

Steelcase®

Product Compliance Laboratory Confirmation of Product Compliance

BIFMA
MEMBER

9-Mar-2022

Steelcase Work Tents products have been designed, engineered, and manufactured, to meet or exceed all applicable requirements for safety and performance.

Samples representative of current production have been tested and found to be in compliance with the following Test Requirements:

UL 1286 Standard for Safety of Office Furnishings (including the flammability requirement of)
When tested to UL 723 Surface Burning Characteristic of Building Materials (ASTM E 84 test methods) ¹
Flame Spread Index (FSI) less than 25
Smoke Developed Index (SDI) less than 450

In addition to Standards listed above, the Overhead Tent products have been tested and found that this product does not interfere with the existing building sprinkler system when tested to the following standard:

UL 723S Drop-out Ceilings Installed Beneath Sprinklers ¹

* Although Overhead Work Tent is not a drop out ceiling, the procedures of UL 723S were used to evaluate its performance. It was observed that the presence of the fabric in the test did not delay the activation time of sprinklers compared to the control test.

¹ This specification is not included in the Steelcase Laboratory's scope of accreditation and was performed by an accredited independent lab.

Steelcase uses its own ISO 9001 registered and ISO 17025 accredited laboratories, and accredited independent laboratories, to verify compliance to the Standards and requirements listed. A list of accredited independent laboratories is available upon request.

Sincerely,

Jeff Musculus – Director, Global Testing

Note:

This document may be reproduced in full only.

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and assembly directions. The use of unauthorized non-Steelcase components, parts, or materials with integrated Steelcase product solutions VOIDS all Steelcase claims of product compliance to BIFMA, UL, CSA, LEED, and / or any office furniture safety or performance standards, including all building, fire, and electrical codes. This exclusion includes but is not limited to the use of non-Steelcase panel supported work surfaces, leg supports, panels, brackets, shelves, overhead bins, and other integral components. The use of non-Steelcase components in an integrated product solution not designed, tested, or supported, by Steelcase is an unauthorized modification of the original product which voids all Steelcase warranties, expressed or implied.
