Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing

shows you what the product looks like and points out important features.

Product Details

gives specific information on the product and how it is used.

Connections

describes how the product is assembled or how it attaches to another product.

Actual Dimensions

table lists the dimensions of the product.

Wiring and Cabling

details the power and cable-management and cable routing capabilities of the product.

Surface Materials

lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product.

Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes
(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify
(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information
(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.

Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page

Slatwall

Slatwall allows for vertical stacking anywhere on the tile.

► Specifying, page 16

Slatwall tiles are standard in 12" or 18" heights and seven different widths.

Mounting brackets are available to correspond with selected furniture system and are ordered separately.

Slatwall can be panel-mounted or wall-mounted. 12" high Slatwall can be freestanding.

Actual Dimensions

	Freestanding slatwall stanchions	Slatwall tiles	Slatwall brackets
Depth	3"	1/2"	N.A.
Width	3 1/2"	24", 30", 36", 42", 45", 48", or 60"	2"
Height	16"	12" or 18"	12 1/3" or 18"

Product Details

Slatwall tiles are available for straight mounting applications only.

Slatwall tiles support a maximum of 60 lb.

Freestanding Slatwall stanchions are for use with 12"H Slatwall tiles only. Stanchions and Slatwall tiles must be ordered separately.

Freestanding Slatwall stanchions clamp to work surfaces $\frac{3}{4}$ " to 2" thick and uses a 2" footprint on the work surface.

Worksurface must be a minimum depth of 18" and able to support a maximum weight of 60 lb when using freestanding Slatwall stanchions.

In freestanding application, top of Slatwall is 15½" above mounting surface and is a fixed height. Rubber feet under stanchions ensure a tight fit without marring work surface.

Slatwall can overhang freestanding stanchions by 12" for tiles 48"W or less and 15" for 60"W tiles.

When using freestanding Slatwall stanchions, a 2" clearance is required below work surface to accommodate C-clamp.

Freestanding Slatwall stanchions cannot work in a corner application.

Freestanding Slatwall stanchions are not for use with glass, bullnose, knife edge, or other non-standard work surface edges.

Slatwall tile must be 10" shorter than core unit when utilizing Context columns to support overhead bins or shelves.

Panel mount Slatwall brackets cannot be used with transaction top work surfaces.

Panel or wall-mount applications require a minimum of 13" vertical space between work surface and overhead bins or shelves.

Wall mount brackets must be installed in a wall stud.

Digilock

Digilock provides a keyless locking solution. Digilock is available as an option on the SOTO personal console. Digilock has a 10-digit keypad and lock knob to keep contents inside the personal console secure while away from the workstation. The programming key and manager key are required if the keyless option is selected on the personal console.

The programming key is used during installation to program the lock out of the factory setting and into the shared setting. It is also used to pair the manager key to the lock. The shared setting is intended for open spaces where multiple users may be utilizing that space throughout the day. The assigned setting is intended for owned spaces where only one user will have access to the locking unit.

The manager key is used to override the lock when a passcode is forgotten or the battery loses power. The manager key can be paired at any time. One manager key may be paired to infinite locks; however, each lock may only pair with up to six manager keys.

The user key is ADA compliant and is available for users that require additional assistance in operating the keypad on the lock.

Product Details

The lock is metal and contains a CR2032 battery.

The lock battery is accessed from the bottom of the lock unit. The battery may be removed and replaced if necessary. A philips screw driver (cheese head M2x4) is required to remove the two screws.

How to Program

1. Insert the programming key. A two-toned beep will be heard and the LED light will start to flash.
 2. While the LED light is flashing, insert one manager key at a time. A beep will be heard for each manager key that is programmed.
 3. Insert the programming key. A two-toned beep will be heard and the LED light will stop flashing.
 4. Repeat previous steps for each lock.
- Tip: The locks will arrive in the factory setting. During the process of pairing the manager key(s), the locks will be programmed into the shared setting.*

Victor2

Victor2 is a recycling solution that is appropriate for supporting larger work groups, conference rooms, and cafés. A mobile unit and two freestanding units are available.
► Specifying, pages 76

Mobile unit has three openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish, and French.

Receptacles contain features to accommodate oversized bags.

Four non-locking casters are standard. Two casters swivel, and two casters are fixed. Move unit from the swivel casters side. Unit moves from the right in the direction of the swivel casters. Enclosing the unit in too limited of space impedes movement. Unit needs room to swivel, approximately 5" from side of enclosure.

Soft-touch integral handle allows easy movement from one location to another.

Receptacles fit bags from 30 gallon size and larger.

Freestanding unit has four or five openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish and French.

Leveling glides are fully adjustable up to 1½".

Actual Dimensions

	Mobile Unit	Freestanding Unit
Depth	18"	25"
Width	36"	48" or 60"
Height	36"	36"

Product Details

Mobile and freestanding units are standard with a metal case and top. Front and back of unit are available in wood or laminate.

Acrylic inserts etched with recycling icons are standard on mobile and freestanding units. The verbiage for each icon is in English/Spanish/French on the same insert.

Mobile unit is standard with three openings for inserts and sloped receptacles with built-in bag holding system.

Top on the mobile unit can be used for food service use or tray storage.

Hinged doors on the back are standard on the mobile unit for easy access to receptacles.

Four non-locking concealed casters, two swivel and two fixed, are standard on the mobile unit. Unit moves from the front right side. It is not recommended to move from the fixed caster side.

Receptacles in mobile unit can accommodate 12 gallons each. Receptacles in freestanding unit can accommodate 30 gallon size and larger.

Soft-touch integral handle on mobile unit allows for easy movement from one location to another.

Freestanding unit is standard with either four or five openings for inserts on the top of the unit.

Hinged doors on the front are standard on the freestanding unit for easy access to the receptacles.

Leveling glides on freestanding units are fully adjustable to 1½".

Tray shelf can only be used with the freestanding unit.

Tray shelf fits most trays up to 20¾" x 12".

Freestanding four- or five-slot opening will accommodate two tray shelves.
Tip: A gap of 15" will separate the two tray shelves on a five-opening unit.

Maximum capacity of tray is 20 food trays with maximum size of tray 20" x 20".

Display holds two 8½" x 11" papers or one 11" x 17" paper.

Tip: Paper will be between two acrylic plates. Paper can easily be replaced without tools.

Display can only be used with the freestanding unit.

Freestanding four- or five-slot opening will accommodate two displays.
Tip: A gap of 18½" will separate the two displays on a five-opening unit.

One tray shelf and one display can be used on the freestanding unit.

dash and dash mini LED Lights

dash and dash mini LED lights are available in a variety of mounting applications.

► Specifying, page 90

Vertical height adjustment range of dash light is 2"–25".

Housing is painted steel.

Freestanding bases, if selected, are painted to match housing.

Soft touch switch has continuous range dimming from 100%–15%.

9.3-watt LED, 3500K is standard.

Automatic turn off is standard and is enabled after 10 hours.

Mounting brackets are available for C-clamp, Slat-wall/SlatRail, panel, and rail applications. Rail applications include SOTO, Ology, c:scape, Elective Elements, Campfire, Tour, Answer beam, and FrameOne. All mounting brackets are painted to match housing.

Vertical height adjustment of dash mini light is 0"–20³/₈".

Freestanding USB base comes standard with one USB type-A (2.4A max) and one USB type-C (60 watt max). USB cord to connect personal devices is not included.

Horizontal arm adjustment range of dash light is 0"–37".

Occupancy sensor is available on dash and dash mini to detect movement and conserve energy.

Horizontal range of dash mini light is 0"–24".

Product Details

dash LED light is for use with worksurfaces 60"W or greater.

dash mini LED light is for use with worksurfaces 58"W or smaller.

dash and dash mini LED lights are 110 volt, mercury free, and has a color rendering index of 94.

Occupancy sensor utilizes a passive infrared technology to detect the slightest movements by constantly monitoring a 36" diameter zone around the LED light head.

Occupancy sensor is fully integrated into the LED light head and activates in 15 minutes when no movement is detected to conserve energy.

Average rated lamp life of dash and dash mini LED lights is 50,000 hours.

Power supply for all dash lights except with USB base has a 15-watt, 9' cord.

Power supply for dash with USB base has a 60-watt, 11' modular cord with standard two prong plug, an integrated low voltage cord, and a connector to the attached USB base.

Freestanding USB base provides two integrated USB charging ports, type-A and type-C. The USB cord to connect personal devices is not included.

When specified with Height-Adjustable Series Benching or power and data tray, flexible receptacles are recommended.

90° mini extension cord can be used with Ology bench, FrameOne, or where power receptacles are located in confined spaces.

► Specifying, page 109

Head of light rotates 360°.

dash and dash mini LED lights, designed in collaboration with Foster + Partners, is U.L. and c.U.L. listed and BIFMA Level 1 certified.

Connections

For applications that include an integrated SOTO rail: FrameOne, Ology, c:scape, Campfire, Tour, or SOTO rail; specify dash rail mount with integrated SOTO bracket. dash can be mounted in front of privacy screens, Slatwall, or FrameOne center screen.

Applications that include a rail mounted dash to Elective Elements Tech Zone will need to choose the optional Elective Elements Tech Zone rail mount bracket. Elective Elements Tech Zone rail mount bracket cannot be used with privacy screens, Slatwall, or FrameOne center screens. The light must be mounted adjacent to the screens or Slatwall.

Panel-mount light cannot be used in corner application.

Wiring & Cabling

Electronic dimming control features a soft touch switch, which allows dimming from 100% to 15% light output.

LED Radial Desktop Lights

LED radial desktop single arm and double arm lights are available in a variety of mounting applications.

► Specifying, page 96

Rotational base provides 320° of adjustment.

Freestanding base, if selected, is painted to match housing.

Integrated rail-mount bracket used on SOTO rail, FrameOne, Ology, c:scape, Campfire, and Tour applications can be mounted in front of privacy screens, Slatwall, or FrameOne center screen.

Knuckle tension points are adjustable with a hex wrench.

Panel-mount, if selected, allows single and double arms to mount to Answer, Avenir, and Kick.

A properly diffused light source under the radial head provides a softly blended light pattern that reduces eye strain.

Optional occupancy sensor turns LEDs off after 30 minutes of inactivity, available on both single and double arm models.

Single touch on/off pad plus touch and hold dimming for easy individual user control.

Continuous dimming from 100% to 15% with last state memory.

Product Details

LED radial single arm desktop lights are for use with worksurfaces 58"W or smaller.

LED radial double arm desktop lights are for use with worksurfaces 60"W or greater.

LED radial single and double arm desktop lights come standard with 7.5-watt 18 fractional LEDs with a color temperature of 3500K.

Occupancy sensor is fully integrated into the LED light head and activates in 30 minutes when no movement is detected to conserve energy.

Occupancy sensor utilizes a passive infrared technology to detect the slightest movements by constantly monitoring a 36" diameter zone around the LED light head.

Average rated lamp life of LED radial desktop lights is 50,000 hours.

Color temperature of LEDs is 3500K.

Color rendering index of LEDs is 85.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Through-mount and theft deterrent through-mount brackets can only be used with worksurfaces that are 1"D to 1³/₄"D. They are not for use with turnstone Bivi, Frame-One, or c:scape worksurfaces under 1"D.

Theft deterrent through-mount bracket cannot be retrofitted in the field.

Freestanding base with USB provides an integrated USB charging connection in the base to power up devices such as smart phones (USB cord not included).

Connections

- Freestanding base
- Freestanding base with USB
- Through-mount
- C-clamp mount

Optional choice of base/mounting brackets includes: freestanding base, C-clamp mount, Slatwall mount, integrated rail-mount, panel-mount, through-mount, or theft deterrent through-mount.

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply uses a modular cord with standard two prong plug, integrated 3' silver cord, and an 18-watt, 9' black cord.

When specified with Height-Adjustable Series Benching or power and data tray, flexible receptacles are recommended.

LED linear desktop single and double arm lights are available in a variety of mounting applications.

► Specifying, page 100

Integrated rail-mount bracket used on Soto rail, FrameOne, Ology, c:scape, Campfire, and Tour applications can be mounted in front of privacy screens, Slatwall, or FrameOne center screen.

Product Details

LED linear single arm desktop lights are for use with worksurfaces 58"W or smaller.

LED linear double arm desktop lights are for use with worksurfaces 60"W or greater.

LED linear single and double arm desktop lights come standard with 7.5-watt 18 fractional LEDs with a color temperature of 3500K.

Occupancy sensor is fully integrated into the LED light head and activates in 30 minutes when no movement is detected to conserve energy.

Occupancy sensor utilizes a passive infrared technology to detect the slightest movements by constantly monitoring a 36" diameter zone around the LED light head.

Average rated lamp life of LED linear desktop lights is 50,000 hours.

Color temperature of LEDs is 3500K.

Color rendering index of LEDs is 85.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Through-mount and theft deterrent through-mount brackets can only be used with worksurfaces that are 1"D to 1¾"D. They are not for use with turnstone Bivi, Frame-One, or c:scape worksurfaces under 1"D.

Theft deterrent through-mount bracket cannot be retrofitted in the field.

Freestanding base with USB provides an integrated USB charging connection in the base to power up devices such as smart phones (USB cord not included).

Connections

- Freestanding base
- Freestanding base with USB
- Through-mount
- C-clamp mount
- Slatwall-mount
- Panel-mount
- Theft deterrent through-mount
- Integrated rail-mount

Optional choice of base/mounting brackets includes: freestanding base, C-clamp mount, Slatwall mount, integrated rail-mount, panel-mount, through-mount, or theft deterrent through-mount.

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply uses a modular cord with standard two prong plug, integrated 3' silver cord, and an 18-watt, 9' black cord.

When specified with Height-Adjustable Series Benching or power and data tray, flexible receptacles are recommended.

LED Personal Task Lights

► Specifying, page 112

Product Details

Personal task light includes the lamp and power supply with cord set. Rail-mounted version includes rail brackets. Non rail-mounted version includes Universal Mounting brackets.

Power supply is an 18 watt two prong driver plug with 9' black cord.
Tip: Energy saving mini-LEDs greatly reduce power use.

When specified with Height-Adjustable Series Benching or power and data tray, flexible receptacles are recommended.

Connections

LED personal task light mounts directly to the rail systems of Ology, c:scape, FrameOne, Elective Elements, turn-stone Campfire big table, and SOTO rail.

Non rail-mounted LED personal task lights will not work on worksurfaces with knife edge that is longer than 1 1/4", or with modesty panels or modesty screens closer than 6" from the back edge.

Wiring & Cabling

Personal task light includes the lamp and power supply with cord set.

Power supply uses a modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

LED Shelf Lights

► Specifying, page 116

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply is used on the LED standard light; it is 9" long with a two prong driver plug.

Tip: Energy saving mini-LEDs greatly reduce power use.

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood shelves.

Specify Underline task light or LED shelf light for use under 24" wide bins. Standard, Utility2, and Bottomline 24" wide lights do not fit under 24" wide bins.

LED linear daisy chain lights include the lamp, daisy chain cords, and both magnetic mounts, and wood mount bracket hardware with adhesive cord managers.

Optional occupancy sensor is a separate component that connects to the light fixture and activates in 30 minutes when no movement is detected to conserve energy.

Average rated lamp life of LED linear shelf lights is 50,000 hours.

Color temperature of LEDs is 3500K.

Color rendering index of LEDs is 84.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Connections

Lights mount recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnet mounts allow shelf lights to be installed without tools under most metal overhead storage bins or shelves.

Wood mount brackets allow shelf lights to be mounted to wood shelves.

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply for 17" linear stand alone only uses a straight plug with a 9' 18 watt 24 volt wall transformer.

Power supply for 31", 44", 58", or 17" starter light; 60 watt compact in-line brick straight plug. The cord is 11', 6' from power supply to power outlet and 5' from power supply to fixture.

Tip: Daisy chain starter light comes with a 60 watt power supply to support up to a limited number of lights – refer to chart for daisy chaining fixture. Daisy chain secondary lights do not come with a power supply, but instead come with two daisy chain jumper cords, one 8" and one 30" set.

Shelf Lights

Standard and Utility2

► Specifying, pages 130 and 132

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Daisy chain cords have modular connectors to link Standard shelf lights together. 78" daisy chain jumper cord is standard with select Utility2 lights.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Specify Underline task light or LED shelf light for use under 24" wide bins. Standard, Utility2, and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Daisy chain starter light with cord must be ordered when Utility2 shelf lights are used in a daisy chain application.

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath overhead storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet. Utility2 light daisy chaining allows up to 10 fixtures.

► Page 128

Starter cord for Standard and starter light for Utility2 powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power-factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard and Utility2.

Normal-power-factor electronic ballasts are available on Utility2 shelf lights.

Batwing lens is available as an option on Utility2 shelf lights for applications where moderate improvement to light distribution is needed.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with a three-prong plug or a Chicago plug.

Plug configuration allows two task lights to engage adjacent outlets in one receptacle.

Optics:

Underline includes an aluminum reflector with batwing lens.

Bottomline includes a batwing lens with mylar reflector that provides low glare and broad distribution of light.

Connections

Shelf light mounts recessed or flush depending on the design of the overhead storage bin or shelf. Standard with universal spring brackets for recessed mount or screw-in for flush mount.

Specify Underline task light or LED shelf light for use under 24" wide bins. Standard, Utility2, and Bottomline 24" wide lights do not fit under 24" wide bins.

Lamp life of a fluorescent lamp that turns on and off once a day will last longer than a lamp that turns on and off many times a day. Environmental effects can shorten the life of a lamp, such as: moisture or higher humidity, higher or colder than normal temperatures, excessive vibration, and power surges.

Tip: If the light begins to flicker, or shuts down immediately, the sensor is indicating the lamp is at the end of its life and needs to be replaced.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining is only available on Bottomline shelf lights.

Daisy chaining on Bottomline permits interconnecting up to six shelf lights from a single power outlet.

Daisy Chaining

For Standard, Utility2, and Bottomline Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

For Utility2 lights, connect the power cord **1** between the first light and the wall receptacle. Connect the jumper cord **2** between the lights. Maximum distance between receptacles for 78" jumper is 74".

Tip: Connect up to 10 fixtures maximum. Voltage and current rating of fixture is 120 volt, .75 amps.

Starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

For Bottomline lights, starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Standard Shelf Lights

Tip: Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.
 ▶ See page 128 for more information.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: Remember to order a daisy chain starter cord separately.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: Minimum of two fixtures for daisy chaining and maximum of 10.

► For more information on daisy chaining, see page 128.

Tip: When ordering starter light do not order a daisy chain starter cord.

► See page 1 for details.

Tip: Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

► See page 128 for more information.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: When ordering the Bottomline shelf lights with daisy chain starter cord you do NOT need to order a starter cord or jumper cord.

PowerPincher with Occupancy Sensor

► Specifying, page 137

PowerPincher has eight outlets with surge protection. Six outlets are controlled by sensor and two outlets are uncontrolled.

Passive inferred occupancy sensor detects slight motions within a monitored area.

Rocker on/off switch is located on the top of the powerstrip.

Product Details

Sensor can be positioned under worksurface, storage, or on wall up to 9' away from outlet.

PowerPinch outlet can be mounted under worksurface.

Sensor is standard with 110 volt.

Sensor time delay can be adjusted from 1 to 30 minutes.

Power supply uses a 7'8" cord with standard three prong plug.

PowerPincher is U.L. and CSA listed.

Connections

PowerPincher swivel base allows user to easily aim sensor.

Vertical Wire Manager

Vertical wire manager conceals cords and cables that are routed vertically outside of the panels.
► Specifying, page 139

Cover conceals cords or cables.

Hooks fit into vertical channel at edge of panel.

Actual Dimensions

Depth	1" (25 mm)
Width	1 ⁵ / ₈ " (41 mm)
Height	48" (1219 mm)

Product Details

Wire manager is available for use between the bottom of a shelf or overhead storage bin and a worksurface. Wire manager can be cut in the field to suit specific application.

Wire manager can also be used below the worksurface.

Power cords and cables can be routed from the wire manager and the 1/2" gap along the back edge of the worksurface.

Connections

Snaps into the slotted channel of the junction.

Basics of Ergonomic Computer Support Tools

Proper ergonomic worktools and seating can help workers perform more efficiently and avoid muscle and eye strain.

Neck is straight or slightly forward.

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Lower back fits into curved lumbar support.

Tension is adjusted so backrest tilts easily, yet provides smooth, even support.

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces that are used for writing, paperwork, and other tasks.

Screen is 20" to 30" from the eyes.

Top of monitor should be at eye level.

Screen is at eye level slightly lower and directly in front of worker so head is not turned.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

Keyboard is at elbow height.

Thighs are parallel to the floor.

Feet are flat on the floor or on a foot rest.

Laptop Support

Frequent or extended use in cramped posture positions increase risk of damage to the spine, neck, shoulders, and legs.

Keep frequently viewed objects, such as source documents, at or below the horizontal line of sight. Arrange display screen and documents to be equidistant from your eyes. See Freestanding In-Line Document Support, page 228.

To maintain good posture wherever you work, a separate keyboard, a mouse, and Mobile Collapsible Laptop Support are recommended.

► See page 229

To reduce eyestrain and unhealthy postures when using laptops, an external full-size monitor with external keyboard and mouse is recommended.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a foot rest. ► See page 229

Basics of Monitor Arm Positioning

Basics of Monitor Arm Positioning

Monitor arms offer varying levels of adjustability to meet the needs of many types of users. Adjustable arms should be adjusted for best positioning as such.

Top of monitor should be 0° to 20° below horizontal line of sight.

Keying height should have minimal bend at the wrist.

Avoid locking knees to help maintain good posture.

Feet should be flat on the floor or use foot rest or foot pad.

Height

Top of the monitor should be positioned at or slightly below eye level.

Distance

Monitor should be 20" to 30" from the eyes or approximately an arm's length away.

Alignment

Proper alignment is the key to preventing strain. Computer monitor, keyboard, and mouse should be centered to allow user to see the display without looking downward or to either side. Mouse should be accessible without twisting or reaching. Reference documents should never be flat on desk and should be at the same height as or aligned with the monitor or above keyboard and below the monitor.

Dual Monitor Alignment

If using two monitors, position the monitor used more often closer. If equally used, center monitors directly in front and angle them in a slight inward "V" shape.

Monitor arms are not intended for use in applications where the monitor extends beyond the perimeter of the worksurface.

Keyboard Supports Basics

Keyboard supports are comprised of a mechanism and track, a keyboard platform that includes a variety of mouse surfaces and palm rests options. The components can be ordered individually or as assemblies. Below are illustrations to guide you in your selection.

Mechanisms are orderable individually or with a standard track to insure stowing under worksurfaces. See D on chart below.
▶ See *Mechanisms and Tracks*, page 164.

Keyboard platforms are available in a variety of options.
▶ See *Keyboard Platforms and Palm Rests*, page 167.

Palm rests are options on all platforms or can be ordered separately.
▶ See *Keyboard Platforms and Palm Rests*, page 167.

Mouse surfaces are options for all platforms.

Tip: All mechanisms ship with positive tilt locked out.

How to Specify a Keyboard Assembly

1. Determine workstation configuration – straight, 90°, radius, or diagonal.
2. Measure the depth of clearance on underside of worksurface to attach track to determine track length and mechanism to use.
3. Select platform depending on needs of the keyboard size and mouse location preference.

Palm rest are options on all platforms or can be ordered separately.

Mouse surfaces are options for all platforms.

Mechanisms and Tracks

Stella Standard Mechanism with 20" Track

► See Specifying, page 172.

Product Details

Stella Standard mechanism with 20" track is for use in a straight, radius, or diagonal application.

Stella Standard mechanism has a height adjustment range of 3 1/2" above track and 5" below track.

Stella Standard mechanism tilts $\pm 15^\circ$ and a rear swivel of 360° .

Stella Standard mechanism is standard with patented knob free adjustability.

Application Topics

Stella Standard mechanism requires a 20"D clearance under the worksurface.

Surface Materials

Stella Standard mechanism
• 0835 Black

Shipping

All mechanisms ship with positive tilt locked out.

Stella Extended Mechanism with 23" Track

► See Specifying, page 172.

Product Details

Stella Extended mechanism with 23" track is for use in a narrow, corner application that is less than 18" radius or 17" diagonal and greater than 90° corner.

Stella Extended mechanism has a height adjustment range of 3 1/2" above track and 5" below track.

Stella Extended mechanism tilts $\pm 15^\circ$ and a rear swivel of 360° .

Stella Extended mechanism is standard with patented knob free adjustability.

Application Topics

Stella Extended mechanism requires a 23"D clearance under the worksurface.

Surface Materials

5" Lift and Lock Mechanism with 18", 22", or 23" Track

► See Specifying, pages 172–173.

Product Details

5" Lift and Lock mechanism with 18", 22", or 23" track is for use in a straight application.

5" Lift and Lock mechanism has a height adjustment range of 2½" above track and 5⅘" below track.

5" Lift and Lock mechanism tilts ±15° and a rear swivel of 360°.

**Application Topics**

5" Lift and Lock mechanism requires a 23"D clearance under the worksurface.

7" Lift and Lock Mechanism with 18" or 26" Track

► See Specifying, pages 173–174.

Product Details

7" Lift and Lock mechanism with 18" or 26" track is for use in a narrow corner application that is less than 18" radius or 17" diagonal and greater than 90° corner.

7" Lift and Lock mechanism has a height adjustment range of 3" above track and 7⅘" below track.

7" Lift and Lock mechanism tilts ±15° and a rear swivel of 360°.

**Application Topics**

7" Lift and Lock mechanism requires a 26"D clearance under the worksurface.

Dial Indicator6 Mechanism with 23" Track

► See Specifying, page 174.

Product Details

Dial Indicator6 mechanism with 23" track is for use in straight and corner applications.

Dial Indicator6 mechanism has a height adjustment range of 2 3/8" above track and 6 1/2" below track.

Dial Indicator6 mechanism extends 6" and is standard with a patented dial tilt adjustment of +10/-20° and dual swivel of 360°.

Height and tilt indicator are a visual display located on the throat of the mechanism for easy use.

Application Topics

Dial Indicator6 mechanism requires a 23"D clearance under the worksurface.

Keyboard Platforms and Palm Rests

Keyboard Platforms
and Palm Rests

Slider Keyboard Platforms

► See Specifying, page 177.

Product Details

Slider keyboard platforms are available without palm rest, with 1½" standard adjustable palm rest, and with 3" deeper adjustable palm rest.

Tip: When using MS Natural Keyboard, specify platform without palm rest.

Slider palm rests are height adjustable between ¼" to 1½" above the platform.

Slider keyboard platform is standard with sliding mouse surface for either left- or right-hand use. Mouse surface is curved to provide ergonomic positioning for the user and is standard with built-in cord management for keyboard and mouse.

Slider platforms require 20"W of kneespace clearance below worksurface for storage.

Slider mousing palm rest mounts left or right by sliding on the mouse surface. Sliding mouse surface should be pushed into center position for storage.

Slider keyboard platforms are standard with document slot to support up to 20 sheets of paper.

Slider keyboard platforms include built-in cord management for keyboard and mouse.

Application Topics

Slider platforms require 20"W of kneespace clearance below worksurface for storage.

Corner filler is required for 90° corner applications.

Jules Keyboard Platforms

► See Specifying, page 178.

Product Details

Jules keyboard platforms are available without palm rest, or with standard foam palm rest. Palm rest fixed and is 2"D.

Tip: When using MS Natural Keyboard, specify platform without palm rest.

Jules keyboard platforms are standard with mouse surface for either left- or right-hand use and is ideal for multi-user workstation. Jules mousing surface stores beneath platform when not in use.

Jules platforms include integrated cable routing clips for cord management.

Application Topics

Jules platforms require 20"W of kneespace clearance below worksurface for storage.

Classic Rectangular Keyboard Platforms

Tip: Classic Rectangular platforms are not recommended for use in corner applications.

► See Specifying, page 180.

Product Details

Classic Rectangular keyboard platforms are available without palm rest, with positionable palm rest, with full-width/fixed height palm rest, and full-width/adjustable palm rest.

Tip: When using MS Natural keyboard, specify platform without palm rest.

Classic Rectangular keyboard platforms is standard with integrated same-plane mouse surface for either left- or right-hand use.

Classic Rectangular keyboard platforms include integrated cable routing clips for cord management.

Cableways

► Specifying, page 233

Tip: Cableways may need to be shorter than work-surface width. To determine screen/cableway and height-adjustable desks compatibility see Height-Adjustable Desks Specification Guide.

Product Details

Cableway allows user to manage cables and power at worksurface height for a clean aesthetic.

Cableway is a fixed height ¼" above the worksurface.

Cableway with universal clamp can be used in combination with privacy and modesty screens.
► See *Height-Adjustable Desks Specification Guide*.

Gap between worksurface and cableway is 1" to allow for cables to feed through.

Cableway is 3" shorter than screen width to accommodate universal clamp.

Cableway must be mounted to the left or the right of the power access door cable tray on Ology.

Universal clamp, if selected, is for use with worksurfaces 1" to 2" thick.

Universal clamp, if selected, uses a 2" footprint above and below worksurface.

Universal clamp, if selected, is standard with rubber feet to ensure a tight fit without marring worksurface.

Horizontal brackets, if selected, screw into underside of worksurface.

Horizontal brackets, if selected, require 2" of clearance below worksurface.

Flat Panel Monitor Arms and Supports

Flat panel monitor arms are available in four series: Eyesite, CF Series, FYI, and Volley. Eyesite monitor arms can support one to six monitors. CF Series monitor arms support up to two monitors. FYI monitor arms support up to two monitors. Volley monitor arms are for single monitor use.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Tip: Attaching monitor arms to freestanding tables with casters or glides, including height-adjustable tables with less than three legs, is not recommended due to tipping hazards.

Tip: When attaching flat panel monitor arms to integrated rail on Ology, from either end of the rail, there is a 5½" mounting free zone.

Flat panel monitor arms are for use in C-clamp, through-mount, FrameOne, c:scape, and Ology. CF Series and FYI flat panel monitor arms are also for use with Slatwall and SlatRail applications. Volley flat panel monitor arms are available with C-clamp/through-mount, or Slatwall/SlatRail applications only. ► See individual series for application limitations.

To select appropriate flat panel monitor arm, determine mounting application, number of monitors to be supported, weight of monitors to be supported, and whether a dynamic or static arm movement is preferred.

Eyesite

Eyesite display supports are available in several variations: single, dual, or triple monitor; one-over-one, two-over-two, and three-over-three; and single and dual laptop display supports.

Quick connect is standard on all Eyesite supports.

Cable management is included on all Eyesite display supports.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Product Details

Eyesite arms allow for monitor to rotate portrait to landscape orientation.

Tip: Eyesite is not permitted of use on Elective Elements Technology Worksurfaces.

Eyesite mounting brackets are available in C-clamp, through-mount, FrameOne, c:scape, Ology, and Bivi applications.

To adjust the height of the monitor, use the supplied Allen wrench or use a $\frac{5}{32}$ hex bit. Turn the adjustment nut right or left to make the monitor go up or down.

All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquire through Apple.

Application Topics

Standard columns can be used with monitor screens 20" or greater.

Extended columns can be used with monitor screens 17"–19".

When mounting, Eyesite arms should only be mounted to c:scape desks that are tethered to either the beam, another desk, or 1½-High low storage with a connect zone.

Slatwall or SlatRail can be mounted on either side of Eyesite display supports.

Eyesite cannot be C-clamped in front of Stanchion mounted Slatwall or SlatRail. For this application, a through-mount bracket is recommended.

Monitor arms and supports with C-clamp brackets are not recommended on Universal Tables with P-edge as the user's edge wraps all the way around table.

C-clamp brackets can be used with Universal Systems worksurfaces with a P-edge as it is applied to the front edge only.

Monitor cables that connect to the rear of the monitor near the VESA plate will not fit properly with the Eyesite monitor arm. Use right angle IEC cords or choose FYI or CF Series arm.

When mounting dual or triple Eyesite on stand-alone, single-sided FrameOne base units, the worksurface must be 66"W or greater and must be used with Eyesite standard crank adjustable column only.

Eyesite columns may be mounted back to back on double-sided FrameOne worksurfaces when using FrameOne brackets.

Bar-over-bar applications utilize the 26" extended static column only. Bar-over-bar is not permitted on c:scape, Bivi, or Big Table. Bar-over-bar may be used with FrameOne utilizing the static, non-focal adjusting dual and triple static yokes.

Bar-over-bar applications may be used with Ology, Series 3, 5, and 7 worksurfaces with three column base configurations. Bar-over-bar applications are not permitted for use with Airtouch, any Ology, Series 3, 5, or 7 worksurfaces with two column-base configurations, or any free-standing table with casters.

Eyesite single and dual laptop supports are not recommended for use with docking station. External keyboard and mouse are recommended.

Tip: Bivi bracket to be used with Eyesite single support, dual display support, single laptop support, and dual laptop support with extended crank adjust columns only.

Eyesite assemblies, components, and VESA bracket assembly-slide are available with a pivot option to allow greater angle flexibility of individual monitors and enable booking.

Monitor arms are not intended for use in applications where the monitor extends beyond the perimeter of the worksurface.

Tip: Adjustment of monitors is manual and limited by monitor size.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Tip: Eyesite single flex mount, when used with monitors with weight concentration at bottom of monitors or all-in-one monitors with CPUs, may be prone to drift.

Eyesite Flat Panel Monitor Arm Support Assemblies

Eyesite Single Display Supports

Tip: Eyesite single display support is for use with monitors up to 20 lb.

Tip: For large monitor screens (20"+), order standard columns. For small monitor screens (17"-19"), order extended columns.
▶ Page 267

Tip: Ology bracket mount is available with optional brackets. See options above.

Tip: Eyesite arms should only be mounted to c:scape desks that are tethered to either the beam, another desk, or 1½-High low storage with a connect zone.

Tip: Monitor cables that connect to the rear of the monitor near the VESA plate will not fit properly on the Eyesite monitor arm.

Tip: Eyesite is not recommended with 22¼"D Airtouch worksurfaces due to C-clamp interference with the lifting column.

CF Series Flat Panel Monitor Arms

CF Series display supports are available in several variations: Light-duty arm, standard arm, heavy-duty arm, maximum-duty arm, single and double pole mount, and wall-mount display supports.

CF Series light-duty, standard, and heavy-duty arms and poles includes standard tilt head mechanism. Optional heavy-duty spring tilt head mechanism and brackets specified separately. Maximum-duty arms are standard with heavy-duty spring tilt head mechanism.

Double-arm pole mount includes standard tilt head mechanism. Optional heavy-duty spring tilt head mechanism and brackets specified separately.

Cable management is included with all CF Series supports.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

CF evolution light-weight monitor arm supports one to two monitors. Quick release tilt head standard.

CF Series laptop holder platform holds laptops securely in place with bungee cord. Laptop platform contains a non-slip mouse-like pad. Can be used on CF Series, CF Series Modular, and CF Series Evolution.

CF Series universal laptop/tablet holder holds devices securely in place and accommodates a wide range of dimensions. Can be used on CF Series, CF Series Modular, and CF Series Evolution.

CF Series slider bar includes tilt head mechanism with quick release. Heavy-duty tilt head mechanism can also be specified separately.

Single-arm pole mount includes standard tilt head mechanism. Optional heavy-duty tilt head mechanism specified separately.

Wall-mount support

CF Series modular monitor arm assemblies allow flexibility and reconfigurability. Assemblies provide monitor support for one to six monitors. Assemblies are available with standard or heavy-duty spring tilt-head mechanism.

CF Series intro monitor arm supports one or two monitors. Quick release tilt head standard.

Product Details

CF Series dynamic arms, except CF2500, are standard with 75/100 VESA plate and tilt head. A heavy-duty spring tilt head, standard and heavy-duty quick release tilt head, and slider bar quick release tilt head options are available. The CF2500 monitor arm comes standard with the heavy-duty spring tilt head.

When using CF series single arm with CFDUALBAR dual monitor support, the heavy-duty spring tilt head is required.

CF Series pole arms and components are available to allow various configurations to meet user needs.

CF Series pole arms are standard with 75/100 VESA plate and tilt head. A heavy-duty spring tilt option is available.

CF Series evolution single arm mounting bracket includes options of C-clamp, through-mount, Bivi, c:scape, and FrameOne.

CF Series evolution dual arm mounting bracket includes options of C-clamp, Bivi, c:scape, and FrameOne.

CF Series slider bars accommodate larger monitors on CF Series modular arm assemblies. Slider bars are not recommended for use on tiered monitor applications.

CF Series arms allow for monitor to rotate portrait to landscape orientation.

Monitor arm assemblies include mounting bracket options of C-clamp/grommet, through-mount, Bivi, c:scape, and FrameOne.

CF Series intro single and dual arm brackets can be C-clamped or through mounted.

CF Series brackets are available in desk C-clamp/grommet, through-mount, desk C-clamp through-mount wall/grommet reverse wall-mount, Slatwall, maximum-duty, Bivi, FrameOne, and c:scape applications. *Tip: See CF Series Monitor Arm Application Guide on www.steelcase.com for all possible arm configurations.*

CF Series arm mounting brackets must be specified as an option.

All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Application Topics

CF Series cannot be mounted in front of stanchion mounted Slatwall when using C-clamp bracket. For this application, a through-mount bracket is recommended. *Tip: Double-arm pole is not recommended for use with Slatwall mounting bracket.*

CF Series T-shape dual-base and CF2500 maximum-duty monitor arm are not available with FrameOne brackets and must be C-clamped 5 1/2" to the left or the right of the power access door on Ology.

CF Series intro single arm can be grommet mounted.

Monitor arms and supports with desk-clamp grommet are not recommended on Universal Tables with P-edge as the user's edge wraps all the way around table. C-clamp brackets can be used with Universal Systems work-surfaces with a P-edge as it is applied to the front edge only.

Tip: CF Series arms should only be mounted to c:scape desks that are tethered to either the beam, another desk, or 1 1/2"-High low storage with a connect zone. *Tip: When planning with stand-alone, single-sided FrameOne base units, the worksurface must be 66"W or greater and utilize no more than one single CF Series flat panel monitor arm.*

Tip: FrameOne and c:scape CF Series brackets have a maximum load limit of 30 lb.

CFP28 is not recommended for use with single-sided FrameOne, c:scape, or any freestanding applications.

CF Series display supports are compatible with touch screen monitors.

Monitor arm assemblies with more than two monitors are not allowed on non-tethered desks.

Bivi mounting bracket requires additional Bivi brace (TS8TMBRAC). *► See turnstone Specification Guide.*

When mounting CF Series arm brackets to Slatwall, bracket must be mounted no further than 10" away from Slatwall mounting bracket. If application does not allow bracket to be installed within the 10" range, an additional bracket or brackets should be installed within 10" of desired arm location.

Tip: Slatwall skin brace package is required when mounting a flat panel monitor arm on an Answer slatwall skin.

Tip: Single monitor arm can be mounted on 12"H slatwall skin that has an installed brace package.

Tip: Two single or one dual monitor arm can be mounted on 18"H or 24"H Answer slatwall skin that has an installed brace package. For optimal stability, the monitor arm should be mounted as shown below:

When optioning both integrated rail and power access door on Ology, CF series arms (excluding CF Series T-shaped dual-base and maximum-duty monitor arm) can be attached with FrameOne brackets behind the power door.

LED with bracket is available for use with CF Series monitor arms. *► See page 296*

Monitor arms are not intended for use in applications where the monitor extends beyond the perimeter of the worksurface.

CF Series Tablet and Laptop Holders

Tip: Laptop holder and universal laptop/tablet holder attach to tilt head mechanism (not included).

Tip: The laptop holder platform (CFLHS) and the Universal tablet and laptop support (CFTULT) can be used on CF Series, as well as most monitor arms with a VESA plate and tilt head that has tilt functionality.

Tip: Laptop holder includes black pad to stop laptop slippage. Security cord secures laptop in place.

Tip: CF Series laptop holder platform and Universal laptop/tablet holder work best with the CF500 light-weight monitor arm, due to laptop and tablet lower weights. Specify CF500 for CFLHS and CFTULT.

Tip: Supports laptops up to 11 lb with the standard tilt head. For laptops weighing more than 11 lb, use the heavy duty tilt head. Security cord holds laptop in place.

Tip: Supports laptops and tablets up to 0.9" to 2.1" in depth and 8.8" to 20" in width.

Tip: CF Series laptop holder platform and Universal laptop/tablet holder also work on static pole arm extensions.

CF Series Flat Panel Monitor Brackets

Tip: Flat panel monitor arm must be used with flat panel monitor brackets, ordered separately.

Tip: When mounting CF Series arm brackets to Slatwall, bracket must be mounted no further than 10" away from Slatwall mounting bracket. If application does not allow bracket to be installed within the 10" range, an additional bracket or brackets should be installed within 10" of desired arm location.

Tip: C-clamp bracket is for use with worksurfaces with a thickness of 1" to 1 5/8".

Tip: Requires 3/8" diameter through hole. For use with maximum worksurface thickness of 1" with through-mount bracket base plate and 1 5/8" without through-mount bracket base plate.

Tip: CFSPWM is not recommended for drywall, sheet rock, or plaster surfaces.

Tip: When using CFSPSW, limit the CF arm load to 25 lb.

Tip: Maximum-duty monitor arms CF2500 can be used only with maximum-duty arm bracket CFSPSGLBASE.

Product Details

FYI single flat panel arms are available with or without brackets.

FYI Flat panel arms allow for monitor to rotate portrait to landscape orientation.

Single FYI flat panel arm has a focal adjustability range of 4½" to 24" and vertical adjustment range of 11½".

Single FYI flat panel arm supports monitor weighing 5 to 20 lb and up to 30" diagonal.

FYI dual flat panel monitor arms are standard with brackets – C-clamp, through-mount, wall-mount, Slatwall/SlatRail, and c:scape.

Dual FYI flat panel arm has a focal adjustability range of 4½" to 24" and vertical adjustment range of 11½".

Dual FYI flat panel arm supports monitors weighing 2 to 20 lb and accommodates monitors 19" to 27". It is not recommended to use an FYI dual flat panel arm on a 24" deep worksurface due to lack of focal depth adjustment.

Tip: The larger the monitor, the less focal adjustment. 27" monitors are limited to approximately 19" of forward travel from the back of the worksurface.

All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Application Topics

FYI single and dual flat panel arms cannot be mounted to glass surfaces and are not intended for use with touch screen monitors or monitors with built in CPUs.

FYI single cannot be mounted in front of stanchion mounted Slatwall when using C-clamp bracket. For this application a through-mount bracket is recommended.

When mounting FYI single flat panel arms to Slatwall, bracket must be mounted no further than 10" away from Slatwall mounting bracket. If application does not allow bracket to be installed within the 10" range, an additional bracket or brackets should be installed within 10" of desired arm location.

Monitor arms with C-clamp mounts are not recommended on Universal Tables with P-edge as the user's edge wraps all the way around table.

C-clamp brackets can be used with Universal Systems worksurfaces with a P-edge as it is applied to the front edge only.

When mounting FYI to Ology with integrated rail and/or power access door, C-clamp brackets may not be attached behind the power access door, and must be mounted 5½" to either side.

When mounting FYI single and dual panel monitor arm on c:scape, the desk must be tethered to the c:scape beam, back of another desk or 1½-High low storage file.

When mounting FYI single on stand-alone, single-sided FrameOne base units, the work-surface must be 66"W or greater and utilize one monitor arm only.

Slatwall/SlatRail or wall-mount brackets for FYI upper arm, FYI tilt/pan, and FYI single arm must be ordered separately.

LED with bracket is available for use with FYI flat panel monitor arms. ▶ See page 322

Monitor arms are not intended for use in applications where the monitor extends beyond the perimeter of the worksurface.

*Dual FYI flat panel arm supports monitors weighing 5 to 20 lb and accommodates monitors 19" to 27".

Tip: The larger the monitor, the less focal adjustment. 27" monitors are limited to approximately 19" of forward travel from the back of the worksurface.

**Maximum monitor size may be impacted by thickness of monitor and location of VESA bracket mount. Dimensions are estimates.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Tip: FYI monitor arms rotate 99° at the base of the arm to allow maximum flexibility. Maximum rotation may result in monitor making contact with mounted privacy screens.

***FYI Dual can be used with monitors up to 27" in 16:9 format and will reduce the focal depth to 19¼".

Dual Arm Focal Adjustment Range

Tip: It is not recommended to use an FYI dual flat panel arm on a 24" deep work-surface due to lack of focal depth adjustment. FYI dual should only be installed on 29" or deeper work-surfaces.

FYI Single Flat Panel Monitor Arms and Supports with Mounting Brackets

Tip: FYI flat panel arm support is for use with monitors 5 to 20 lb.

Tip: When planning with stand-alone, single-sided FrameOne base units, the worksurface must be 66"W or greater and utilize no more than one single FYI flat panel monitor arm.

Tip: FYI flat panel monitor arm is not for use in front of stanchion mounted Slatwall.

Tip: The colors for upper arm and cable cover are defaulted by monitor arm.

► See page 351, Defaulted Finishes.

Tip: Monitor arms with C-clamp brackets are not recommended on Universal tables with P-edge as the user's edge wraps all the way around. Universal Systems Worksurfaces with P-edge will work as the user's edge is applied to the front only.

Tip: C-clamp bracket is for use with worksurfaces with a thickness of 3/4" to 1 3/8".

Tip: Through-mount bracket is for use with worksurfaces with a thickness of 1" to 2".

Volley Flat Panel Monitor Arms and Supports

Volley flat panel monitor arms offer dynamic height-adjustment with a 9½" minimum vertical range.

Volley uses Single Direction Bearings (SDB) in height adjustment mechanism to allow for no minimum weight requirements.

Single and dual flat panel monitor arm mounting bracket options include C-clamps, grommet mount, and through mount.

Universal C-clamp/grommet-mount mounting bracket is shown with C-clamp.

Volley flat panel monitor arm is standard with 75 mm/100 mm VESA plate quick connect.

Slatwall/SlatRail mounting bracket

Integrated cable management is standard on Volley flat panel monitor arms. Shown with C-clamp.

Swivel limiters prevent Volley flat panel monitor arms from colliding with screens or walls.

Dual Volley supports two monitors, a single monitor and laptop holder, single monitor and tablet holder, or tablet holder and laptop holder.

Tablet holder supports a tablet from 8¾" to 10¾" in length by 6" to 7½" in width.

Laptop holder supports a laptop up to 15 lb and 11½" in length and width.

Tip: All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Product Details

Volley flat panels monitor arms are standard with a universal C-clamp/grommet-mount bracket or Slatwall/SlatRail bracket.

Volley dual is available with a universal C-clamp/grommet-mount bracket. Dual volley is not available with a Slatwall/Slatrail bracket.

Volley single and dual through-mount bracket options are available.

Volley monitor arms allow for monitor to rotate portrait to landscape orientation.

Volley flat panel monitor arms have a 9½" minimum vertical adjustment range.

Volley flat panel monitor arms support monitors with no minimum weight to 15.4 lb.

All Steelcase monitor arms utilize the VESA hole pattern to connect monitor to arm. Apple monitors do not connect without optional adapter plate. Plate must be acquired through Apple.

Application Topics

Volley flat panel monitor arms cannot be mounted in front of stanchion mounted Slatwall when using universal C-clamp bracket. For this application a grommet-mount bracket is recommended.

Tip: Optional through-mount bracket available winter 2018.

Volley display supports are compatible with touch screen monitors.

When mounting Volley to Ology with integrated rail, its one piece universal C-clamp design requires that Volley be mounted before integrated rail.

When mounting Volley to Ology with integrated rail and power access door, the universal C-clamp must be positioned 5½" either to the left or the right of the power access door.

When mounting Volley arm brackets to slat-wall, bracket must be mounted no further than 10" away from Slatwall mounting bracket. If application does not allow bracket to be installed within the 10" range, an additional bracket or brackets should be installed within 10" of desired arm location.

Tip: Slatwall skin brace package is required when mounting a flat panel monitor arm on an Answer Slatwall skin.

Monitor arms and supports with universal C-clamp are not recommended on Universal Tables with P-edge as the user's edge wraps all the way around table.

C-clamp brackets can be used with Universal Systems worksurfaces with a P-edge as it is applied to the front edge only.

Volley single laptop holders are not recommended for use with docking station. External keyboard and mouse are recommended.

Tip: Tablet and laptop holder connect to the Volley monitor arm via the VESA plate quick connect.

Locking feature ensures that tablets cannot be removed without sliding the locking mechanism.

Monitor arms are not intended for use in applications where the monitor extends beyond the perimeter of the worksurface.

Divisio Side Screen

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 339

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For worksurfaces 1" thick or less; c:scape, FrameOne, Ology, Migration, a #10 x 3/4" countersunk wood screw is recommended. For work-surfaces over 1", a #10 x 7/8" countersunk wood screw is recommended.

Fixed Personal/Modesty Screens

Personal / modesty screens are tackable and provide variable privacy when and where it is needed. The screens can be used on the beam, on 1½-High low storage with a connect zone, on the back of the desk for visual privacy, or below the desk for modesty. 19½"H and 24"H are not intended for use in modesty position when used with a height-adjustable desk.

► Specifying, page 342

Fixed personal/modesty screens are available in three heights, 12", 19½", and 24", and four widths to accommodate varying levels of privacy. Height is measured from the top of the mounting surface to the top of the screen.

Brackets are attached to the screens.

Actual Dimensions

Width 30", 36", 42", or 48"

Height 11", 18½", or 23"

Overall height 12", 19½", or 24"

Thickness ¾"

Product Details

Fixed personal/modesty screens can be mounted on the desk rail. In privacy applications on a 28 1/2"H desk, the 12"H screen has an overall height of 40 1/2" from the floor, a 19 1/2"H screen has an overall height of 48" from the floor, and a 24"H screen has an overall height of 52 1/2" from the floor.

Gap is 1" between personal/modesty screen and mounting surface.

Connections

Each end of the top desk rail has a 5 1/4" mounting free zone which prohibits the attachment of personal screens.

When screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

► See page 1 for details.

Cableways

Tip: Cableway with Universal clamp can be used in combination with privacy and modesty screens.

► See page 346

Tip: Cableways may need to be shorter than work surface width. To determine screen/cableway and height-adjustable work surface compatibility, see Worktools Compatibility Charts, in the Height-Adjustable Desk Specification Guide.

Tip: Cableways are not recommended for use with 22 1/4"D rectangular Airtouch work surfaces.

Tip: Cableways with Universal clamp are 3" shorter than privacy and modesty screen widths.

Tip: 55"W and 61"W cableways ship with three Universal clamps or horizontal brackets. All other cableway widths ship with two Universal clamps or horizontal brackets.
