

Passerelle

Product Environmental Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on sustainability attributes of **Passerelle**.

Crisply tucked upholstery and a tapered wood base come together in the Passerelle Lounge Seating collection. A rich tradition of fine craftsmanship is exemplified in the button-tufted, double needle stitch detail, while the defined edges of the internal frame allow for a crisp and tightly upholstered appearance. A lounge, loveseat and sofa, and coordinating ottomans are complemented by a versatile bench collection with tufted upholstery. Efficiently scaled, with a thoughtful rear view, Passerelle Lounge Seating is ideal for small, intimate surroundings or big, open spaces.

The model chosen for analysis from the Passerelle range is reference # 440-WB.

Final Assembly Location

Final assembly of Passerelle is in Reynosa, Mexico by Steelcase for the Americas Market.

Recycled Content ⁽¹⁾

Pre-Consumer: 1%
Post-Consumer: 0%

Recyclability ⁽²⁾: 20%

Product Certifications and Labels ⁽³⁾

- SCS Indoor Advantage™ Gold

Material Certifications ⁽⁴⁾

- Cradle to Cradle Certified™ textiles available
- Oeko-Tex® textiles available

Plant Certifications

- ISO 14001 – Reynosa, Mexico

Passerelle may contribute to the following building standards and initiatives ⁽⁵⁾ in the following ways, depending on options.

Potential contribution area	LEED® Credit	The WELL Building Standard® Feature
Recycled content: Pre-Consumer: 1% Post-Consumer: 0%	BPDO - Sourcing of raw materials, Furniture and medical furnishings	
SCS Indoor Advantage™ Gold	Low-emitting materials	Feature 04
Materials Transparency	Passerelle may meet the Furniture and Medical Furnishings credit of LEED.	

⁽¹⁾ Calculations of recycled materials exclude packaging and are based on data provided by professional organizations, suppliers and other available information. Recycled materials are determined by weight and defined in accordance with ISO 14021. This data may include industry averages, ranges or other broadly-based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice. Recycled content may include pre- and post-consumer materials:

Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

⁽²⁾ In locations where recycling is available. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold. Steelcase offers services to assist customers with end-of-use options including resale, refurbishment, charitable donation, and recycling.

⁽³⁾ Product Certifications and Labels

Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

⁽⁴⁾ Available to specify.

⁽⁵⁾ Building standards and initiatives

LEED® —an acronym for Leadership in Energy and Environmental Design™—is a registered trademark of U.S. Green Building Council®. These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product. Refer to www.usgbc.org for LEED Program details.

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. Learn more at [WELL certified.com](http://WELLcertified.com).

Steelcase sustainability related actions and results are communicated annually in the **Corporate Sustainability Report.** [➤](#)
