

Health Products for Crisis Environments

During crisis situations, healthcare solutions that can be quickly mobilized are crucial to delivering care where and when needed. Highly effective crisis response environments offer a layer of protection for patients and clinicians, support efficient work and aid in infection control.

The healthcare products shown here and on the next page have been specifically chosen because of their ability to be efficiently manufactured, quickly shipped and more easily installed.

These products have been designed to be highly durable and withstand stringent cleaning protocols.

Steelcase Health is committed to working with our customers to meet their changing healthcare needs. If healthcare products are required that are not shown here, please reach out to your local Steelcase Dealer or Sales Representative so that we can rapidly work to meet those specific needs.
