

Supporting the Needs of Front-Line Workers

Separation Screens aid infection-control efforts and offer a protective barrier between those who seek help and those who stand ready.

Separation Screens

Providing space division and visual transparency – these freestanding and desktop plastic screens suit healthcare check in, consultation and triage areas. They also work well in non-healthcare applications such as retail, banking and essential public domains.

Screens serve a variety of application uses and are available with cutouts either for contactless temperature checks or to conveniently transfer documents and small items. The adjustable clamps on desktop screens do not damage or deface worksurfaces while freestanding screens are easily deployed.

SURFACE MATERIALS

PLASTIC (SCREEN PANELS)

- Smooth Clear
- Smooth White Opaque

PAINT (FRAME)

- Platinum Metallic (4799)

Colors are representative and may vary slightly from actual material. For further options visit us online.

STATEMENT OF LINE
