Navigate with Confidence

Steelcase® Live Map is a large-scale digital display that shows the real-time availability of rooms, desks and workspaces. Located in highly visible spaces, it takes the guesswork out of finding the ideal space to get things done—not just saving valuable time but also helping people feel more confident and comfortable so they can focus on what really matters: achieving their best-possible performance.

15m

Employees currently spend an average of at least 15 minutes per day looking for workspaces.

IM#: 18-0109784

SAVE TIME SEARCHING

Between the sprawling size of large campuses and their often complex naming conventions, locating available workspaces can be frustrating and time consuming. Live Map provides immediate visual context so everyone, including nomadic workers, can find their space quickly and get right to work.

FIND THE RIGHT SPACE

Live Map's user-friendly layout can be presented on any standard 1080p display, making it a flexible option for workplace wayfinding systems. Built on Microsoft Azure, the cloud-based software solution pulls scheduling data from Microsoft Office 365 and occupancy data from Steelcase Workplace Advisor sensors to reveal the real-time availability of rooms, desks and workspaces. The result? An elevated experience for visitors and valuable peace of mind for employees.

FOCUS FASTER

With Live Map's best-in-class digital overlay on an easy-to-read floor plan, employees can save time searching and maintain momentum, whether they're locating a scheduled meeting, searching for a conference room for an impromptu touch-base or seeking a quiet desk for a few hours of focused work.

SMART + CONNECTED WORKPLACE

Employees need room availability data to be accurate. Workplace Advisor Subscription sensors activate Auto Book and Auto Release, and Live Map signals the availability to the workplace. Together, Workplace Advisor, Live Map and Find create a seamless user experience as employees navigate the workplace.
