For LEVEL® certification, Steelcase uses the product grouping methodology defined in the preamble of Section 6 of e3 – 2019 standard:

> The combination of base product and options with the highest volume of sales or anticipated highest volume for a new product within the product category / subcategories as defined in Annex A. It is not necessary to consider the full range of options available on the representative sample for purposes of the evaluation. Notwithstanding all products of a family group are expected to meet the intent of the credits.
