

Steelcase

Overhead Tent

Overhead Tent provides a dynamic and airy layer of privacy to social and collaborative spaces. Its soft and light form adds visual interest to any space while providing comfort and shielding, allowing people to feel a sense of privacy while meeting or socializing in the open.

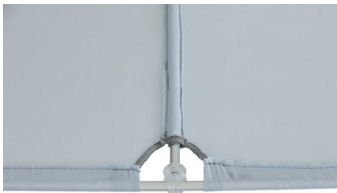

Features + Adjustability

Aluminum Frame

A flexible aluminum frame and spine provides the stable framework for the wave-like shape while adding a unique visual aesthetic.

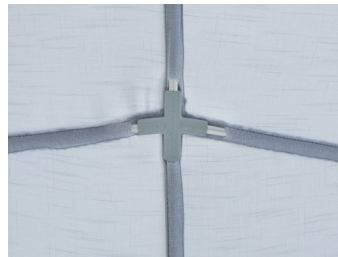

Intuitive Assembly

A single layer of fabric, aluminum poles and two bases make it easy for two people to quickly assemble an Overhead Tent – no tools needed.

Easily Movable

Built-in handles on the freestanding base makes it easy to move Overhead Tent around a floor plan, while allowing for variations in height and width.

Connectors

Plastic connection points are strategically placed to secure the frame, helping to keep the shape intact.

Surface Materials

The organic, wave-like shape combined with the sheer materiality of Overhead Tent adds a light and airy visual aesthetic to the modern workplace.

Fabric

Overhead Tent is available in three sheer options.
