LED Intro Task Light

Modern and traditional at once, LED Intro offers a transitional look – that harmonizes with both residential and commercial environments – at a budget-conscious price. It moves with ease to direct light where needed, and adjusts to provide differing levels of brightness to suit every individual and need.

	Black Matte 4135

FEATURES + ADJUSTABILITY

While ambient lighting casts across the workplace as a whole, it often falls short of the shadows on individual workspaces. Poorly lit areas cause eyestrain and headaches. And as we age (especially over 40), our need for good lighting increases – a critical consideration in today’s multi-generational workplace.

Affordable and highly adjustable – in light level and position – LED Intro Task Lighting invites everyone to personalize how their desk is lit so they can feel good and be their most productive at work.
