

IM#: 16-0014453

Bold + Versatile

Privacy Wall is the bold modular wall solution that builds new spaces and flexes to meet changing needs. Painted steel frames create a strong, rectilinear look. Panels and frames comprise complete modular units for fast and easy planning, installation and reconfiguration. So you can create attractive meeting rooms, enclaves and private offices with ease – now and later. Privacy Wall also works with butt glazing for an open, seamless effect.

Significant savings

Speed the schedule and shrink the budget. Privacy Wall saves up to 53% in costs and 29% in installation time compared to traditional construction. As a modular solution it also depreciates faster than drywall, so you see tax benefits sooner.

Stay flexible

As business needs evolve, Privacy Wall keeps performing. Unitized panels are easy to relocate and reconfigure to serve new purposes. It's a solid investment in agility.

Create quiet places

Even in the open office, people seek enclosed places to concentrate and collaborate. Privacy Wall solid panels can create rooms much quieter than most drywall applications, achieving STC ratings of 41 or 45.

Sustainable solution

Made with 44% recycled content, Privacy Wall is also 63% recyclable and 100% reusable. Privacy Wall and related Steelcase Glass Selections are the first and only Cradle to Cradle™ Silver relocatable wall products and the only ones manufactured in North America. They are also SCS Indoor Advantage Gold certified and can contribute to LEED certification.

SURFACE MATERIALS

Privacy Wall offers a wide range of frame colors and surface materials, including fabrics, woods, plastics, metals and glass types. Glass can also feature Casper™ Cloaking Technology to obscure digital screens while maintaining clear, open views.

Please consult the *Specification Guide* and Steelcase Finish Library for a full list of available surface materials.

PRODUCT DETAILS

- ¼" thick glass with 2 ½", 4" or 5" base trim profile
- ½" thick glass with 1" base trim profile
- Available unitized or with butt glazing
- Creates enclosures or glass fronts
- Slider, butt-hinged or pivot-hinged doors
- Integrates with other Steelcase architectural solutions

Refer to the *Specification Guide* at Steelcase.com for the complete system.
