For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing

shows you what the product looks like and points out important features.

Product Details

gives specific information on the product and how it is used.

Connections

describes how the product is assembled or how it attaches to another product.

Base Junctions—Thin Trim

Product Details

Connections

Surface Materials

Wiring and Cabling

Actual Dimensions

table lists the dimensions of the product.

Wiring and Cabling

details the power and cable-management and cable routing capabilities of the product.

Surface Materials

lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Options
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Product Drawing shows you what the product looks like.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Tip 6

Required to Specify

Specify with Customiz Stain

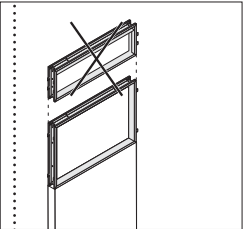

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X".

Other Specification Guides

Steelcase offers a comprehensive portfolio of furniture and solutions. For the full offering of products, refer to the individual product specification guides. These can be accessed at the www.steelcase.com web site or at village.steelcase.com

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Air³

Air³ has been designed as a scalable system, able to work globally. Its internationally patented opening roof system features an advanced fire safety system developed specifically for sprinklered office environments.

► Specifying, page 44

Louvred roof controlled by motion sensor as well as user control buttons.

Exterior and interior side panels are upholstered acoustic panels.

Grommet.

Air circulation fan.

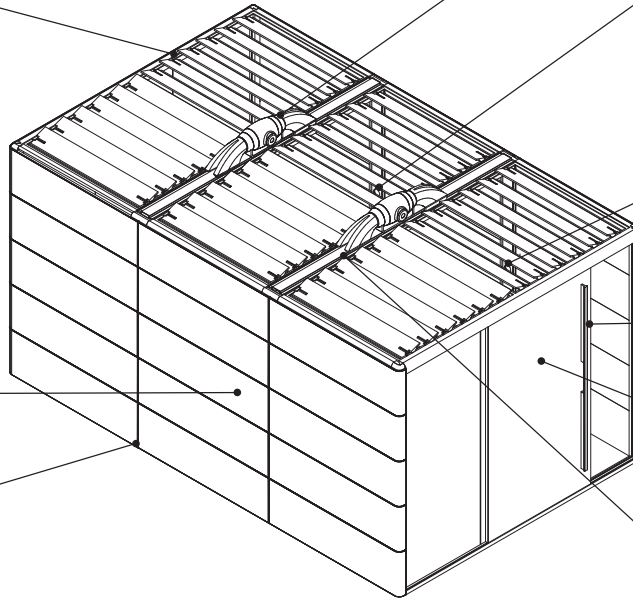

Service hoop control panel side includes touch button controls for lighting, air circulation, and roof.

Service hoop power side includes three NEMA 5-15 3-prong power outlets and two data connection cutouts.

Sliding glass door can be fitted to open right to left, or left to right, at time of installation.

Front and back panel glass are tempered glass.

Service hoop horizontal bar includes three LED lights, two heat detectors, monitor sensor, and fan.

Product Details

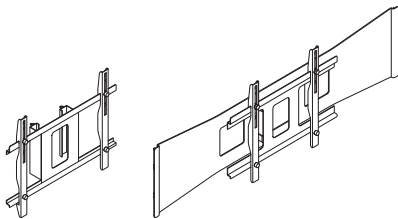

Fabric panel layer numbering begins from the bottom position.

Panel positions account for both glass and fabric panels and are determined when standing outside of the pod with a right to left opening door.

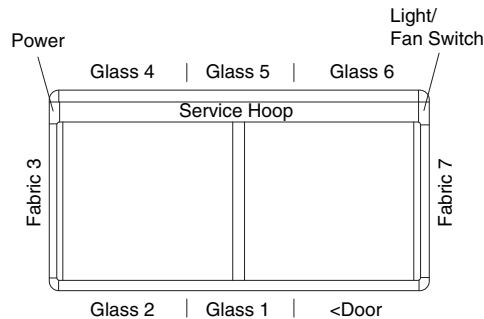

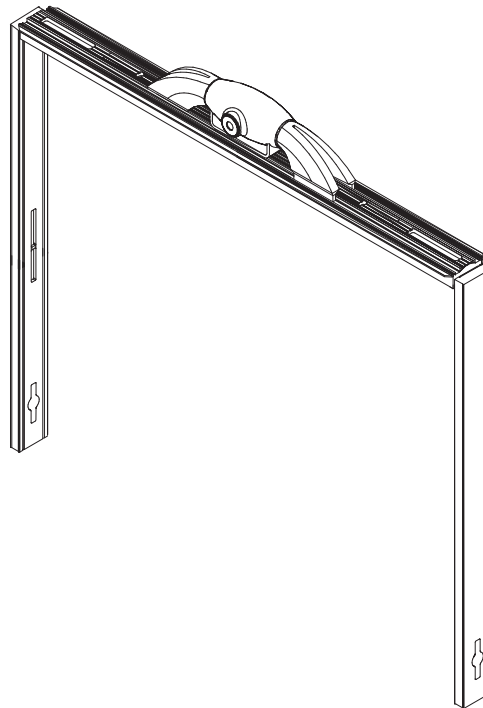

Optional whiteboards can be installed in place of internal fabric panels on layers 3 and 4 (all panels will still be included). Dimensions are 50³/₄" x 34³/₄".

Monitor brackets are available in two different styles and both support a monitor up to a maximum weight of 55 pounds:

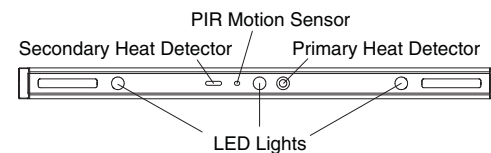

- Over upholstery monitor brackets—mounted directly to the fabric panels on layers 3 and 4.
- Hoop mounted monitor brackets—attached to the power side of the service hoop.

Electrical

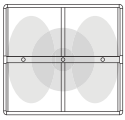

The service hoop contains all the electrical services, such as power, lighting, and airflow. Each service hoop requires a single 15 amp connection. This must be connected into the hoop. The maximum loading of the hoop is 1.2 kilowatts.

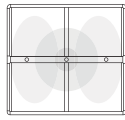

Orangebox does not provide a power whip to make the power connection to the building. It is the responsibility of the qualified site electrician to supply and install a suitable power connection to the building in accordance with local codes.

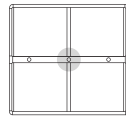

Service hoop horizontal bar includes three LED lights, two heat detectors, motion sensor, and fan.

Three LED lights work in tandem to establish multiple lighting situations within the pod using 4000K bulbs.

Passive inferred (PIR) motion sensor turns on the power to the pod when activated. Power is shut off within the pod after five minutes of inactivity.

Primary heat detector will cut all power in the pod and open the roof fully if heat at 135°F (57°C) is detected.

Secondary heat detector acts as a failsafe fusible link and will cut all power in the pod and open the roof fully if heat at 150.8°F (66°C) is detected.

Data Ports

Service hoop power side comes standard with three NEMA 5-15 3-prong power outlets, two data connection cutouts, and two cable ports with removabe center grommet for cable management.

Service hoop control panel side includes touch button controls for lighting, air circulation, and roof. Power usage when occupied is 100W (not including any plugged-in external equipment) per hoop.

The patented louvred roof has three settings: fully open, semi open, and closed. When the pod is unoccupied, the roof is always open. When entering the pod, the passive inferred sensor (PIR) senses movement and closes the roof to create acoustic privacy. When the pod is occupied, it is possible to select either 10° (semi) or 90° (fully) open position manually for enhanced airflow. The PIR turns the power off after five minutes and the roof automatically opens.

Product Details

Two-tone contrasting upholstery option is available through specifying inner and outer contrasting colorways.

Tip: Inner/outer selection must stay in the same fabric family.

Patterned fabric works best when specified on the seat only. Patterns should be avoided on the upper and lower body due to predominant double stitch seams making pattern matching unachievable.

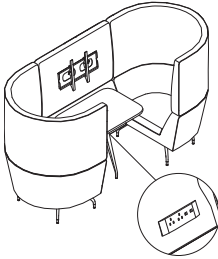

Reveal seam matches seat as standard but can match body finish or "other." Other allows specification to be independent of the seat and body finish selection.

Tip: Reveal seam not allowed to match seat when patterned.

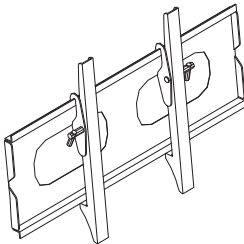

Tip: Reveal seam may only be vinyl if body is also vinyl.

Power and Media

Power integrated in lower screen when optioned on media den units.

72" cord length exits through bottom of lower screen.

Tilting monitor brackets available as an option on media den units. Monitor bracket supports a single screen up to 32" and 44 pounds.

Wire channel and grommet are located in the upper screen for cable management.

Product Details

Patterned fabric works best when specified on the seat or inner back only. Patterns should be avoided on the outer back and screen due to predominant double stitch seams making pattern matching unachievable.

Contrasting upholstery option possible through specifying each surface independently.

Power and Media

Power can be optioned in tabletops, table bases, and arms.

72" cord length exits through base of the tables and arms.

Tilting monitor brackets available as an option on media den units. Monitor bracket supports a single screen up to 32" and 44 pounds.

Application Topics

Handedness of units and connection points are determined based on the user sitting position.

Arms can only connect the outer most ends of a configuration.

Product Details

A compact footprint maximizes available space by utilizing three standard core panels. As sets of bays are added to configurations, panels are shared to reduce the amount of space required.

Core panels feature a single center $\frac{3}{4}$ " plywood panel set between two 1" thick urethane foam fillers, both covered with a $\frac{1}{5}$ " pressed felt panel.

Concealed cam locks, operated with a hex key, join and lock core panels together.

With multiple upholstered personal screens, a single finish may be applied to all, or specified individually for contrast. Bay numbering is determined when starting in the top left (when viewed from above), moving down across the spine before continuing right.

Power and Media

Integrated power available in workspaces in the following configurations:

- 2 three-prong NEMA outlets
- 1 three-prong NEMA and 2 USB-A outlets
- 1 three-prong NEMA, 1 USB-A, and 1 USB-C outlets

Power cord is 10' long and is available with either a standard three prong NEMA plug or hardwire.

Power includes one convenience outlet below the worksurface to power the available lighting options.

Lighting is available as a worksurface mounted lamp or an over panel clip lamp.

Worksurface mounted lamp is 16"H with a 12" diameter shade that rotates 360°, tilts up to 45°, and comes standard in a white finish.

Over panel clip lamp hangs on the panel and can be positioned in the users desired location. The standard light heather grey shade is 7"H with an 8" diameter.

Wiring and Cabling

Cable clips double as connecting clips for the pressed felt and create built-in concealed cable management on every panel.

Power in multiple bay styles will come standard with Interlink daisy chaining with a single plug located at the end of the configuration.

Grommets are created at the junction between two panels just below the worksurface.
