## Elbrook Table Collection

Active learning is best supported in open, free-flowing environments. So we created Elbrook—a collection of organically shaped tables with inset legs and low-profile bases that make movement throughout a space easy, so everyone can focus on what matters most—learning.

## FEATURES

Available in lounge, seated and standing heights, Elbrook's worksurface shapes were specifically designed so students can come together to collaborate from any angle.

Highly durable in-line skateboard wheels and glides make for simple, smooth and convenient movement to support any active learning mode.

Low-profile bases and recessed legs offer maximum space for students' knees under the table and ease of movement around the classroom.
