

Understanding and Specifying Leap 462 Series Work Chairs

Work Chairs

Highly adjustable task seating offers maximum personalization for fit and comfort for a range of duration and use. By making a series of simple adjustments, you can customize the chair to your body, preferences, and tasks. These chairs provide continuous, stable, comfort, and can be quickly adjusted to support you in upright, and reclining work postures.

Leap 462 Series

Leap is a high-performance chair for customers who place the highest value on ergonomics, health, and productivity.

Outer back and outer seat are plastic.

LiveBack moves with the shape of the user's spine as sitting positions change.

Lumbar height adjusts 5" to provide additional lower back support. It is standard on all chairs, but may be omitted.

Arm height can adjust independently within a 4" range to help relieve upper back and shoulder fatigue.

Seat depth adjusts within a 3" range to accommodate users of varying leg lengths. Seat depth is standard on all models.

Five-arm base is available in plastic or polished aluminum.

Casters have hard, dual-wheels that roll smoothly on carpets. They are 2½" for increased mobility. Soft, dark grey treaded, dual-wheel roll-control casters are available for use on hard floors or mats. Stools are standard with 2" hard casters. Soft casters are available as an option.

Tip: Do not roll the chair across asphalt during installation as this may damage the casters.

Arm depth can retract 3" to allow user to get closer to worksurface and into tight corners.

Arm width can adjust 4½" overall to provide forearm support.

Arm caps can pivot 30° in and out to accommodate individual user preferences.

Passive seat edge angle allows the front edge of the seat to flex 1½" to relieve pressure under the user's thighs.

Lower back firmness changes the amount of firmness user feels in lower back. Requires only two complete turns.

Upper back force requires only five complete turns and accommodates a broader range of users by allowing user to change the rate of increase in force as the user reclines.

Variable back stop with five positions is standard.

Seat height adjusts within a 5" range with a pneumatic adjustment mechanism. A 7" range is available as an option. Stools have an 8" range.

Product Details

Parallel slats in the Live-Back shell provide extensive flexibility to allow back to conform to individual users.

Leap Plus offers the benefits and functionality of the standard Leap chair, including LiveBack Technology, to users weighing up to 500 pounds.

Rectilinear arms with soft caps are standard.

Models are standard with adjustable seats that include seat depth and passive seat edge angle.

Adjustability instructions are included with every chair. Fully adjustable arm models include instructions under the arm cap. Instructions can also be found at www.steelcase.com

Controls under the seat include tactile braille designers.

Coat hanger is field installed. It is offered in one finish, 0835 Black. The coat hanger supports up to 10 pounds and is not intended to hold bags or backpacks. The coat hanger cannot be used on stool models.

Cartoned request on your dealer purchase order means Leap chairs will ship knocked down with the chair base separated from the rest of the chair. This allows for shipment in a smaller carton. Assembly instructions are included. This does not apply to Leap stools, Leap Plus, or Leap WorkLounge.

Uncartoned request on your dealer purchase order means Leap chairs will ship fully assembled.

Adjustment Features

Seat Adjustments

Seat height adjusts pneumatically. To lower, hold handle up while seated. To raise, hold handle up and keep your weight off the chair. Range of adjustability is 5", from 15½"H to 20½"H, and is standard on work chairs. A 7" range of adjustability (17"H to 24"H) is available as an option. Stools are standard with an 8" range of adjustability (22"H to 30"H). Leap Plus is standard with a 4" range of adjustability (15½"H to 19½"H). A 5" range (17½"H to 22½"H) is available as an option.

Passive seat edge angle flexes 1½", relieving pressure under the user's thighs. This feature is standard on all work chairs and stools.

Seat depth adjusts 3" (15¾"-18¾") by pulling handle up. Slide seat forward or back to accommodate various leg lengths. Release handle to lock. This feature is standard on work chairs and stools. Seat depth adjustment range for Leap Plus is 2" (16¾"-18¾").

Back Adjustments

Lumbar height adjusts 5" (5¼" to 10¼" from seat, 6½" to 11½" on Plus chairs) by grabbing exposed tabs and sliding the lumbar support up or down. This feature is standard on work chairs and stools, but may be omitted.

Lower back firmness adjusts by turning knob two complete turns. Forward increases firmness. Backward decreases firmness. This feature is standard on work chairs and stools.

Upper back force adjusts by turning knob five complete turns. Turn knob forward to increase rate of tension; backward to decrease. This feature is standard on work chairs and stools.

Variable back stop. Rotate handle up or down to set recline angle. Lean back to desired back angle. Five stops are available. This feature is standard on work chairs and stools. *Tip: To stop in upright position, remove weight from back and rotate lever up.*

Headrest (option) adjusts 2¼" vertically and adds 6¾" to 9" to the overall height. Plastic shell on the headrest is available in black only. Upholstery is available to match the seat material or black vinyl only. Headrest is not available on stools, Plus models, or when the fire code option (FCS) is selected.

Arm Adjustments

Rectilinear height-, width-, pivot-, and depth-adjustable arms come standard on all arm models of chairs and stools.

Arm height adjusts independently within a range of 4" (7"-11" from the seat, 7¼"-11¼" on Plus models). Push button on outside and under arm cap in while moving arms up or down. Releasing buttons locks arms in position.

Arm width adjusts 2¼" each independently on chairs with this option. Grasp arm and move in or out.

Arms pivot independently 30° inward and outward. Grasp arm and push front to left or right.

Arm depth adjusts approximately 3" to enable user to get closer to worksurface.

Leap 462 Series, continued

Other Features

Height-only adjustable arm is also available and adjusts 4".

Armless models are also available.

Glides are available as an option, except on chairs with polished aluminum package. Glides ship with chair or stool for field installation and maintain same height as casters.

Foot ring height on stools adjusts by first lifting ring and rotating it counter-clockwise to unlock. Then raise or lower ring up to 4" to desired position before rotating it clockwise to lock.

Soft-wheel casters for hard floors are available for specific applications.

► See surface materials on page 678 for specific availability or refer to the *Surface Materials Reference Manual* for further information.

Upholstery

All Steelcase seating with standard upholstery fabrics complies with requirements of the State of California Technical Bulletin 117-2013. All standard seating is labeled to be in compliance with California 117-2013.

Programs & Services

► See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

The Customer's Own Material (COM) Program

offers the opportunity for customers to select fabrics that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Through the COM program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule.

Steelcase will order the COM fabric directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM fabrics and details regarding yardage requirements for most Seating lines, visit the COM website. To locate the COM website:

- Visit www.steelcase.com

Soil retardants are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pre-treated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)

- Jacks
- Link

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

Contact your Steelcase Solutions Fulfillment Team Representative at 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Fire Codes

► See page 698 for upholstery fabrics available for use with FCS modification.

Steelcase offers Fire Code Seating modification (FCS) on some seating models.

The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as theaters, meeting rooms, and lobbies. The FCS standards will meet the State of California Bureau of Electronic and Appliance Repair, Home Furnishings, and Thermal Insulation Technical Bulletin 133 (Cal TB 133). Boston adopted the California Bureau of Electronic and Appliance Repair, Home Furnishings, and Thermal Insulation Technical Bulletin TB 133 test standard in 1992.

Local codes may have special requirements for upholstery.

Leap Upholstery

What Is It?

Fabric, leather, or vinyl-covered back and seat, 3D Knit back.

Fabric

Leather, Vinyl, and Select Fabrics

3D Knit Back

Stitched seams are included on the back cushion and seat cushion of the following:

- Leather
- Customer's Own Leather (COL)
- Vinyl
- Select Customer's Own Material/Vinyl (COM)

Pattern alignment at the lumbar seam cannot be guaranteed.

3D Knit back is made up of three layers: the 3D Knit, a solid fabric that matches the 3D Knit color, and the polyester cushion that provides exceptional comfort. The seat on these models can be specified with Cogent: Connect fabric colors to match the 3D Knit color, or in any other material.

Plastic outer back is fully exposed.

Seat and back cushions can be removed and replaced if damaged.
