Credit, Prices, and Terms

Credit may be established upon acceptance of satisfactory references. For payment terms, contact Coalesse's Credit Department. Coalesse may cancel or change credit terms at its discretion and may request advance payment at any time.

The order confirmation will be deemed by the customer and by Coalesse, as the final expression of agreement and will be deemed the exclusive statement of terms. The order confirmation supersedes all prior writings and may not be modified or rescinded, except by a revised Coalesse order confirmation signed by the customer. No changes are binding on Coalesse until delivery of the order confirmation. Any storage charges and applicable sales taxes are in addition to the prices shown for merchandise. Inside delivery, uncartoning and installation are customer's responsibility unless separately quoted. All list pricing shown includes freight prepaid to one destination for delivery in the 48 contiguous United States. Hawaii and Alaska are not included. We reserve the right to increase prices without notice due to increases in labor and material costs. If timely payment is not made, customer is liable for reasonable collection costs, including attorney's fees.

Shipping and Storage

Coalesse reserves the right to select carrier and packaging method. Partial shipments may be delivered. Coalesse is not liable for delays or delivery failure due to strikes, lockouts, labor, or transportation difficulties, failure or delay of supply sources, accidents, fire, acts of God, or any other cause of like or unlike nature beyond Coalesse's control. Coalesse may transfer merchandise to storage if not accepted when shipment scheduled. Transfer and storage charges will be the customer's expense. Coalesse's invoice is payable upon transfer. If transfer is made prior to confirmed shipping date, storage expenses will be borne by customer.

Shipping charges MAY be calculated per order. Lead times vary by product. Coalesse reserves the right to select carrier. Partial shipments may be delivered. Coalesse will make every effort to provide current and accurate lead time information, however, Coalesse is not liable for delays or delivery failure due to strikes, lockouts, labor, or transportation difficulties, failure or delay of supply sources, accidents, fire, acts of God, or any other cause of like or unlike nature beyond Coalesse's control.

Freight is included on domestically manufactured products within the 48 contiguous states of the United States and standard freight service of Carl Hansen & Son and Emu.

Claims

Merchandise shipped from Coalesse is thoroughly inspected and properly packed before leaving the factory. Responsibility of its safe delivery is assumed by the carrier at the time of shipment. Customer must match the freight delivered with the bill of lading. Customer must examine packaging material upon delivery and note any damage on the carrier bill of lading. If there is damage to the packaging material, inspect the furniture immediately. If concealed damage is found, contact the carrier within 10 days of delivery date. Save all packaging materials until after inspection.

Freight damage and claims must be reported by the purchaser to the carrier. Coalesse is not responsible for freight claims. Claims for loss or damage must not be deducted from our invoice, nor payment withheld awaiting adjustment of such claims. Do not return any merchandise to Coalesse without a Return Authorization number. By following these procedures carefully, Coalesse guarantees our full support of your claims to protect you against loss or damages. All claims against Coalesse for errors or shortages must be made by customer in writing within fifteen (15) days after delivery. Failure to make claims within fifteen (15) days constitutes acceptance of merchandise and waives claims. Cutting of textiles deems acceptance of yardage and waives all defects, errors, and shortages. Coalesse is not liable for subsequent damages.

Ordering and Warranty

Order Cancellations/ Changes

All order change/cancellation requests must be submitted using the Coalesse order change/cancellation request form. Late changes could jeopardize the committed delivery of an order.

Coalesse Rapid10 programs no change or cancellations allowed.

Coalesse Products:

- No charges will be assessed for change or cancellation 14 or more calendar days prior to the manufacturing completion date (excludes holidays and/or large quantity project size orders). For import products, charges may apply.

- No manufacturing changes are allowed 0-13 calendar days prior to the manufacturing completion date. Simple changes including shipping address changes are subject to approval but will be accommodated when possible.

- No cancellations or product changes will be accepted for quick ship or special/custom product orders including special laminates. A cancellation fee will be applicable for any custom product and/or change may jeopardize lead time.

- If COM/COL has been received at time of change or cancellation, it is the dealer's responsibility to advise disposition or return of materials. Coalesse will not store materials after 30 days.

Additional Charges

- Changes or cancellations that involve any of the following may be subject to a charge earlier and/or greater than shown above: Special engineering product, CSM, pre-ordered components, materials with extended lead times (e.g., veneers, special paint, etc.) or large quantities of standard materials.

- Use our Order Change/Cancellation Request Form for all order changes. It is Coalesse responsibility to accurately process change order requests. It is the dealer's responsibility to verify that we have accurately interpreted your change requests by checking the acknowledgment after the change has been made. If you do not use the web-based change order form process and an error occurs during our translation which cannot be corrected prior to ship, all costs will be shared on a 50/50 basis. Changing ship dates or adding product to your order is subject to the availability of manufacturing capacity.

- Cartoning changes and shipping address changes are subject to approval and to a change charge. Please consult your Customer Service for specific information pertaining to your order.

Reserved Fabric Policy

Prior to order receipt, reserving textiles (COM/COL, Maharam, Designtex, and select Luna Graded-In) is the responsibility of the dealer. Coalesse cannot reserve textiles based on projected orders. Coalesse cannot guarantee Maharam or Designtex fabric availability. If dealer reserves Maharam or Designtex textiles, Coalesse will require the reserve number and zip code for locating purposes when ordering.

Schedule Enhancements

Coalesse will entertain schedule enhancements on a case-by-case basis; however, please understand that we must receive complete information such as installation date, opening date in order to make informed scheduling decisions.

No order move-ups or move-outs are allowed on any order that falls within the 15-working day period of its manufacturing completion date. If it is within the 15-working day period, Coalesse will invoice at shipment but may offer storage options at a charge for manufactured product.

The Coalesse Rapid10 program provides a broad selection of our most popular seating, outdoor furniture, and tables with expedited manufacturing. Sustainability and SCS Certifications

As our understanding of sustainability evolves in the contract furniture business, Coalesse is being launched on three important fronts: responsibly harvested woods, better ways of plating metal, and manufacturing for the highest level of durability. To ensure all new products are socially responsible, we have engaged the "cradle-to-cradle" design consultancy, MBDC, to advise us and provide third-party analysis of the materials and processes we use to create our products. As Coalesse grows, social responsibility will be an essential part of our decision-making, from design to disposal. We believe that our success on the environmental front will be built on the accumulation of a multitude of small steps and the occasional big leap. We are starting with a green outlook and we have every intention of growing greener.

SCS Certifications

For SCS/IAQ and level certifications, please go to <http://www.coalesse.com/products/>. Click on a product category, then click on product line for desired certification. Look under Professional Resources, then find Environmental Profile to find certification(s), if available.

Woods: FSC Certification

Our policy with wood sourced from outside North America and our approved European partners is that they must be certified by The Forestry Stewardship Council (FSC) to ensure these woods have been responsibly harvested from sustainable forests, and that the rights and welfare of workers and local communities are being respected. Through an FSC label, wood can be traced back to its original source of supply.

Chrome: A New Alternative to Metal

Chromed steel is a mainstay of the contract furniture industry because it is considered a premium finish with high durability. But depending on the type of chrome processing used, it can have a detrimental impact on human and environmental health. The most common method of chrome plating uses hexavalent chrome, a known carcinogen and considered by MBDC in their color-coded rating system (green, yellow, red), to be a "hard-red" chemical. There are no health hazards associated with chrome once it has been applied, but the hexavalent chrome electroplating process can be hazardous.

Is there an alternative? Coalesse is opting for a safer method of plating and has partnered with a domestic supplier who uses only "trivalent" chrome, a non-carcinogenic form of the metal. Few, if any, metal finishing processes are without environmental challenges, and chrome is no exception. Working with the best technology currently available, we will continue to seek new and better alternatives.

Building to Last

Building longevity into products is an important sustainability strategy. A chair or table that lasts for 50 or 100 years or more will not have to be replaced, saving the materials and finishes and embodied energy from being duplicated in another form. Coalesse is quality furniture designed to outlast its buyers. We hold up Hans Wegner designs as the model of longevity—pieces manufactured a generation ago are still prized possessions today. Our hope is that every piece in our collection appreciates in value over the years, so it will be passed on.

Ongoing Audits

As the Coalesse collection grows, our intention is to live by the cradle-to-cradle (C2C) philosophy described by MBDC this way: "Instead of designing cradle-to-grave products, dumped in landfills at the end of their 'life,' the goal is create products for cradle-to-cradle cycles, whose materials are perpetually circulated in closed loops. Maintaining materials in closed loops maximizes material value without damaging ecosystems." Coalesse has contracted MBDC to audit the materials used in the majority of our existing products, and to advise us as we develop new products. We intend to achieve Cradle to Cradle certification on the highest percentage of products possible. As Coalesse grows, social responsibility will be an essential part of our decision-making, from design to disposal. We believe that our success on the environmental front will be built on the accumulation of a multitude of small steps and the occasional big leap. We are starting with a green outlook and we have every intention of growing greener.

Product Details

Individual work-booth area provides an alternative to a confined workstation. It offers a semi-private setting for temporary tasks that require projects to be spread out. It is created by grouping two straight sectionals or lounge chairs with a 27"H work-booth table.

Tip: Extended corner sectionals or straight sections with arms should not be used in a work-booth application because access to the seating area is obstructed.

Lounge chairs are available with or without upholstered back screens. Models with upholstered arms are also available.

Sled lounge chairs feature a compact base that is designed for small spaces or to be used flush against the wall. They are available with or without upholstered arms or a tablet arm.

Sectional seating is offered in corner, extended corner, and straight units to provide a variety of configurations. They are offered with or without back screens and with or without arms. All sections include an integrated ganging device. Corner sectional units are handed. Handedness is determined by the location of the back screen or back support legs.

Bench provides a backless seating option. It can also be used as an alternative soft occasional table. An open storage space that is accessible from either side is available for storing magazine and media equipment.

18" seat height is an available option on all lounge, sectional seating, bench, and podiums. This option should not be used in conjunction with work booth tables. It allows a higher sit for healthcare applications.

Podium serves as a focal point for lounge-based meeting spaces and provides comfortable seating for the presenter. A lockable storage drawer secures projection equipment or presentation tools. A fixed tablet arm provides a surface for presenter's notes, laptop computer, or wireless mouse.

Integrated projection screen is available on select podium units for slides or projected digital media. It can also be used to divide an open space. The screen is a fine white mesh that allows light to filter through when the screen is used as a space divider. It also accommodates a Steelcase huddleboard.

Multiple fabrics can be specified on lounge, sectional, and podium seating units for an additional fee per specified fabric.

- Seat cushion and sides of seat cushion - no additional fee
- Back cushion and sides of back cushion - additional fee
- Back screen (if selected) - no additional fee
- Armrest (if selected) - no additional fee

► See *Bix Multi-Fabric Diagram and Yardage Request Form*, pages 63 and 68.
Tip: Fabric for the seat and back is specified separate from the back screen, if selected. For a monochromatic look, specify the same fabric for both the seat and back and back screen.

30"W corner sectional units are available with the two fabric direction options for the seat - railroaded or cut-right. Seat fabric direction is determined by its relationship to the back screen or back support legs.

Tip: Seat fabric on extended corner and straight sections is always railroaded.

Bridge tables integrate with Bix sectional seating to create a range of lounge-based applications and are available with two top shapes - rectangular and corner. Translucent screens are available to create a sense of visual privacy for open space environments. The worksurface is available with or without a grommet and an optional power, voice, and data module. The rectangular table features an integrated 18"W x 12½"H tilted display surface for magazines or project folders.

Tip: Bridge tables are used with sectional seating. They do not attach to benches or podiums.

Corner bridge tables are offered in 20" table height option to be used with the 18" seat height option only.

Occasional tables are free-standing 18"H tables that can be used a variety of lounge applications. They are available with a round, square, or rectangular top. The tops are available with or without a grommet and an optional power, voice, and data module. ► See occasional tables section in *Coalesse Tables, Storage, and Accessories Specification Guide*.

Plastic edge Wood edge

Edge detail is available in either plastic or wood edge.

Work-booth tables are free-standing 27"H tables that are used with sectional seating to create a work-booth configuration. They are available with either a round or rectangular top. The tops are available with or without a grommet and an optional power, voice, and data module. Base features a low profile for foot clearance.

► See *Coalesse Tables, Storage, and Accessories Specification Guide*.

Side table offers a freestanding, mobile tablet surface. The tripod base allows it to be positioned close to a seating unit. The top is available in vinyl.

► See *Coalesse Tables, Storage, and Accessories Specification Guide*.

Back screen is available on lounge and sectional seating. It is fully upholstered with a zipper detail. However, it is not removable. Back screens must be ordered with the chair. It cannot be retrofitted to an existing backless lounge chair or seating sections.

Connections

Integrated ganging device, included, connects sectional seating units together in the field. It is not intended for user reconfiguration.

Bridge tables connect on both sides between sectional seating units. A rectangular top is used in an in-line configuration. A corner top is used in an L-shape configuration.

Exception: Bridge tables cannot attach to a seating unit with arms.

Lounge chairs are independent and are not intended to connect to sectional units or bridge tables.

► See *How To Plan*, page 52

Wiring & Cabling

Bridge tables are available with a grommet, factory installed, to allow cords and cables to pass through the top. Wire management clips, attached to the underside of the top, are used to route cords and cables. A power, voice, and data module can be inserted in the grommet.

Occasional and work-booth tables are available with a factory-installed grommet located over each column and base to allow cords and cables to pass through the top. A power, voice, and data module can be inserted in each grommet location.

► See *Coalesse Tables, Storage, and Accessories Specification Guide*.

The work surface cutout for the grommet and PVD is 3 1/2" in diameter.

Column and base of occasional and work-booth tables are used to route and conceal cords. The cords pass through the work surface down through the column and out through a mouse hole in the base plate. Bases may be installed with the mouse hole facing in any of four directions, depending upon where cords need to exit for access to power/data/voice in the wall or floor. Cords should be routed through the concealed channels and out the mouse hole during the installation of the table base.

Hole at the top of each column allows cords to be routed between tables directly below the work surfaces. Wire management clips are included for routing purposes.

Power, voice, and data module can be installed in the grommet locations to bring power and communication to the work surface. Each module is equipped with two 110 volt electrical outlets and one snap-in voice/data module insert consisting of dual CAT 5 RJ45 universal T568A/B jacks. It is UL listed and CSA certified. It has a 6' power cord. For additional data/voice outlet options, please contact Metro Customer Service at 1.800.627.6770.

Hardwired applications require on-site modifications by a licensed electrician following all local electrical code requirements.

Tip: The base will accommodate a 3/8" diameter flex-conduit.

Programs & Services

Customer's Own Material/Leather (COM/COL) Program is available.

► See *Coalesse Surface Materials Reference Guide* for additional information.

Note: Due to unusual upholstery conditions inherent in the design of Bix, not all seating fabrics may be specified. Refer to <http://fabric.coalesse.com/> for a list of pre-approved Desintex fabrics on Bix.

Pre-approval is required for all COM fabric. Also, due to the geometric shapes and flat planes of the Bix design, seat fabric tautness will vary depending upon the amount of stretch in the fabric. Leather naturally stretches with use.

Configuration guidelines —
work settings with benches,
bridge, and occasional tables.

A variety of configurations may be created to support lounge-based meeting spaces using the Bix podium as a focal point. Occasional and bridge tables support media projection equipment. As projection equipment varies, you will need to verify the distance required between the equipment and projection screen when planning your space. The examples below are suggested layouts.

Configuration Examples

Bix Lounge System

How To Plan

DESIGN METRO DESIGN GROUP

Configuration guidelines – work-booths with 27" high tables

Two straight sections are grouped with 27" high tables to create work-booth applications. Lounge chairs may also be specified with 27" high tables to create a two-person work-booth. Facing seats edges should be spaced 24"–27" apart from one another to accommodate leg clearance and maintain the correct user relationship to the worksurface. The table base is centered within the 24"–27" space.

Configuration Examples

Configuration guidelines – work settings with 18" high tables

A variety of configurations may be created by combining sectional seating and 18" high tables. The Bix system is built upon a 12"/24" dimension module for planning. Seats are 24" wide. Rectangular tables are 24" deep. Tables are spaced 12" from seat edges. A 24" opening should be maintained for large 360° group enclaves.

DESIGN METRO DESIGN GROUP

Configuration guidelines – DON'TS

- 30" wide corner sections are not intended to be freestanding. 30" wide corner sections must always be connected to an adjoining 54" wide extended corner or straight section, using the ganging hardware provided.
- Individual lounge chairs are independent elements not designed as a module within the seating system. The lounge chair seat is wider than the 24" system module and lounge chairs do not include ganging hardware. Bridge tables also do not connect to lounge chairs.
- Do not create a U-shaped configuration with a 27" high rectangular table. Access to the closed end is difficult and the table edge is too far from reach for the user.
- Do not use 54" wide extended corner sections or straight sections with arms to create a work-booth configuration with 27" high tables. Access is obstructed.
- Bridge tables must be connected on both sides to a seating section.
- Bridge tables do not connect to seating sections with arms. Seating sections do not gang with arms at the seam.
- Do not attach 30" wide corner sections to a corner bridge table. This application does not allow enough leg room for two users.
- Bridge tables do not attach to benches or podiums.

Orientation & fabric direction

Corner units are handed from a facing position. Handedness for 30"W corner units is determined by the location of the back-screen or back support legs. Location of back-screens should be considered for each configuration. In order to create a consistent pattern across seats in the configuration,

30"W corner units are available with two seat fabric direction options. Seat fabric direction is determined by its relationship to the back-screen or back support legs. Seat and back fabric on 54"W extended corner and straight sections is always railroaded.

Examples below assume a striped patterned fabric:

*Fabric yardage is based on non-directional/solid fabrics. Use conversion chart below for repeat/printed fabric yardage.

Non-standard fabric requirements

Yardage requirements shown are based on non-directional 54"W material applied railroaded. Coalesse will apply fabric railroaded unless instructed otherwise on the dealer's purchase order. The following conversion chart should be used to determine yardage requirements when COM has a repeat of 2" or more. Please contact Coalesse Customer Service for a yardage quotation if the fabric is less than 54" wide, has a repeat of more than 24", or if the fabric must be cut-right.

CONVERSION CHART

PRODUCT	REPEAT		
	2" - 8"	9" - 14"	15" - 24"
Bix	15%	30%	75%

Yardage quotations will also be provided for order of 10 or more pieces.

Pattern matching on Bix

Due to Coalesse's high standards for pattern matching, we reserve the right to apply the following upcharges for extra labor incurred by a pattern or material that poses such challenges.

Customers will be informed if an upcharge will be applied to their order during the approval process. Should Coalesse receive an order without prior approval, it will be held as pending until the customer accepts such charges. The upcharge will be applied per item where applicable.

Cutting direction guidelines

Cutting direction is based on the fabric width and the way the fabric is cut from the roll and applied to Coalesse products. There are two cutting directions: railroaded or cut-right.

Horizontal or railroaded (across roll, warp horizontal) means fabric is cut across the roll; selvages are on the top and bottom.

Vertical or cut-right (down roll, warp vertical) means fabric is cut in the same direction it is woven; selvages are on the left and right sides.

Coalesse reserves the right to railroad or apply fabric according to weave unless instructions specify otherwise. Fabrics are railroaded when possible to avoid seams in large upholstered areas and/or single cushion units. If a fabric is questionable, a cutting of adequate size showing full repeat (if any) should be sent to Coalesse for a fabric requirement quotation.

Fabric and knit, combined with high and low panels, allow for a full range of aesthetic and functional possibilities. Benches complement the range of lounge pieces. Work, occasional, and personal tables are curated to work specifically with Lagunitas lounges and benches. Integrated power options for the lounges, benches, and tables are available. Lagunitas supports existing and emerging work activities in an endless number of social, collaborative, and personal settings.

Tip: This product line is part of a collection and will be found in multiple locations in this specification guide and/or Coalesse Tables, Storage, and Accessories Specification Guide.

► See *Collections*, page 5.

All corners are standard with a stationary corner cushion for all 2- and 3-seat lounges and chaises. Arm cushions are optional on units with left- and right-hand screens to allow for articulating backs on all back cushions.

Welt cord is standard on fabric screens and will match the outside screen fabric selection if contrasting is selected.

Seat deck is available in knit or fabric and must be same material as the screen.

Lounges and chaises are standard with two glides per screen section or seat deck. Each glide can adjust $\frac{1}{2}$ " for uneven floors.

Lounges and benches are offered in 1-, 2-, and 3-seat models. The chaise is offered in 2- and 3-seat models. The corresponding table offering works with the seating dimensions for complete systematic compatibility.

Screens are available in two heights for lounges and chaises. Low-back screens are 26 $\frac{3}{4}$ "H and high-back screens are 50"H. Overall height of low-back units is 32 $\frac{3}{8}$ ".

Screens are available in knit or fabric.

Articulating back is standard on lounges and chaises which allow user to change from a lounge position to a task position within the same unit. An integrated pull at the top and bottom intuitively identifies the back and aids in the function of the back.

Lounge units can be connected together to create permanent connections for L- and U-configurations. The alignment connector bracket package includes two brackets to connect the seat decks and one screen alignment clip to keep the screens aligned.

Tables are offered in three types; work, occasional, and personal tables. 26"H table dimensions are curated to work with the lounge pieces for optimal compatibility. 28 $\frac{1}{2}$ "H work tables are compatible with standard height seating.

► See *Coalesse Tables, Storage, and Accessories Specification Guide*.

Table bases and columns are standard in powder coat paint.

Table glides are non-adjustable and are clear plastic.

Personal table tops are standard in High-Pressure Laminate with 3 mm plastic edge or Fusion fabric.

Work and occasional table tops are standard in High-Pressure Laminate with a 3 mm plastic edge or wood veneer with a 3 mm matching edge profile.

Screens are offered in two types of materials, knit and fabric. The knit panels allow for some transparency and light to pass through the panels. The fabric panels can be either monolithic (non-contrasting) or can be specified in differing finishes (contrasting) for the inside and outside of the screen.
Tip: If a contrasting screen is specified, the fabric must be chosen from the same fabric family.

Seat deck is offered in two types of materials, knit and fabric. The seat deck material must match the screen material. If knit is specified on the screen, the seat deck will be applied automatically to the screen choice. If fabric is specified, seat deck must match either the inside or outside screen finish if contrasting is selected. When non-contrasting fabric screen is selected, seat deck will match screen fabric.

A welt cord is standard on all fabric specified screens and seat decks. The welt cord finish is non-specifiable and is the same fabric finish as the outside screen specification when contrasting screens are specified. For non-contrasting screens the welt cord matches the screen specification. The knit screen and seat deck does not require a welt cord.

Lagunitas Lounge System *continued*

DESIGN TOAN NGUYEN

Screens and seat deck can be specified in:

- Knit
- Fabric (one fabric choice)
- Contrasting fabric (must be from fabric family)
 - Inside screen
 - Outside screen
 - Seat deck must match either the inside or outside fabric choice

Tip: Leather and vinyl are not approved for the screen(s) and seat deck. Consult the fabric database for fabric approvals.

Tip: It is important to understand the seat deck implication for contrasting fabric selection when two or more pieces are attached or adjacent to each other. The seat deck for contrasting fabric specification is either the outside screen (top example) or inside screen (bottom example).

Seat back and seat cushions can be specified in:

- Fabric or leather (one fabric choice)
- Contrasting fabric or leather
 - Seat backs
 - Seat cushion
 - Top and bottom pulls on articulating back cushion(s)

The seat back, seat cushion, as well as, top and bottom pulls on the articulating back can be specified in fabric or leather. It can be specified as non-contrasting, one finish; or contrasting, finish for back cushions(s) and finish for seat cushion. Specification of back cushion is for all back cushions for that style number. Specification of seat cushion is for all seat cushions for the style number.

Comfort wrinkles are intended to occur over the time to increase the comfort of Lagunitas. Very little maintenance is required to reduce the definition: smooth the cushion fabric with a spreading/wiping motion.

Work tables are available in six differing sizes, ranging from 30"W to 72"W that coordinate with the lounge dimensions to create a variety of social, collaborative, and personal applications. The work tables are available in two heights: 26"H and 28½"H. The work tables are comprised of a single column rectangular base in powder coat paint and a rectangular table top in laminate with matching or complementing 3 mm flat edge band profile or wood veneer with matching 3 mm flat wood edge band.

Occasional tables are available in two sizes, 32"W and 48"W, that coordinate with the lounge, chaise, and bench dimensions. The occasional tables are comprised of a single column with rectangular base available in powder coat paint and a rectangular table top in laminate with matching or complementing 3 mm flat edge band profile or wood veneer with matching 3 mm flat wood edge band.

Personal table is available in one size. It can easily be moved to your desired location for short term laptop work or simply used to set your coffee. The personal table is comprised of a single column with rectangular base available in powder coat paint and a rectangular table top in laminate with matching or complementing 3 mm flat edge band profile or a Fusion fabric-wrapped surface.

16" seat height is standard on all seating and benches. The 16"H seat height integrates specifically with the heights of all Lagunitas tables. There is an additional 1¼" crown of the seat cushion, which makes it 17¼" to work with the 26" work table height.

Two screen heights are available, 26¾"H for the low-back screen and 50"H for the high-back screen. Seat back cushions extend above the low-back screen, therefore, the overall height of low-back units is 32¾"H. Low-back screens are designed to provide an open environment. High-back screens are designed to provide privacy.

Lagunitas Lounge System

Seat depth accommodates two depths due to the articulated back design. In the lounge position, the seat depth is 22 1/2"D and in the task position, the seat depth is 17 3/4"D.

Lounge

Bench

The overall seat depth on benches is 32 5/8"D. The overall depth for lounge seating is 34"D.

Two seat widths are available, 25 9/16"W and 32 11/16"W. When specifying corner or end cushions, the 32 11/16"W module is used. The corner cushion and end cushion account for 7 1/8" of the 32 11/16" width, equating to the same seating space as the 25 9/16"W module.

Exception: 1-seat lounge with three screens has an overall width of 46 7/8" allowing for a seating space of 32 11/16"W.

An additional 1 13/16" thickness for each end screen or corner is added to the seating width to obtain the overall width of the product.

Corner cushions are standard when specifying two or three screens with closed end(s). Corner cushions are fixed and do not articulate.

Two end cushions with two articulating backs

Two corner cushions

Two end cushions with three articulating backs

Two corner cushions with middle articulating back

Two corner cushions or two end cushions are available on all 2- and 3-seat lounges when back, left- and right-hand screens are specified. If articulating backs are specified, end cushions are required.

Lounge position

Task position

The articulating back is standard on all lounges and 3-seat chaises (2-seat chaises are only available with a corner cushion). The articulating back allows the user to easily change postures from a lounge position, when the back cushion is fully upright, to a task position, when the seat back is articulated down. Simply use the integrated pulls, one at the top and one at the bottom, to position the seat back to the desired position. The articulating mechanism is completely hidden behind the back cushion, and attaches the cushion to the seat frame.

Pulls at top and bottom of all articulating backs aid the user to change from a lounge position to a task position and back to the lounge position.

Glides adjust 1/2" for uneven floors. There are two glides per screen and/or seat deck. Glides have a metal rounded foot.

Space is available under the seat deck of all Lagunitas seating to provide a place to temporarily store personal items. The clearance height, without power module(s), is 10 3/4" and the depth is 32 11/16".

Work tables are available in two heights: 26"H tables are optimized to work with the lounge seat height, while 28 1/2"H tables work with standard height seating.

Occasional tables are available in one optimized height, 16"H, to work with the lounge seat height.

Lagunitas Lounge System *continued*

DESIGN TOAN NGUYEN

All work and occasional tables have a rectangular metal base with a centered column. The 3" column includes a cone at the top that attaches to the work surface. There are five rectangular base dimensions:

16"D x 23⁵/₈"W x ³/₈"H for 18"D x 32"W, 24"D x 30"W, and 24"D x 36"W work tables; 16"D x 31⁵/₈"W x ³/₈"H for 18"D x 48"W occasional table; 21"D x 28¹/₂"W x ³/₈"H for 36"D x 40"W and 36"D x 48"W work tables; 21"D x 35"W x ³/₈"H for 36"D x 57"W x work table; and 21"D x 35"W x ¹/₂"H for 36"D x 72"W x work table

The personal table is available in one height, 25"H, to work with the lounge seat height.

The personal table has a rectangular metal base with the column centered at the back of the base. The 1¹/₄" column includes a flat plate at the top that attaches to the underside of the top. The base plate dimension is 10³/₄"D x 15³/₄"W x ³/₈"H.

Non-adjustable 3" diameter plastic glides are standard on all tables. Glides are ³/₈" thick for the 36"D x 72"W table; ¹/₂" thick for all other work and occasional tables; and ¹/₄" thick for the personal table. For all work and occasional tables the glide height is needed to route cords.

Tables are standard with a knife edge profile, that has the appearance of a ¹/₂" thick top that tapers to an overall top thickness of 1¹/₈".

High-Pressure Laminate tables are standard with a matching or complementing 3 mm flat edge band. Wood veneer tables are standard with a matching wood 3 mm flat edge band. The underside of the table top is finished in black.

Specials are possible with Lagunitas. To confirm practicality and obtain a quotation, contact Customer Service at 1.800.627.6770.

Connections

Alignment connector bracket package includes two seat attachment brackets and one screen alignment clip. The alignment connector bracket package is used when permanent connection is needed for L-, U-, and straight configurations of two or more pieces. The screen alignment clip is not needed for any bench connections, only the two seat attachment brackets would be utilized. The alignment connector bracket package should not be used if reconfigurations of the furniture pieces are required.

Attachment brackets for screen connection to seat deck must be specified in either platinum matte or low gloss black. Along with the brackets, the entire frame underneath will be painted to match the bracket finish specified.

Brackets can be specified in:

- 4710 Low Gloss Black paint (for dark color fabrics)
- 4141 Platinum Matte paint (for light color fabrics)

Lounge booth connector screen comes with two bottom brackets and two screen ganging alignment clips. The bottom brackets can be specified in either 4710 Low Gloss Black Paint or 4141 Platinum Matte Paint. The paint should match the bracket specification of the lounge.

Power, Data, Wiring & Cabling

Optional power can be specified on all seating components (lounge, chaise, and bench):

- The power module consists of two power outlets.
- The USB power module consists of one USB port and one power outlet. There is one USB per port with two amps.

Power modules can be positioned anywhere along the attachment rail underneath the front lounge seat.

Power modules are available in black. One optional power module is available on 1-seat lounges. One or two optional power modules are available on 2- and 3-seat lounges.

The power and USB power module options are located 7¹/₂" from the floor.

The power module has a 72"L cord and contains wire manager clips to route the cord underneath the seat deck when desired.

Lagunitas Lounge System

DESIGN TOAN NGUYEN

The power module cord is routed to the back utilizing clips attached to the underside of the lounge. The cord is then routed between the gap where the two screens meet when wall plug in access is needed.

A metal grommet is an option on all work and occasional tables. The 3" grommet is flush-mounted and located in the center of the table top over the cone and column. The metal grommet is available in anodized silver only.

Round power modules are available on the focus nook, and all work and occasional tables. On the focus nook worksurface, the power module is specifiable on the back right or left side. On the tables, the power module is located in the center of the table top over the cone/column. The 3" power module features tamper resistant power simplexes, an 8' L power cord with 15-amp plug, and is available in four colors.

The round power modules are available in three configurations:

- Two TR simplex receptacles
- One TR simplex receptacle and two USB A charging ports
- One TR simplex receptacle, one USB A charging port, and one USB C charging port

Tip: USB receptacles conveniently charge a range of electronic devices. Some devices may not be compatible.

PowerPod grommet and stop is an option on all work and occasional tables. The grommet is located in the center of the table top over the cone/column. The stop attaches to the column to help hold and route cords and cables through the column. The grommet and stop cap are available in black or milk.

The grommet allows for pass through of cords and cables at the desktop. The grommet is open to allow for the PowerPod to be housed over or stored on the table. The grommet inside dimension is 3 1/2" and outside dimension is 5 1/16".

PowerPod includes six 15 amp outlets with an energy saving illuminated on/off switch. It comes with a 6' cord with three prong plug. The top tray is milk and the power source is silver with a milk face. It is UL and CSA listed.

Tip: PowerPod is sold separately.

The contour of the PowerPod bottom cradle is designed to work in conjunction with the grommet for a snug fit or can be used independently without a grommet.

Work and occasional tables route cables and cords from the desktop through the column out through the base. Cords can be concealed in the cone.

Tip: A powerstrip cannot fit inside the cone.

Tip: If a desktop device is desired, other than the standard PowerPod or power module, consult Specials engineering for capability.

Laminates are available in two standard grades. Additional laminates from any manufacturer may also be practical—see *Other laminates* below.

Grade 1 laminates include:

- Coalesse standard laminates

► See *Coalesse Surface Materials Reference Guide*.

- Steelcase standard laminates (code 290A)

► See *Steelcase Surface Materials Reference Manual*.

- Any standard-grade Wilsonart laminate in solid color, woodgrain, or pattern finish (code 290A)

Grade 2 laminates

(code 290B) include any standard-grade, solid color, woodgrain, or patterned laminate from Nevamar (includes Matrix), Formica, or Pionite. Grade 2 laminates may have extended lead times. For details, contact Customer Service at 1.800.627.6770.

Other laminates that are not included in the Grade 1 or Grade 2 offerings may also be available, such as Abet Laminati and Laminart. To determine availability and pricing, contact Customer Service at 1.800.627.6770, with the laminate manufacturer's name and the name and number of the laminate you want.

Laminate swatches are reproduced in the Surface Materials Color Palettes.

► See *Coalesse Surface Materials Reference Guide* for a list.

Swatch cards and actual samples of Coalesse standard laminates are available from your Coalesse Customer Service representative. For samples of laminates from other manufacturers, contact them directly:

Tip: Laminate manufacturers change their offerings frequently. Always check availability before ordering.

Wood veneer table tops are fabricated with Architectural Grade AA hand-selected hardwood veneer, plain sliced, book matched, and bonded to the core with a backing sheet for balance. Coalesse's primary wood finish, Clarity, is a water-borne UV topcoat, which protects the environment while providing exceptional durability and resistance to water and chemical stains. Due to natural variations in wood, finished products may vary from samples in color, texture, and grain.

Wood is a natural material; slight variations occur in veneer texture, color, grain configuration, and stain acceptance. Coalesse stains are all applied with an exacting regard for consistency and are well within traditional tolerances for wood products.

Tip: You should know that finished tops may vary slightly in tone or character from each other or from the samples Coalesse produces. No guarantee can be made of an absolutely exact match.

Wood veneer swatches are reproduced in the Surface Materials Color Palettes.

► See *Coalesse Surface Materials Reference Guide* for a list.

Swatch cards and actual samples of Coalesse standard wood veneers are available from your Coalesse Customer Service representative.

Additional wood veneer species are available. To confirm availability and to determine pricing, contact Customer Service at 1.800.627.6770.

Stains applied to Coalesse wood veneer table tops are standard with the same stain color applied to both the top and the solid hardwood edge profile. Coalesse strives to produce a consistently high quality product and some natural variation in color is to be expected. This is especially apparent on natural woods which have no stain applied, for example 3525 Natural Maple. This color variation is normal and reflects the unique and natural properties of wood. This should not be considered a defect.

Stain swatches are reproduced in the Surface Materials Color Palettes.

► See *Coalesse Surface Materials Reference Guide* for a list.

Swatch cards and actual samples of standard wood veneers are available from your Customer Service representative.

Additional wood veneer stains are possible. Coalesse offers two programs to accommodate customers who need special stains—Stain-to-Match and Stain and Finish to Match.

Stain-to-Match option is a special Coalesse program that will match a wood stain sample that you provide. There is no additional charge for this service. You must supply a sample of reasonable size (3" x 3" or larger is usually adequate). Coalesse will formulate a stain, produce a matching sample, and send it to you for approval. When we receive your written approval, we'll schedule production of your order.

Tip: Stain-to-Match will achieve a color match to the sample only. Graining of the wood veneer and final surface finish may differ from your original sample. See Stain and Finish to Match.

Customer's Own Material/Leather (COM/COL) Program is available.

Lagunitas Focus Nook

Product Details

Screens are offered in two types of materials: knit and fabric. The knit panels allow for some transparency and light to pass through. The fabric panels can either be monolithic (non-contrasting) or specified in differing finishes (contrasting) for the inside and outside of the screen.

Tip: If a contrasting screen is specified, the fabric must be chosen from the same fabric family.

A **welt cord** is standard on all fabric specified screens. The welt cord finish is non-specifiable and is the same fabric finish as the outside screen when contrasting screens are specified. For non-contrasting screens, the welt cord matches the screen specification. The knit screen does not require a welt cord.

Laminate or wood veneer worksurface is standard with a knife edge profile that has the appearance of a $\frac{5}{8}$ " thick top, which tapers to an overall top thickness of $1\frac{1}{8}$ ".

High-Pressure Laminate worksurface is standard with a matching or complementing 3 mm flat edge band. Wood veneer tables are standard with a matching wood 3 mm flat edge band. The underside of the table top is finished in black.

Glides adjust $\frac{1}{2}$ " for uneven floors. There are two glides per screen. Glides have a metal rounded foot.

Power, Data, Wiring & Cabling

2" light grommet is available to accommodate an on-surface light by routing the on-surface light plug to the below-surface power source. Grommet is specifiable on the left or right side of worksurface and is available in three color options.

Round power modules are specifiable on the back right or back left side of the worksurface. The 3" power module features tamper resistant power simplexes, an 8'L power cord with 15-amp plug, and is available in four color options. Available in three configurations:

- Two TR simplex receptacles
- One TR simplex receptacle and two USB A charging ports
- One TR simplex receptacle, one USB A charging port, and one USB C charging port

Tip: USB receptacles conveniently charge a range of electronic devices. Some devices may not be compatible.

Power package is available when light grommet is specified. Power package includes power module with a below worksurface convenience outlet to power the available on-surface light and retain a single power cord out. Specifiable on the back right or back left side of the worksurface.

Magnetic wire management brackets are black and come standard with the power module and power package to neatly manage the cord to the floor.

Cable management tray neatly conceals below surface cords to the underside of the worksurface.

*Fabric yardage is based on non-directional/solid fabrics. Use conversion chart below for repeat/printed fabric yardage.

Non-standard fabric requirements

Yardage requirements shown are based on non-directional 54"W material applied railroaded. Coalesse will apply fabric railroaded unless instructed otherwise on the dealer's purchase order. The following conversion chart should be used to determine yardage requirements when COM has a repeat of 2" or more. Please contact Coalesse Customer Service for a yardage quotation if the fabric is less than 54" wide, has a repeat of more than 24", or if the fabric must be cut-right.

CONVERSION CHART

PRODUCT	REPEAT		
	2" - 8"	9" - 14"	15" - 24"
All other products	15%	25%	35%

Yardage quotations will also be provided for order of 10 or more pieces.

Cutting direction guidelines

Cutting direction is based on the fabric width and the way the fabric is cut from the roll and applied to Coalesse products. There are two cutting directions: railroaded or cut-right.

Horizontal or railroaded (across roll, warp horizontal) means fabric is cut across the roll; selvages are on the top and bottom.

Vertical or cut-right (down roll, warp vertical) means fabric is cut in the same direction it is woven; selvages are on the left and right sides.

Coalesse reserves the right to railroad or apply fabric according to weave unless instructions specify otherwise. Fabrics are railroaded when possible to avoid seams in large upholstered areas and/or single cushion units. If a fabric is questionable, a cutting of adequate size showing full repeat (if any) should be sent to Coalesse for a fabric requirement quotation.

Chord Conference Seating

DESIGN MICHAEL SHIELDS DESIGN ORIGIN: UNITED STATES

Product Details

Chord conference seating is offered in mid back or high back.

5-star base is standard in black resin or optional polished aluminum.

Casters are standard with hard, dual-wheels that roll smoothly on carpets. Soft casters for use on hard floors are an available option.

Accent welt flows across the back and down the arms (contrasting fabric option).

Pillowback versions are available on mid-back and high-back chairs for added comfort.

Adjustment Features

Seat height adjusts pneumatically. Lift lever to activate cylinder for desired height. To raise height, slightly stand while lifting lever; to lower, sit while lifting and weight pressure will lower seat height. Range of adjustability is 3" with a maximum seat height of 22".

Upright back lock allows users to lock the backrest in a full, upright position. To unlock for free tilting, push handle back towards seat.

Tension control knob allows the user to increase tension (will require more force to tilt chair back), by turning the knob clockwise. For reduced tension and more responsive tilt adjustment, turn knob counter-clockwise.

Knee tilt control (optional) minimizes the rise of the front of the chair when the chair is in a reclined position, allowing the user's feet to remain on the floor. Push handle up to lock and down to free tilting.

Massaud Conference Seating

DESIGN COALESSE DESIGN GROUP AND JEAN-MARIE MASSAUD DESIGN ORIGIN: FRANCE

Conference and duvet conference chairs feature different upholstery techniques expressed through the unique geometry on each chair's inner back.

Tip: These techniques apply to mid- and low-back chairs with both loop and integrated arms.

Tip: This product line is part of a collection and will be found in multiple locations in this specification guide.

Polished aluminum loop arm is contoured for comfort and is available on mid-back chairs only. Optional upholstered arm caps are available.

Casters have hard, dual-wheels that roll smoothly on carpets. Soft casters with roll control have been designed to roll quietly and are available for use on hard floors and chair mats.

Back tension adjustment offers two settings to allow the user to adjust the rate of increase or decrease in force as the user reclines. Turn lever forward to increase tension. Turn lever back to decrease.

Seat height adjustment allows users to change seat height within a 5" range with the assistance of a pneumatic gas cylinder.

Conference chair upholstery features a horizontal, single needle stitching technique on the chair's inner back.

5-star base is standard on mid-back chair with loop arm.

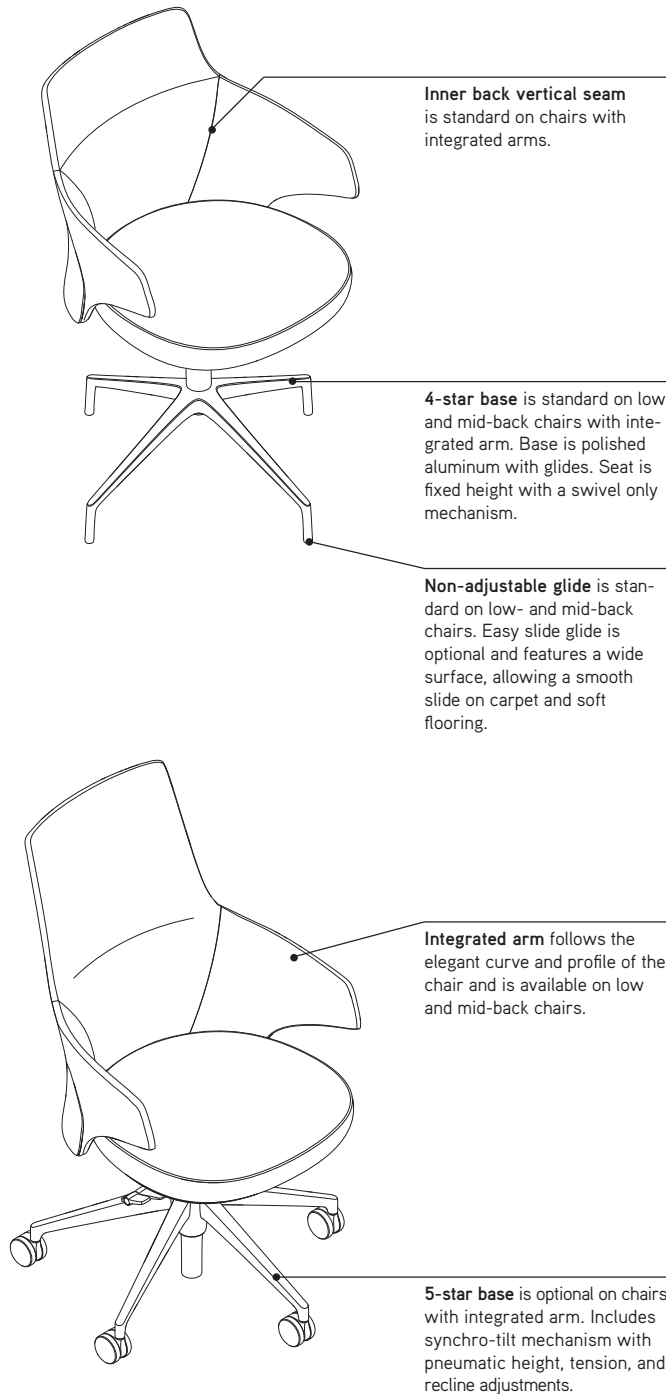

Duvet conference chair upholstery features a duvet stitching technique accented with comfort wrinkles on the chair's inner back.

Recline adjustment allows user to choose from three recline positions: full-tilt, mid-stop, and full upright positions.

Synchro-tilt mechanism is weight activated and automatically responds to recline resistance proportionate to the user's weight. The chair and back move in a 3:1 ratio.

Adjustment Feature Definitions

Active mechanism (AM+) allows the seat and back angle to be adjusted independently of each other. The seat can be locked at various angles, and the back can free tilt with adjustable tension or lock in four positions.

Arms, height adjustable allow the user to independently move each arm up and down.

Arms, width-adjustable allows the arm rests to be adjusted in and out.

Arms, folding allows the user to independently fold each arm up or down for total freedom of leg movement and posture accommodation.

Back, height adjustable allows the user to raise or lower the chair back within a given range.

Back lock, forward allows the user to lock the backrest in a full upright position or release it to recline.

Back stop, selective allows the user to lock and unlock the backrest in any position within the tilt range.

Back tilt tension adjustment regulates the ease of tilt movement of the back only.

Back and seat tilt (Your Power mechanism) automatically responds to the weight and seating position of the user with an individual back resistance.

Base, free swivel allows chair to swivel 360°.

Base, memory-return swivel allows a chair to swivel 360°, but return to the forward-facing position when released.

Base, nesting four-prong has two front legs that are lower than the two rear legs, allowing chairs to nest for storage. A nylon tooth on the base engages a notch in the seat when folded. This engagement properly aligns the seat and base for nesting.

Folding seat allows the seat to flip up, while the chair automatically rises for nesting and storage.

Knee tilt control (low front rise) minimizes the rise of the front of the seat when the chair is in a reclined position, allowing the users' feet to remain on the floor. This feature reduces pressure under the thighs, allowing for continuous blood circulation.

Lumbar support, adjustable provides additional lower back comfort by allowing the user to move the lumbar support up or down, as well as increase or decrease the amount of support.

Passive mechanism (PM) allows the seat and back to move in synchronization without manual adjustment.

Pneumatic height allows the user to change the seat height assisted by a pneumatic gas cylinder.

Seat angle adjustment allows the user to change and lock the seat angle in various positions.

Seat depth, adjustable allows the user to slide the seat forward or back within a set range.

Seat tilt control allows the seat and back to rotate as a unit backward one position and forward two positions.

Seat, zero front rise allows the user to tilt back in the chair while feet remain on the floor because the seat front remains level.

Swivel-tilt mechanism control allows the chair to swivel 360° and the fixed seat and back to tilt in unison when the user leans back.

Synchro-tilt mechanism synchronizes the tilting movement of the seat and back in a set ratio.

Tilt tension adjustment allows the user to vary the amount of recline resistance. Your Power mechanism allows the back and seat tilt to adjust automatically to the weight and seating position of the user.

Your Preference control allows the user to adjust the back tilt by selecting one of four settings: weight activated, weight activated with 20% resistance boost, mid-stop recline, and upright back lock.

Emu Ivy collection features guest seating, lounge seating, seating cushions, and occasional tables.

Emu Ivy

DESIGN PAOLA NAVONE DESIGN ORIGIN: ITALY

Product Details

Ivy seating is a series of side seating and lounge seating. Frame is constructed of formed steel mesh with outdoor grade, powder coat finish. When used outdoors, the volumetric structures allow grass and ivy to grow through and around lounge seating.

Cushions are a series of one-piece back and seat cushions (chairs only available with seat cushion). One-piece seat and back cushions feature a water drainage slit at the bend seam. Cushions are available in indoor or outdoor fabric. Cushions have tethers which can be loosened without tools for easy removal.

Pouf features a solid sheet metal top with a photovoltaic panel filled with five LED lights. LED lights collect and store solar energy to illuminate the under structure at night. Use as a seat, ottoman, side table, or light accessory.

Flexible loop strap is used to aid mobility; made of orange rubber.

Tables are constructed of mesh steel legs. Table tops are solid sheet metal. Some models are also offered with blue fish tile or white bug tile.
