

Answer Beam and Answer Fence Specification Guide

Availability

Electronic price list updated with release 200.D (U.S.) and 156.D (Canada), dated December 19, 2022.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Tip: Steelcase Marketing Resources is a new global platform for ordering Steelcase marketing materials that replaces Adstock.

View or download Steelcase Specification Guides at <https://steelcase.s4mrc.com/na/spec-guides/individual-spec-guides?limit=30&p=1>

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at <https://finishlibrary.steelcase.com/>.

► For a list of all trademarks, refer to the last page of this specification guide. © 2022 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing

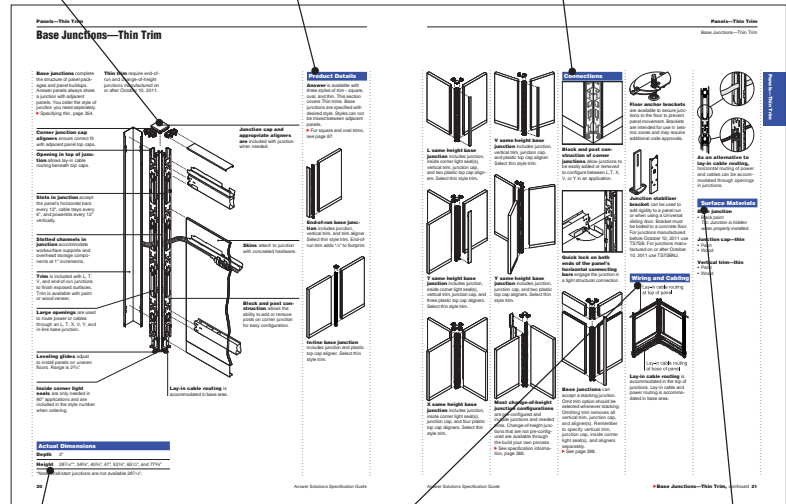

shows you what the product looks like and points out important features.

Product Details

gives specific information on the product and how it is used.

Connections

describes how the product is assembled or how it attaches to another product.

Actual Dimensions

table lists the dimensions of the product.

Wiring and Cabling

details the power and cable-management and cable routing capabilities of the product.

Surface Materials

lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product.

Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes

(under the red or dark grey band) provides a list of what comes standard with the product.

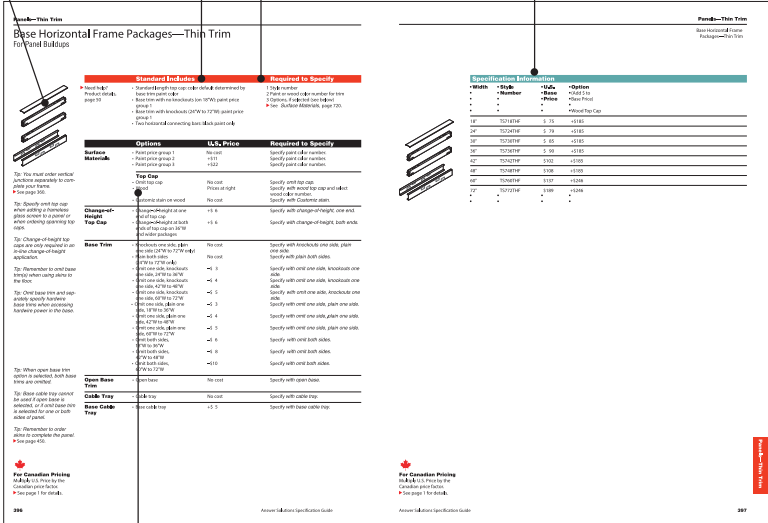

Required to Specify

(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information

(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Options

(under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products

provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Customiz Stain

Tip 7

• **To determine** how many skins are needed to complete a panel, consult the table at the right.

- *Tip: Remember to order skins for both sides of the panel buildup.*

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an “X.”

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.

Additional Resources

Answer beam and Answer fence are supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools – Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project-Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Planning Ideas

Planning ideas are available to help inspire, envision, and plan great solutions. 2D and 3D AutoCAD drawings, Sketch-Up files, and SmartTools drawings are available on the Planning Ideas site: www.steelcase.com/planningideas.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance, call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Related Products

Worktools include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

► For additional information, refer to *Steelcase Worktools Specification Guide* or contact Steelcase at 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Answer Assembly Tool

As an alternative to using a rubber mallet, frames can be assembled using the Answer Assembly Tool. Call Steelcase for pricing and order information. 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies.

To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/>

Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at Origin.build.

Answer Beam Overview

The Answer beam

supports privacy screens, worksurfaces, and personal storage on a light-scale spine that delivers power and data at multiple elevations.

Beam frame is made up of three major elements—vertical junctions, horizontal connecting bars, and a top cap rail.

Actual Dimensions

Height 28¹/₂"

Tip: Height is minimum from floor to beam top cap rail. Leveling glides can extend 2³/₄".

Answer Beam Buildups

Frames

Begin by planning your frames. Junction height is 28½" and the horizontal connecting bars determine width.

Beam Top Cap Rail

Select beam top cap. Beam top caps are available in the following widths: 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", and 96". The beam top cap rail can span in-line junctions.

Skins

Order skins for both sides of beam. Skins are available in standard base, to-the-floor, and big open base configurations.

Tackable acoustical fabric covered skins

Steel skins

Laminate skins

Wood skins

Power

Specify powerkits where power is needed. Power can be expressed in the base, just above the base, or at 20"H. Steel skins are available with cutouts for power and data access at 20"H. Fabric skins can support power and data by field-cutting openings.

Answer Beam Junctions

Answer beam junctions give the beam a height of 28¹/₂".

Beam junctions complete the structure of beam buildups and are available for in-line, L, T, X, V, Y, and end-of-run configurations. Answer beam segments always share a junction with adjacent beam segments. You order the style of junction you need separately.

► Specifying, pages 200–204

Slots in junction accept the beam's horizontal connecting bars, cable trays every 6", and powerkits every 12" vertically.

Slotted channels in junction accommodate worksurface supports and storage-to-beam brackets.

Trim is included with L, T, V, and end-of-run beam junctions to finish exposed surfaces.

Large openings are used to route power or cables through an L, T, X, V, Y, and in-line beam junction.

Lay-in cable routing is accommodated in base area.

Leveling glides adjust the beam segment to install beam on uneven floors. Range is 2³/₄".

Inside corner light seals are only needed in 90° applications and are included in the style number when ordering.

Junction cap included with junction when needed.

Block and post construction allows the ability to add or remove posts on corner junction for easy reconfiguration.

Product Details

End-of-run beam junction includes beam end-of-run junction, beam end-of-run vertical trim, and beam end cap.

In-line beam junction includes beam in-line junction and beam top cap rail aligner.

L beam junction includes junction, inside corner light seal(s), vertical trim, and L beam junction cap.

T beam junction includes junction, inside corner light seal(s), vertical trim, and T beam junction cap.

Actual Dimensions

Depth 3"

Height 27¹¹/₁₆"

X beam junction includes junction, inside corner light seal(s), and X beam junction cap.

V beam junction includes junction, vertical trim, and V beam junction cap.

Y beam junction includes junction, and Y beam junction cap.

Omit trim on end-of-run beam junction when connecting a beam end-of-run boundary screen.

A beam top cap rail aligner is included with in-line junctions.

Posts can be added or removed from corner junctions to change from one corner configuration to another.

Connections

Answer beam junctions are unique to the Answer beam and are not compatible with Answer panel builds.

Block and post construction of corner junctions allow junctions to be easily added or removed to configure between L,T, X, V, or Y in an application

Junction caps are junction type specific. When reconfiguring corner junctions, the appropriate junction cap will need to be specified.

Quick lock on both ends of the beam's horizontal connecting bars engage the junction in a tight structural connection.

Floor anchor brackets are available to secure junctions to the floor to prevent beam movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Junction stabilizer bracket can be used to add rigidity to a beam segment. Bracket must be bolted to a concrete floor.

Bracket foot is visible on one side of beam when installed.

Junction stabilizer bracket blocks power routing in the beam base and just above the base areas. The bracket covers the slots on the junction where the powerkit connects in these two zones. It also blocks the ability for a powerkit harness, pass-through powerkit, or modular harness to route in the base area from an adjacent beam segment.

Junction stabilizer bracket also blocks lay in of cables in base area of beam segment.

Skins extend onto junction and meet skin of adjacent beam segment. The slotted channel of the junction is accessible between these two skins.

Wiring and Cabling

Lay-in cable and power routing is accommodated in base area.

Horizontal routing of power and cables can be accommodated through openings in junctions.

Junction tall sleeves can be ordered to cover the exposed metal edges in the large cable routing opening of junctions.

43" or 80" modular harnesses available to change the height at which you are routing power kits or to route power from the beam base to different heights.

Carpet gripper glide caps may be added to junction glides to help hold beam in place.

Surface Materials

Answer Beam Junction Elements

Beam Junction Post

► Specifying, page 214

Product Details

Beam junction post is available in 28 1/2"H and can be ordered separately for use in building beam junctions.

Beam junction posts do not come with trim. All trim must be specified separately.

Beam junction posts can be fastened to 90° corner or 120° corner junction blocks. Posts can be easily added or removed from the junction blocks to reconfigure the application.

Fasteners are included with the beam junction blocks. For additional fasteners order part number T521882MP (quantity 50).

Surface Materials

- Black paint only

Junction Blocks

► Specifying, page 214

Product Details

90° corner and 120° corner junction blocks can be ordered separately for use in building beam junctions that are not supported by style numbers.

90° corner and 120° corner junction blocks are available in packages of three, four, or five. Two junction boxes are needed for each beam junction.

Four fasteners are included with each junction block.

Beam junction post can be easily added or removed from junction blocks to reconfigure the application.

When using 120° corner junction blocks with Answer Beam junctions, washers must be added between the block and the junction. Washer available through service parts.

Surface Materials

- Black paint only

Beam Junction Caps

► Specifying, page 215

Product Details

L, T, X, V, and Y beam-to-beam junction caps can be ordered separately for use in building and reconfiguring beam junctions.

Beam junction caps are junction type specific. When reconfiguring corner junctions, the appropriate junction cap will need to be specified.

Surface Materials

- Paint

End-of-Run Vertical
Beam Trim and End
Cap Package

► Specifying, page 209

Product Details

Answer beam end-of-run package consists of a vertical end-of-run trim and end-of-run junction cap.

V Vertical Beam Trim

► Specifying, page 211

Product Details

V junction caps are not included with V vertical beam trim and must be ordered separately.

Surface Materials

- Paint

Actual Dimensions

Height: 28 1/2"

Inside Corner Light Seal

► Specifying, page 215

Product Details

Inside corner light seals are available in 54"H, 66"H, and 78"H and need to be specified in 90° corner junction applications (they are not required in 120° corner applications).

Inside corner light seals are available in packages of four.

Inside corner light seals can be field cut to accommodate shorter post heights.

Surface Materials

- Black paint only

Answer Beam-to-Panel Change-of-Height Junctions

Answer beam and Answer panel systems can connect to seamlessly blend the two planning solutions.

Beam-to-panel change-of-height junctions include the necessary change-of-height trim (including junction cap and aligners) for the change-of-height portion.

Beam-to-panel change of height junctions are available in L, T, and X configurations.

Beam-to-panel change-of-height junctions support L, T, and X connections for up to two different heights.

Change-of-height trim is available for beam-to-panel connections for L, T, and X configurations.

Beam-to-panel change-of-height junctions are shipped assembled.

L Beam-to-Panel Change-of-Height Junction

An end-of-run aligner is included with the end-of-run change-of-height trim to provide tight alignment between the panel top cap and the change-of-height trim. No junction cap is required.

End-of-run change-of-height trim is used at end-of-run or in-line change-of-height. The top of the trim aligns with the top cap on the panel.

L vertical trim is used to finish trimming out the base of the beam-to-panel connection. Vertical trim is included when specifying the change-of-height junction.

T Beam-to-Panel Change-of-Height Junction

T vertical trim is used to finish trimming out the base of the beam or panel. Vertical trim is included when specifying the change-of-height junction.

Actual Dimensions

Depth	3"
Change-of-Height Trim Height	7 ¹ / ₈ ", 13 ³ / ₈ ", 15 ⁹ / ₁₆ ", 25 ³ / ₄ ", 31 ¹⁵ / ₁₆ ", and 38 ¹ / ₈ "

X Beam-to-Panel Change-of-Height Junction

T corner change-of-height trim is used in T or X change-of-height applications where there are two panels at the same height located in-line with each other.

Product Details

Beam-to-panel change-of-height junctions connect beam junctions to 36"H, 48"H, 54"H, and 66"H panel junctions.

L beam-to-panel change-of-height connections are handed due to the handedness of the junction cap. The correct handed L beam-to-panel change-of-height junction style number should be specified.

Handedness of L beam-to-panel change-of-height junctions is determined by which side of the beam the panel is on when looking down the beam.

For right hand L beam-to-panel change-of-height junction, the panel is on the right side of the beam.

Right-handed L beam-to-panel change-of-height junctions include the following style numbers:

- TSB2QCLJ
- TSB24CLJ
- TSB28CLJ
- TSB25CLJ
- TSB26CLJ

For left hand L beam-to-panel change-of-height junction, the panel is on the left side of the beam.

Left-hand L beam-to-panel change-of-height junctions include the following style numbers:

- TSBQ2CLJ
- TSB42CLJ
- TSB82CLJ
- TSB52CLJ
- TSB62CLJ

L beam-to-panel change-of-height junctions include a handed beam junction cap.

T beam-to-panel change-of-height junctions connecting two beam segments and one panel segment include a T beam junction cap.

T beam-to-panel change-of-height junctions connecting one beam segment and two panel segments include a 90° panel junction cap.

X beam-to-panel change-of-height junctions include a 90° panel junction cap.

Answer Beam-to-Panel Change-of-Height Junctions, continued

The beam-to-panel change-of-height junctions include the necessary change-of-height panel trim to finish the junction.

Change-of-height trim for the beam-to-panel configurations supported by style numbers are available to order separately from the junction and support reconfiguration.

Left-handed L, right-handed L, T, and X change-of-height junction caps for beam-to-panel configurations are available to order separately from the junction and support reconfiguration.

- Black plastic only

Answer Beam-to-Panel Change-of-Height Visual Overview

Selecting a Junction

To determine the application you need, follow these steps:

1. Find the type of beam-to-panel change-of-height junction required – L, T, or X. All the applications that are supported by style numbers are shown on the following pages.

2. It may help if you make a sketch of the junction you are trying to build and then match it with the junction shown on the following pages.

3. Find the type of junction you are looking for in the following pages and see the corresponding specifying page.

Style numbers for junctions are based on the heights of the frames.

Digit in Style Number	Corresponding Frame Height
-----------------------	----------------------------

2	28½"
Q	36"
4	42"
5	54"
6	66"
8	48"

Right-Handed L Configuration

A	B	Style Number
28½"	36"	TSB2QCLJ
28½"	42"	TSB24CLJ
28½"	48"	TSB28CLJ
28½"	54"	TSB25CLJ
28½"	66"	TSB26CLJ

Answer Beam Horizontal Frame Packages

Beam horizontal frame packages include horizontal connecting bars that lock into vertical junctions and complete the structure of beam. A pair of base trims are also included. Cable tray and base cable tray are available as options.

► Specifying, page 216

Actual Dimensions	
Width	23 ¹³ / ₁₆ ", 29 ¹³ / ₁₆ ", 35 ¹³ / ₁₆ ", 41 ¹³ / ₁₆ ", 47 ¹³ / ₁₆ ", 59 ¹³ / ₁₆ ", and 71 ¹³ / ₁₆ "
Base trim height	3 ³ / ₄ "
Big open base height	9 ¹¹ / ₁₆ "
Receptacle Knockout	
Width of opening	2 ⁵ / ₈ "
Height of opening	1 ³ / ₈ "

Product Details

Beam horizontal frame packages include horizontal connecting bars and base trims. Options for big open base and open base are available. Cable trays and base cable trays are optional. Skins, top cap rail, and beam vertical junctions are specified separately.

Two horizontal connecting bars must be used in each beam segment.

Horizontal connecting bars determine beam segment width.

Horizontal connecting bars can be used and reused across Answer panel, Answer beam, and Answer fence applications.

The beam top cap rail is specified separately and is not included in the beam horizontal frame package.

Omit base trim option should be selected when using skins to the floor.

Base trims are available with or without knockouts. Base trims with knockouts accommodate power and communication terminations.

Open base trims are available. They do not accommodate power and data routing or entry in the base.

Open base trims occupy the same space as the standard base trims. Open base trims occupy the bottom $3\frac{3}{4}$ " of the beam segment; the height of the opening is $2\frac{1}{2}$ ".

Standard base trims and open base trims can be used and reused on Answer panel applications.

Big open base option is available on beam. The beam horizontal frame package includes two inside vertical trims in addition to two horizontal connecting bars.

Big open base option provides a larger open base aesthetic for the beam. The opening is 10"H.

When the big open base option is specified, big open base skins must be used.

Big open base trim package is available for reconfiguring a beam segment from standard base trim to the big open base. The big open base trim package includes two inside vertical trims.

When beam big open base is used, power is available only at 20"H.

Cable tray can be positioned every 6" vertically above the base to support cable routing.

Cable tray can accept added cable carriers attached below tray to expand horizontal cable management options.
► See *Montage Specification Guide* for cable carrier (ZCC).

Base cable tray is used only in the base to support lay-in cable routing in the base. Base cable tray cannot be used if omit base trim option is selected for one or both sides of the beam segment, or if open base trim or big open base trim is used.

Connections

Quick lock on both ends of beam's horizontal connecting bars engage the junction in a tight structural connection.

Wiring & Cabling

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Knockouts in base trim can be removed in the field where needed. Knockout dimensions are $1\frac{3}{8}$ "H by $2\frac{5}{8}$ "W.

Communication outlets attach to openings in beam base trim. Order communication outlets from an outside vendor. Knockouts for communication in base accommodate modular furniture size only.

Surface Materials**Horizontal connecting bars**

- Black paint
- Tip: Components are hidden when properly installed.*

Base trim, open base trim, and big open base inside vertical trim

- Paint

Application Topics

A cable tray can be used to provide extra support for 60"W and 72"W full skins where people may lean against the beam.

Answer Beam Top Cap Rail

Answer beam top cap rail can support stanchion mounted storage, connect screens, and tether worksurfaces to create a lighter-scale, efficient workstation.

► Specifying, page 219

Top cap rail

Product Details

Beam top cap rail connects to the horizontal connecting bar in the top position.

Beam top cap rail can span in-line beam junctions.

Spanning top cap rails can only be used in an in-line condition. They cannot span over a corner junction.

Beam top cap rail can span the following Answer beam in-line junction combinations.

Beam Top Cap Rail Width	Combination of Junction Widths
48"W	24"W + 24"W
54"W	30"W + 24"W
60"W	30"W + 30"W
66"W	36"W + 30"W
72"W	36"W + 36"W
78"W	42"W + 36"W
84"W	42"W + 42"W
90"W	42"W + 48"W
96"W	48"W + 48"W

Actual Dimensions

Width 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", and 96"

Connections

Currency Enhanced storage can be stanchion-mounted off the top cap rail.

The Universal screen for Answer beam can be connected to the beam top cap rail.

c:scape 12"H and 19½"H centered screens can be connected to the beam top cap rail.
▶ See *c:scape Specification Guide*.

Universal worksurfaces can be tethered to Answer beam top cap rail in both parallel and perpendicular applications.

Dash LED lights, dash mini LED lights, LED radial or linear desk-top lights, and SOTO LED lights are compatible and connect to the Answer beam top cap rail.
▶ See *Worktools Specification Guide*.

Surface Materials

- Top cap**
- Clear anodized aluminum only

Answer Panel and Beam Foot

The Answer panel and beam foot supports a freestanding beam run without additional support from corner beam-to-beam junctions, beam-to-panel connections, tethered low storage or, tethered worksurfaces.

► Specifying, page 220

Product Details

Panel and beam foot attaches to end-of-run and in-line junctions to support a freestanding beam run.

Answer panel and beam foot is compatible with Answer panel and Answer beam.

Vertical attachment post is offset on the panel and beam foot and allows for a choice of proud or inset installation at the end-of-run by rotating the panel and beam foot.

Panel and beam foot positioned proud of the end of run accommodates Ology, Migration, and Airtouch height-adjustable desks. It is used parallel to the panel without overlapping desk supports and panel feet.

Panel and beam foot positioned inset from the end-of-run provides a cleaner visual and accommodates Ology, Migration, and Airtouch height-adjustable desks.

Actual Dimensions

Width	3 1/4"
Length	21"
Height	5/8"

Panel and beam foot will be centered on beam in-line junctions.

Glide for use with panel and beam foot is included in the beam junction. This glide is designed to maintain standard beam height and minimize the gap between the beam and floor.

Set screws in the end of the foot provide 1/4" of micro adjustment.

Surface Materials

Foot
• Paint

Application Topics

Open base trim cannot be used in conjunction with a panel and beam foot.

Big open base trim can be used in conjunction with a panel and beam foot.

Stanchion mounted storage is not permitted on freestanding beam runs supported only by panel and beam feet.

The Answer fence foot cannot be used on the Answer beam.

Wiring & Cabling

Panel and beam foot blocks power routing in the beam base and just above the base areas. The vertical attachment post covers the slots on the junction where the powerkit connects in these two zones. It also blocks the ability for a powerkit harness, pass-through powerkit, or modular harness to route in the base area from an adjacent beam segment.

Base power infeed cannot be located in beam section where a panel and beam foot is located. Place infeed in adjacent section.

Multipurpose infeed connects power from the building floor into a panel run supported by panel feet. Conduit can be run under the beam or through a knockout in the basetrim.

San Francisco power infeed can be used if liquid tight conduit is required. Plan to have a long enough infeed to attach to a modular power kit in the beam segment adjacent to the entry panel.

Power can be accessed in the third position up from the base through field cut fabric skins or receptacle cutouts in steel skins.

Answer Beam
Skins

Fabric-Covered Beam Skins

Fabric-covered beam skins are tackable acoustical and available in multiple configurations to finish the appearance of a beam.

► Specifying, pages 222–224

Power and communication can be accessed at 20" and just above the base by cutting skin in the field. Templates for cutting both receptacle and communication cutouts are available from Service Parts (T500940SR). Filler to close unwanted cutout in a skin is available from Service Parts (TS7STFSR).

Product Details

Fabric-covered beam skins are available in standard height, to-the-floor height, and big open base height.

Standard height beam skins are sized to work in conjunction with base trims to finish the beam.

To-the-floor skins are sized to extend to the bottom of the beam. They can be used on one or both sides of the beam.

Tip: Omit base trim option should be selected on the horizontal frame when using beam skins to the floor.

Big open base skins are sized to work in conjunction with big open base trims, leaving the bottom of the beam open. They must be used on both sides of a beam.

Tip: Select the big open base option on horizontal frames that are receiving big open base height skins.

Actual Dimensions	
Width	23 ¹³ / ₁₆ ", 29 ¹³ / ₁₆ ", 35 ¹³ / ₁₆ ", 41 ¹³ / ₁₆ ", 47 ¹³ / ₁₆ ", 59 ¹³ / ₁₆ ", and 71 ¹³ / ₁₆ "
Height Standard Size	21 ¹ / ₁₆ "
Height To the Floor Size	24 ⁷ / ₈ "
Height Big Open Base Size	15 ⁵ / ₈ "

Connections

Skins extend onto junction and meet skin of adjacent beam segment.

Skins for Answer beam are unique to the Answer beam and are not compatible with Answer panel buildups.

Wiring & Cabling

Powerkits are available in widths that correspond to beam widths.

Faceplate is used to surround receptacle when field-cutting fabric skins. Specify receptacle (TS7RC) and faceplate (TS7UFPLATE) for each cutout.

Faceplate, ordered separately, is used to surround modular furniture size communication outlet when field-cutting fabric skins.

NEMA-size communication outlets can be installed on the face of a beam skin without using a faceplate, but just the screws. Order communication outlets from an outside vendor. NEMA-size communication outlets cannot be used in the base.

Surface Materials

Skins

- Fabric

Fabric application is standard in the warp horizontal direction. Warp vertical direction is available as an option. Exceptions to this are all 72"W skins, which can only accommodate fabric in the horizontal direction.

► See *Specification Guidelines for Directional Fabrics*, page 458, for more information.

Application Topics

Answer Beam buildups

► Page 12

Steel Beam Skins

Steel beam skins provide a clean, finished look to a beam and offer multiple options for access to power and data.

► Specifying, pages 225–227

Steel beam skins are available in a number of power and data cutout configurations.

Actual Dimensions	
Width	23 ¹³ / ₁₆ ", 29 ¹³ / ₁₆ ", 35 ¹³ / ₁₆ ", 41 ¹³ / ₁₆ ", 47 ¹³ / ₁₆ ", 59 ¹³ / ₁₆ ", and 71 ¹³ / ₁₆ "
Height Standard Size	21 ¹ / ₁₆ "
Height To the Floor Size	24 ⁷ / ₈ "
Height Big Open Base	15 ⁵ / ₈ "

Product Details

Steel beam skins are available in standard height, to-the-floor height, and big open base height.

Standard height beam skins are sized to work in conjunction with base trims to finish the beam.

To-the-floor skins are sized to extend to the bottom of the beam. They can be used on one or both sides of the beam.

Tip: Omit base trim option should be selected on the horizontal frame when using beam skins to the floor.

Big open base skins are sized to work in conjunction with big open base trims, leaving the bottom of the beam open. They must be used on both sides of a beam.

Tip: Select the big open base option on horizontal frames that are receiving big open base height skins.

Steel beam skins are only available in painted steel.

Connections

Skins extend onto junction and meet skin of adjacent beam segment.

Skins for Answer beam are unique to the Answer beam and are not compatible with Answer panel builds.

Wiring & Cabling

Powerkits are available in widths that correspond to beam widths.

Power and data can be accessed at 20"H in steel skins by specifying power and data cutouts.

For 20"H power access in steel skins, specify TS7RC receptacles and TS7RCT trim rings for each cutout.

For 24"W and 30"W steel skins, hardwire receptacle cutout option will always have a single centered hardwire cutout.

For 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and right hardwire cutout.

Data cutouts are available in furniture style data cutouts and NEMA data cutouts.

Laminate Beam Skins

Laminate skins attach to frames to finish the appearance of a beam.

► Specifying, pages 228–229

Laminate skins consist of a laminate surface captured by a painted metal trim border on all sides.

Laminate skins are non-tackable.
Skins can be removed and repositioned.

Product Details

Laminate beam skins are available in standard height and to-the-floor height.

Laminate beam skins are not available on the big open base.

Standard height beam skins are sized to work in conjunction with base trims to finish the beam.

To-the-floor skins are sized to extend to the bottom of the beam. They can be used on one or both sides of the beam.

Tip: Omit base trim option should be selected on the horizontal frame when using beam skins to the floor.

Connections

Skins extend onto junction and meet skin of adjacent beam segment.

Skins for Answer beam are unique to the Answer beam and are not compatible with Answer panel builds.

Woodgrain and directional laminate patterns run vertically as standard with an option of running horizontally.

Wiring & Cabling

Power and communication cannot be accessed in laminate skins.

Surface Materials

Laminate skins

Wiring Schematics

Details for the Electrician

Answer offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

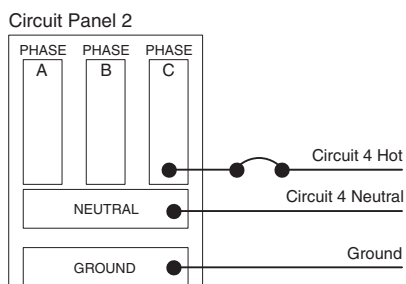

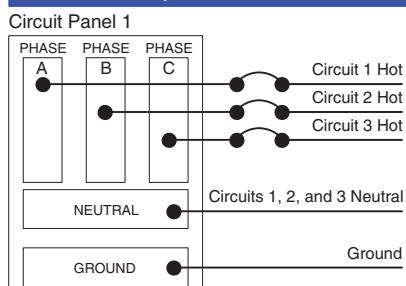

Rust = Three-circuit, separate neutrals (3SN)

Shared neutrals = 10 gauge

Non-shared neutrals = 12 gauge

Hot wires = 12 gauge

Four-Circuit, 3+1

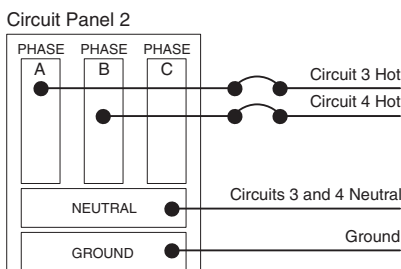

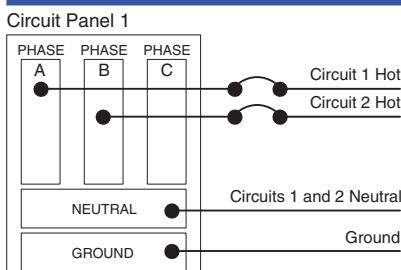

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

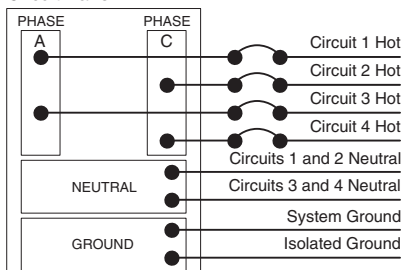

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

Single 3-Phase
Circuit Panel

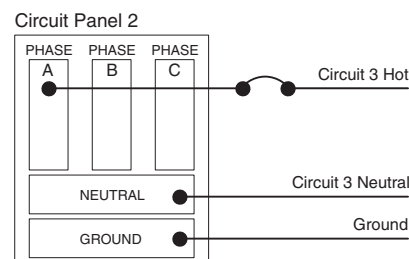

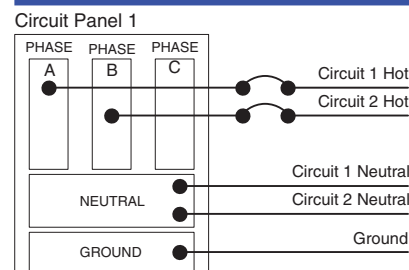

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase
Circuit Panel

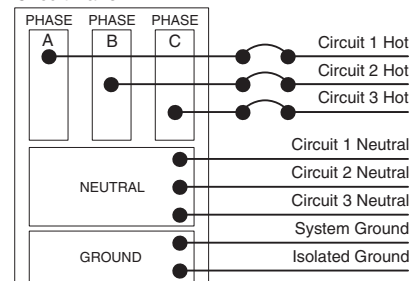

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate Neutrals

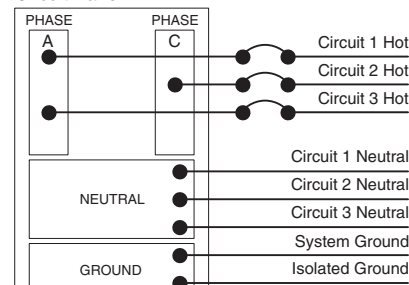

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase
Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase
Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	13.6	110	1
Microwave (low)	150	5.5	110	3
Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Cable Capacities

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this table are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity.

Tip: Tests were performed on junctions with tall sleeves installed.

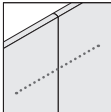

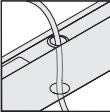

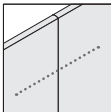

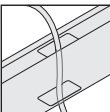

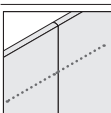

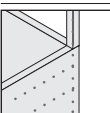

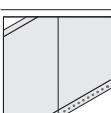

Cables Tested

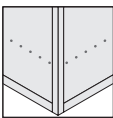

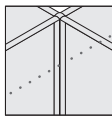

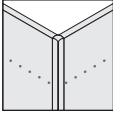

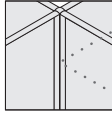

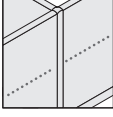

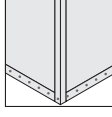

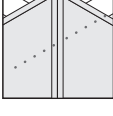

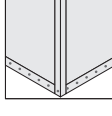

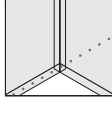

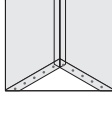

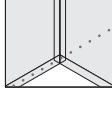

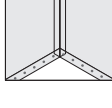

**A CommScope
Systimax Gigaspeed
1071E Series
Category 6 Cable
OD=0.23"**

**B CommScope
Systimax X10D
1091B Series
Category 6A Cable
OD=0.285"**

Power harnesses reduce cable capacity. An average of 10-15 cables will be reduced per harness used. However, this number varies according to installation practices and the type of cables used.

When laying cables vertically behind skins, capacity is dependent on skin width.

	A	B		A	B		
Straight Horizontal Routing			Straight Vertical Routing				
	Horizontal pass-through (straight) at cable routing opening	12	7		Vertical cable routing through round openings of horizontal connecting bar; two locations per bar	11	7
	Horizontal pass-through (straight) at rectangular opening for modular power harness (available every 12" inside frame)	72	47		Vertical cable routing through rectangular openings of horizontal connecting bars; two locations per bar	24	16
	Lay-in cable routing at base of beam with power	36	22		Vertical cable routing inside utility pole and exiting into the beam	50	40
	Lay-in cable routing at base of beam without power or with power harness routed above	48	30				

		A	B			A	B
L, T, X, V, and Y Horizontal Routing				L, T, X, V, and Y Horizontal Routing			
	Horizontal pass-through at cable routing opening	8	5		Horizontal pass-through (straight) at rectangular opening for modular power harness	72	47
	Horizontal pass-through (corner) at rectangular opening for modular power harness	48	26		Horizontal pass-through (corner) at cable routing opening	8	5
	Horizontal pass-through (straight) at cable routing opening (T configuration)	12	7		Lay-in cable routing (corner) at base of beam with power in L, T, or V configuration	14	9
	Horizontal pass-through (straight) at cable routing opening (X configuration)	12	7		Lay-in cable routing (corner) at base of beam without power in L, T, or V configuration	14	9

					Lay-in cable routing (straight) at base of beam without power, or with power harness routed above in X or Y configuration	48	30
					Lay-in cable routing (corner) at base of beam without power, or with power harness routed above in X or Y configuration	14	9

Beam Utility Pole–L, T, and X Junctions

Utility pole–L, T, or X brings power and cabling from the ceiling and introduces it into the beam. Junction is not included as utility pole connects into the existing beam junction.

► Specifying, page 234

Utility pole is flush with the footprint of the beam.

Product Details

Ceiling attachment kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the beam to make a modular connection to a powerkit.

Tip: Power harnesses are ordered separately from the utility pole.

Utility pole can extend up to 8' above the beam.

Shield on power harness permits a utility pole to accommodate power and communication cable routing at the same time. For applications where more cable routing is needed, you can use the utility pole without a power harness.

Connections

Utility pole can be used at an L, T, or X junction configuration. It cannot be used in an V or Y configuration. Utility pole is not shipped with a junction.

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 47

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements.

Utility pole

- Paint

Ceiling trim plate

- White paint

Beam End-of-Run Junction with Utility Pole

End-of-run junction with utility pole brings power and cabling from the ceiling and introduces it into the beam through openings in the base, above the base, and at 20"H. Includes a junction and replaces the need to order one separately.
 ▶ Specifying, page 234

Utility pole extends beyond the footprint of the beam.

Product Details

Ceiling attachment kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the beam to make a modular connection to a powerkit.
Tip: Power harnesses are ordered separately from the utility pole.

Ceiling heights up to 10' can be accommodated.

Shield on power harness permits a utility pole to accommodate power and communication cable routing at the same time. For applications where more cable routing is needed, you can use the utility pole without a power harness.

Connections

Utility pole works with beam junctions. It can only be used at an end-of-run, and is always shipped with a junction, so don't double order.

End-of-run application uses an in-line junction. Utility pole extends 3" beyond the footprint of the beam.

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.
▶ Page 47

Base Power Infeed

Base power infeed connects power in the building floor to a powerkit in the base of a beam. Infeed occupies one receptacle opening.

► Specifying, page 236

Connector on end of base power infeed harness occupies one receptacle location in power block.

Flexible harness makes hardwired connection to building monument. The harness must be backfed through the base trim prior to connection into the building monument.

Cover is included with base power infeed to conceal the connection.

Wiring & Cabling

Connector on base power infeed must be placed behind base trim and harness must be backfed through base trim opening prior to an electrician making the connection to power in the building floor.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 47

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Special requirements are needed for San Francisco.

► See page 236 for specification.

Base power infeed cannot be used on beam junctions supported by panel feet. Use a multipurpose infeed instead.

Big open base beam segments cannot use base power infeed. Bring power in using a multipurpose infeed.

Surface Materials

Power infeed cover

- Plastic

Conduit

- Black plastic

Special Requirements for New York City

Special Requirements
for New York City

New York City electrical code requires modular power components to be field installed by the electrician. Because Answer power components are always field installed, they are okay for use in New York.

► Specifying, page 237

Order New York City power infeed of the width that corresponds to the width of the beam it will be installed in.

Tip: Remember that the beam with the New York City power infeed installed cannot accommodate any receptacles in the base because a powerkit cannot be installed. Install a powerkit higher in the beam to accommodate receptacles or use adjacent beam segments to install receptacles.

Distribution Products

Powerkits are a combination of modular power blocks, harnesses, and connectors that attach to a power tray for installation inside an Answer beam. Powerkits are available in widths that correspond to beam widths.

► Specifying, page 238

Powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Two modular connectors on end of powerkit accept modular connectors of adjacent powerkit, power infeeds, or modular harness.

Openings in power tray accommodate voice/data outlets. Openings line up above the power blocks. Communication ports can never be back-to-back.

Power tray supports power blocks and provides space for cable routing.

Power block is attached to underside of power tray.

Duplex and USB receptacles, ordered separately, can be field installed where needed on both faces of power blocks.

Pass-through powerkits are available for applications where you want to extend the power between beam segments but have no need for access in a specific beam.

► Specifying, page 239

Pass-through powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Modular connector plugs into the connection point on adjacent powerkits.

Modular connector accepts adjacent powerkits.

Cable trays can be installed every 6" vertically and rear-ranged at various heights within a beam for communications access and cable routing.

► Specifying, page 240
Exception: Cable tray cannot be used in the base of the beam.

Cable tray can accept added cable carriers attached below tray to expand horizontal cable management options.

► See *Montage Specification Guide* for cable carrier (ZCC).

Product Details

Powerkits can be installed in the base, just above the base or 20"H from the floor.

Pass-through powerkits extend power between beam segments.

Big open base beam segments only support power and data access at 20"H.

Standard Base Trim

Width of beam segment determines how many receptacle and communication locations are available.

24"W with one power block. Communication opening is located below and to the right of the power block.

30"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

36"W with two power blocks. Communication openings are located below and to the right of each of the power blocks.

60"W to 72"W with four power blocks. Communication openings are located below and to the right of each right-hand power block of each power block pair.

Hardwired Base Trim

Width of beam segment determines how many receptacle and communication locations are available.

24"W with one power block. Communication opening is located below and to the right of the power block.

30"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

36"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

42"W to 48"W with two power blocks. Communication openings are located below and to the right of each of the power blocks.

60"W to 72"W hardwire powerkit comes with two power blocks. The hardware base trim has two power knockout options on each end of the base trim. The power block can be installed at either knockout location. Communication openings are located below and to the right of each right-hand power block of each power block pair.

Tip: Communication openings are located 2 1/2" further right than standard base trims to accommodate wider hardwired junction boxes.

15-amp or 20-amp duplex receptacles snap into powerkits on one side or both sides of the beam.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

USB receptacles available in three wiring schematics with multiple line options, snap into powerkits on one side or both sides of the beam. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Install duplex or USB receptacles only where you want them. Add more receptacles in the future.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 47

Fabric skins allow access to power and data just above the base and at 20"H in the field. Specify TS7UFPLATE faceplates for use with field cut fabric skins. Cutting templates are available through Service Parts (T500940SR).

Steel skins can be specified with cutouts to access power and communication at 20"H. Specify TS7RC power receptacles, TS7USB USB receptacles, and TS7RCT trim rings when accessing power through steel skins.

Knockouts and cutouts for receptacles in the beam base trim and skins are always 10 9/8" from the outside edges of the beam. Knockouts for communication in base accommodate modular furniture size only.

Filler to close unwanted openings in base trim is available from Service Parts.

Wire separators are not required. All electrical harnesses are shielded.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements. ► Pages 57 and 61

Distribution Products, continued

Modular Harness

► Specifying, page 242

Product Details

Modular harnesses are available to connect powerkits at different heights. Available in 43" and 80" lengths.

Extra length modular harness is required when connecting two power kits located at different heights inside the beam in a corner or in-line application.

Harnesses plug into connection points on the powerkit. Every powerkit has multiple connection points to allow branching of power.

Modular harness may be specified in a non-PVC version.

T-connection is formed by connecting two harnesses to a power block.

X-connection is formed by connecting two harnesses to two successive power blocks.

Modular harness may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Multipurpose Power Infeed

► Specifying, page 244

Product Details

Multipurpose power infeed is shielded to allow power and communication routing side by side. Available in 6', 12', and 24' lengths.

Multipurpose power infeeds bring power into the beam and make a modular connection to a powerkit.

Multipurpose power infeeds can be used with utility poles. Specify power harness separately.

Multipurpose power infeeds may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Multipurpose infeed conduit cover is aesthetic only and conceals the metallic portion of the multipurpose infeed.

Modular Junction Box Faceplate

► Specifying, page 245

Product Details

Modular junction box faceplate can be ordered separately and used with any modular harness length when 6', 12', and 24' lengths are not appropriate. Straight/flush and 90° faceplates are available. Non-PVC is standard. PVC version can be optioned.

Connections

Faceplate is attached to junction box with screws. Hardwire connection to power source with conventional 4¹¹/₁₆" x 4¹¹/₁₆" junction box is completed by electrician in the field. Modular extension harness can be connected or disconnected from faceplate as needed.

Special Requirements for Hardwired Solution

Special Requirements for
Hardwired Solutions

Chicago electrical code

requires the power distribution network to be hardwired on site. These installations require hardwired powerkits.

► Specifying, page 243

Tip: Any hardwired installation can use the components of the hardwired powerkit.

Order beam without power and order a hardwired powerkit of the corresponding width.

► Page 243

Power tray is included in hardwired powerkit to secure junction boxes and to attach to beam frame.

When hardwire power

is placed in a non-based application, fabric skins must be fieldcut and steel skins must specify hardwire power cutouts.

Tip: Hardwire powerkit applications in the base location require a hardwire base trim for correct alignment of power and data receptacles.

Junction boxes are included in hardwired powerkit.

Receptacles are supplied by the electrician.

Receptacle openings are knocked out in the field.

Conduits are supplied by the electrician.

Wiring & Cabling

Junction box can accommodate two receptacles back to back. Electrician can use Leviton 5325 or equivalent receptacles.

When hardwire kit is installed in 30"W beam base, only one junction box can be used (installer to decide which position to utilize). Two junction boxes can be used in all other beam locations.

When installing a hardwire kit above the base in a 30"W beam, there is an additional set of holes on the tray that will need to be utilized to allow two hardwired boxes to be accommodated.

Electrician must make all hardwire connections in the field. Electrician must supply all conduits, wires, nuts, and connection to building power supply.

Order Chicago-version of shelf lights. These lights have a built-in circuit breaker.

Connections

Powerkit can be installed in beam base, just above the base, or at 20"H.

Junction boxes are typically mounted below the power tray; however, they can be mounted above when power is routed in a location other than the panel base. A bracket is included for mounting junction boxes above the power tray.

Number of Junction Boxes is Determined by Beam Width

Beam width	Junction boxes
24"	1
30"	2
36"	2
42"	2
48"	2
60"	2
72"	2

Access Products

Receptacles

15 amp 20 amp
► Specifying, page 246

Product Details

15-amp or 20-amp receptacles, ordered separately, snap into both faces of power block in the field.

Tip: Use TS7RCT trim covers with steel skins.

Tip: Use TS7UFPLATE face-plates with fabric skins.

Orange triangle indicates to users the receptacles that are connected to isolated grounds.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

- 6654 Sand
- 6697 Fog

Receptacle Trim Ring

► Specifying, page 249

Product Details

Receptacle trim ring is used with each receptacle, receptacle cut-out cover, or USB on a steel skin to cover the edge of the cut-out and create a precise transition between the cut-out and the receptacle.

Trim ring will only work on receptacle TS7RC, TS7USB, and TS7BCC.

Only specify when using steel skins.

Surface Materials**Receptacle Trim Ring**

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6527 Merle
- 6654 Sand
- 6697 Fog

Faceplate

► Specifying, page 250

Product Details

Faceplate, ordered separately, is used to surround receptacle when a fabric skin is field-cut. Templates for field cutting are available through Service Parts (T500940SR).

Faceplate is used to surround modular furniture size communication or DECORA outlets when installed in the face of a tackable acoustical beam skin. Templates for field cutting are available through Service Parts (T500940SR).

NEMA-size communication outlets (single gang) do not require a Steelcase faceplate. Cannot be used in base.

Surface Materials**Faceplate**

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6651 Tungsten
- 6652 Titanium
- 6654 Sand

Accessories

Junction Tall Sleeve

► Specifying, page 252

Product Details

Junction tall sleeve can be added to vertical junctions to cover the exposed metal edges in the large cable routing openings of junctions.

Junction tall sleeves are ordered separate from vertical junctions and are available in packages of 10.

Surface Materials

- Red plastic only

Feed-Through Horizontal Cable Sleeve

► Specifying, page 252

Product Details

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Surface Materials

Feed-through horizontal cable sleeve

- Black plastic only

Grommet for Vertical Junctions and Horizontal Connecting Bars

► Specifying, page 253

Product Details

Grommet for horizontal connecting bar and junctions can be added in the field to finish the exposed metal edges of cable pass-through openings. For cable sleeves used with junctions.

Grommets can also be used with power trays or cable trays.

Surface Materials

- Black plastic only

Grommet for Junction

► Specifying, page 253

Product Details

Grommet for junction can be added in the field to finish the exposed metal edges of horizontal cable pass-through openings.

Surface Materials

- Black plastic only

Duplex Cable Grommet

► Specifying, page 253

Product Details

Cable grommets can be inserted in receptacle openings to route cables from the beam base into the beam.

Surface Materials

- Black plastic only

Under Worksurface Cable Manager

► Specifying, page 241

Product Details

Under worksurface cable manager clips into the side of the top cap rail and manages cables along the beam.

Surface Materials

- 6249 Platinum Solid

Answer Beam End-of-Run Straight Boundary Screens

Answer beam end-of-run boundary screens

provide light scale space division and privacy for a variety of worksettings.

Answer beam end-of-run boundary screens

attach to the Answer beam at the end-of-run as an alternative to a return panel or beam segment, when power and storage components are not required.

► Specifying, pages 256–264

Answer beam end-of-run boundary screens

have a thickness of $1\frac{3}{16}$ ".

Screens are available in laminate or wood veneer.

Boundary screens

come standard with adjustable glides, with a range of $1\frac{1}{2}$ ". The glides are located $1\frac{1}{2}$ " from the outside of each edge.

Product Details

Answer beam boundary screens are available in three configurations: end-of-run, on-module in-line, and centered in-line.

For more information on Answer beam on-module in-line boundary screens, ► Page 80

For more information on centered in-line Answer beam boundary screens, ► Page 84

Answer beam end-of-run boundary screens attach to the Answer beam using an end-of-run junction.

Actual Dimensions

Height	28½", 42", and 48"
Single-Sided Width	27", 33", 39", 45", 51", 57", 63", 69", and 75"
Spanning Width	51", 57", 63", 69", and 75"
Split Width	25½", 31½", 37½", 43½", 49½", 55½", 61½", 67½", and 73½"
Return Width	18", 24", and 30"
Thickness	$1\frac{3}{16}$ "

Tip: Answer beam boundary screen widths can also be specified parametrically.

Answer Beam Boundary Screens

Answer beam boundary screens have modular heights and widths. Parametric widths are allowed from 27"W to 75"W increasing in 1/16" increments. Boundary screen return widths are available at 18", 24", and 30", and are also available parametrically from 18"W to 30"W increasing in 1/16" increments.

Answer beam end-of-run boundary screens are available in five different configurations.

1. Single-sided boundary screens provide boundary to one side of an Answer beam and are specified as either left or right. Right handed application is shown above.

3" Answer
beam thickness

Straight single-sided beam end-of-run boundary screens will always include the 3" thickness of the Answer beam to which they attach. Minimum width for a single-sided boundary screen is 27" (24" inside, and 3" for the Answer beam thickness). The maximum width is 75" (72" inside, and 3" for Answer beam thickness). The above image is shown with a right handed application.

Tip: The above image shows a 75" specified width. The planning width is 72".

2. Spanning beam end-of-run boundary screens use one screen segment to provide boundary of equal widths to both sides of an Answer beam.

Spanning beam end-of-run boundary screens always extend in equal dimension from the beam to which they attach and include the 3" thickness on the Answer beam. Minimum width for a spanning boundary screen is 51" (48" inside, and 3" for the Answer beam thickness). The maximum width is 75" (72" inside and 3" for Answer beam thickness).

Tip: The above image shows a 75" specified width. The planning width is 36" on each side of the beam.

3. Split beam end-of-run boundary screens use two screen segments to provide boundary to both sides of an Answer beam. Both sides of a split boundary screen are the same height.

Split boundary screens can either be equal or asymmetrical in dimension from the beam to which they attach and include the 3" thickness of the Answer beam. Minimum width for a split boundary screen is 25 1/2" (24" inside, and 1 1/2" for half of the Answer beam thickness) for each side of the beam. The maximum width is 73 1/2" (72" inside, and 1 1/2" for half of the Answer beam thickness) for each side of the beam.

Tip: The above image shows a 25 1/2" specified left width and a 73 1/2" specified right width. The planning left width is 24" and the planning right width is 72".

Answer Beam End-of-Run Straight Boundary Screens, continued

4. Single-sided L return beam end-of-run boundary screens provide boundary and additional privacy to one side of an Answer beam. Both screen segments (primary and return screen) are the same height and are specified as either left or right handed. Right handed application is shown above.

3" Answer beam thickness

Single-sided L return beam end-of-run boundary screens in modular widths have inside clearance in 6" increments to wrap standard width work-surfaces in 6" increments. Beam connected segments (the primary screens) are available in widths of 27" (24" inside, and 3" for Answer beam thickness) to 75" (72" inside, and 3" for Answer beam thickness). The inside width of modular returns are 18", 24", or 30". There is an additional $1\frac{3}{16}$ " that will be added to the return width for the primary screen thickness. Both boundary screens have equal heights and are specified as either left or right handed. Right handed application is shown above.

Tip: The above image shows a 75" specified width. The planning width is 72".

5. Split L return beam end-of-run boundary screens consist of four segments to provide boundary and additional side privacy to both sides of an Answer beam. Split L configuration screens do not have to have symmetrical widths, but must have the same height.

3" Answer beam thickness

Split L return beam end-of-run boundary screens in modular widths have inside clearance in 6" increments to wrap standard width work-surfaces from 24" to 72" in 6" increments for each side of the split. The inside width of modular returns will be 18", 24", or 30". There is an additional $1\frac{3}{16}$ " that will be added to the return width for the primary boundary screen thickness. Each beam connected segment is available in widths from 25 1/2" (24" inside, and 1 1/2" for half of the Answer beam thickness) to 73 1/2" (72" inside, and 1 1/2" for half of the Answer beam thickness).

Tip: The above image shows a 61 1/2" specified left width and a 73 1/2" specified right width. The planning left width is 60" and the planning right width is 72".

Connections

The 28 1/2" H boundary screen aligns with top of the beam top cap rail.

Answer beam end-of-run boundary screens have a metal cover plate that covers the bracket that connects the boundary screen to the end-of-run junction. The cover is located 22" from the bottom of the screen and is 3"W and 14"H.

Return segments also have a second metal cover plate that covers the connection bracket that connects the return to the primary screen segment.

Surface Materials

Boundary screens

- Laminate
- Wood veneer

Edge on laminate screen

- Plastic

Bracket cover

- Paint

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

Open Line laminates with grain direction

can only be applied vertically. Open Line laminates are not allowed on boundary screens that are greater than 59"W or have segments that are greater than 59"W.

On single-sided boundary screens, horizontal wood grain laminates and veneers can be applied up to 75"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 75"W.

On spanning boundary screens, wood grain laminates and veneers can be horizontal grain direction up to 75"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 75"W.

On split boundary screens, horizontal wood grain laminates and veneers can be applied up to 73 1/2"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 73 1/2"W.

On split boundary screens with horizontal grain direction, the grain pattern of two screen segments may not align.

All boundary screen sides will have the same finish applied.

Application Topics

Answer beam end-of-run boundary screens do not support hang-on components.

Answer beam end-of-run boundary screens attach at the end-of-run location of an Answer beam segment.

Tip: Select "omit trim" option for beam end-of-run junctions that attach to beam end-of-run boundary screens.

Answer beam end-of-run boundary screens cannot attach to an Answer beam end-of-run junction where an Answer foot is utilized.

One single-sided boundary screen may be attached at the end of the Answer beam. If the intent is to have a boundary screen in both directions of the beam, use either spanning or split Answer beam end-of-run boundary screens.

Single-sided and split boundary screens are available left and right handed. This is determined by the user facing the attaching Answer beam. Left sided application is shown above.

Split boundary widths do not have to be symmetrical.

A front edge of a worksurface can be supported off of an Answer beam boundary screen with the boundary screen worksurface support bracket (Service part 1148776001SR). Order separately.

All L return boundary screens have a step miter detail at the adjoining edge.

Answer Beam On-Module In-Line Boundary Screens

Answer beam boundary screens provide light scale space division and privacy for a variety of worksettings.

Answer beam on-module in-line boundary screens attach to the Answer beam mid-run as an alternative to a return beam segment, when power and storage components are not required.
► Specifying, pages 266–269

Answer beam on-module boundary screens have a thickness of $1\frac{3}{16}$ ".

Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of $1\frac{1}{2}$ ". The glides are located $1\frac{1}{2}$ " from the outside of each edge.

Actual Dimensions

Height	42" and 48"
On-Module T Width	27", 33", 39", 45", 51", 57", 63", 69", and 75"
On-Module X Width	25½", 31½", 37½", 43½", 49½", 55½", 61½", 67½", and 73½"
Thickness	1¾"

Tip: Answer beam boundary screen widths can also be specified parametrically.

Product Details

Answer beam boundary screens are available in three configurations: end-of-run, on-module in-line, and centered in-line. For more information on end-of-run boundary screens,
► Page 76

For more information on centered in-line boundary screens.
► Page 84

Answer beam on-module boundary screens attach to the Answer beam using a boundary screen on-module junction.

When specifying Answer beam on-module in-line boundary screens, specify an on-module in-line boundary screen junction separately.
► Page 268

An on-module in-line boundary screen junction takes the place of an in-line junction.

Answer beam on-module in-line boundary screens maintain planning dimension of the beam.

On-module in-line beam boundary screens add $1\frac{3}{16}$ " to the overall dimension of a beam run.

Answer beam boundary screens have modular heights and widths. Parametric widths are allowed from 27"W to 75"W increasing in $\frac{1}{16}$ " increments.

Answer beam on-module in-line boundary screens are available in two different configurations.

1. Answer beam on-module T boundary screens provide boundary to one side of an Answer beam.

Answer beam on module T boundary screens

will always include the 3" thickness of the Answer beam to which they attach. Minimum width for a single-sided boundary screen is 27" (24" inside, and 3" for the Answer beam thickness). The maximum width is 75" (72" inside, and 3" for Answer beam thickness).

Tip: The above image shows a 75" specified width. The planning width is 72".

On-module
T boundary
screen
Answer
beam

Answer beam on-module T boundary screens extend over the top of the beam and are flush with the back edge of the beam.

Answer beam on-module T boundary screens include a $1\frac{3}{16}$ "W painted junction trim to finish the side of the beam that is opposite the T boundary screen.

Answer beam on-module X boundary screens use two screen segments to provide boundary to both sides of an Answer beam. Both sides of a split boundary screen are the same height.

3" Answer
beam thickness

Answer beam on-module X boundary screen can either

be equal or asymmetrical in dimension from the beam to which they attach and include the 3" thickness of the Answer beam. Minimum width for a split boundary screen is $25\frac{1}{2}$ " (24" inside, and $1\frac{1}{2}$ " for half of the Answer beam thickness) for each side of the beam. The maximum width is $73\frac{1}{2}$ " (72" inside, and $1\frac{1}{2}$ " for half of the Answer beam thickness) for each side of the beam.

Tip: The above image shows a $25\frac{1}{2}$ " specified right width and a $73\frac{1}{2}$ " specified left width. The planning right width is 24" and the planning left width is 72".

Answer beam on-module X boundary screens extend over the top of the beam. The two segments of the beam where the on-module X boundary screen meets at is the center point above the beam.

On-module in-line boundary screens do not limit power and data routing in the beam. The on-module in-line boundary screens are notched around the beam.

Answer beam on-module in-line boundary screens have a metal cover plate that covers the bracket that connects the boundary screen to the on-module boundary screen junction. The cover is located 22" from the bottom of the screen and is 3"W and 14"H.

Surface Materials

Boundary screens

- Laminate
- Wood veneer

Edge on laminate

- Plastic

Bracket cover

- Paint

Junction trim (on-module T only)

- Paint

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

Open Line laminates with grain direction

can only be applied vertically. Open Line laminates are not allowed on boundary screens that are greater than 59"W or have segments that are greater than 59"W. Vertical wood grain veneers can be applied up to 75"W.

On on-module X beam boundary screens, horizontal wood grain laminates and veneers can be applied up to $73\frac{1}{2}$ "W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to $73\frac{1}{2}$ "W.

On on-module X beam boundary screens with horizontal grain direction, the grain pattern of two screen segments may not align.

All boundary screen sides will have the same finish applied.

Answer Beam On-Module In-Line Boundary Screens, continued

Application Topics

Answer beam on-module boundary screens do not support hang-on components.

Answer beam on-module boundary screens cannot attach to an Answer beam junction where an Answer foot is utilized.

On-module X boundary screen widths do not have to be symmetrical.

If removing one side of an on-module X boundary screen, a conversion trim (TSBBSCTRM) is available to finish the junction. Note that the remaining boundary screen will stop at the center line as opposed to flush like the on-module T boundary screen.

A front edge of a worksurface can be supported off of an Answer beam boundary screen with the boundary screen worksurface support bracket (Service part 1148776001SR). Order separately.

On-module beam boundary screens do not prevent power and data from routing through the beam junction. Screens are notched to wrap around beam.

Answer Beam Centered In-Line Boundary Screens

Answer beam Boundary screens

provide light scale space division and privacy for a variety of worksettings.

► Specifying, pages 270

Answer beam centered in-line boundary screens have a thickness of $1\frac{3}{16}$ ".

Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of $1\frac{1}{2}$ ". The glides are located $1\frac{1}{2}$ " from the outside of each edge.

Product Details

Answer beam boundary screens are available in three configurations: end-of-run, on-module in-line, and centered in-line. For more information on Answer beam end-of-run boundary screens, ► Page 76

For more information on Answer beam on-module in-line boundary screens, ► Page 80

Answer beam centered in-line boundary screens attach into standard in-line beam junctions.

Answer beam centered in-line boundary screens decrease the planning dimension of the beam by $\frac{5}{8}$ " on either side of the centered in-line boundary screen.

Beam centered in-line boundary screens have modular heights and widths. Parametric widths are allowed from 24"W to 72"W increasing in $\frac{1}{16}$ " increments.

Answer beam centered in-line boundary screens end at the Answer beam in-line junction.

Actual Dimensions

Height	28 $\frac{1}{2}$ ", 42", and 48"
Centered In-line Width	24", 30", 36", 42", 48", 54", 60", 66", and 72"
Thickness	$1\frac{3}{16}$ "

Tip: Answer beam boundary screen widths can also be specified parametrically.

Answer beam centered in-line boundary screen width is the same as its inside planning dimension. Tip: The above image shows a 72" specified width. The planning width is 72".

Answer beam

Centered in-line boundary screens do not wrap around the Answer beam.

Centered in-line boundary screens can create a double sided boundary screen application by specifying two centered in-line boundary screens separately.

Answer beam

When two centered in-line boundary screens are applied to the same in-line junction in a double sided application, there will be a 3"W gap between the two boundary screens.

On Answer beam centered in-line boundary screens, there is a metal cover plate that covers the connection bracket that connects the boundary screen to the in-line junction. The cover is located 22" from the bottom of the screen and is 3"W and 14"H.

Surface Materials

Boundary screens

- Laminate
- Wood veneer

Edge on laminate screen

- Plastic

Bracket cover

- Paint

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

Open Line laminates with grain direction can only be applied vertically. Open Line laminates are not allowed on boundary screens that are greater than 59"W or have segments that are greater than 59"W.

For Answer beam centered in-line boundary screens horizontal wood grain laminates and veneers can be applied up to 75"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 75"W.

All boundary screen sides will have the same finish applied.

Application Topics

Answer beam centered in-line boundary screens do not support hang-on components.

Centered in-line boundary screens attach at the in-line junction of an Answer beam.

Answer beam centered in-line boundary screens cannot attach to an Answer beam where an Answer foot is utilized.

A front edge of a worksurface can be supported off of an Answer beam boundary screen with the boundary screen worksurface support bracket (Service part 1148776001SR). Order separately.

Universal Beam Screen

Universal beam screens

provide a tackable boundary element along the Answer beam. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 272

Product Details

Universal beam screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

Brackets are included with screens. Two brackets are used on all screens.

Screen brackets are each two pieces which slide into the channels on the top of the beam. A plastic cap slides over the two pieces to hold the bracket together prior to sliding the screen onto the brackets.

Actual Dimensions

Overall Height 13½" or 19½"

Width 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Gap is 1" between universal screen and mounting surface.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Universal beam screen can install anywhere along the beam top cap rail.

Universal beam screen can span over a junction.

The 13 1/2"H universal beam screen will reach a 42" height on the beam.

The 19 1/2"H universal beam screen will reach a 48" height on the beam.

Universal Privacy/Modesty Screens

Universal privacy/modesty screen provides a boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration, Series 5 worksurfaces, Elective Elements, Universal tables, and Universal panel-mount worksurfaces.

► Specifying, page 274

Universal privacy/modesty screens are available in one height, 25⁷/₁₀", with two mount location options to provide either privacy or privacy/modesty.

Universal privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Actual Dimensions	
Width	42", 48", 54", 60", or 66"
Height	25 ⁷ / ₁₀ "
Weight	9.79 lb, 10.315 lb, 10.84 lb, 11.365 lb, 11.89 lb
Thickness	3/4"

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on 3/4"-1 1/2" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Surface Materials

- Screen**
- Fabric
- See *Surface Materials*, page 451.
- Edge (upper segment)**
- 7360 Merle
- Edge (lower segment)**
- P630 Medium Heather Grey PET
 - P631 Dark Heather Grey PET
- Brackets**
- 7360 Merle

Application Topics

Universal privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned 3 3/4" in from each side of the screen.

Screen height attachment locations are determined when specifying privacy (top of screen will be at 48") or privacy/modesty (top of screen will be at 42"). The location cannot be changed in the field.

Privacy configuration provides 19 1/5" of screen above the worksurface and 5 1/2" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 48"H Answer panel.

Screen can be mounted with a 1 1/8" cord drop or flush with no cord drop.

Privacy/modesty configuration provides 13" of screen above the worksurface and 11 7/10" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 42"H Answer panel.

Both the privacy and privacy/modesty configurations allow the height-adjustable desks to be lowered to the lowest position (22") while preserving pinch point gap. Privacy version will not interfere with integrated storage.

Universal privacy/modesty screens can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

- Example 1—Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2—Tables with cabby leg or double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Privacy/modesty screens can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools Planning aid be used to ensure proper application of screen to work-surface or tables.

Universal Privacy Screens

Universal privacy screens provide a boundary and privacy element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration, Series 5, Elective Elements, Universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 276

Product Details

Universal privacy screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on ¾"—1½" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Actual Dimensions	
Height	12½" or 18½"
Overall Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Brackets are included with screens. Two brackets are used on all screens.

Universal privacy screen slides onto brackets.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Sarto Beam Screens

Sarto beam screens

provide a light scale tackable boundary element along the Answer beam. They are available in two modular heights to accommodate varying levels of privacy.

► Specifying, page 278

Actual Dimensions

Screen Height 12½" or 18½"

Overall Height 13½" or 19½"

Width 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: Modular 13½"H screen aligns with a 42" datum from the floor. Modular 19½"H screen aligns with a 48" datum from the floor.

Tip: Parametric specifications are available for Sarto beam screens.

Tip: Parametric specifications define actual screen height and width. Overall height will be about inch larger than specified height due to gap between screen and mounting surface. Newly ordered parametric screens may not align exactly with previously specified modular sizes, even if the same dimension is specified. It is highly recommended to use CET SmartTools to verify all dimensions.

Product Details

Sarto beam screens are tackable. They are available in modular heights, 13½"H and 19½"H, and have modular widths ranging from 24"W to 96"W. Screens are also available to specify parametrically.

Brackets and hard stops are included with screens. Two brackets are used on screens 54"W and smaller. Three brackets are used on screens 60"W and larger.

Screen brackets each contain two pieces that slide into the channels on the top of the beam. A plastic cap slides over the two pieces to hold the bracket together. The hard stops are then added before sliding the screen onto the brackets.

Gap is 1" between sarto screen and mounting surface.

Sarto beam screen can install anywhere along the beam top cap rail.

Sarto beam screen can span over a junction, provided there is no conflict between the brackets and the junction. The third bracket on longer screens may conflict with the junction. Please consult CET SmartTools for confirmation before finalizing specification.

The modular 13½"H sarto beam screen will reach a 42" height off the floor.

The modular 19½"H sarto beam screen will reach a 48" height off the floor.

Sarto Privacy/Modesty Screens

Sarto Privacy/
Modesty Screens

Sarto privacy/modesty screen provides a light scale boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration SE, Migration, Elective Elements, universal tables, and universal panel-mount worksurfaces.

► Specifying, page 280

Sarto privacy/modesty screens are available in overall heights from 24" to 30", with a privacy height option to provide varying levels of privacy and modesty.

Sarto privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Product Details

The screen may be used on $\frac{3}{4}$ "– $1\frac{1}{2}$ " thick worksurfaces.

Screens are available in modular or parametric sizes.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Weight of screens are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 0.2 lb per bracket.

Application Topics

Sarto privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned $3\frac{3}{4}$ " in from each side of the screen. Two L-brackets are included with screens narrower than 60"W. Three or four L-brackets are included on screens 60"W and wider.

Worksurface type is available for screens 60" wide or wider, and allows the Sarto privacy/modesty screen to mount to a scalloped worksurface (for example Bivi Height-Adjustable Desk).

Screen can be mounted to the back edge of the worksurface with a $1\frac{1}{8}$ " cord drop or flush with no cord drop.

Screens 36"W and narrower can be mounted as side screens, and are always mounted flush to the edge of the worksurface. This application grows the footprint of the workstation by $\frac{9}{16}$ " per screen.

Screens are specified with a privacy height above the worksurface. A 1" thick worksurface is assumed. This privacy height sets the position of the brackets and cannot be changed in the field.

Screens are specified by first selecting an overall screen height (24"–30"), then specifying a privacy height. Privacy height is measured from the top of the screen to the top of the worksurface. Allowable privacy height selection changes based on the specified overall height.

All privacy heights allow a height adjustable desk to be lowered to the lowest position (22") while preserving pinch point gap.

To match screens

ordered on or before June 20, 2021, please consult the following information to determine proper privacy height.

- 24"H Screen, Privacy/Modesty Configuration – Privacy Height = $13\frac{1}{2}$ "
- 24"H Screen, Privacy Configuration – Privacy Height = $16\frac{1}{2}$ "
- 30"H Screen, Privacy Configuration – Privacy Height = $22\frac{1}{2}$ "

Sarto privacy/modesty screens can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

- Example 1—Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2—Tables with cabby leg or double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Privacy/modesty screens can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy/modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Surface Materials

Screen

- Fabric
- See *Surface Materials*, page 451.

Brackets

- 7360 Merle

Actual Dimensions

Width	23"–70"
Height	24"–30"
Thickness	$\frac{9}{16}$ "

Sarto Privacy Screens

Sarto privacy screens provide a light scale boundary and privacy element for height-adjustable desks and fixed worksurfaces. It can be used with Ology, Migration SE, Migration, Elective Elements, universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 282

Actual Dimensions

Screen Height	12½"–34½"
Overall Height	13½"–35½"
Width	24"–96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

Sarto privacy screens are tackable. They are available in four modular heights, 13½"H, 19½"H, 23½"H, and 35½"H, and have widths ranging from 24"W to 96"W. Screens can also be specified parametrically.

The screen may be used on ¾"–1½" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Brackets and hard stops are included with screens. Screens narrower than 60"W use two brackets, while screens 60"W and larger utilize three brackets. The third bracket is centered on the width of the screen.

Offset brackets are included with 29"W screens, to help maintain appropriate pinch points between the screen and adjacent objects. Side screen option is available for screens 36"W and narrower.

Sarto privacy screen slides onto brackets.

Alignment brackets are available to help eliminate gapping and misalignment between back and side screens. Alignment brackets are available as their own style (**PSCB**).

Weight of screens are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 1.2 lb per bracket.

Divisio Side Screen

Divisio Side Screen

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 285

Magnetic body accommodates magnets for visual display.

Finger trigger makes it simple for the end user to move the screen to allow for expansion, compression, increased privacy, or collaboration.

Clamp can accommodate 3/4"- to 1 1/2"-thick worksurfaces.

21 1/2" of the screen sits on the worksurface. The depth allows the side screen to work on any 24"D or deeper worksurface.

Overhang provides greater peripheral privacy.

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For 3/4" thick worksurfaces, c:scape, and FrameOne, a #10 x 3/4" countersunk screw is recommended. For worksurfaces over 3/4" thick, a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)
Width	1 1/4"
Height	14 1/4" (total), 11 5/8" (above worksurface)

Understanding Answer Beam Stability Guidelines

Stability Guidelines

98

Stability Guidelines

Answer beam, when installed properly, is an exceptionally stable furniture system. That applies to workstations using beam alone, beam-supported components, or freestanding furniture.

Counterweight packages for storage products are required to ensure product stability.

► See *Storage Specification Guide*.

The following section on beam stability gives some guidelines to be used with common system furniture configurations. Guidelines are given to beam with and without components. Consult your local dealer or Steelcase representative prior to deviating from these guidelines.

Guidelines for Freestanding Beam

► Page 99

Guidelines for Single-Sided Planning with Stanchion Mounted Centered Storage

► Page 101

Guidelines for Double-Sided Planning with Stanchion Mounted Centered Storage

► Page 102

Guidelines for Single-Sided Parallel Stanchion Mounted Storage with Mid-Storage Support

Guidelines for Double-Sided Parallel Stanchion Mounted Storage with Mid-Storage Support

► Page 104

Guidelines for Single-Sided Perpendicular Stanchion Mounted Storage with Mid-Storage Support

► Page 105

Guidelines for Double-Sided Perpendicular Stanchion Mounted Storage with Mid-Storage Support

► Page 106

Guidelines for Freestanding Application

Beam-mounted storage is not allowed in freestanding beam configurations.

Tip: The maximum beam with screen height is 48"H.

Tip: Single Answer beam segments supported by panel feet must be at least six feet wide.

Tip: Freestanding Answer beam runs with multiple beam segments must have a panel and beam foot every 10 feet.

Tip: A panel and beam foot is required within three feet of the end-of-run.

Stability Guidelines, continued

Guidelines for Answer Beam Applications without Stanchion Mounted Storage

- Answer Beam must be supported every 10'.

Answer Beam supports that can take the place of a panel and beam foot

- Answer beam spanning or split end-of-run boundary screen
- Answer beam T or X junction
- Answer panel T or X junction
- On-module X in-line boundary screens
- Centered in-line boundary screens (double sided)
- Double-sided mid-storage support application
- Worksurface supported as indicated below

Acceptable worksurface applications as primary supports

- Post leg with cantilever
- Universal FrameOne legs (half loop, open loop, and closed loop)
- Tether brackets with Answer panel and beam foot
- Tether brackets with Two High low storage supporting worksurface
- Tether brackets with 1-High or 1.5-High storage (attached to beam storage-to-beam connector and beam intermediate worksurface support)

Allowable mid-run supports (applied to one or both sides)

- 1-High, 1.5-High, Two High (18"D or 24"D) Currency Enhanced cabinet or credenza, attached to beam with storage-to-beam connector (parallel or perpendicular application)

Guidelines for Single-Sided Planning with Stanchion Mounted Centered Storage

- End-of-run support must be applied at each end of beam run. End-of-run support can be Answer beam end-of-run boundary screen, Answer beam, or Answer panel.
- Answer panel or beam foot must be applied on beam runs longer than 6'. Maximum spacing from foot to end-of-run and foot-to-foot is 6'.
- Low storage and tethered worksurfaces can be applied, but do not count as support elements in single-sided planning with stanchion mounted centered storage.

Stability Guidelines, continued

Guidelines for Double-Sided Planning with Stanchion Mounted Centered Storage

- Double-sided primary supports must be applied at each end-of-beam run. Primary supports can be Answer beam end-of-run spanning or split boundary screen, Answer beam T junction, Answer panel T junction, double-sided mid-storage support applications, or worksurfaces (see details below for worksurface supports).
- Beam runs can be longer than 24' if double-sided primary supports are applied at least every 24' feet.
- Double-sided primary supports can be on-module in-line boundary screen, centered in-line boundary screen, Answer beam X junction, Answer panel X junction, double-sided mid-storage support applications, or tethered worksurfaces (see details below for worksurface supports).
- On beam runs longer than 10', the maximum spacing from primary support to mid-run support is 10' (see details below for allowable mid-run support). The maximum spacing from mid-run support to mid-run support is also 10'.

A single worksurface connected to the beam using only worksurface tethers is not allowed at the beam end-of-run unless one of the following guidelines are met:

- Single worksurface needs to have a boundary screen at the end-of-run on the side of the beam the worksurface is located.
- Single worksurface needs to be supported by beam junction or Answer panel connection.
- Single worksurface needs to be supported with a junction attached support (beam cantilever or Universal FrameOne leg for Answer Beam).

Acceptable worksurface applications as primary supports (parallel or perpendicular)

- Post leg with cantilever
- Universal FrameOne legs (half loop, open loop, and closed loop) support Answer beam
- Tether brackets with Answer panel and beam foot
- Tether brackets with Two High low storage supporting worksurface
- Tether brackets with 1-High or 1.5-High storage (attached to beam storage-to-beam connector and beam intermediate worksurface support)

Allowable mid-run supports (applied to one or both sides)

- Answer panel or beam foot
- 1-High, 1.5-High, Two High (18"D or 24"D) Currency Enhanced cabinet or credenza, attached to beam with storage-to-beam connector (parallel or perpendicular application)
- On-module in-line boundary screens
- Centered in-line boundary screens
- Answer beam junction
- Answer panel junction

Guidelines for Single-Sided Parallel Stanchion Mounted Storage with Mid-Storage Support

- Supporting low storage must be connected to a beam with a storage-to-beam connector bracket. When low storage is at the end-of-run position, the storage-to-beam connector bracket should be placed at the end-of-run position.
- For single-sided applications, the supporting low storage requires counterweights.
- Worksurfaces supporting parallel stanchion mounted storage with mid-storage support must be tethered to the beam. Worksurface support can include:
 - Cantilever and front edge support
 - Universal FrameOne legs (half loop, open loop, and closed loop) for Answer beam
 - Tether brackets with Answer panel and beam foot
- For single-sided applications, when only worksurfaces are supporting stanchion mounted storage and the beam, the worksurfaces must utilize a front edge worksurface support every 6'.
- For single-sided applications, when only worksurfaces are supporting stanchion mounted storage and the beam, worksurface depth in benching application must be 30"D.

Stability Guidelines, continued

Guidelines for Double-Sided Parallel Stanchion Mounted Storage with Mid-Storage Support

- Supporting low-storage must be connected to a beam with a storage-to-beam connector bracket. When low storage is at the end-of-run position, the storage-to-beam connector bracket should be placed at the end-of-run position.
- Worksurfaces supporting parallel stanchion mounted storage with mid-storage support must be attached to the beam. Worksurface support can include:
 - Cantilever and front edge support
 - Universal FrameOne legs (half loop, open loop, and closed loop) for Answer beam
 - Tether brackets with Answer panel and beam foot and front edge support
- Double-sided parallel stanchion mounted storage with mid-storage supports counts as a beam support.
- The beam must meet the application guidelines for freestanding beam application if the application has no stanchion mounted centered storage.
- The beam must meet the application guidelines for stanchion mounted centered storage if the beam application also contains stanchion mounted centered storage.

Guidelines for Single-Sided Perpendicular Stanchion Mounted Storage with Mid-Storage Support

- Supporting low-storage must be connected to a beam with a storage-to-beam connector bracket.
- Single-sided perpendicular stanchion mounted storage with mid-storage supports count as a beam support.
- When there is low storage back-to-back supporting perpendicular stanchion mounted storage, the low storage should be ganged together to ensure consistent alignment.
- The beam must meet the application guidelines for freestanding beam application if the application has no stanchion mounted centered storage.
- The beam must meet the application guidelines for stanchion mounted centered storage if the beam application also contains stanchion mounted centered storage.

Stability Guidelines, continued

Guidelines for Double-Sided Perpendicular Stanchion Mounted Storage with Mid-Storage Support

- Supporting low-storage must be connected to a beam with a storage-to-beam connector bracket.
- Double-sided perpendicular stanchion mounted storage with mid-storage supports count as a beam support.
- When there is low storage back-to-back supporting perpendicular stanchion mounted storage, the low storage should be ganged together to ensure consistent alignment.
- The beam must meet the application guidelines for freestanding beam application if the application has no stanchion mounted centered storage.
- The beam must meet the application guidelines for stanchion mounted centered storage if the beam application also contains stanchion mounted centered storage.

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.

Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. A light load application is less than 40 pounds placed on a worksurface. Reinforcing channel must be specified separately.

► See *Storage Specification Guide*.

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.

Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" ($72" - 6" = 66"$). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left- Hand Support	FrameOne Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg-Table Application	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	Intermediate Support	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	DBL Post Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	Cantilever	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	All other Legs/Supports	-6"	-6"	-9"	-9"	-6"	-6"	-6"

Reinforcing Channel Sizes		
Style Number	Nominal	Actual
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Tip: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Reinforcing Channel Size for Straight 120° Worksurfaces

To calculate the reinforcing channel size for a straight 120° worksurface, use the user edge length, subtract 6" and order the next shortest channel. Also, reference the chart below.

Back Edge Width	Worksurface Depth	User Edge Depth	Reinforcing Channel Size
48"	23½"	61½"	54"
48"	29½"	65½"	57"
60"	23½"	73½"	66"
60"	29½"	77½"	66"
72"	23½"	85½"	72"
72"	29½"	89½"	72"

Universal Systems Worksurfaces

Systems worksurfaces— with 1/2" cord drop feature built-in cable management flexibility, allowing cords to drop below the worksurface at any point along the back edge.
► Specifying page 288

Systems worksurfaces— Full Depth feature a tighter fit to beams for a cleaner aesthetic or to stay on module when using perpendicular to beams.

Systems straight worksurfaces with 1/2" cord drop and full depth are available in a variety of widths and depths in modular and parametric dimensions.

Cable scallops allow cords and plugs to pass behind the worksurface. Cable scallops can be omitted as an option.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 13/16" thick.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes.

3 mm edge profile

Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight and straight 120° systems worksurfaces.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Straight worksurfaces are available to specify parametrically. The parametric dimensions available are from 18" to 36" deep and from 18" to 120" wide in 1/16" increments both depth and width.

Edge Profiles

Straight

Straight, 120°

Tapered

Taper-Flat

Single-Tapered

Corner, 120°

Edge profile is applied to front (user's) edge only.

*Tip: Straight worksurface width is available parametric from 18"W–120"W in 1/16" increments. Straight worksurface depth can be specified parametric from 18"D–36"D in 1/16" increments.

Parametric straight worksurfaces are available in laminate with a 3 mm plastic edge, P-edge, knife edge, or soft edge options and wood veneer with square edge or soft edge options.

Parametric straight worksurfaces have the option to specify a scallop, grommet cutouts, power and data access door and tray cutout, or power access door.

30\"D straight, tapered, taper-flat and single-tapered cantilevered worksurfaces require additional floor support along the front edge, such as post leg.

Connections

Worksurfaces can be used freestanding or in beam-supported installations.

Supports are ordered separately and installed in the field.

For beam-supported applications you can use:

- Closed loop beam support
- Open loop beam support
- Half loop beam support
- Intermediate beam support
- Tether bracket
- Beam cantilever with tie plate
- Support plate
- Columns or legs

► Pages 316–322

Intermediate beam supports replace the need for other types of worksurface support when used with 1-High or 1.5-High Currency Enhanced storage.

Tip: Intermediate beam supports are optimized to ensure alignment with Answer beam when supporting worksurfaces with Currency Enhanced storage.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPT reinforcing channel is used. Reinforcing channel must be specified separately.

► Page 317

Knife edge worksurfaces require reinforcement channels for spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Heavy load worksurfaces spanning greater than 60", or all worksurface spans wider than 72" require additional support of a cantilever, pedestal, intermediate support, or leg.

Wiring & Cabling

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers are included with wood veneer worksurfaces. Wire managers for use with laminate worksurface must be ordered separately.

Cable scallop can be omitted for freestanding applications or beam-supported applications where plugs do not need to pass over the back edge of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

► Page 241

Parametric straight worksurfaces have two grommet cutout options. The 2" round grommet cutout option fits the AWAG2 grommet which is specified separately.

► See page 314

The 3" round grommet cutout option fits the TSAEGROM grommet which is specified separately.

► See page 314

The grommet cutout option is not available on a worksurface when the power access door option is selected.

Grommet cutouts in parametric straight worksurfaces can be specified in the center, the left, or the right sides of the worksurface. Grommet cutouts are available in the below configurations.

FrameOne post legs will interfere with the left or right grommet cutouts on parametric Universal straight worksurfaces.

Grommet cutouts in parametric straight worksurfaces are located 3 5/16" from the back edge of the worksurface to the back edge of the grommet cutout. Left and right grommet cutouts are located 6 1/2" from the edge of the worksurface to the outside edge of the grommet cutout.

Grommet Location on Worksurface	Minimum Worksurface Widths
Center, Right, or Left	All widths
Right and Left	At least 25"W
Right and Center	At least 34"W
Left and Center	At least 34"W
Center, Right, and Left	At least 34"W

Universal Systems Worksurfaces, continued

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option) A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Wood Veneer Worksurfaces

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match worksurface

Front (user's) edge(s)

- Wood edge band

Application Topics

Full-depth worksurfaces provide an uninterrupted working surface and are designed to allow traditional corner or L-configuration planning without creating uneven gaps.

Straight 120° worksurfaces with 1/2" cord drop maintain the 1/2" cord drop on the diagonal edge and the back edge.

Screens mount to worksurfaces in privacy position or below the worksurface for modesty.

▶ Page 274

Worksurfaces used in beam-supported installations must follow applicable beam stability guidelines.

Do not use a Universal Systems Worksurface as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are slightly undersized for beam-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

▶ See *Storage Specification Guide*.

Knife edge worksurfaces have limitations for support options and application restrictions.

▶ See *Answer Specification Guide*.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5–50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray

Soft edge provides a comfortable user experience reducing strain on wrists and forearms.

► Specifying page 296

Power and data access door and tray provides desk top access and management of cords.

► Specifying page 312

Soft edge and power and data access door and tray cutout are available in modular and parametric straight worksurfaces, both 1/2" cord drop and full depth.

Cutout is optional; power and data access door and tray is ordered separately. 24"W cutout is centered near the back of the worksurface.

Edge is soft to the touch and flexes to conform to the arm.

Power and data access door and tray is available with cord or with modular or hardwire connection.

Soft edge is 36" wide centered on the worksurface; balance of front edge is 3 mm radius. Back and side edges are flat.

Soft edge and power and data access door and tray are available on straight and taper Universal Systems Worksurfaces with 1/2" cord drop and full depth.

Tray includes six simplex receptacles and cutout for data access.

Soft Edge, Power and Data Access Door and Tray Worksurface Availability

● Only soft edge, only power & data access door & tray, or both

*Tip: Subtract 1/2" for worksurfaces with cord drop.

Dimensions

	Soft edge	Cutout for Door	Tray (below worksurface)
Width	36"	24"	27 ¹ / ₈ "
Depth	3"	4 ⁵ / ₈ "	6"
Thickness	1/2" at front	N.A.	N.A.
Height	N.A.	N.A.	4 ³ / ₄ "

Product Details

Soft edge profile is polyurethane and is available with Bactiblock™ antimicrobial protection.

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

3 mm front edge is specifiable. Back and side edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for work surface.

Scallops are omitted on work surface when cutout for power and data access door and tray option is selected.

Power and data access door and tray cutouts are 3 $\frac{5}{16}$ " from the back edge of the work surface and always centered on the width of the work surface.

Power and data access door and tray cutouts are available on work surfaces 24"D through 36"D.

Inner tray provides under the surface power and data connections and access and cord management.

Outer tray provides cover and management for harness, cord, and/or data cables to and from the beam.

Power and data access door and tray flips toward the user.

Modular, cord and plug, or hardwire options are available.

Cord version includes 10' cord with plug. Modular and hardwire versions each include 8' of harness.

Three wiring schematics are available in the modular version – 3+1, 2+2, and 3 separate neutrals (3SN). Each has a single circuit. 3+1 and 2+2 have the option for line 1, 2, 3, or 4 with either a system or isolated ground. 3SN has the option for line 1, 2, or 3 with either a system or isolated ground.

Data cutout in tray can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate.

Beam receptacle fillers and data fillers are available to fill unused data cutouts. Order separately in packages of 20.

With the modular and hardwire version, the harness enters the beam through a field cut opening in a fabric skin. A grommet is included to provide a finished edge to the field cut opening in the skin where the harness enters the beam. Inside the beam the harness can connect to a powerkit or it can use either a harness to harness connector or a branching harness to harness connector to connect to other modular harness trays or modular harnesses.

Cord and plug version has an integrated overload circuit breaker.

Non-PVC versions are available for each power solution.

Connections

Fixed storage can be used with worksurfaces with soft edge but must not encroach the 36" width of the edge.

Worksurfaces connected perpendicular should not encroach the 36" width of the soft edge.

Soft edge worksurfaces are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

▶ See page 114 for *Universal Systems Worksurfaces* understanding.

Exception: 48"W work surface with soft edge used with the FrameOne post leg has some limitations.

In an end-of-run condition, the FrameOne post leg will not fit when used with 48"W soft edge worksurfaces, use half, open, or closed loop legs.

In shared applications, the FrameOne post leg can be angled and positioned at the front edge or for a square orientation it must be inset 1" from the front edge when used with 48"W soft edge worksurfaces.

Access holes in tray allow power and data to be routed straight back when work surface is against the beam or routed to the sides when the work surface is perpendicular to the beam.

Worksurfaces with power and data access door and tray are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

▶ See page 114 for *Universal Systems Worksurfaces* understanding.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray, continued

Tray with cord and plug can be used in a freestanding table application.

Worksurfaces with power and data access door and tray with modular or hardwire power cannot be used in a freestanding application. The worksurface must either be attached to a panel or beam on one end or if the worksurface is attached to low storage with an intermediate support on one end, the cabinet must be attached to the beam or ganged to another storage cabinet. This applies to both parallel or perpendicular to the panel or beam applications.

Height of tray is 4³/₄" so lower storage height must be accounted for when used adjacent to tray.

Width of outer tray below the worksurface is 27¹/₈" so adjacent lower storage dimensions must be accounted for on each worksurface width.

Tray with cord and plug includes two cord clips to help manage the cord below the worksurface.

Tray with modular harness or hardwire harness includes two harness clips to help manage the harness below the worksurface.

Soft edge worksurfaces and power and data access door and tray worksurfaces require reinforcement channel or other support on worksurfaces 60"W or beam.

Worksurfaces greater than 72"W require additional support such as cantilevers, pedestals, or legs beyond the brace.

Wiring & Cabling

Chicago, New York, and Los Angeles have special requirements.

Underwriter Laboratory (UL) listed. The power and data tray has been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Access Door and Tray

Universal Systems Worksurfaces with Power Access Door

Power access door option on worksur-

faces allows for convenient pass through access to beam outlets.

► Specifying page 312

Systems straight work-

surfaces with power access door are available in a variety of widths and depths in modular and parametric dimensions.

Power access door provides desk top access and management of cords.

Power access door is only available on worksurfaces with a 1/2" cord drop.

Actual Dimensions

Modular*	Parametric**	Centered	Left	Right	Left and Right	Left and Center	Right and Center	Left, Right, and Center

Dimensions

Cutout for Door

Width	16 ¹ / ₈ "
Depth	4 ¹ / ₄ "

*Tip: Modular 29¹/₂"D worksurface is only available up to 72"W.

**Tip: Worksurface width is available parametric from 18"W–120"W in 1/16" increments. Worksurface depth can be specified parametric from 18³/₈"D–36"D in 1/16" increments.

Product Details

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials Reference Manual* for specific PVC-free availability.

3 mm front edge is specifiable. Back and side-edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on all worksurfaces with a power access door.

Power access door provides access to power outlets in the beam.

Currency Enhanced storage with recessed back should be used when storage will be placed in front of a power outlet.

Recessed back storage features a 3³/₄" cavity to allow access to outlets below the worksurface.

Left and right configured power access doors will interfere with FrameOne post leg support and freestanding end panels (UE18, UE24, and UE30).

Universal Bench for Answer Beam

Universal bench for Answer beam provides efficient face-to-face configuration tethered to Answer beam.

► Specifying, page 310

Universal bench work-surface has a wood core with a High-Pressure Laminate or wood veneer surface and is $1\frac{3}{16}$ " thick.

Product Details

Universal bench for Answer beam is a package that includes a shared FrameOne style open loop leg, two work-surfaces, tether brackets, and an optional utility tray.

Front (user's) edge is available in a square (3 mm) edge profile only on laminate and wood veneer work-surfaces.

3 mm edge profile

For laminate work-surface on Universal bench for Answer beam, edge profile finishes are specified separately from laminate color.

For wood veneer work-surface on Universal bench for Answer beam, wood edge color matches finish specified for worksurface.

Actual Dimensions

Shared Open Loop Leg Depths	48" and 60"
Worksurface Depths	23 $\frac{1}{8}$ " and 29 $\frac{1}{8}$ "
Worksurface Widths	48", 54", 60", 66", and 72"

Application Topics

The worksurfaces for Universal bench for Answer beam are unique depths. Universal worksurfaces are not compatible with the Universal bench for Answer beam.

The Universal privacy screen can be added to the Universal bench. The brackets for the screen attach to either of the two worksurfaces of the Universal bench application.

The worksurfaces of the Universal bench support clamp on components like power strips and monitor arms.

Surface Materials

Universal Beam-Mounted Worksurface Supports

For Answer Beam Applications

Worksurface supports

can be used to beam-support worksurfaces in various configurations.

► Specifying, page 316

Beam cantilever can be used to beam-support a worksurface at 28½"H.

Worksurface-to-beam tether brackets feature alignment tab used to set a depth for Universal Systems Worksurfaces—with ½" cord drop. This tab is bent down or broken off when installing full-depth worksurfaces.

Product Details

Cantilevers engage in vertical slots on vertical junctions of Answer beam.
Tip: Cantilevers for use with beam have a unique attachment to accommodate the aluminum rail and should only be used with Answer beam.

Tether brackets attach into the beam rail and can support the back edge of a worksurface.
Tip: Tether brackets do not provide adequate structural support to stabilize the beam.
► See Application Guidelines for beam support requirements when using tether brackets.

Tether brackets are available individually or in pairs.

Tether bracket cannot be shared to support two worksurfaces.

For all perpendicular worksurfaces and parallel worksurfaces 72" or less, two worksurface-to-beam brackets are required.

Actual Dimensions

	Cantilever	Tether Brackets
Height	16"	1"
Depth	17⅜"	3"

For parallel worksurfaces greater than 72", three worksurface-to-beam brackets are required.

Cantilevers support worksurfaces at 28½". Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D cantilevered worksurfaces require additional floor support along the front edge.

26½/16"D-36"D parametric straight cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Pedestals and lateral files can be used to support the end of a worksurface.
► See *Storage Specification Guide*.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPPT reinforcing channel is used. Reinforcing channel must be specified separately.
► Specifying, page 317

Surface Materials

Reinforcing channel

- Black paint only

Cantilever

- Paint

Tether bracket

- 4799 Platinum Metallic paint only

Application Topics

Universal beam-mounted worksurface supports are designed so the worksurface is even with the top of the Answer beam top cap rail.

Universal beam-mounted worksurface supports support the worksurface at slightly lower height than the Universal panel-mounted worksurface supports or is supported by both beam and panel.

Universal beam-mounted worksurface supports should be used on Answer panels when a worksurface tethered to the Answer beam is adjacent.

Worksurfaces greater than 30"D can only be used in freestanding applications and cannot be beam mounted.

Worksurfaces used in beam-supported installations must follow applicable beam stability guidelines.

Beam FrameOne Legs and Supports for Universal Worksurfaces

Legs and supports

share a common visual with FrameOne bench and support Universal worksurfaces in freestanding, storage-supported, or beam-supported applications.

► Specifying pages 318–322

Spacers between top of legs and worksurface provide a floating look to the worksurface and match visual of FrameOne bench.

Beam intermediate support

is used with Currency Enhanced One-High or 1.5-High storage as a worksurface support allowing for nesting of low storage.

Post leg is square to provide a complementary visual to FrameOne legs. Post leg can be used as a column support.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Dimensions

	Beam closed, Open, and Half-Loop Legs	Post Leg	Beam Intermediate Supports	
			For One-High storage	For 1.5-High storage
Height*	28½"	28½"	28½"	28½"
Height	N.A.	N.A.	11¼"	5¼"
Depth	24" or 30"	N.A.	16"	16"
Width	N.A.	N.A.	23⅞"	23⅞"
Glide range	2¼"	1"	N.A.	N.A.

*Height dimensions include the thickness of the worksurface.

Product Details

Closed, open, and half-loop legs are handed when beam supporting and must be specified left or right when facing the front of the worksurface. Freestanding tethered and table versions are non-handed.

Beam FrameOne legs can be used with Answer beam. FrameOne legs for Answer panel cannot be used with Answer Beam.

Closed, open, and half-loop legs are available in beam supporting versions. They support the ends of worksurface; they are not shared supports between two worksurfaces.

Closed and open-loop legs are available in tethered versions in which one side of the worksurface is attached to a beam, or storage.

Closed and open-loop legs are available in table versions in which both sides of the worksurface are supported by the legs. Post legs can also be used to create freestanding tables.

Closed, open, and half-loop legs do not align properly with knife-edge worksurfaces. Instead use cantilevers.

► See page 114 for knife-edge worksurface application guidelines.

27"H mobile, freestanding, or fixed pedestals do not fit flush to the inside of the closed, open, or half-loop leg, there is a 3" gap due to the worksurface support plate. 25 1/2"H freestanding pedestals or 21"H mobile pedestals will fit flush.

27"H mobile, freestanding, or fixed pedestals do not fit flush to the inside of the post leg, there is a 5 3/4" gap due to the worksurface support plate. 25 1/2"H freestanding pedestals or 21"H mobile pedestals will fit flush.

Post leg can be shared between two worksurfaces.

Post leg in shared applications can be square or oriented angled to the front edge of the worksurface.

Beam intermediate supports replace the need for other types of worksurface support when used with One-High or 1.5-High Currency Enhanced storage.

Storage used with beam intermediate supports need to use laminate or wood square edge top.

Intermediate supports for use with Answer panel should not be used with Answer beam because the worksurface will not align to the top of the beam rail.

Intermediate support must be at least 1" from the front, back, or side edges of the storage unit to allow clearance for installation.

Worksurfaces 18"D to 24"D allow intermediate support to be positioned below the worksurface 1" from the front or back.

For worksurfaces 24 1/16"D to 30"D, intermediate supports must be placed a minimum of 1" from the front or back edge, and a maximum of 7" from the front or back edge.

Worksurface may extend up to 10" maximum overhang of intermediate support as long as the other end of the worksurface is anchored to the beam.

Intermediate support cannot support worksurfaces larger than 30"D.

FrameOne post legs will interfere with left and right oriented grommet cutouts in parametric straight Universal worksurfaces.

FrameOne post legs will interfere with left and right oriented power access doors on Universal worksurfaces.

Connections

Answer beam requires unique FrameOne legs when attaching to the beam. *Tip: FrameOne legs for beam support can only be used with Answer beam.*

For One-High and 1.5-High Currency Enhanced storage applications used with worksurfaces perpendicular to Answer beam, intermediate support is needed. ► Page 318

Surface Materials

Legs and intermediate support

- Paint

Spacer caps for beam attached legs

- Black plastic only

Glide cap for legs

- 6694 Slate only

Shipping

Closed, open, and half-loop legs are packed in boxes of six when ordered on the same line item.

Bracing for intermediate supports ship separately from intermediate supports and are field installed into storage cases.

Infills for FrameOne Legs for Universal Worksurfaces

Infills are available in laminate and veneer and are used with open and closed loop FrameOne legs.

► Specifying page 319

Infills provide added privacy.

Product Details

Infills can be used with both beam connected or freestanding versions of open and closed loop FrameOne legs for universal worksurfaces.

Connectors attach to the back side of the legs.

Surface Materials

Surfaces

- Laminate
- Veneer

Planning Dimension

Infills are available 24"W and 30"W.

Knife Edge Worksurface Application Guidelines

When planning an L-configuration, two UFB flat brackets should be used to support the worksurfaces. A cantilever is not wide enough to support the gap where the knife edge worksurface comes together.

Freestanding L-configuration should be avoided due to profile on the backside of the worksurface.

Compatible storage includes box/file mobile pedestals and 1-high storage.

Knife edge with 27"H lateral and 27"H pedestal

Knife edge worksurface over 27"H storage can make files difficult to access.

Knife edge worksurfaces require reinforcement channels for unsupported spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Currency Enhanced 27"H standard pedestals, brackets, and FrameOne legs for Universal do not align properly with knife edge worksurfaces. Instead, use cantilevers as shown.

Currency Enhanced Overheads and Organizers

Currency Enhanced overheads and organizers

provide storage above a work surface and can be used in a variety of applications. See matrix for options.

► Page 145

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

► Specifying, pages 324–329

Sliding door overheads

have a non-locking sliding door. Door is available in Low-Pressure Laminate, High-Pressure Laminate, and optional markerboard surface.

Tip: Markerboard is slightly thicker than the standard laminate.

Hinged door overheads

have two, three, or four locking doors depending on width. Doors are available in Low-Pressure Laminate and High-Pressure Laminate.

Tip: Markerboard is slightly thicker than the standard laminate.

Open overheads have two equal-spaced openings.

Finished top, back, and sides are standard on overheads and organizers.

Personal overhead and organizer configurations provide access on one side of a unit. Cases have a fixed divider in the middle.

Lock is standard on overheads with hinged doors. Locks are specified with storage, but shipped separately. Locks are field installed.

Shared overheads and organizer configurations provide dual sided access.

Currency Enhanced overheads and organizers provide support and storage for users in beam-based settings. A number of configurations are available to support storage in parallel and perpendicular orientation to the beam, in both shared and personal storage configurations.

Overheads mounted perpendicular to the beam and low storage provide personal storage and privacy between users.

Overheads mounted parallel to the beam provide shared storage and privacy along the beam.

*Units are on module to match width of panel, Answer beam, or other 6" module product dimensions.

** Units are 3" wider than module to accommodate width of Answer beam.

*** Units are 1¹/₂" wider than module to partially overlap the Answer beam.

Currency Enhanced Overheads and Organizers, continued

Product Details

Organizers are available personal or shared. Personal provides storage on one side only. Shared storage is divided down the center, with half storage on one side and half storage on the opposite side. Personal storage has a center divider.

Currency Enhanced overheads are designed differently than Currency overheads. Please note Currency Enhanced overheads do not have a light-concealing valence.

Wall mount overheads have a 1" gap between the back panel and end panel.

Locks are standard on overheads with hinged doors. Lock cylinders must be specified separately, and are field installed.

Field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately.

► Lock and Keying, page 468

Application Topics

Bracket options

► Page 145

Stability Guidelines

► Page 97

Standard width overheads and organizers are on-module to align with Answer beam widths and should be used in parallel application with the beam.

Overheads and organizers for perpendicular application are intended for use only with Answer Beam. They are wider than module width to accommodate the width of the beam and remain on-module with storage below.

In all Answer Beam applications where overhead or organizer are being mounted on Answer Beam, select the appropriate bracket option. Mid-storage support and stanchion kits for mounting with Answer Beam must be ordered separately.

► Pages 379–380

Units for single-sided perpendicular application are dimensioned 3" wider than module width to fully overlap the beam and align with on-module storage on the other end.

Tip: Units for single-sided perpendicular application should only be used with Answer Beam.

Units for dual-sided perpendicular application are dimensioned 1 1/2" wider than module width to partially overlap the beam.

Tip: Units for dual-sided perpendicular application should only be used with Answer Beam.

Units for parallel application are on-module width and can be used anywhere along a beam.

Low storage or credenzas used to support one end of overheads or organizers must be connected to Answer Beam using storage-to-beam connector.

► See page 370

Storage-to-beam connector can not be used with Answer panels.

When overheads are placed side-by-side in parallel application to Answer beam, it is recommended that the units be ganged. **TSBAWAK** is the style number for the ganging bracket to use for low and mid-storage in beam applications.

► Page 382

Shared storage in parallel application should always be centered over the beam.

Personal storage in parallel application can be used back-to-back.

Tip: Use centered stanchions and mid-storage supports to support the front edge of the overhead unit.

Overheads and organizers in parallel applications must not extend past end of beam.

Tip: Beam-mounted storage is not allowed in freestanding beam configurations.

Connections

When ganging storage units together for Answer Beam application, use ganging bracket **AWAK**. When ganging overheads and organizers for Answer Beam applications, use ganging bracket **TSBAWAK**. Use mid-storage supports or stanchion supports when mounting overheads and organizers for Answer Beam applications.

Currency Enhanced One-High, 1.5-High, and Two-High Lower Storage and Lateral Files

One-High, 1.5-High, and Two-High Currency Enhanced low storage and lateral files are floor standing and can support work surfaces at 15³/₈"H, 21³/₈"H, or 27⁵/₁₆"H
Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.
 ▶ Specifying, pages 332 and 335

Tops can be optioned on to low storage and laterals, and are either 1¹/₈" or 1³/₈" thick. If no top is selected, low storage and laterals accommodate attachment to a work surface or common top. Attachment hardware is included.

Drawer and door fronts are available in Low-Pressure Laminate and High-Pressure Laminate, and are full to the bottom of the case (no toe kick).

Finished back and sides are standard on low storage and lateral files. Recessed back option on 18⁷/₈" depth units have an unfinished back.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Shelf thickness is 1".

Pull on low storage with doors and laterals is available in a variety of shapes.

One-High, 1.5-High, and Two-High Currency Enhanced storage provides support to Answer beam settings. A variety of configurations are available to support application needs. Units with recessed backs, to allow access to beam power outlets, come without top.

Lock is standard on low storage with doors and lateral files. Lock is located in the top left corner of the right handed door of low storage with doors. Lock is located in the bottom drawer of lateral files, and locks the drawer it is located in and the one above. Locks are specified with storage, but shipped separately. Locks are field installed.

Recessed back option on 18⁷/₈" depth units provides access to power and data outlets in panel, beam, or wall.

Leveling glides adjust to install low storage and laterals on uneven floors and have a 1¹/₄" adjustable glide range.

Actual Dimensions			
	One-High File	1.5-High Box/File and Open/File	Two-High File/File
Depth	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ ", 22 ³ / ₄ ", and 24"
Width	30" and 36"	30" and 36"	30" and 36"
Height	15 ³ / ₈ "	21 ³ / ₈ "	27 ⁵ / ₁₆ "
	One-High Open File	1.5-High Open File	Two-High Open File

Width	30", 36", and 42"	30", 36", and 42"	30", 36", and 42"
Height	15 ³ / ₈ "	21 ³ / ₈ "	27 ⁵ / ₁₆ "

*The top (if specified) matches the depth of units with drawers and doors.

Tip: All heights are without top. Add either 1¹/₈" or 1³/₈" (depending on selection) to achieve overall height with top.

Product Details

Drawers are a black, bore and dowel construction.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

36"W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

30"W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

Pulls on low storage with doors and lateral files are available in the following styles: ledge, handle, contemporary, jazz, transitional, Nile, bar, and inset.

Pilot-hole to pilot-hole dimensions are as follows:

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (pending storage type)
- Bar: 128 mm
- Inset: N.A.

Lateral files receive the 320 mm Nile pull. All other storage units receive the 160 mm Nile pull.

Locks are available field-installed. Low storage with doors and lateral files are shipped installed with plugs, with the locks separate.

Optional field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately. When cylinders are ordered, the factory will omit lock cylinders from all Currency Enhanced storage products. ▶ Lock and Keying, page 468

Counterweight packages are required to ensure product stability and are ordered as an option, or separately through service parts.

Counterweights are available as a service part package for use when furniture is reconfigured into application which require the use of counterweights.

Counterweight type and quantity varies depending on size and storage configuration. Units with counterweights will ship with either standard or steel counterweights. Steel counterweight pricing will equal the price of two standard counterweights.

One adjustable shelf is included in 1.5-High and Two-High open and hinged door configurations.

42"W open configurations have a center support.

Recessed back storage includes laminate front and sides. The back of the storage is inset 3³/₄" to allow access to Answer beam power receptacles. Recessed back storage does not include a top.

Square edge tops with 1/2" cord drop are ordered separately through Universal Systems Worksurfaces. Specify option hinged door for power and data outlet access. ▶ See Answer Freestanding Specification Guide.

When One-High or 1.5-High storage is used in conjunction with intermediate supports or stanchions, specify no top open and order square edge tops with 1/2" cord drop or common top separately.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Side-by-side units with individual tops will result in a nominal 3/32" gap.

Wiring and Cabling

Recessed back units cannot be used to conceal base power infeed. ▶ Page 236

Currency Enhanced One-High, 1.5-High, and Two-High Lower Storage and Lateral Files, continued

Application Topics

One-High, 1.5 High, and Two-High laminate enhanced lateral files provide storage and support to beam-based settings. A variety of configurations are available to support application needs.

Square edge tops with 1/2" cord drop features an optional power access door and 1/2" cord drop for access to power in Answer beam.

Square edge tops with 1/2" cord drop should be used with storage with recessed back.

Whenever a low storage unit is to be used to support overheads or organizers that are supported at one end with Answer beam, tops must be removed and square edge tops must be specified separately. Note that the power access door tops always have a 1/2" cord drop at back.

Low storage that is used to support one end of overheads or organizers must be connected to Answer beam using a storage-to-beam connector.

► Pages 328–330

For single-sided applications that have stanchion mounted storage running parallel to beam, the supporting low storage connected to beam must be specified with counterweights. For double-sided application that have stanchion mounted storage the supporting low storage must be connected to a beam with a storage-to-beam connector bracket.

► Page 378

Answer storage-to-beam connector cannot be used with Answer panels.

Recessed-back storage features a 3 3/4"D cavity to allow access to outlets below the storage top.

Currency Enhanced low storage cannot be placed over Answer beam support foot.

Currency Enhanced storage with recessed back should be used when storage will be placed in front of a power outlet.

Use mid storage supports attached to 1.5-High and Two-High laminate storage to support the opposite end of stanchion mounted storage on an Answer beam.

► Page 380

Intermediate supports are used with Currency Enhanced One-High or 1.5-High storage as a work-surface support, allowing for nesting of low storage. Use square edge tops with 1/2" cord drop when used in beam applications.

Storage to beam connector attaches to One-High, 1.5-High, and Two-High storage to Answer beam to support a beam segment. Connector must attach to a finished back. One-High, 1.5-High, and Two-High storage can not be placed over Answer beam foot.

Storage-to-beam connector can not be used with Answer panels.

Surface Materials

Currency Enhanced storage can be specified with different case, headset, and top laminate finishes. *Tip: Low-Pressure Laminate headsets cannot be specified with High-Pressure Laminate cases.*

Currency Enhanced Storage Filler Panels

Fillers can be used with 18⁷/₈"D Currency Enhanced One-High, 1.5-High, and Two-High lower storage in conditions where 24"D worksurface is desired. The filler will fill the gap between storage and panel.

► Specifying page 339

Fillers attach to lower storage units and to the work-surface above. Fillers cannot be used with the storage-to-beam connector to provide support to beam.

Fillers are laminate with matching edge banding. They are available in three heights to match the height of Currency Enhanced One-High, 1.5-High, and Two-High storage without tops.

Fillers should never be used to enclose location of a base power feed.

Actual Dimensions

	One-High	1.5-High	Two-High
Depth	1"	1"	1"
Width	5 ¹ / ₈ "	5 ¹ / ₈ "	5 ¹ / ₈ "
Height	15 ³ / ₈ "	21 ³ / ₈ "	27 ⁵ / ₁₆ "

Currency Enhanced One-High and 1.5-High Open Storage for Ology, Migration SE, and Slim Leg HAD Applications

Currency Enhanced One-High and 1.5-High open storage

are available with options to accommodate Ology, Migration SE, and Slim Leg HAD leg integration. They provide a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with the open storage configuration.

► Specifying, page 340

Wire manager keeps wires tidy and functionally flexes vertically.

Grommet provides a clean area where the desk leg integrates.

Units come without tops. Currency Enhanced tops for Ology, Migration SE, and Slim Leg HAD application are ordered separately.
► See page 368

Usable depth in One-High and 1.5-High open storage is 10²/₅"D for Ology application and 9⁵/₁₀"D for Migration SE and Slim Leg HAD applications.

Shelf thickness is 1".

Leveling glides adjust to install on uneven floors and have a 1¹/₄" adjustable glide range.

Actual Dimensions

	One-High	1.5-High
Depth	18 ⁷ / ₈ "	18 ⁷ / ₈ "
Usable Depth for Ology application	10 ² / ₅ "	10 ² / ₅ "
Usable Depth for Migration SE application	9 ³ / ₁₀ "	9 ³ / ₁₀ "
Width	30", 36", 42", 48", 60", and 72"	30", 36", 42", 48", 60", and 72"
Height	15 ³ / ₈ "	21 ³ / ₈ "

CAUTION

1.5-High HAD integrated storage can only be used with basic height Ology and Migration SE.

Product Details

One-High open storage can be used with Ology extended range desks, Ology basic range desks, Migration SE extended range desks, Migration SE basic range desks, and Slim Leg HAD.

1.5-High open storage can be used with Ology basic range desks, Migration SE basic range desks, and Slim Leg HAD.

One-High and 1.5-High open storage has a merle painted steel, removable interior back panel to allow access to the base.

One-High and 1.5-High open storage cannot be interchanged. Use Ology open storage with Ology desk, Migration SE open storage with Migration SE desk, and Slim Leg HAD open storage with Slim Leg HAD.

Finished back

Ology, Migration SE, and Slim Leg HAD open units offer an option of open back or a finished back for use in applications where the back of the unit is exposed, such as an aisle-way.

Integrated storage options that apply to One-High and 1.5-High units are only meant for use with the specified height-adjustable desk. For example, open storage specified for Migration SE cannot later be blended with Ology.

Integrated open laterals do not accommodate 24"D, 30"D, or 36"D Migration SE worksurfaces. See actual dimensions chart on next page.

Application Topics

Base units are non-handed. Handedness is identified in the specification of the tops, which are ordered separately.

Application is determined by which leg of the desk is located inside the storage.

Location of the Ology, Migration SE, and Slim Leg HAD port in tops is determined by the application orientation. If right leg is integrated into storage, it is a right application. Ology or Migration SE desks cannot be placed in the middle of the Currency Enhanced common top.

Currency Enhanced tops for Ology, Migration SE, and Slim Leg HAD application feature a cutout for legs and are used on individual storage units.

Currency Enhanced common tops for Ology, Migration SE, and Slim Leg HAD application can be used with two units side-by-side when one storage unit is required for leg integration.

Currency Enhanced common tops for Ology, Migration SE, and Slim Leg HAD open units application are available when ganging height adjustable desk integrated storage units to other Currency Enhanced lower storage units of the same height and depth.

Universal or Sarto privacy/modesty screens must be under-sized and justified to the outside when used with a storage unit.

To help avoid pinch points, the Currency Enhanced One-High and 1.5-High lower storage for height-adjustable desk application extends 1" past the back of the height-adjustable desk worksurface.

Currency Enhanced One-High and 1.5-High Open Storage for Ology, Migration SE, and Slim Leg HAD Applications

Currency Enhanced Pedestals

Fixed and Mobile

Fixed pedestals are floor standing and can support work surfaces at 21¹¹/₃₂"H or 27¹¹/₃₂"H.

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

► Specifying, page 342

Top is open on fixed pedestals and accommodates attachment to a work surface. Attachment hardware is included.

Drawer fronts are available in Low-Pressure Laminate and High-Pressure Laminate, and are full to the bottom of the case (no toe kick).

Finished back and sides are standard on pedestals.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Mobile pedestals can be moved wherever storage is needed. They provide an auxiliary work surface when you need more space to spread out your work.

► Specifying, page 344

Tip: Two-High mobile pedestals do not fit under desks with reinforcement channels.

Top on mobile pedestal is 1¹/₈" thick and is available in Low-Pressure Laminate and High-Pressure Laminate.

Pulls on pedestals are available in a variety of shapes.

Lock is standard on pedestals. Lock is located in the bottom drawer, and locks the drawer it is located in and the one above. Locks are specified with storage, but shipped separately. Locks are field installed.

Leveling glides adjust to install pedestals on uneven floors and have a 1¹/₂" adjustable glide range.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Cushion top is ordered separately and requires field installation.

► Specifying, page 344

Tip: Two-High mobile pedestals with a cushion top will not fit under a desk.

Four casters are hard composition and non-locking, with a full-rotation swivel.

Product Details

Fixed pedestals cannot be placed over an Answer panel and beam foot.

Drawers are a black, bore and dowel construction.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

All pedestal file drawers accommodate front-to-back and side-to-side letter filing.

24"D, 29¹/₁₆"D, and 30"D pedestal file drawers also accommodate front-to-back and side-to-side legal filing.

► See page 171

Pencil tray to hold small office supplies is standard with pedestals with box drawers.

21³/₈"H fixed pedestal can be used in combination with other 1.5-High lower storage to create a variety of storage options.

27⁵/₁₆"H fixed pedestal can be used in combination with other Two-High lower storage to create a variety of storage options.

Actual Dimensions

1.5-High Fixed Pedestals (Box/File)		Two-High Fixed Pedestals (Open/Box/File, Box/Box/File, and File/File)	
Depth	18 ⁷ / ₈ " and 24"		18 ⁷ / ₈ ", 22 ¹³ / ₁₆ ", 24", 29 ¹ / ₁₆ ", and 30"
Width	15 ³ / ₄ "		15 ³ / ₄ "
Height	21 ³ / ₈ "		27 ⁵ / ₁₆ "
1.5-High Mobile Pedestals (Box/File)		Two-High Mobile Pedestals (Open/Box/File, Box/Box/File, and File/File)	
Depth	18 ⁷ / ₈ " and 22"		22"
Width	15 ³ / ₄ "		15 ³ / ₄ "
Height	23 ² / ₃ "		27"

Pulls on pedestals are available in the following styles: ledge, handle, contemporary, jazz, transitional, nile, bar, and inset.

Pilot-hole to pilot-hole dimensions are as follows:

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (pending storage type)
- Bar: 128 mm
- Inset: N.A.

Lock cylinders are available field-installed. Pedestals are shipped installed with plugs, with lock cylinders separate.

Optional field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately. When cylinders are ordered, the factory will omit lock cylinders from all Currency Enhanced storage products. ▶ Lock and Keying, page 468

Mobile pedestal cushion top is field installed with screws. See assembly instructions for details.

Counterweight packages are required to ensure product stability and are ordered as an option, or separately through service parts.

Counterweights are not needed when under worksurface pedestals are installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are required when stacking storage (overheads and bookcases) is mounted to the worksurface, and less than the full width of the worksurface.

Counterweights are not required when stacking storage is mounted to the work-surfaces, and is full width of the worksurface.

Counterweights are available as a service part package for use when furniture is reconfigured into application which require the use of counterweights.

Connections

Fixed pedestals are intended to attach under a worksurface for security and support. Pedestals match the depth of Universal worksurfaces exactly, or can be paired with Currency Enhanced parametric common top.

Fixed pedestals are not to be used alone as a free-standing unit, and must be used with other furniture.

Pedestals using common tops must be attached to other storage, a perpendicular worksurface, or a panel. A maximum 6" overhang of the worksurface is allowed on either side, or back.

Surface Materials

Currency Enhanced storage can be specified with different case, headset, and top laminate finishes. *Tip: Low-Pressure Laminate headsets cannot be specified with High-Pressure Laminate cases.*

- ▶ Specifying, page 344

Application Topics

22 3/4"D and 29 1/16"D pedestals are for use with desk and return shells. Their depth allows them to slide under a desk or return shell to create an array of storage configurations.

The thickness between Low-Pressure Laminate and High-Pressure Laminate

differs slightly. These slight dimensional differences are accounted for within SmartTools, and are important when specifying a parametric common top. Use SmartTools to specify an exact fit.

Storage capacities and dimensions

▶ Page 171

Currency Enhanced Credenzas

Credenzas come in various depths, heights, and storage configurations.

► Specifying, Pages 347–355

Full storage credenzas

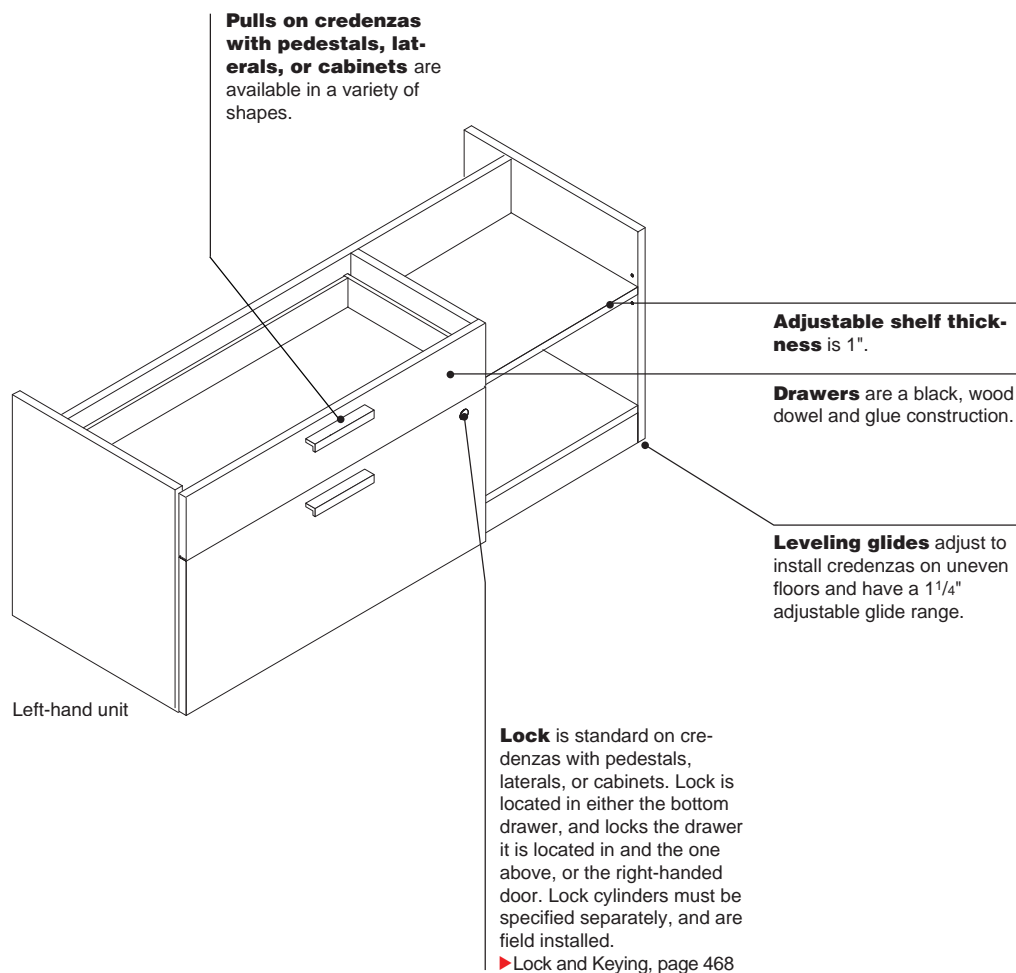

are available in 18⁷/₈"D and 24"D, and 1.5-High and Two-High heights.

Tops are available in either 1¹/₈" or 1³/₈" thicknesses.

Finished back is included on all full storage credenzas.

Recessed-back option

provides access to power and data outlets in panel, beam, or wall applications.

Actual Dimensions

Currency Enhanced Credenza Top Thickness

	Low-Pressure Laminate	High-Pressure Laminate
Worksurface/ Top Thickness— 1 ¹ / ₈ " core	1 ¹ / ₈ "	1 ³ / ₁₆ "
Worksurface/ Top Thickness— 1 ³ / ₈ " core	1 ³ / ₈ "	1 ⁷ / ₁₆ "

Tip: Top thickness differs based on the worksurface thickness and materiality specified.

Currency Enhanced credenzas provide storage and support to beam based settings. A variety of credenza configurations are available to accommodate a range of applications and needs.

Actual Dimensions

Full Storage Credenzas

	Open/Open	Open/ Lateral File	Lateral File/ Lateral File	Lateral File/ Cabinet	Cabinet/ Cabinet
Depth	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ " and 24"	18 ⁷ / ₈ " and 24"
Width	48", 60", 66", and 72"	42", 48", 60", 66", and 72"	60", 66", and 72"	60", 66", and 72"	60", 66", and 72"

Width	66" and 72"	66" and 72"
Height	28 ⁷ / ₁₆ "	28 ⁷ / ₁₆ "

Tip: Credenzas with kneespace are standard with a 1¹/₈"-thick top, included in the overall height.

Currency Enhanced Credenzas, continued

Product Details

Open/open credenzas are divided evenly with a single center support in all widths.

Open/lateral file credenzas in 42"W, 48"W, and 60"W include 30"W file drawers. 66"W and 72"W open/lateral file credenzas include 36"W file drawers.

Lateral file/lateral file credenzas in 60"W include 30"W file drawers. 66"W lateral file/lateral file credenzas include 36"W (left) and 30"W (right) file drawers. 72"W lateral file/lateral file credenzas include 36"W file drawers.

Lateral file/cabinet credenzas in 60"W include 30"W file drawers. 66"W and 72"W lateral file/cabinet credenzas include 36"W file drawers. *Tip: "Handedness" option of lateral file/open or lateral file/cabinet credenzas determines the location of the lateral file.*

Cabinet/cabinet credenzas are divided evenly with a single center support in 42"W and 48"W cases and double center support in 60"W, 66"W, and 72"W cases. All widths include four doors.

Ledge pull

Handle pull

Contemporary pull

Jazz pull

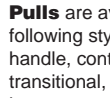

Transitional pull

Nile pull

Bar pull

Inset pull

Pulls are available in the following styles: ledge, handle, contemporary, jazz, transitional, Nile, bar, and inset.

Pilot-hole to pilot-hole dimensions are as follows:

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (pending storage type)
- Bar: 128 mm
- Inset: N.A.

Lateral files receive the 320 mm Nile pull. All other storage units receive the 160 mm Nile pull.

File drawer body is standard with integrated U-channel to accommodate hanging folder files.

Beam intermediate supports can be used with credenzas. Units should be ordered without top and order a Universal proud top separately.

► Page 318

Tip: Use intermediate support for Answer beam when supporting worksurfaces with credenzas in beam-based setting.

Modesty panels and back panels have horizontal grain direction.

End panels have vertical grain direction.

Recessed-back credenzas inset the back of the storage by 3/4" to allow access to Answer beam power receptacles. Storage does not include a top.

Currency Enhanced credenza with recessed back should be used when storage will be placed in front of a power outlet.

Square edge laminate top with 1/2" cord drop must be specified with door location that aligns with outlet location on Answer Beam.

Square edge laminate tops feature option power access door and can be used as individual storage tops or common tops.

► Page 378

Cushion top is available on 21³/₈"H credenzas. Cushion top is ordered separately and requires field installation.

► Page 381

Tip: If used with an open unit, the cushion will overhang the front by ³/₄".

Locks are standard on credenzas. Lock cylinders must be specified separately, and are field installed.

► Lock and Keying, page 468

Field installed locks are available with consecutive, specific, and random keying options. **LOCK9201FR** or **LOCK9250FR** must be specified separately.

Counterweight packages are required to ensure product stability and are included in credenzas, or are available separately through service parts.

Counterweight type varies depending on size and storage configuration. Units with counterweights will ship with either standard or steel counterweights. Steel counterweight pricing will equal the price of two standard counterweights.

Storage capacities and dimensions

► See page 171

Application Topics

Recessed-back units cannot be used to conceal base power feed.

When using credenzas to support mid-storage supported overheads or organizers, select no top option.

Tip: Specify square edge top to ensure proper alignment with Answer beam.

► Page 376

Specify square edge tops with 1/2" cord drop separately to be used with recessed-back storage.

Square edge tops with 1/2" cord drop feature an optional power access door and 1/2" cord drop for access to power in Answer beam.

When using Currency Enhanced laminate credenzas to support one end of overheads or organizers with the other end supported by Answer beam, the top must be removed and 1¹/₈" thick square edge top should be specified to ensure upper storage is level. It requires separate specification of mid-support.

► See Page 380

Specify square edge top with 1/2" cord drop and power access door when using recessed-back storage.

► Page 376

Square edge tops with 1/2" cord drop must be specified with door location that align with outlet location on Answer beam.

► Page 376

Credenzas used to support one end of overheads or organizers must be connected to Answer Beam using storage-to-beam connector. Use single-sided stanchion kit to connect to Answer Beam and use mid-storage supports.

► Page 373

Storage-to-beam connector can not be used with Answer panels.

Mid-storage supports can be used with credenzas to support the opposite end of stanchion-mounted storage on an Answer beam. These supports can also be used on both ends of an overhead unit to support if freestanding.

Mid-storage supports can be used on both ends of an overhead unit to the credenza unit. Credenza must be 1.5-High and include a lateral file.

Surface Materials

Currency Enhanced credenzas can be specified with different case, headset, and top laminate finishes.

Tip: Low-Pressure Laminate headsets cannot be specified with High-Pressure Laminate cases.

Currency Enhanced Towers and Wardrobes

Towers and wardrobes

provide storage for a variety of work and personal items including: paper, binders, books, and coats.

► Specifying, pages 358–364

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

Towers are available in a variety of configurations combining coat storage, fixed and adjustable shelves, and box and file drawers.

Locker space is 8" wide and standard with a coat hook on the hinge side of the door.

Locks are standard on door and drawers. Lock cylinders must be specified separately, and are field installed.

► Lock and Keying, page 468

Finished back is standard.

Drawers open their full depth for total access to the contents.

Leveling glides adjust to install tower and wardrobe on uneven floors and have a 1¹/₄" adjustable range.

Product Details

Towers and wardrobes cannot be placed over an Answer panel and beam foot.

Towers and wardrobes are available in heights that align with Answer panels and other storage units.

Tower and wardrobe combines coat storage, box and file drawers, and adjustable shelves.

Door on wardrobe is full height and can be hinged on the left or right. Coat hook is always located on the same side as the door hinge.

Actual Dimensions

	Single Door with Drawers	Dual Door with Drawers	Side Access Tower with Drawers	Single Door Wardrobe
Depth	24"	18 ⁷ / ₈ " and 24"	24"	18 ⁷ / ₈ " and 24"
Width	15 ²⁹ / ₃₂ "	24"	24"	12"
Height	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", 54 ¹ / ₈ ", and 66 ¹ / ₂ "	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", 54 ¹ / ₈ ", and 66 ¹ / ₂ "	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", 54 ¹ / ₈ ", and 66 ¹ / ₂ "	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", and 54 ¹ / ₈ "

Box drawers are a black, bore and dowel construction.

File drawer body is standard with integral top rail to accommodate hanging file folders.

Pulls are available in the following styles: ledge, handle, contemporary, jazz, transitional, nile, bar, and inset.

Pilot-hole to pilot-hole dimensions are as follows:

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (pending storage type)
- Bar: 128 mm
- Inset: N.A.

Locks come standard on towers and wardrobes. Lock cylinders must be specified separately, and are field installed.

Field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately.

► Lock and Keying, page 468

Adjustable shelves on 47³¹/32"H, 54¹/8"H, and 66¹/2"H side access towers are recessed from the side of the tower.

CRTWSA, 41²⁵/32"H and 47³¹/32"H towers have one bottom fixed shelf.

- **54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

CRTW and CRTWD, Box/File configuration:

- **41²⁵/32"H towers** have one bottom fixed shelf.
- **47³¹/32"H and 54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

CRTW and CRTWD, File/File configuration:

- **41²⁵/32"H and 47³¹/32"H towers** have one bottom fixed shelf.
- **54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

Ganging hardware is available to provide alignment by joining adjacent storage components side-by-side, back-to-back, or both.

Wardrobes must be attached to another wardrobe, another storage unit, or a wall to ensure stability and prevent wardrobe from tipping over. See Assembly Directions for further instruction, available from your Steelcase dealer or call 1-888-783-3522.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Side access tower construction is as follows:

- Front panel over top panel
- Top panel over back panel

Surface Materials

Currency Enhanced storage can be specified with different case, headset, and top laminate finishes. *Tip: LPL headsets cannot be specified with HPL cases.*

Tower door fronts and front panels will not have matching grain direction with drawer fronts.

Tower drawer fronts

specified in High-Pressure Laminate will have High-Pressure Laminate on both the front and the back. All other High-Pressure Laminate drawer fronts have High-Pressure Laminate on the front, and backer material on the back.

Grain Direction

Tip: Tower door fronts will not have matching grain direction with drawer fronts.

Currency Enhanced Bookcases

Bookcases offer convenient storage for binders, books, and other objects.

► Specifying, page 366

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

Actual Dimensions	
Bookcase	
Depth	15"
Width	30" and 36"
Height	41 ²⁵ / ₃₂ ", 47 ³¹ / ₃₂ ", 54 ¹ / ₈ ", 66 ¹ / ₂ ", and 72 ¹¹ / ₁₆ "

Product Details

Bookcases cannot be placed over an Answer panel and beam foot.

Bookcases are available with adjustable shelves. Shelves can be repositioned without using tools.

The number of adjustable shelves per bookcase depends on case height:

- 41²⁵/₃₂"H – 2 adjustable shelves
- 47³¹/₃₂"H – 2 adjustable shelves
- 54¹/₈"H – 3 adjustable shelves
- 66¹/₂"H – 4 adjustable shelves
- 72¹¹/₁₆"H – 4 adjustable shelves

Standard-size binders will fit in bookcases with adjustable shelves.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both. Currency Enhanced bookcases 66¹/₂"H and larger must be placed against a wall, if not ganged back-to-back.

Surface Materials

Currency Enhanced Parametric Common Tops

Currency Enhanced parametric common tops are used to create storage applications with a seamless top, or as a table or desk with legs. These tops can flex by $\frac{1}{16}$ " increments to allow flexibility in planning.

► Specifying, pages 368–370

Currency Enhanced worksurfaces and tops use $1\frac{1}{8}$ " and $1\frac{3}{8}$ " core. The actual thickness of the work-surface will change depending on materiality selected.

Currency Enhanced worksurfaces and tops use $1\frac{1}{8}$ " and $1\frac{3}{8}$ " core. The actual thickness of the work-surface will change depending on materiality selected.

Product Details

Common tops are available in either Low-Pressure Laminate or High-Pressure Laminate.

Common tops have $1\frac{1}{8}$ " thick and $1\frac{3}{8}$ " core thickness. Please see actual dimensions table below for core thickness plus materiality thickness.

Common tops have 3 mm plastic edge banding on the front (user's) side. Sides and back have matching 1 mm edge.

The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) tops are slightly different. It is recommended that only tops of the same type are specified in a given application. There may be sheen or texture differences when using Low-Pressure Laminate and High-Pressure Laminate in adjacent applications. Use caution when mixing and matching different work-surface types.

Actual Dimensions

Currency Enhanced Common Top Parametric Ranges

	Low-Pressure Laminate	High-Pressure Laminate	Blending
Depth	17"–36"	17"–36"	N.A.
Width	15"–96"	15"–120"	N.A.
Worksurface/ Top Thickness – $1\frac{1}{8}$ " core	$1\frac{1}{8}$ "	$1\frac{3}{16}$ "	$1\frac{1}{8}$ " core with HPL ($1\frac{3}{16}$ ") is the same thickness as HPL Universal worksurfaces
Worksurface/ Top Thickness – $1\frac{3}{8}$ " core	$1\frac{3}{8}$ "	$1\frac{7}{16}$ "	$1\frac{3}{8}$ " core with HPL ($1\frac{7}{16}$ ") is the same thickness as HPL Elective Elements worksurfaces

Application Topics

When specifying a Currency Enhanced parametric common top over a run of storage, use SmartTools to determine the correct dimension to be specified.

Common top dimensions are calculated in SmartTools using six major factors:

- Product combination—dimensions of common top vary pending storage combinations in the application.
- Top offset—the width of the common top is not equal to plan width and is undersized for panel-applications.
- Case offset—width of the top changes between HPL and LPL.
- Case vs. top offset—difference between end panel face to top.
- Ganging offset—width of the common top reduces if units gang together.
- Parametric rounding—parametric common tops round to the nearest $\frac{1}{16}$ th of an inch.

Common top width examples:

- Two pedestals HPL: $31\frac{13}{16}$ "
- Two pedestals LPL: $31\frac{5}{8}$ "

Surface Materials**Top**

- Low-Pressure Laminate
- High-Pressure Laminate

Edge

- Plastic

Directional Laminate and Edge Profile Detail

The appearance of laminate

may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Understanding Storage Tops, Stanchions, and Connectors

Square Edge Tops	178
Answer Beam Stanchion Supports	180
Mid-Storage Supports	181
Storage-to-Beam Connector	182

Square Edge Tops

Square edge tops with 1/2" cord drop for use with Answer beam

allow multiple low storage units to be combined under one surface, while allowing access to power and room for cables along a beam.

► Specifying, page 376

Product Details

Proud front

Square edge tops for use with beam align with proud front Currency Enhanced storage units.

Edge profile is plastic on laminate top and is specified separately from laminate color.

Square edge tops with 1/2" cord drop can be used on the following:

- One-High Lateral Files
- 1.5-High Lateral Files
- Two-High Lateral Files
- Credenzas

Attachment hardware ships with the top.

Wiring and Cabling

Power access door is optional on square edge top for beam and allows access to power receptacles in the beam.

Tip: Specify Currency Enhanced storage with recessed backs for use in conjunction with power access door on square edge top.

Square edge top with 1/2" cord drop power access door is available in the following configurations.

Width of Square Edge Top	Power Access Door Location				
	Center	Left	Right	Left and Right	Left, Right, and Center
30"W	●				
36"W to 48"W	●	●	●		
54"W to 66"W	●	●	●	●	
72"W to 96"W	●	●	●	●	●

Application Topics

Square edge tops with 1/2" cord drop should be used to access power in applications where laminate storage is parallel to Answer beam.

Specify recessed back option on low storage when using square edge tops with 1/2" cord drop and optional power access door to access power in Answer beam.

Square edge top feature 1/2" cord drop along the back edge to allow cords to drop below the worksurface anywhere along the back edge.

Square edge top with 1/2" cord drop should be used with 1.5-High and 2-High Currency Enhanced laterals with recessed back option to provide access to the power at the 20"H location on the beam.

Square edge top with 1/2" cord drop are not needed with One-High Currency Enhanced laterals because the power access on the beam at 20"H is not blocked by the storage.

Surface Materials

Laminate

- Open Line laminate (option)

Width	30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"
Height	13 1/16"

Square Edge Tops

For use with Proud Front Products

► Specifying, page 378

Product Details

Proud front

Square edge tops can be specified.

Edge profile is plastic on laminate top and is specified separately from laminate color.

Connections

Not all top sizes are intended for use on all furniture. See *Specifying* pages to determine the appropriate sized top for your furniture.

Square edge tops with proud fronts can be used on the following:

- Lateral files
- Combination cabinets
- Storage cabinets
- Wardrobe cabinets

Attachment hardware ships with the top.

Contact Specials for common tops placed over group storage and placed back-to-back to ensure correct sizing for the application.

Surface Materials

Top

- Laminate
- Open Line laminate (option)
- Plastic side-edge

Proud-front tops

Depth	18 ⁷ / ₈ ", 24", 37 ¹³ / ₁₆ ", or 48 ¹ / ₁₆ "
Width	24", 30", 36", 42", 48 ¹ / ₁₆ ", 60 ¹ / ₁₆ ", 66 ¹ / ₁₆ ", 72 ¹ / ₁₆ ", 78 ¹ / ₁₆ ", 84 ¹ / ₁₆ ", 90 ¹ / ₈ ", 96 ¹ / ₈ ", or 108 ¹ / ₈ "
Height	1 ³ / ₁₆ "

Application Topics

Field-installed tops can also be used with pedestals to create credenzas, but the tops will overhang the pedestals by 1/2" at the back.

Square edge tops should be used in beam applications where storage is perpendicular to the spine or when a full depth top is desired.

Answer Beam Stanchion Supports

Stanchion supports

allow parallel and perpendicular attachment of laminate overhead storage or organizer to a beam.

► Specifying, page 379

Product Details

Answer beam stanchions come in a pair. Both stanchions are used in both parallel and perpendicular storage applications.

Single-sided stanchion supports allow attachment of overhead storage biased to one side of a beam.

Shared stanchion supports allow for attachment of a single overhead centered over a beam, or for two perpendicular overhead storage units.

Stanchion support cover conceals attachment hardware.

Application Topics

Currency Enhanced overheads supported by beam stanchions align with fabric screens and boundary screens at 48"H.

Currency Enhanced organizers supported by beam stanchions align with fabric screens and boundary screens at 42"H.

Connections

Attachment hardware is standard with stanchion supports to secure the support to the overhead storage unit and the beam.

Stanchion supports attach directly into beam rail and can be positioned anywhere along the beam.

Stanchion supports screw into underside of overhead storage.

Surface Materials

Paint

- 4799 Platinum Metallic

Actual Dimensions

Single Sided

Support Height 4 1/2"

Width 4"

Depth 3"

Height 48"H with Overhead

Height 42"H with Organizer

Double Sided/Shared

Support Height 4 1/2"

Width 10"

Depth 3"

Height 48"H with Overhead

Height 42"H with Organizer

Mid-Storage Supports

Mid-storage supports allow overheads and organizers to be mounted perpendicular to a beam segment.

► Specifying, page 380

Product Details

Mid-storage supports attach to 1.5-High and Two-High laminate storage or beam-tethered worksurfaces to support the opposite end of stanchion-mounted storage on an Answer beam.

Connections

Single overhead configuration require two mid-storage supports per end.

Overheads in back-to-back configuration cannot share a center mid-storage support. Two mid-storage supports must be used side by side.

Overhead storage supported by mid-storage supports can span two lower storage units.

Mid-storage support defaces the top of the lower laminate storage or worksurface it attaches to.

Attachment hardware is standard with mid-storage supports to secure the support to an overhead storage unit and a worksurface in the field.

Application Topics

Currency Enhanced overheads supported by mid-storage supports align with fabric screens and boundary screens at 48"H.

Currency Enhanced organizers supported by mid-storage supports are 42"H above finished floor.

When using mid-storage supports on low storage, omit the storage top and specify squared edge to achieve the correct alignment.

Surface Materials

Paint
• 4799 Platinum Metallic

Actual Dimensions

1.5-High Support

Support Height	10½"
Aligned Height with Organizer	42"
Aligned Height with Overhead	48"

Two-High Support

Support Height	4½"
Aligned Height with Organizer	42"
Aligned Height with Overhead	48"

Storage-to-Beam Connector

Storage-to-beam connector engages beam junctions to storage to provide stability and support to a beam segment.

► Specifying, page 373

Product Details

Low storage-to-beam connector attaches One-High Currency Enhanced storage to beams.

Medium storage-to-beam connectors attach 1.5-High and Two-High Currency Enhanced storage to a beam segment.

Storage-to-beam connector is available in versions for use with fabric and steel skins or with laminate and wood skins.
Tip: Specify appropriate bracket for beam skin to ensure optimal stability.

Connections

Storage-to-beam connector engages into slots in beam junction.

Storage-to-beam connector attaches to laminate storage back with screws and defaces the back side of the storage unit.

Recessed back laminate storage requires unique storage-to-beam connector bracket.

High-Density Storage

High-density storage is a personal storage product that provides ample organizational space with the added benefit of extendable privacy. Two configurations are available, shelf and bag drop. Resident workers are supported with room for their piles, files, and supplies to support their work flow in the high-density storage with shelf versions. Mobile workers have temporary storage and ease of access for all their belongings in the high-density storage with bag drop versions.

► Specifying, page 384

Front is available in laminate or veneer.

Contrasting front is available as an option.

Coat closet, available as an option, is 7"W on 24"D units and 8"W on 30"D units and standard with two coat hooks.

Leveling glides adjust to install case on uneven floors and have a 1/2" adjustable range.

Shelf liners provide a soft landing pad for personal objects and are standard in the bag drop configuration.

Locks are standard on door. Locks are standard factory-installed, keyed random.
► Lock and Keying, page 469

Case is available in laminate or veneer.

Product Details

Two configurations are available on the 15"W version, the shelf configuration or the bag drop configuration. Only the shelf configuration is available on the 12"W version.

Coat closet is available as an option.

Left-hand configuration

Right-hand configuration

Left-hand and right-hand configurations are available.

Mirrors are standard in all cases.

Light is available as an option on the bag drop configuration only.

Actual Dimensions

Depth 24" and 30"

Width 12" and 15"

Height 42" and 48"

Nile pull

Bar pull

Contemporary pull

Jazz pull

Pull on high-density storage defaults with a Nile pull. Bar, contemporary, and jazz pull are available as an option.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Contrasting fronts and horizontal grain direction are available options for laminate front/laminate case, veneer front/laminate case, or laminate front/veneer case.

Application Topics

Magnetic boards, available as an option, are fabric-wrapped steel providing a place for visual display. The size of the magnetic board is determined by high-density case height and depth. Magnetic boards are field installed.

Worksurface support bracket can be used to mount a worksurface off one side of the high-density storage eliminating the need for other worksurface supports such as legs or end supports next to the case.

Worksurface support bracket can be used to support one side of a worksurface only.

Verb Whiteboard and Brackets

For Answer Beam Applications

Verb brackets allow a Verb personal whiteboard to be displayed and stored off of a boundary screen or worksurface.

► Specifying, page 391

Verb brackets for boundary screens clip to the top edge of a boundary screen.

Verb personal whiteboards are a two-sided whiteboard that easily remove from the brackets for use at personal workstations.

► Specifying, page 390

Verb brackets for boundary screens are available in double-sided and single-sided configurations.

Verb brackets for Universal worksurfaces stores the Verb personal whiteboard at the edge of a Universal worksurface.

Verb marker clip attaches to the Verb personal whiteboard and holds dry erase markers to the edge of the personal whiteboard.

Product Details

For more information on the Verb personal whiteboard, see *Steelcase Learning Specification Guide*.

Verb brackets for boundary screens can clip to the top edge of Answer beam end-of-run boundary screens, Answer beam on-module in-line screens, Answer beam centered in-line boundary screens and Answer panel boundary screens.

Verb brackets for Universal worksurfaces attach to Universal worksurfaces.

Application Topics

Verb brackets for boundary screens are not permanently attached to the boundary screen and can be repositioned along the boundary screen.

Verb brackets for Universal worksurfaces are screwed into the undersurface of the worksurface.

Maintenance

- Wipe board with a clean cloth moistened by a liquid markerboard cleaner or a solution of 50% water and 50% isopropyl alcohol. Rinse with clear water.
- Wipe dry with a clean cloth. If your board is used daily, the cleaning should be performed at least 2-3 times a week.

More thorough cleaning may be required if writing is left on the board for more than two days.

Markers

Use any high-quality dry erase marker.

CAUTION! The use of Low Odor markers may cause ghosting to occur. If Low Odor markers have been used, the surface can be completely cleaned by following the cleaning instructions above. Remember to discard eraser if used with Low Odor markers.

Removing Permanent Marker

Option 1:

- Write over the top of the permanent marker ink with a dry-erase marker
- Simply erase

Option 2:

- Moisten a clean, dry cloth with isopropyl alcohol
- Wipe the board in a circular motion to loosen marker residue
- Rinse with clear water
- Dry the board with a clean cloth
- Repeat these steps as necessary

Installer's Instructions for Initial Cleaning at Time of Installation

Tip: These initial cleaning instructions are shipped with every board.

- For initial cleaning, wipe your board with a clean cloth moistened by a mild, alcohol-based cleaner.
- Rinse with clear water. This step is simple, but very important.
- Wipe dry with a clean cloth.

Steel Beam Skins To The Floor

Tip: Remember to omit base trim(s) on horizontal frame package when using a beam skin to the floor.

Tip: Data cutouts can be placed on the left or the right side of a steel beam skin. Data cutouts cannot be placed on both left and right side of steel beam skins.

Tip: Data cutouts is an option under receptacle location. Specify data cutout location under the appropriate receptacle selection. Data cutout price is additive to the receptacle cutout price.

Tip: On 24"W and 30"W steel skins, hardwire receptacle cutout option will always be with a centered hardwire cutout.

Tip: On 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and a right hardwire cutout.

Answer Beam End-of-Run Boundary Screens

Straight

Tip: Additional hardware upcharge is applied only when split style number is specified.

Tip: When specifying a beam end-of-run boundary screen, order an end-of-run junction with the omit trim option.

Tip: When specifying a split boundary screen, two screen widths will need to be specified.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and group 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Answer Beam End-of-Run Boundary Screens

L Return

Standard Includes		Required to Specify
► Need help? Product details, page 76	<ul style="list-style-type: none"> Primary and return screen: High-Pressure Laminate price group 1 or wood group 1 veneer Edge on laminate screen: plastic, if selected Height: 28½"H, 42"H, or 48"H Width: <ul style="list-style-type: none"> Single-sided: 27"W–75"W Split left and right: 25½"W–73½"W Connecting panel cover: paint price group 1 1½" adjustable glides Attachment hardware 	<ol style="list-style-type: none"> Style number Screen size type (see below under Required Selections) Screen height(s) Screen width(s) Handedness: on single-sided screens, if selected (see below under Required Selections) High-Pressure Laminate or wood veneer color for screen Plastic color number for edge on laminate screen, if selected Grain direction Paint color number for connecting panel cover Options, if selected (see below)
		► See <i>Surface Materials</i> , page 452.

	Required Component	U.S. Price
Additional Hardware	Single-connect single-sided L return	+\$ 58
	Single-connect split L return	+\$ 86

Tip: When specifying a beam end-of-run boundary screen, order an end-of-run junction with the omit trim option.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and group 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split L return boundary screen, four screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

	Required Selections	U.S. Price	Required to Specify

Universal Privacy/Modesty Screens

Tip: Universal privacy/modesty screens can be attached to 3/4"–1 1/2" thick worksurface, including height adjustable work-surfaces, universal work-surfaces, and Elective Elements work-surfaces.

Tip: The screens weigh between 9.79 lb and 11.89 lb. Take this into consideration when planning for use on height-adjustable work-surfaces.

Tip: The universal privacy/modesty screen is intended for use on the back of a worksurface.

Tip: Fabric is applied horizontally on the screen.

Tip: Screen allows for 1 1/8" cord drop or no cord drop. See understanding pages for product specific application guidelines.

Tip: Universal privacy/modesty screen is included here to simplify your planning. It may have different pricing terms than other products in this specification guide.

Standard Includes

Sarto Privacy/Modesty Screens

Tip: Sarto privacy/modesty screens can be attached to 3/4"–1 1/2" thick worksurface, including Ology, Migration, Elective Elements, universal tables, and universal panel-mount worksurfaces.

Tip: The screens weigh between 3.51 and 11.64 lb. Take this into consideration when planning for use on height-adjustable worksurfaces. See understanding pages to calculate screen weight.

Tip: Worksurface type option adds a fourth worksurface bracket and repositions brackets to avoid worksurface scallops.

Tip: Side screen option changes brackets to smaller L-brackets, mounting the screen mount flush to the side of the worksurface. Side screen option is only available on screens 36"W and narrower.

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable workspaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and beam-mounted applications must be specified separately.

Tip: Long work surface spans require additional support.

► See understanding section for details, page 113

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US1830 becomes US1830SW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 312

► See page 122 for work surface size availability matrix.

Tip: Scallop will be omitted if you select power access door.

Tip: Power access door option includes the power access door and a cutout for the door in the work surface.

Tip: Power access door option is only available on straight work surfaces with 1/2" cord drop.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Standard Includes

► Need help?
Product details,
page 114

- Work surface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate work surface:
 - Plastic 3 mm edge profile or knife profile on front edge
 - Plastic default flat profile on side and back edges
- Wood work surface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

Required to Specify

- 1 Style number with appropriate edge profile suffix
 - K** Laminate with knife edge
 - SW** Wood with square edge
 ► See edge profiles below.
 - 2 High-Pressure Laminate or wood color number for work surface
 - 3 Plastic color number for front edge on laminate work surface, if selected
 - 4 Options, if selected (see below)
- See *Surface Materials*, page 452.

	Options	U.S. Price	Required to Specify
Surface Materials	High-Pressure Laminate work surfaces		
	• Laminate price group 2	See information at left	Specify laminate color number.
	• Laminate price group 3	See information at left	Specify laminate color number.
	• Open Line laminate	+\$102 plus cost of laminate	► See <i>Surface Materials Reference Manual</i> .
	Wood veneer work surfaces		
	• Wood group 2	See information at left	Specify wood color number.
	• Wood group 3	See information at left	Specify wood color number.
	• Customiz stain	No cost	Specify with <i>Customiz stain</i> .
	• Full-fill finish on wood group 1	Prices at right	► See <i>Surface Materials Reference Manual</i> . Specify full-fill finish number.
	Door		
	• Paint price group 1	No cost	Specify paint color number.
	• Anodized aluminum	+\$ 13 per door	Specify with <i>8043 Clear Anodized Aluminum</i> .
Scallop	• Omit scallop	No cost	Specify <i>omit scallop</i> .
Cutout for Power and Data Access Door and Tray	• Cutout	No cost	Specify with <i>cutout for power and data access door</i> .
Power Access Door	Applies to 30"W		
	• No power access	No cost	Specify with <i>no power access</i> .
	• Power access door center	+\$136	Specify with <i>power access door center</i> .
	Applies to 36"W to 48"W		
	• No power access	No cost	Specify with <i>no power access</i> .
	• Power access door center	+\$136	Specify with <i>power access door center</i> .
	• Power access door left	+\$136	Specify with <i>power access door left</i> .
	• Power access door right	+\$136	Specify with <i>power access door right</i> .
	Applies to 54"W to 66"W		
	• No power access	No cost	Specify with <i>no power access</i> .
	• Power access door center	+\$136	Specify with <i>power access door center</i> .
	• Power access door left	+\$136	Specify with <i>power access door left</i> .
	• Power access door right	+\$136	Specify with <i>power access door right</i> .
	• Power access door left and right	+\$272	Specify with <i>power access door left and right</i> .

	• Power access door left and right	+\$272	Specify <i>with</i> power access door left and right.
	Applies to 72"W to 120"W		
	• No power access	No cost	Specify <i>with no</i> power access.
	• Power access door center	+\$136	Specify <i>with</i> power access door center.
	• Power access door left	+\$136	Specify <i>with</i> power access door left.
	• Power access door right	+\$136	Specify <i>with</i> power access door right.
	• Power access door left and right	+\$272	Specify <i>with</i> power access door left and right.
	• Power access door left and center	+\$272	Specify <i>with</i> power access door left and center.
	• Power access door right and center	+\$272	Specify <i>with</i> power access door right and center.
	• Power access door left, right, and center	+\$408	Specify <i>with</i> power access door left, right, and center.
Grommet Cutout	• No grommet cutout	No cost	Specify <i>with no</i> grommet cutout.
	• 2 inch grommet cutout	No cost	Specify <i>with</i> 2 inch grommet cutout.
	• 3 inch grommet cutout	No cost	Specify <i>with</i> 3 inch grommet cutout.
Grommet Location	Applies to 18"W to 24¹⁵/₁₆"W		
	• Center	No cost	Specify <i>with</i> center grommet.
	Applies to 25"W to 33¹⁵/₁₆"W		
	• Center	No cost	Specify <i>with</i> center grommet.
	• Left	No cost	Specify <i>with</i> left grommet.
	• Right	No cost	Specify <i>with</i> right grommet.
	• Right and left	No cost	Specify <i>with</i> right and left grommet.
	Applies to 34"W to 120"W		
	• Center	No cost	Specify <i>with</i> center grommet.
	• Left	No cost	Specify <i>with</i> left grommet.
	• Right	No cost	Specify <i>with</i> right grommet.
	• Right and left	No cost	Specify <i>with</i> right and left grommet.
	• Left and center	No cost	Specify <i>with</i> left and center grommet.
	• Right and center	No cost	Specify <i>with</i> right and center grommet.
	• Right, left, and center	No cost	Specify <i>with</i> right, left, and center grommet.

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

▶ Page 312

▶ See page 122 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with 1/2" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

Specification Information

Tip: Dimension A = depth and dimension B = width.

Tip: Side and back edges of worksurface default to a flat profile.

Tip: Worksurfaces greater than 30"D can only be used in freestanding applications.

Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and beam-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.
▶ See understanding section for details, page 113

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US2448S becomes US2448SWS for wood with square edge profile).

Tip: Power and data access door and tray is ordered separately to be used with cutout.

▶ See page 122 for worksurface size availability matrix.

Parametric Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

► Need help?
Product details,
page 118

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic antimicrobial soft edge profile centered on worksurface
 - Plastic 3 mm edge profile, P-edge profile or knife edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Plastic antimicrobial soft edge centered on worksurface
 - Wood square edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Depth: 18"D–36"D
- Width: 18"W–120"W

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Selections)
 - 5 User edge profile (see below)
 - 6 High-Pressure Laminate or wood color number for worksurface
 - 7 Plastic color number for front edge on laminate worksurface, if selected
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 452.

Tip: Long worksurface spans require additional support.
► See understanding section for details, page 113

 ▶ Pages 318–322
 ▶ Pages 272–285
 ▶ Page 233
 ▶ Page 314
 ▶ Page 314

▶ Specification Information, on next page

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

▶ Page 312

▶ See page 122 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with 1/2" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

120° Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and beam-mounted applications must be specified separately.

► Need help?
Product details,
page 114

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic 3 mm edge profile, or plastic knife profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

Required to Specify

- 1 Style number with appropriate edge profile suffix
 - K** Laminate with knife edge
 - SW** Wood with square edge
 - 2 High-Pressure Laminate or wood color number for worksurface
 - 3 Plastic color number for front edge on laminate worksurface, if selected
 - 4 Options, if selected (see below)
- See *Surface Materials*, page 452.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.
► See understanding section for details, page 113.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, USE2448LH becomes USE2448LHSW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 312
► See page 122 for worksurface size availability matrix.

Tip: When facing the user edge, the side the diagonal is on is the handed side.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

	Options	U.S. Price	Required to Specify
Surface Materials	High-Pressure Laminate worksurfaces		
	• Laminate price group 2	See information at left	Specify laminate color number.
	• Laminate price group 3	See information at left	Specify laminate color number.
	• Open Line laminate	+\$102 plus cost of laminate	► See <i>Surface Materials Reference Manual</i> .
	Wood veneer worksurfaces		
	• Wood group 2	See information at left	Specify wood color number.
	• Wood group 3	See information at left	Specify wood color number.
	• Customiz stain	No cost	Specify with Customiz stain.
	• Full-fill finish on wood group 1	Prices at right	► See <i>Surface Materials Reference Manual</i> . Specify full-fill finish number.
	Door		
	• Paint price group 1	No cost	Specify paint color number.
	• Anodized aluminum	+\$ 13 per door	Specify with 8043 Clear Anodized Aluminum.
Scallop	• Omit scallop	No cost	Specify omit scallop.
Power Access Door	Applies to 48"W		
	• No power access	No cost	Specify with no power access.
	• Power access door center	+\$136	Specify with power access door center.
	• Power access door left	+\$136	Specify with power access door left.
	• Power access door right	+\$136	Specify with power access door right.
	Applies to 60"W		
	• No power access	No cost	Specify with no power access.
	• Power access door center	+\$136	Specify with power access door center.
	• Power access door left	+\$136	Specify with power access door left.
	• Power access door right	+\$136	Specify with power access door right.
	• Power access door left and right	+\$272	Specify with power access door left and right.
	Applies to 72"W		
	• No power access	No cost	Specify with no power access.
	• Power access door center	+\$136	Specify with power access door center.
	• Power access door left	+\$136	Specify with power door left.
	• Power access door right	+\$136	Specify with power door right.
	• Power access door left and center	+\$272	Specify with power access door left and center.
	• Power access door right and center	+\$272	Specify with power access door right and center.
	• Power access door left, right, and center	+\$408	Specify with power access door left, right, and center.

Universal Bench for Answer Beam

► Need help?
Product details,
page 124

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface: plastic 3 mm edge profile on all sides
- Wood worksurface: wood square 3 mm edge profile on all sides
- FrameOne style shared open loop leg: paint price group 1
- Worksurface-to-beam tethers and support bracket

Required to Specify

- 1 Style number with appropriate edge profile suffix
- 2 **SW** Wood with square edge
► See edge profiles at right.
- 3 High-Pressure Laminate or wood veneer number for worksurface
- 4 Plastic color number for edge on laminate worksurface, if selected
- 5 Paint color number for shared open loop leg or column
- 6 Options, if selected (see below)
► See *Surface Materials*, page 452.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

	Options	U.S. Price	Required to Specify
Surface Materials	High-Pressure Laminate worksurfaces		
	• Laminate price group 2	See information at left	Specify laminate color number.
	• Laminate price group 3	See information at left	Specify laminate color number.
	• Open Line laminate	+\$204 plus cost of laminate	► See <i>Surface Materials Reference Manual</i> .
	Wood veneer worksurfaces		
	• Wood group 2	See information at left	Specify wood color number.
	• Wood group 3	See information at left	Specify wood color number.
	• Customiz stain	No cost	Specify <i>with Customiz stain</i> . ► See <i>Surface Materials Reference Manual</i> .
	Shared leg		
	• Paint price group 1	No cost	Specify paint color number.
	• Paint price group 2	+\$ 27	Specify paint color number.
	• Paint price group 3	+\$ 48	Specify paint color number.
Shared Leg	• Closed loop leg	+\$378	Specify <i>with closed loop leg</i> .
Tray	• Utility tray	+\$275	Specify <i>with utility tray</i> .

Tip: If utility tray option is selected, the paint finish will match the shared leg paint finish.

For Canadian Pricing

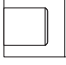

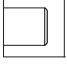

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Tip: To specify 3 mm edge profile, no suffix is required. For wood square edge profile, add suffix to the style number. (For example, TSBUB2PK4848 becomes TSBUB2PK4848SW for wood square edge profile.)

One-High, 1.5-High, and Two-High Lateral Files

Tip: 22 3/4"D lateral files are intended for use with a desk or return shell.

Tip: Open file configuration does not include a headset.

Tip: Recessed back option automatically removes top. Specify square edge top with 1/2" cord drop and power access door separately.

Tip: Recessed back option available in 18 7/8"D units only.

Tip: For Answer beam applications where low storage supports overheads or organizers with mid-storage supports, omit the 1"H top on the lower storage and specify a square edge top.

Tip: For laminate price group 2 and higher pricing, please refer to the electronic catalog or SmartTools.

Tip: Price is per pull.

Standard Includes

- Lateral file:
 - Low-Pressure Laminate case with matching or contrasting Low-Pressure Laminate headset
 - Low-Pressure Laminate case with High-Pressure Laminate headset, if selected
 - High-Pressure Laminate case with matching or contrasting High-Pressure Laminate headset, if selected
- Finished back
- Miterfold laminate drawer construction: black only
- One fastened metal filing system per file drawer: black only
- Full extension, heavy-duty ball bearing drawer suspensions
- Counterweight, if selected
- Attachment hardware
- 1 1/4" adjustable leveling glides
- Shipped fully assembled

One-High and 1.5-High Open Storage

Tip: The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications.

Standard Includes

- Case, One-High and 1.5-High:
 - Low-Pressure Laminate price group 01
 - High-Pressure Laminate price group 01, if selected
- Removable interior cover
- Shelf, if 1.5-High unit is selected
- Grommet
- Wire manager
- 1 1/4" adjustable leveling glides
- Shipped fully assembled

Parametric Common Tops

Right-hand unit

Tip: For laminate price group 2 and higher pricing, please refer to the electronic catalog or SmartTools.

Tip: Width is specifiable in 1/16" increments.

Tip: Right-hand or left-hand application is determined by which leg of the Ology desk is located inside the storage.

Tip: The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications.

Standard Includes

- 1 1/8" thick common top for Ology and Migration SE application:
 - Low-Pressure Laminate price group 01
 - High-Pressure Laminate price group 01, if selected
- 3 mm edgeband on user's side: plastic price group 01
- 1 mm edgeband on sides and back: plastic price group 01
- Width: 30"W–96"W (LPL), 30"W–120"W (HPL)

Answer Fence Overview

Answer fence is a free-standing spine that allows for flexible power routing, data distribution, and light scale space division.

Answer fence features a light scale design with an open base.

The horizontal package determines the width of the fence segment; and includes horizontal connecting bar, steel covers, powerkit, and inside vertical trim.

Power harness, specified separately, allows power to move from one horizontal frame to the next.

Fence feet provide stability to the fence in in-line applications.

Answer fence features a horizontal design detail for distinguished aesthetic.

Junctions are specific to fence 27½"H, and are available in in-line, end-of-run, L, T, X, V, and Y configurations.

Frames

Begin by planning your horizontal frames. Junction height is 27½" and the horizontal package determines width.

Junctions + Horizontal Package = Frame

Power and Data

When selected, power is always 20"H, measured from the floor to the center line of the receptacle. Receptacle cutouts are determined by fence width and locations are not specifiable. Data cutouts are available for modular furniture style and single-gang (NEMA) faceplates and are always positioned above the receptacle (shown below). Power and data cutouts can be omitted for aisle-way applications or where power is not required.

60"W and 72"W - High-capacity Cover

Answer Fence Junctions

Answer fence leverages the construction of the Answer panels. Answer fence junctions give the fence a height of 27½".

Answer fence junctions must be specified as in-line, end-of-run, L, T, X, V, or Y junctions.

► Specifying, page 426

Slots in junction accept the horizontal bar which is part of the horizontal package.

Large openings are used to route power and cables through an L, T, X, V, Y, and in-line junctions.

Outside vertical trim is included with L, T, V, and end-of-run junctions to finish exposed surfaces. Trim is available in paint.

Junction cap and aligner are included with junction.

Leveling glides adjust to install fence on uneven floors. Range is 2¾".

Product Details

End-of-run fence junction includes junction, outside vertical trim, trim aligner, and junction cap. End-of-run trim adds ½" to footprint.
Tip: Inside vertical trim is included with horizontal package.

In-line fence junction includes junction and in-line fence cover aligner.
Tip: Inside vertical trim is included with horizontal package.

L fence junction includes junction, outside vertical trim, inside corner light seal(s), junction cap, and two plastic corner aligners.
Tip: Inside vertical trim is included with horizontal package.

Actual Dimensions

Depth	3"
Height	27½"

T fence junction includes junction, inside corner light seal(s), outside vertical trim, junction cap, and three plastic corner aligners.
Tip: Inside vertical trim is included with horizontal package.

Y fence junction includes junction, junction cap, and two plastic top cap aligners.
Tip: Inside vertical trim is included with horizontal package.

X fence junction includes junction, inside corner light seal(s), junction cap, and four plastic corner aligners.
Tip: Inside vertical trim is included with horizontal package.

An in-line fence cover aligner is included with in-line junctions.

Fence aligners are included with end-of-run, L, T, X, V, and Y junctions.

V fence junction includes junction, outside vertical trim, junction cap, and plastic aligner.
Tip: Inside vertical trim is included with horizontal package.

Connections

Junctions for Answer fence are unique to the Answer fence and are not compatible with Answer panel buildups.

Answer fence foot can be used with fence junctions to provide support and stability.

Block and post construction of corner junctions allow junction posts to be easily added or removed to configure between L, T, X, V, or Y in an application.

Tip: Junction and post trim can be ordered through Service Parts.

Quick lock on both ends of the fence horizontal connecting bars engage the junction in a tight structural connection.

Floor anchor brackets are available to secure junctions to the floor to prevent fence movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Carpet gripper glide caps may be added to fence junction glides to help hold fence in place.

Wiring & Cabling

Answer fence junctions have the ability to support cabling by routing cable through openings in the junction.

Surface Materials

Junction

- Black paint

Tip: Junction is hidden when properly installed.

Fence vertical trim and junction cap

- Paint

Tip: Junction cap matches outside vertical trim color on end-of-run, T, V, and L junctions.

Application Topics

Stability Guidelines for application rules.

► Page 421

Answer Fence Foot

The **fence foot** attaches to the fence junction to provide stability to the end-of-run and in-line fence run.

► Specifying, page 430

Actual Dimensions	
Width	3½"
Length	19½"
Height	5⁄16"

Product Details

Answer fence foot can be used with fence junctions to provide support and stability.

► See Stability Guidelines page 421, for more information.

Fence foot will be offset on end-of-run junction.

Fence foot will be centered on in-line junctions.

Fence foot accommodates Ology, Migration, Airtouch, and height adjustable desks.

Surface Materials

Foot

- Paint

Answer Fence Horizontal Packages

Answer fence horizontal packages include horizontal connecting bar, a pair of steel covers with power and data cutouts, a powerkit, and inside vertical trim.
► Specifying, page 431

Fence covers wrap to create top and bottom of the fence, providing a ¼" gap for use with Universal screens for fence.

Power and data cutouts are always included in predefined locations.

Horizontal connecting bar locks into vertical junctions.

High-capacity horizontal packages include taller covers to accommodate additional data cables.

Actual Dimensions

Width	24", 30", 36", 42", 48", 60", and 72"
Height	10" and 13¼"

Product Details

Answer fence horizontal package includes a horizontal connecting bar, a pair of steel covers with power and data cutouts, a powerkit, and inside vertical trim.

Answer fence cover features a bead design detail sized relative to the width of the cover.

Answer fence high-capacity horizontal package includes a horizontal connecting bar, a pair of high-capacity steel covers, a powerkit, and inside vertical trim.

High-capacity fence cover features a second bead design detail.

Steel covers come together at the top of the fence with a $\frac{1}{4}$ " gap allowing for use of screens on fence.

Covers can be specified with or without cutouts (Fence segments shown without cutouts). When specified with cutouts, covers always have both power and data cutouts.

Covers include a steel spring clip to lock the cover in place.
Tip: Steel spring clips will not fit junctions manufactured prior to April 15, 2019.

Horizontal package includes vertical trim to create a 17"H open base.

High-capacity horizontal package includes vertical trim to create a 13 $\frac{3}{4}$ "H open base.

Infed covers can be specified for horizontal packages to conceal data cables and power infed.

Connections

Answer fence horizontal packages are unique to the Answer fence and are not compatible with Answer panel buildups.

Wiring & Cabling

Power and data is always expressed at 20"H off the floor to center line of the receptacle with data above the power. The horizontal cover has cutouts to express the receptacle and data cutouts.

Powerkits are included with horizontal packages.

Powerkit can be omitted when not required.

Power is standard in non-PVC modular or hardwire. Modular is available in 3+1, 2+2, or 3SN.

Data is specified in the Answer fence horizontal package with either modular furniture style cutout or single-gang (NEMA) style cutout.

All receptacles and trim rings are specified separately.

Fence receptacle filler (TSFRF) are available to fill unused receptacle openings. They are offered in packages of 20.

Data fillers (TS7DF) should be specified in furniture style data cutouts that are not being used. Field provided data filler should be used for any single-gang (NEMA) data cutout that is not being used.

Modular Power

Three wiring schematics are available; 3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 418

15 amp

20 amp

15-amp or 20-amp duplex receptacles snap into powerkits on both sides of the fence.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

Answer Fence Horizontal Packages, continued

USB receptacles are available in three wiring schematics with multiple line options, snap into powerkits on both sides of the fence. USB receptacles offer easy access to two charging ports. Each port provides one ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Blank receptacles can be used to fill cutout locations where power is not expressed.

Tip: Unused receptacle cutout openings can also be filled using a fence receptacle filler (TSFRF).

A receptacle trim ring (TS7RCT) is required at each power cutout location for modular power configurations and is specified separately.

Hardwire Power

Chicago electrical code requires the power distribution network to be hardwired on site. These installations require hard-wired powerkits.

Power tray is included in hardwired powerkit to secure junction boxes and to attach to horizontal package.

Junction boxes are mounted below the power tray and included with the powerkit.

Junction box can accommodate two receptacles back to back. Electrician can use Leviton 5325 or equivalent receptacles.

Electrician must make all hardwire connections in the field. Electrician must supply all conduits, wires, nuts, and connection to building power supply.

Receptacle trim rings are not required for hardwire power. The electrician will provide the receptacle and faceplate.

Surface Materials

Horizontal covers

- Paint

Horizontal bar

- Black paint

Answer Fence Infeed Covers

Infeed covers are available for use with standard and high-capacity fence to conceal power infeed and data cable routing.

► Specifying, page 433

Actual Dimension

Depth	2 7/8"
Width	3" or 5"
Height	13 5/16" or 16 1/2"

Product Details

Infeed cover includes metal cover, attachment bracket, and hardware.

Infeed cover takes the place of inside vertical trim.

Infeed cover can be retro-fit on any fence junction.

Infeed cover for standard fence is 3"D x 16 1/2"H and accommodates up to 24 cables and a multipurpose infeed.

Infeed cover for high-capacity fence is 5"D x 13 5/16"H and accommodates up to 70 cables and a multipurpose infeed.

Surface Materials

- Infeed cover**
- Paint

Answer Fence Power Distribution and Access

Power Harnesses

► Specifying, page 436

Product Details

Power harnesses are required to connect powerkits between fence sections.

Harnesses plug into connection points on the powerkit. Every powerkit has multiple connection points to allow branching of power.

T-connection is formed by connecting two harnesses to a power block.

X-connection is formed by connecting two harnesses to two successive power blocks.

Power harnesses are non-PVC.

Harness Length Application

20"W	In-line
23"W	L, T, X, V, and Y corner junctions
50"W	24"W fence pass-through
56"W	30"W fence pass-through
62"W	36"W fence pass-through
68"W	42"W fence pass-through
74"W	48"W fence pass-through
86"W	60"W fence pass-through
98"W	72"W fence pass-through

Multipurpose Power Infeeds

► Specifying, page 437

Product Details

Multipurpose power infeed is shielded to allow power and communication routing side by side. Available in 6', 12', and 24' lengths.

Multipurpose power infeeds bring power into the fence and make a modular connection to a powerkit.

Multipurpose infeed enters below the horizontal package.

Multipurpose power infeeds can be used with ceiling- and floor-access lay-in utility packages and utility poles. Specify power harness separately.

Multipurpose power infeeds may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Multipurpose infeed conduit cover is aesthetic only and conceals the metallic portion of the multipurpose infeed.

Duplex Receptacle

15 amp 20 amp
► Specifying, page 438

Product Details

15-amp or 20-amp receptacles, ordered separately, snap into both faces of power block in the field.

Orange triangle indicates to users the receptacles that are connected to isolated grounds.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

Surface Materials**Duplex Receptacle**

- 6000 Black
- 6009 Arctic White

Grommet for Junction

► Specifying, page 441

Product Details

Grommet for junction can be added in the field to finish the exposed metal edges of horizontal cable pass-through openings.

Surface Materials

- Black plastic only

Modular Junction Box Faceplate

Straight/
Flush

90°

► Specifying, page 441

Product Details

Modular junction box faceplate can be ordered separately and used with any modular harness length when 6', 12', and 24' lengths are not appropriate. Straight/flush and 90° faceplates are available. Non-PVC is standard. PVC version can be optioned.

Connections

Faceplate is attached to junction box with screws. Hardwire connection to power source with conventional 4 $\frac{1}{16}$ " x 4 $\frac{1}{16}$ " junction box is completed by electrician in the field. Modular extension harness can be connected or disconnected from faceplate as needed.

Answer Fence End-of-Run Junction with Utility Pole

Answer Fence End-of-Run
Junction with Utility Pole

Utility pole for fence with end-of-run junctions brings power and cabling from the ceiling and introduces it into the fence. It includes a junction and replaces the need to order one separately.

► Specifying, page 434

Utility pole extends beyond the footprint of the fence.

Product Details

Ceiling attachment

kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the fence to make a modular connection to a powerkit. *Tip: Power harnesses are ordered separately from the utility pole.*

Ceiling heights up to 9'6" can be accommodated.

End-of-run application uses an in-line junction. Utility pole extends 3" beyond the footprint of the fence.

Utility pole is always shipped with junction. Don't double order.

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts. ► Page 418

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements.

Answer Fence Utility Pole—L, T, or X Junctions

Utility pole—L, T, or X brings power and cabling from the ceiling and introduces it into the fence. Junction is not included as utility pole connects into the existing fence junction.

► Specifying, page 435

Utility pole is flush with the footprint of the fence.

Product Details

Ceiling attachment kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the fence to make a modular connection to a powerkit.

Tip: Power harnesses are ordered separately from the utility pole.

Utility pole can extend up to 8' above the fence.

Connections

Utility pole works with fence. It can be used at an L, T, or X configuration. It cannot be used in an end-of-run, V, Y, or in-line configuration. Utility pole is not shipped with a junction.

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements.

Universal Screens and Aligners

Universal screens provide a tackable boundary element along the Answer fence. They are available in two heights to accommodate varying levels of privacy.
Tip: Answer fence only accepts universal screens.
► Specifying, page 442

Product Details

Universal screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

Brackets are included with screens. Two brackets are used on all screens.

Universal screen slides onto brackets.

Screen brackets install on horizontal connecting bar prior to steel cover installation.

Gap is 2" between universal screen and mounting surface.

When fabric screens are placed directly adjacent to each other in-line, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Universal screen can install anywhere along horizontal connecting bar with included self-tapping screws.

Universal screen can span over a junction.

Surface Materials

Screen

- Fabric
- See *Surface Materials*, page 452.

Brackets

- 7360 Merle

Edge (lower segment)

- P630 Medium Heather Grey PET
- P631 Dark Heather Grey PET

Actual Dimensions

Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: 13½"H screen aligns with a 42" overall height from the floor. 19½" screen aligns with a 48" overall height from the floor.

Sarto Fence Screens

Sarto fence screens provide a light scale tackable boundary element along the Answer fence. They are available in two modular heights to accommodate varying levels of privacy.

Tip: Answer fence only accepts Universal or Sarto screens.

► Specifying, page 444

Actual Dimensions

Screen Height	12½" or 18½"
Overall Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: Modular 13½"H screen aligns with a 42" overall height from the floor. Modular 19½"H screen aligns with a 48" overall height from the floor.

Tip: Parametric specifications are available for Sarto fence screens.

Tip: Parametric specifications define actual screen height and width. Overall height will be about inch larger than specified height due to gap between screen and mounting surface. Newly ordered parametric screens may not align exactly with previously specified modular sizes, even if the same dimension is specified. It is highly recommended to use CET SmartTools to verify all dimensions.

Product Details

Sarto screens are tackable. They are available in two modular heights, 13½"H and 19½"H, and have widths ranging from 24"W to 96"W. Screens can also be specified parametrically.

Brackets and hard stops are included with screens. Two brackets are used on screens narrower than 60"W. Three brackets are used on screens 60"W and larger.

Sarto screen slides onto brackets after hard stops are installed on the brackets.

Screen brackets install on horizontal connecting bar prior to steel cover installation.

Sarto screen can install anywhere along horizontal connecting bar with included self-tapping screws.

Gap is 2" between Sarto screen and mounting surface.

Sarto modular screen can span over a junction, provided there is no conflict between the brackets and the junction. Third bracket on longer screens may conflict with the junction. Please consult CET SmartTools for confirmation before finalizing specification.

Surface Materials

Screen

- Fabric

Answer Fence Frameless Glass Screens with Recessed Attachment

Answer Fence Frameless
Glass Screens with
Recessed Attachment

Frameless glass screen with recessed attachment can be added to the top of a fence segment to help define space and provide privacy while still providing access to natural light and promoting communications between adjacent workers.

► Specifying, page 446

Product Details

Frameless glass screen with recessed attachment is secured to horizontal connecting bar by the supports below the cover. Two brackets are used on 24"W - 48"W fence segments. Three brackets are used on 60"W and 72"W segments.

Frameless glass screens are available in 13½" and 19½" heights.

13½"H screens align at 42"H datums.

19½"H screens align at 48"H datums.

Frameless glass screens must be installed on module and must be the same width as the fence segment they are connected to.

Glass is ¼" thick and fits through standard gap fence covers.

Glass is notched at junction.

Frameless glass screens cannot span over a junction.

Surface Materials

Glass

- 6500 Clear
- 6530 Frosted

Actual Dimensions

Height	13½" or 19½"
Overall Height	15.912" or 22.092"
Width	24", 30", 36", 42", 48", 60", or 72"

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Answer Fence Boundary Screen

Boundary screens provide light scale space division and privacy for a variety of worksettings.

Boundary screens provide support to the fence.

Answer boundary screens attach to the Answer fence at the end-of-run to provide additional shielded privacy.

► Specifying, page 448

Answer fence boundary screens have a thickness of $1\frac{3}{16}$ ".

Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of $1\frac{1}{2}$ ". The glides are located $1\frac{1}{2}$ " from the outside of each edge.

Actual Dimensions

Height	42" and 48"
Single-Sided Width	27", 33", and 39"
Spanning Width	51", 57", 63", 69", and 75"
Thickness	$1\frac{3}{16}$ "

Tip: Answer fence boundary screen widths can also be specified parametrically.

Product Details

Fence boundary screens are available in two configurations—single-sided and spanning.

Fence boundary screens attach to fence using an end-of-run junction.

Answer fence boundary screens

Fence boundary screens have modular heights and widths. Parametric widths are allowed from 27"W to 75"W increasing in $\frac{1}{16}$ " increments.

Answer fence boundary screens are available in two different configurations.

1. Single-sided boundary screens provide boundary to one side of an Answer fence and are specified as either left or right. Right handed application is shown above.

3" Answer fence thickness

Single-sided boundary screens will always include the 3" thickness of the Answer fence to which they attach. Minimum width for a single-sided boundary screen is 27" (24" inside, and 3" for the Answer fence thickness). The maximum width is 39" (36" inside, and 3" for Answer fence thickness). The above image is shown with a right handed application. *Tip: The above image shows a 39" specified width. The planning width is 36".*

2. Spanning boundary screens use one screen segment to provide boundary of equal widths to both sides of Answer fence.

Spanning fence boundary screens always

extend in equal dimension from the fence to which they attach and include the 3" thickness on the Answer fence. Minimum width for a spanning boundary screen is 51" (48" inside, and 3" for the Answer fence thickness). The maximum width is 75" (72" inside and 3" for Answer fence thickness).

Tip: The above image shows a 75" specified width. The planning width is 72".

On boundary screens, there is a metal cover plate that covers the connection bracket that connects the boundary screen to the end-of-run junction. The cover is located 22" from the bottom of the screen and is 3"W and 14"H.

Surface Materials

Boundary screens

- Laminate
- Wood veneer

Edge on laminate

- Plastic

Bracket cover

- Paint

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

Open Line laminates with grain direction

can only be applied vertically. Open Line laminates are not allowed on boundary screens that are greater than 59"W or have segments that are greater than 59"W.

On spanning boundary screens, wood grain laminates and veneers can be

horizontal up to 75"W, and vertical up to 59"W.

All fence boundary screen sides will have the

same finish applied.

Application Topics

Boundary screens attach at the end-of-run location of an Answer fence.

Boundary screens

cannot attach to an Answer fence end-of-run junction where an Answer fence foot is being used.

One single-sided boundary screen

may be attached at the end of the Answer fence. If the intent is to have a boundary screen in both directions of the fence, use spanning boundary screens.

Single-sided boundary screens

are available left and right handed. This is determined by the user facing the attaching Answer fence. Left sided application is shown above.

Wiring Schematics

Details for the Electrician

Answer offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

Rust = Three-circuit, separate neutrals (3SN)

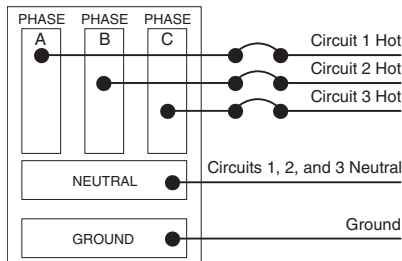

Shared neutrals = 10 gauge

Non-shared neutrals = 12 gauge

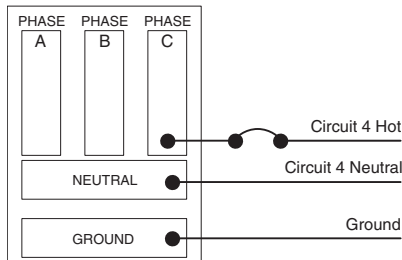

Hot wires = 12 gauge

Four-Circuit, 3+1

Circuit Panel 1

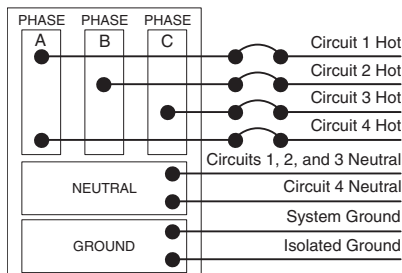

Circuit Panel 2

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

Circuit Panel 1

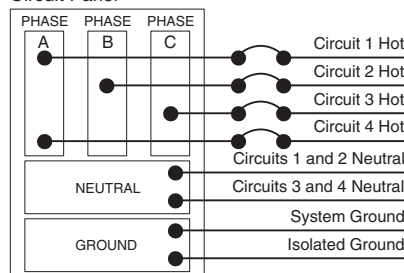

Circuit Panel 2

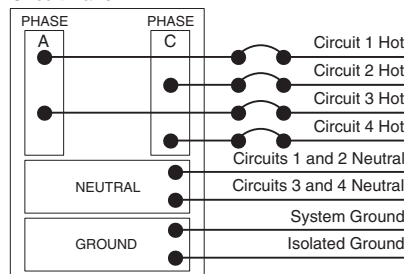

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate Neutrals

Circuit Panel 1

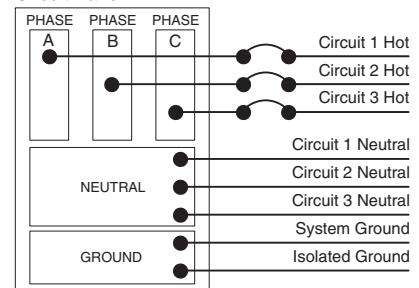

Circuit Panel 2

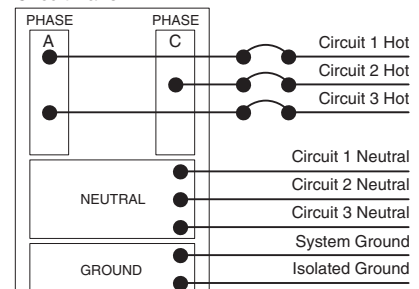

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

How to Calculate
Power Needs

When planning a power network,

you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15

Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Cable Capacities

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this table are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity for cable study performed on junctions manufactured on or after October 10, 2011.

Tip: Tests were performed on junctions with tall sleeves installed.

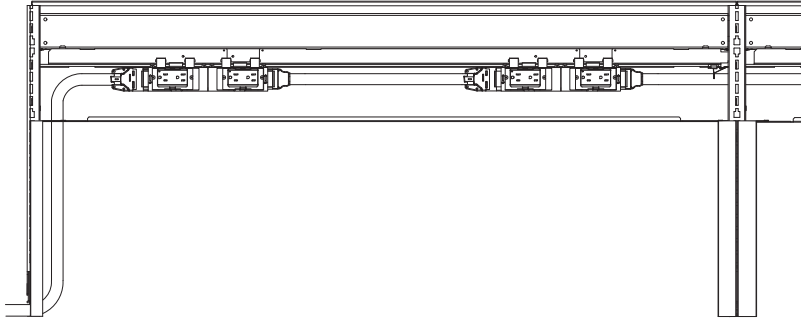

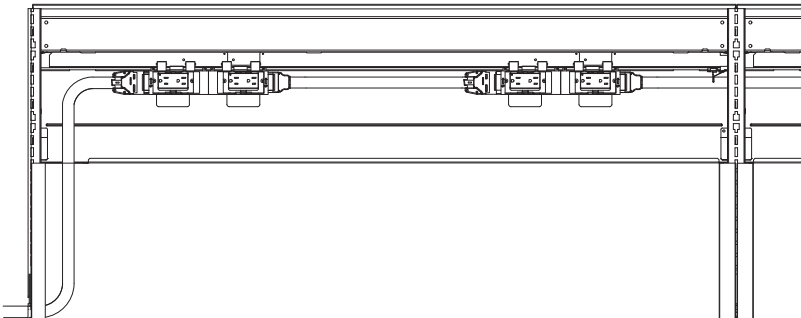

Cables Tested

**A CommScope
Systimax Gigaspeed
1071E Series
Category 6 Cable
OD=0.23"**

**B CommScope
Systimax X10D
1091B Series
Category 6A Cable
OD=0.285"**

Power harnesses reduce cable capacity.

An average of 10-15 cables will be reduced per harness used. However, this number varies according to installation practices and the type of cables used.

	A	B
Standard Fence Data Capacity 	39	29
High-Capacity Fence Data Capacity 	84	54

Answer Fence Stability Guidelines

Minimum Run

The minimum Answer fence run is two fence sections for in-line, L, and V configurations, and three fence sections for T, Y, and zig-zag configurations. There is no maximum run provided the following guidelines are followed.

Universal fence screens or frameless glass screens with recessed attachment can be added to any fence section and do not impact stability guidelines.

In-line application

- A fence foot or spanning boundary screen is required at each end
- Minimum run for in-line applications with power is 8'
- Minimum run for in-line applications without power is 10'

Tip: Single-sided boundary screens do not provide sufficient support and cannot be used in minimum run fence applications.

Answer Fence Stability Guidelines, continued

Single-Sided Planning

- A single-sided support is required every other junction.
- Maximum distance between adjacent supports is 10'.
- A single-sided support is required at both ends of the spine.
- Allowable single-sided supports are:
 - End-of-run boundary screen - minimum 36"W x 42"H
 - L, T, or V junction with 48"W perpendicular fence segment

Double-Sided Planning

- A double-sided support is required every other junction.
- Maximum distance between adjacent supports is 12'.
- Allowable single-sided supports are:
 - Fence foot
 - 51"W x 42"H minimum spanning end-of-run boundary screen
 - 24"W minimum end-of-run T returns
 - 24"W minimum X or Y

Tip: Applications can use a mix of single- and double-sided supports, but must follow single-sided planning application rules.

120 Zig-Zag Planning

- For minimum runs of V and zig-zag applications, see "Minimum Run" on page 413.
- There is no maximum run for 120 zig-zag applications.
- For 120 zig-zag applications four or more segments long, no additional supports are needed; the 120 zig-zag runs are self supporting.

Answer Fence Horizontal Packages

Tip: Horizontal packages are only available with steel covers.

Tip: Power and data is available only at 20" off the floor.

Tip: For modular power, receptacle trim rings (TS7RCT) must be specified separately at each power cutout location.

Tip: For modular power, receptacles are specified separately and are available in 15 amp, 20 amp, and USB.

Tip: For modular power, specify a fence receptacle filler (TSFRF) or a blank receptacle (TSFBCC) to fill cutout locations where power is not expressed.

Tip: 24"W horizontal package with hardwired power cannot support NEMA data cutouts.

Tip: If no power option is selected, data cutouts will default to no cutouts.

Standard Includes

Answer Fence Boundary Screens

Straight, Single-Connect

Tip: When specifying a boundary screen for Answer fence order end-of-run junction with omit outside vertical trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and group 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/ EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials under the Select Surface section.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Boundary screens
- Universal worksurfaces and tables—wood veneer
- High-Density storage
- Answer pedestal tops and fronts
- Universal storage tops and fronts
- Wood skins and trims
- Infills for FrameOne legs

Tip: Wood is not offered as a finish on the value package for High-Density storage cases.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Surface Materials, continued

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Tip: Answer panel wood trims are only available with quarter-cut finishes with the exception of maple finishes. Maple on wood trims is only available with flat-cut finishes. For ordering simplicity, both flat-cut and quarter-cut finishes can be specified on panel trims. However, for all finishes except maple, if a flat-cut finish is selected, the trims will have the coordinating quarter-cut finish. For maple finishes, if quarter-cut is selected, the trims will have the coordinating flat-cut finish. Blending panel trims with other wood products that have flat-cut finishes may be visually acceptable for most applications. If a more exact match is desired for non-maple finishes, please specify quarter-cut finishes for the entire project. If a more exact match is desired for maple finishes, please specify flat-cut finishes for the entire project.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer**Wood Group 1****Flat-Cut Open-Pore**

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry **E**

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2**Flat-Cut Full-Fill**

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry **E**

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3**Quarter-Cut Open-Pore**

- 3832 QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Select Surfaces as Wood Group 1 pricing.

Wood Group 1**Flat-Cut Open-Pore**

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite

Quarter-Cut Open-Pore

- 3F8X QC/OP European Walnut Composite
- 3GGX QC/OP Zebrano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Directional Fabrics

The standard application direction of fabric on Answer panels, skins, and Hutch kit tackboard is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The optional application direction of fabrics on Answer panels, skins, and Hutch kit tackboard is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Wood Veneer Grain Directions

The appearance of wood veneer

may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Resources

Lock and Keying for Currency Enhanced Storage Products	468
Style Number Index	470

Lock and Keying for Currency Enhanced Storage Products

Currency Enhanced products are available with field-installed lock plugs only. Lock cylinders are required to be ordered separately.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
▶ See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR	FR320
5	LOCK9201FR	FR350
15	LOCK9201XF	XF1100
30	Total	
1	877102003SR	standard lock tool
1	877102002SR	master lock tool

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
<ul style="list-style-type: none"> Lock cylinder: 9201 Polished Chrome or 9250 Ember Chrome Two keys 		1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and select beginning key number from FR305–FR454.
Master key random	+\$36 each	Specify <i>master key random</i> .
Master key specific	+\$36 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$36 each	Specify <i>master key consecutive</i> and select beginning key number from XF1001–XF1150.
