

# Desk Screens

---

A curated collection of solutions designed to increase shielding at the desktop

# Introduction

Steelcase offers a range of desk screens that help you **retrofit, reconfigure** or **reinvent** your workplace – creating spaces that when supplemented with new safety guidelines, allow people to confidently come back into the workplace.

There are many screens to choose from, including some specifically designed to meet the unique needs of COVID-19. But whether your need is temporary or more permanent – consider the screens shown in this document for solutions with the broadest range of height, configuration and materiality options. **Each is easy to add or remove as your needs change over time.**

## Corrugated Curtain

Corrugated Curtain is a versatile, modest screen that can be quickly and easily installed and removed – making it the ideal interim solution in a constantly changing world.

- Create a corner boundary using a single unit
- Combine two units to create a u-shaped boundary that fits nearly any worksurface
- Five perforated sections can be removed to accommodate a variety of power and monitor arm needs

Material: Corrugated cardboard

## Sarto Screen

Light in scale and easy on the budget, Sarto screens are an attractive way to create visual separation and shielding across the open office.

- Straight and curved options provide scalable privacy and shielding in heights up to 36"
- Fully tackable surface
- Available in a range of sizes and fabrics that work across applications

Material: Fabric
