Everwall™

Architectural
Interiors

Ever Fast.
Ever Flexible.
Ever Better.

Everwall combines design freedom with one of the fastest installations in the industry to delight both designers and installers.

Boundless Possibilities

Private spaces are some of the most coveted in the hybrid workplace. Everwall creates a variety of private spaces — from hybrid meeting rooms to places for casual connections — and expands the thinking about what walls can do in the hybrid workplace.

A beautiful collaboration meeting room features technology and markerboards.

An extended plane creates a cozy nook for social connections on the exterior wall.

Skins can be oriented either portrait or landscape — with asymmetric and segmented options — with the ability to span multiple frames for a unique visual.

Design Flexibility

Move, add or update your interior spaces with incredible efficiency. Everwall gives you design freedom to create spaces that capture your intent today and adapt to whatever the future brings.

Power routing throughout the structure allows technology to be moved or added effortlessly.

Clerestory glass lets the natural light into interior spaces.

Plywood edgeband laminate skins add visual interest.

Lux, metallic paints add an elegant aesthetic to Everwall's frame.

A broad range of handles, ladder pulls and hinges help achieve an elevated aesthetic.

Materiality Matters

Making a first impression counts and Everwall expresses the full range of possibilities with interior architecture. An expanded materials palette — including metallic paints, laminates, fabrics and modern hardware choices — allows Everwall to fit the vibe of any space.

With acoustic seals in just the right places – including on frames, skins and doors – Everwall achieves high levels of acoustic privacy.

Acoustic Performance

Everwall helps keep the noise in and the distractions out. With best-in-class acoustics, Everwall provides the performance needed to meet the privacy expectations of today's hybrid workplace.

Sustainable Solution

Everwall is advancing positive environmental change as a force for better in the built environment. It was designed for sustainability and the principles of reduce, reuse and recycle. Everwall diverts waste from landfills and is a sustainable solution that assures a positive impact on the environment — and a better wall for the planet.

Everwall is made with recyclable materials and is 100% reusable. Everwall can also contribute to LEED® certification and WELL® building standards.
