Description

Intended to be a primary light source, LED personal task light covers the user's active work zone with a smartly-designed array of light. The light is specifically designed to direct light where it is needed. Energy efficient at only 12.6 watts, LED personal task light is engineered to have a useful life of over 50,000 hours. It attaches directly to the rail systems of Ology, c:scape, FrameOne, Elective Elements, turnstone Campfire big table, and SOTO Rail. A non-rail mounted version attaches to freestanding desks and tables.

Finish Options

- Fixture and stanchions, paint: 4231 Arctic White, 4710 Low Gloss Black, 4799 Platinum Metallic. Plastic cover Arctic White (6009) only.

Optics

- Polycarbonate matte film

Ballasts

- Energy saving low-voltage power supply

Electronic Dimmer

- Standard on all lights

Average Rated Lamp Life

- 50,000 hrs.

Warranty

- Power supply - 5 years
- Fixture - 12 years

LED Personal Task Lights

► Specifying, page 362

Product Details

Personal task light includes the lamp and power supply with cord set. Rail-mounted version includes rail brackets. Non rail-mounted version includes Universal Mounting brackets.

Power supply is an 18 watt two prong driver plug with 9' black cord.
Tip: Energy saving mini-LEDs greatly reduce power use.

When specified with Height-Adjustable Series Benching or power and data tray, flexible receptacles are recommended.

Non rail-mounted LED personal task lights will not work on worksurfaces with knife edge that is longer than 1 1/4", or with modesty panels or modesty screens closer than 6" from the back edge.

Connections

LED personal task light mounts directly to the rail systems of Ology, c:scape, FrameOne, Elective Elements, turnstone Campfire big table, and SOTO rail.

Wiring & Cabling

Personal task light includes the lamp and power supply with cord set.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

SOTO LED Lights

Tip: Rail-mounted bracket of SOTO LED may occupy the same space as a SOTO 3½", 6¾", and 10¼" shelf extending over the shelf itself.

Tip: 90° mini extension cord can be used with Ology bench, FrameOne, or where power receptacles are located in confined spaces.
▶ See Worktools Specification Guide.

Tip: Rail mounted SOTO LEDs will fit in front of c:scape privacy screens.

Tip: When using or installing a dash or SOTO LED light on Ology bench, the light cannot be plugged into the base or integrated power tray. Instead, plug into a power strip.

Standard Includes	Required to Specify

Eyesite Dual Display Supports with FrameOne Mounting Brackets

Tip: When mounting dual or triple Eyesite on stand-alone, single-sided FrameOne base units, the worksurface must be 66"W or greater and must be used with Eyesite standard crank adjustable column only.

Tip: Eyesite dual display support is for use with two monitors up to 27" or less screens and up to 20 lb each. 27" monitors should be use with extended 18" column assemblies or taller.

Tip: When planning with stand-alone, single-sided FrameOne base units, and dual or triple monitor arms, the worksurface must be 66"W or greater and monitor arm must be 15½"H maximum.

Tip: Eyesite flat panel monitor arms with laptop supports are not recommended for use with docking stations.

Tip: Monitor cables that connect to the rear of the monitor near the VESA plate will not fit properly on the Eyesite extended static column.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$74 U.S. per unit, plus the cost of the laminate. When processing orders for Open Line laminate on FrameOne or Series benches, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate. Laminate Approval and Material Requirements to confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

For additional information, refer to the *Surface Materials Reference Manual*.

Tip: OLL is not available on FrameOne dual-sided end panels or infills.

Wood

Applies to:

- FrameOne dual- and single-sided base and extensions
 - FrameOne end counters
 - FrameOne infills and mid storage tops (exception — no full-fill finish)
 - FrameOne single-high overhead cabinets
 - FrameOne organizer shelves
 - FrameOne boundary screens
 - media:scape
 - Ology bench worksurfaces
- Tip: Wood veneer worksurfaces for Series benches are available through specials.*

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Flat-cut open-pore finish choices

**To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.*

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Quarter-cut open-pore finish choices

Wood Group 2

3032	QC/OP Dark Thin Line Bamboo
3052	QC/OP RibbonSapele

Wood Group 3

3832	QC/OP Figured Anegre
3842	QC/OP Figured Makore

Tip: Full-fill finish is not available on Premium veneers as a standard. To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000755 for 3032, form number 09-0000757 for 3052, form number 09-0000758 for 3832, and form number 09-0000759 for 3842.

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Flat-cut open-pore finish choices

Wood Group 1

Planked Veneer

Planked veneer is available in the Select Surfaces offering. Planked veneer may have extended leadtimes. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the planked veneer offering:

Wood Group 1

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

Ⓔ = Established

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Tip: Alloy P525 Polar and P526 Skim are light in color. As a result, some lighting conditions can reveal a "picture framing" effect around the edge of the screen. Steelcase recommends ordering a test screen in these two finishes, for approval by the customer, before purchasing large quantities.

FrameOne Wood Veneer Grain and Directional Laminate Application

Wood veneer and directional laminates are standard with the grain directions shown.

Wood is a natural, unique, and always changing material. No two pieces are the same. The appearance of each surface will vary based on a piece's individual grain pattern, underlying color, and characteristics (like gum pockets and pin knots). While the finishing process is identical for all pieces, each finished piece celebrates wood's individual beauty.

Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

When specifying directional grain laminates and veneers on boundary screens, there are some things you need to know.

Lock and Keying	392
Style Number Index	394

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

► See below.

Key Random

Required to Specify

Master key random	+\$27	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation — random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

► See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
