Storage and Delays

(Open Market) In the event that the site is not accessible, or safe and adequate storage space is not available during installation, the furnishings will be stored until delivery or installation can be accomplished. Pricing for storage will be negotiated on a project-by-project basis. Invoices will be sent to the local government purchasing facility upon delivery of the furniture to a designated storage facility. Steelcase shall provide notice to the Government purchasing facility that the furnishings are available for inspection by the Government at the Storage facility. Upon this notice, the Government, or representative for the Government, must inspect and accept the furniture prior to payment of any invoice. The inspection and acceptance must be completed within reasonable time frame agreed upon by both parties. Payment will be made by the Government 30 days after acceptance of the furniture.

Rectangle Tables

SIN 711.11

Tip: Rectangle tables are available parametrically in 1/16" increments; except when softened shape type and laminate top surface is specified, parametric sizes must be specified in 3" increments.

Tip: Rounded and square corner shapes are only available on tables with straight shape type, not softened shape type.

3 mm Plastic or Wood Edge

Slice Wood Veneer Edge

Drop Wood Edge

Eased Wood Edge

Tip: Wood edge finish will match top finish.

Tip: Solid drop wood edge not available on softened shapes.

Tip: Eased wood edge is not available on laminate tops or tops with square corners.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

▶ See *Wood Color Availability Matrix* on page 160 for color availability by product line.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available or quarter cut, except for Oak, which is rift cut.

▶ Refer to the *Veneer Cut Guidelines* on page 158 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

▶ See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or top only.

Tip: For ease of specification, full-fill finish codes can be selected on other veneer components being used in settings with full-fill veneer worksurfaces. The other components will not have the final fill coat applied, but the finish color will be consistent with the full-fill worksurfaces.

**To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.*

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Note: Known for their color consistency, composite veneers feature a clear coat finish. Because the veneers are sourced in large lots, overall color within a specific purchase order should have minimal color inconsistency. However, composite customers should know that colors may vary slightly from dye lot to dye lot. This inconsistency may be noticed when replacement pieces are ordered that may be from different dye lots, or when a new project phase is installed. Also note that composite veneers tend to fade and lighten over time, especially with sun exposure.

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$67 per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Veneer Cut Guidelines

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

2K71	6045 Medium Mahogany on Walnut
2K73	Instant Iron Patina Match
2K74	6237 Clear Maple
2K75	6231 Graphite Walnut

Tip: To improve consistency, default edge colors are now identified by 6000-series numbers; actual colors and defaults have not changed. Because default edge colors are not actually entered when specifying products, no specification changes are required. (Previous specification guides used 2000-series numbers to describe default edge colors, while 6000-series numbers were used for customer-specified edge colors, even though the edges were identical.)

► See the *Surface Materials Reference Manual* for more details.

Tip: Standard laminates being used in the Open Line laminate program to obtain a different edge detail will be charged the processing fee upcharge; however, no additional charges for the laminate will be applied.

Specification Guidelines for Vertical Fabric Applications

Warp horizontal means the height dimension of the tackboard is perpendicular to the warp of the fabric.

Application Topics

Tip: Fabric warp direction cannot be altered from standard on tackboards.

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

Surface Materials Representatives are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

For further information regarding COM fabrics, refer to the Steelcase *Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

Elective Elements

Desk Worksurfaces—Straight and Bow Fronts

Wood Veneer or Laminate

SIN 711.2

Tip: Any bow-front desk worksurface with an overhang must use a plinth base J-shape end panel and plinth base pedestal combination. The exception is when a return worksurface is attached to a straight or bow-front desk worksurface, then an overhang of no greater than 12" is allowed.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Grommets on desks with inset modesty panels should only be ordered in right or left position.

Tip: Recommended column and leg supports vary based on worksurface length and the support used on the opposite end. Refer to Worksurface Support Guidelines in Elective Elements Wood Systems Furniture Specifications Guide.

► Worksurface Edge Matrix in *Elective Elements Wood Systems Furniture Specification Guide*.

Bridge Worksurfaces

Wood Veneer or Laminate

SIN 711.2

Tip: For bridge worksurfaces with a blade edge, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions. This same rule applies to a bullet or P-top in a U-shape setting.

Tip: The nominal width of a bridge coped with blade edge work surface is approximately 4 1/4" less than a square edge.

Tip: Short grain direction is not available on laminate.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Specify a scallop when a service module or hutch kit is used with a task light.

Tip: Use pedestal back panels when specifying 2/3-height modesty panels and overhanging worksurfaces in a desk configuration or if you want the back of a single pedestal finished.

Tip: Use full-height modesty panels to finish the back of two-high lateral files and other 30"W and 36"W pedestals.
▶ See Elective Elements Wood Systems Furniture Specification Guide.

Tip: For One-High open pedestals for use with Ology, add a finished back when visible from the rear.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Wood group 2 and 3 upcharges are in addition to wood group 1 upcharge.

Plinth Base Corner Support Kits and Rear L-Shape Corner Support

SIN 711.2

Tip: When specifying modesty panels for use with corner support kits, order modesty panels that are 12" shorter than the worksurface width where the modesty panel will be located.

Tip: Corner support kits are not available in leg base applications. Plinth base corner support kits are still a feasible option to be used within a leg base application, if needed.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Plinth Base Center Support Panels

SIN 711.2

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: When calculating unsupported spans, the 15" portion of an L-shaped end panel that runs along the back edge should not be considered. Measure the portion of the end panel that runs front-to-back.

Tip: For unsupported spans from 60"W to 90"W, use one worksurface brace or a center support panel. For spans greater than 90"W, a center support panel must be used.

Tip: 8"D center support panels are used with 18"D worksurfaces. 24"D and 30"D worksurfaces must use the 11"D center support panel.

Glass Modesty Panels

SIN 711.2

Tip: Glass modesty panels offer no structural support.

Tip: Glass modesty panel cannot mount in front of a power unit with cord pass-through due to bracket interference.

Tip: The glass modesty is available in two versions – end panel application and storage application. The storage application is 7/8" larger to fill the absence of headset on open storage in an L-shape application where the lack of open storage headset would adjoin against the modesty.

Tip: Use the glass modesty panels ending in "E" for any application with an end panel on both ends, end panel and storage on either end, or storage on both ends for tightest flush fit. This applies to both plinth and leg base applications.

Tip: When using the column leg application, specify separately rectangular column, column, or disk column leg for spacer.

Tip: Glass modesty panel cannot attach flush to same end of worksurface that has a pedestal as a support.

Perpendicular Tether Supports

SIN 711.2

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Depth of the perpendicular tether support is determined by the depth of the worksurface supported. Use a 19 5/8" D support for a 24" D worksurface. Use a 25 5/8" D support for a 30" D worksurface. Use a 31 5/8" D support for a 36" D worksurface.

Tip: Width of the perpendicular tether support is determined by the depth of the worksurface above the 1.5 high storage units. Use a 13 5/8" W support when the worksurface is 18" D. Use a 19 5/8" W support when the worksurface is 24" D.

Tip: Perpendicular tether supports are designed to work with desk worksurfaces. Any other worksurface will require holes to be drilled by installers.

Tip: The perpendicular support is not handed.

SIN 711.2

Worksurface Braces

Tip: Worksurfaces supported by pedestals or end panels that have unsupported spans from 60"W to 90"W, use one work surface brace or a center support panel. Select the work surface brace length closest to the unsupported span. For spans greater than 90"W, a center support panel must be used.

Tip: Worksurfaces supported by legs or tethered brackets that have unsupported spans less than 24"D x 84"W, use one work surface brace. For unsupported spans greater than 24"D x 84"W, two work surface braces are required for support.

Tip: When calculating unsupported spans, the 15" portion of an L-shaped end panel that runs along the back edge should not be considered. Measure the portion of the end panel that runs front-to-back.

Legs and Supports

SIN 711.2

Tip: Worksurfaces supported by legs or tethered brackets that have unsupported spans less than or equal to 24"D x 84"W, use one worksurface brace. Spans greater than 24"D x 84"W, two worksurface braces are required for support.

Tip: When specifying a rectangular column leg for use with a worksurface 78"W or larger, the rectangular column leg with base must be used.

Tip: The rectangular column leg is adjustable 2 1/4" to support worksurfaces up to 31"H.

Tip: Rectangular column legs, rectangular column legs with bases, columns, and disk columns should not be used to support freestanding tables. They are used to support the end of run-off worksurfaces.

Tip: The gate leg cannot be used with the Universal top or blade edge profile.

Tip: When using a blade edge profile, rules are slightly more stringent due to construction. ▶ See Elective Elements Specification Guide.

Cushion Tops

SIN 711.2

Tip: Cushion top is not designed to be used on open one-high bookcase units. If that application is desired, specify a work-surface to be mounted on the bookcase and attach the cushion top to the work-surface. This will raise the overall height of the unit by an additional 1½".

Tip: Cushion top ships separately from storage.

Tip: Cushion top attaches to one high plinth base and 21½"H leg base pedestals, two-high lateral files, and plinth base 1.5 high storage units. 42"W cushion tops are not available.

Tip: A back panel is required when using a cushion top. Note: Leg base credenzas and pedestals come with an unfinished back panel. Order separately in plinth base storage.

Tip: Seam pattern is determined by upholstery selected.

Tip: For 15"W to 36"W single leg base units, see page 352.

Tip: A 45"W credenza can only be used in an open kneewell setting (without a back panel). Order a leg base L-shape end panel separately. If a kneewell with a back panel is needed, order a built up credenza.

Tip: Storage legs may be shared with another leg base storage unit of the same depth.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Soft close drawer slides only apply to storage that has 15"W drawers.

Tip: Soft close slides are available for both dovetail and miter fold construction.

Tip: Metal shelves only available in open or hinged door components.

Tip: Back panel is inset and spans entire width of credenza.

Tip: Technology trough is not available in hinged door components.

Tip: Center or inside panels are always cut out if technology trough is specified to allow cords to pass between components.

Tip: Storage legs may be shared with another leg base storage unit of the same depth.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: All credenzas with a kneewell ship knockdown.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Soft close drawer slides only apply to storage that has 15"W and 18"W drawers.

Tip: Soft close slides are available for both dovetail and miter fold construction.

Tip: Metal shelves only available in open or hinged door components.

Tip: Back panel is inset and spans entire width of credenza.

Tip: Technology trough not available in hinged door components.

Tip: Center or inside panels are always cut out if technology trough is specified to allow cords to pass between components.

Tip: Storage legs may be shared with another leg base storage unit of the same depth.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: All credenzas with a kneewell ship knockdown.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Soft close drawer slides only apply to storage that has 15"W and 18"W drawers.

Tip: Soft close slides are available for both dovetail and miter fold construction.

Tip: Metal shelves only available in open or hinged door components.

Tip: Back panel is inset and spans entire width of credenza.

Tip: Technology trough not available in hinged door components.

Tip: Center or inside panels are always cut out if technology trough is specified to allow cords to pass between components.

Tip: 102"W credenzas are only available with a kneewell and a combination of one or two storage components.

Tip: Storage legs may be shared with another leg base storage unit of the same depth.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: All credenzas with a kneewell ship knockdown.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Any credenza 102" or 108"W ships knockdown.

Tip: Soft close drawer slides only apply to storage that has 15"W and 18"W drawers.

Tip: Soft close slides are available for both dovetail and miter fold construction.

Tip: Metal shelves only available in open or hinged door components.

Tip: Back panel is inset and spans entire width of credenza.

Tip: Technology trough not available in hinged door components.

Tip: Center or inside panels are always cut out if technology trough is specified to allow cords to pass between components.

Wood Veneer or Laminate

SIN 711.2

Tip: 108"W credenzas are only available with a kneewell and a combination of one or two storage components.

Tip: Storage legs may be shared with another leg base storage unit of the same depth.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: All credenzas with a kneewell ship knockdown.

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: Any credenza 102" or 108"W ships knockdown.

Tip: Soft close drawer slides only apply to storage that has 15"W drawers.

Tip: Soft close slides are available for both dovetail and miter fold construction.

Tip: Metal shelves only available in open or hinged door components.

Tip: Back panel is inset and spans entire width of credenza.

Tip: Technology trough not available in hinged door components.

Tip: Center or inside panels are always cut out if technology trough is specified to allow cords to pass between components.

SIN 711.2

Tip: Freestanding bookcases that are 65⁵/₈" or 72¹/₂"H have an unfinished back and must be placed up against a wall or back-to-back.

Tip: Leg base freestanding bookcases may be ganged when a suspension/ganging hardware kit is used, and share legs at the seam. Note: The exteriors of each will be defaced.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

Tip: Specify optional 1¹/₈" thick heavy load shelves for heavy load conditions. Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects. Metal shelves also support heavy loads.

Tip: Cabinet-to-cabinet attachment kits are used to provide rigidity between cabinets mounted side by side in a panel- or wall-mounted application.

Tip: Suspension/ganging hardware to suspend overhead cabinets between towers and stacking bookcases is ordered separately.

Tip: Single-high overhead cabinets cannot be mounted on Montage, Answer, or Privacy Walls lower than 38"H. They are not designed to function as a seat.

Tip: ADA opening/closing option features a magnetic touch latch and neutral hinge.

Tip: When stacking single-high overhead cabinets with hinged doors, the ADA option should be selected.

Tip: Finished proud back panels or inserts can be specified separately if the back of the cabinet is visible.

► See Elective Elements Wood Systems Furniture Specification Guide.

Tip: Suspension/ganging hardware to attach overhead cabinets to hutch is included with the hutch kit.

Desktop Organizers

Wood Veneer or Laminate

SIN 711.2

Caution: Vertical organizer must be used against a wall with a service module or a hutch kit with a full back. A hutch kit with a partial back can be used if the vertical organizer is placed in the corner of the hutch kit.

Tip: If there is a need to support an overhead, use a stacking paper organizer rather than a vertical organizer. The vertical organizer fits under an overhead, but does not attach.
 ▶ Page 523

For laminate price group 2 pricing, please refer to the electronic catalog or SmartTools.

Tip: When a vertical desktop organizer is used, there is not enough depth for both a tackboard and a standard light valance. Consider an LED shelf light with or without a metal light housing.

Tip: The vertical desktop organizer must be used under a shelf, service module, or overhead, even though it does not attach, to limit the weight placed on its shelves.

Hutch Kits with Tackboard

SIN 711.2

Tip: Because tackboard is one-piece design, fabric will be railroaded for consistent application.

Tip: Overhead cabinets mounted on one-sided hutch kits attach to a tower or stacking bookcase on the other side. Specify suspension hardware kit separately.

Tip: Backs of hutch kit tackboards are unfinished.

Tip: When specifying a single-high overhead cabinet supported by a hutch kit adjacent to a stacking bookcase, use a one support hutch kit and suspend the other end of the overhead from the bookcase. This will allow for precise alignment.

Tip: Tackboards are 3" shorter when used in conjunction with a blade accessory shelf.

Tip: When tackboards are used with a blade accessory shelf, the side supports are unchanged. The tackboard is reduced approximately 3" in height to accommodate the blade accessory shelf.

Magnetic Back Painted Glass

SIN 711.2

Tip: Modular selections account for the height needed to install, and offer a way to run low-voltage wires along the top.

Tip: Application only applies when modular size option is selected.

Tip: Only rare earth magnets may be used with magnetic back painted glass. Such items can be purchased at most office supply outlets online or in-store.

Tip: Spacers for cord management can also be used to align depth of magnetic back painted glass with depth of fabric tackboard. Spacers are always included with the mounting hardware.

Tip: Mirrored bronze is not offered in magnetic back painted glass, due to the extreme difficulty in completely erasing any writing.

Tip: Specifying with cord management makes the glass panel 3/8" shorter to allow room for cords. Cord management may only be selected when an overhead application is specified and may be chosen with all overhead options.

Surface Materials

This listing includes all the surface material choices that are available for the Elective Elements products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

Surface Materials Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut.

▶ Refer to the *Veneer Cut Guidelines* on page 572 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

▶ See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or top only.

Tip: For ease of specification, full-fill finish codes can be selected on other veneer components being used in settings with full-fill veneer worksurfaces. The other components will not have the final fill coat applied, but the finish color will be consistent with the full-fill worksurfaces.

Tip: Make sure to check the cut selection across the entire order. There is no prevention to mixing cuts on a product or an order.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Tip: Known for their color consistency, composite veneers feature a clear coat finish. Because the veneers are sourced in large lots, overall color within a specific purchase order should have minimal color inconsistency. However, composite customers should know that colors may vary slightly from dye lot to dye lot. This inconsistency may be noticed when replacement pieces are ordered that may be from different dye lots, or when a new project phase is installed. Also note that composite veneers tend to fade and lighten over time, especially with sun exposure.

Tip: Composite veneers are only available with a square worksurface profile, and wood integral pulls are not available.

Tip: Be conscious if mixing the flat cut and the quarter cut in composites, there may be large variation in color.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Surface Materials, continued

Customiz stain takes 10 days to formulate. Consult the Surface Materials Reference Manual for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the Surface Materials Reference Manual.

Low sheen wood finish top-coat, approximately 15 gloss level instead of standard 35 gloss level, is available through Specials at no additional cost.

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$69 per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

Veneer Cut Guidelines

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2 1/2-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2 1/2-4" wide.

Tip: To improve consistency, default edge colors are now identified by 6000-series numbers; actual colors and defaults have not changed. Because default edge colors are not actually entered when specifying products, no specification changes are required. (Previous specification guides used 2000-series numbers to describe default edge colors, while 6000-series numbers were used for customer-specified edge colors, even though the edges were identical.)

▶ See the *Surface Materials Reference Manual* for more details.

Tip: Standard laminates being used in the Open Line laminate program to obtain a different edge detail will be charged the processing fee upcharge; however, no additional charges for the laminate will be applied.

Specification Guidelines for Vertical Fabric Applications

Warp horizontal means the height dimension of the tackboard is perpendicular to the warp of the fabric.

Application Topics

Tip: Fabric warp direction cannot be altered from standard on tackboards.

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

Surface Materials Representatives

are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

For further information regarding COM fabrics, refer to the *Steelcase Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

Color Coordination Matrix

1 mm plastic edge trim color

is defaulted and is determined by the laminate color you select for the worksurface. The edge trim color cannot be specified.

3 mm plastic edge trim color is specifiable. Refer to *Plastic* on page 568.

All laminates, except woodgrain laminates, will have solid color plastic edging.

Woodgrain laminates will have woodgrain plastic edges and the grain of the edges will be horizontal.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

► See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

For information on products within Select Surfaces, including accent paints and fabrics from DesignTex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for us as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Planked Veneer

Planked veneer is available in the Select Surfaces offering. Planked veneer may have extended leadtimes. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the planked veneer offering:

Wood Group 1

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain matching fee applies on all CUSTOMIZ requests. (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a log-gloss finish request on a standard color.) The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customize stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customize stain on custom veneers takes 2 to 5 weeks to formulate. Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Directional Fabrics

One application direction of fabric on FlexFrame skins is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The other application direction of fabrics on FlexFrame skins is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Wood Veneer Grain and Directional Laminate Application

Wood Veneer Grain and Directional Laminate Application

Wood veneer and directional laminates are standard with the grain directions shown.

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. The natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on surfaces installed at a 90° angle with each other.

Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

TechBox can have directional change of horizontal and vertical.

Lock and Keying Walden, Convene, and Elective Elements	622
Style Number Index	624

Lock and Keying Walden, Convene, and Elective Elements

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (optional on some product lines). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Master
Key

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.
