

Product Compliance Laboratory Confirmation of Product Compliance

6/2/2015

Steelcase PolyVision markerboards have been designed, engineered, and manufactured, to meet or exceed all applicable ANSI / BIFMA (American National Standards for Office Furnishings) requirements for safety and performance.

The **PolyVision** Ceramic P³ / e³ Markerboards have been tested and found to comply with the following specifications.

UL 723: Test for Surface Burning Characteristics of Building Materials ¹

ASTM E84: Standard Test Method for Surface Burning Characteristics of Building Materials ¹

These markerboards met the requirements for a NFPA 101 Life Safety Code of Class A, Flame Spread Index ≤ 25 and Smoke Developed Index ≤ 450 .

¹ This specification is not included in the scope of accreditation.

Steelcase uses its own ISO 9001 registered and ISO 17025 accredited laboratories, and accredited independent laboratories, to verify compliance to the Standards and requirements listed. A list of accredited independent laboratories is available upon request.

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and assembly directions. The use of unauthorized non-Steelcase components, parts, or materials with integrated Steelcase product solutions VOIDS all Steelcase claims of product compliance to BIFMA, UL, CSA, LEED, and / or any office furniture safety or performance standards, including all building, fire, and electrical codes. This exclusion includes but is not limited to the use of non-Steelcase panel supported work surfaces, leg supports, panels, brackets, shelves, overhead bins, and other integral components. The use of non-Steelcase components in an integrated product solution not designed, tested, or supported, by Steelcase is an unauthorized modification of the original product which voids all Steelcase warranties, expressed or implied.
