For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes
(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify
(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information
(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools — Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications You can access these digital publications at www.steelcase.com or village.steelcase.com.

Currency Enhanced Desks, Desk Shells, Returns, Return Shells, and Bridges

Desks are freestanding and are available with and without pedestals, to create a desk shell, single pedestal desk, or double pedestal desk.

► Specifying, page 78

Returns are available with and without pedestals, to create a single pedestal return or return shell. Returns attach to desks or credenzas to form an L-shape configuration. Attachment brackets are included with returns.

► Specifying, page 82

Bridges must attach to a worksurface on each side to create a U-shape configuration. Attachment brackets are included with bridges.

► Specifying, page 84

Desk and return shells can be used with 22³/₄"D and 27⁷/₁₆"D freestanding pedestals or mobile pedestals for a customized storage solution.

Product Details

36"D desks have a 6" overhang on the visitor side. End panels/pedestals will be 30"D.

Clear access end panels are available with desks to provide structural support, while maintaining clearance for under worksurface knee space. They include a cord pass through cut out, and are not to be used as a visible end panel.

Pulls on desks and returns with pedestals are available in a variety of shapes.

Lock is standard on desks and returns with pedestals. Lock is located in the bottom drawer, and locks the drawer it is located in, and the one above. Locks are specified with storage, but shipped separately. Locks are field installed.

Leveling glides adjust to install desks and returns on uneven floors and have a 1¹/₄" adjustable glide range.

*Worksurface thickness differs based on the worksurface thickness and materiality specified.

1/4-height modesty panels are intended for use up against a wall to provide 20³/₄" of clearance from the floor to the bottom of the modesty panel for all power access, or 13³/₄" of clearance from the top of the bottom stretcher to the bottom of the modesty panel. Top modesty and bottom stretcher are 6¹/₂" tall. Bottom stretcher is included when 1/4-height modesty is specified.

Modesty panels have horizontal grain direction.

End panels have vertical grain direction.

Pulls are available in the following styles: ledge, handle, contemporary, jazz, transitional, Nile, bar, and inset.

Pilot-hole to pilot-hole dimensions are as follows:

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (depending on storage type)
- Bar: 128 mm
- Inset: N.A.

Locks are standard on desks and returns with storage. Lock cylinders must be specified separately, and are field installed.

► Lock and Keying, page 478

Counterweight packages are required to ensure product stability and are ordered as an option, or separately through service parts.

Field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately.

Counterweights are not needed when under worksurfaces pedestals are installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are available as a service part package for use when furniture is reconfigured into application which require the use of counterweights.

Back and end panel configurations differ depending on the modesty panel and support options selected.

Application Topics

60"W or wider desk shells require a reinforcing channel, due to unsupported knee space 54" or greater.

If one clear access end panel is specified on desk shell, the desk shell must be attached to an adjoining worksurface(s). If two clear access end panels are specified on desk shell, the desk shell must be used like a bridge in a U-shaped configuration. Desk shells with clear access end panel(s) can not be freestanding.

If a bridge is specified in a U-shaped configuration, a reinforcing channel must be used with 54"W or more of unsupported knee space.

When specifying a reinforcing channel, use the largest available size that fits within the open kneespace.

Product Details

D- and P-shape worksurfaces must be attached to a bridge, return, or adjoining worksurface to form a flush-height, L- or U-shaped configuration and to provide stability.

D- and P-shape worksurfaces include an end panel, and are available with and without modesty panels.

Modesty panels are available in either full or $\frac{1}{4}$ -height. Full-height modesty panels go to the floor. The $\frac{1}{4}$ -height modesty panels suspend from the worksurface, and are $13\frac{3}{4}$ " high.

Currency Enhanced Parametric Common Tops

Currency Enhanced parametric common tops are used to create storage applications with a seamless top, or as a table or desk with legs. These tops can flex by $\frac{1}{16}$ " increments to allow flexibility in planning.

► Specifying, page 87

Currency Enhanced worksurfaces and tops use $1\frac{1}{8}$ " and $1\frac{3}{8}$ " core. The actual thickness of the work-surface will change depending on materiality selected.

Product Details

Common tops are available in either Low-Pressure Laminate or High-Pressure Laminate.

Common tops have $1\frac{1}{8}$ " thick and $1\frac{3}{8}$ " core thickness. Please see actual dimensions table below for core thickness plus materiality thickness.

Common tops have 3 mm plastic edge banding on the front (user's) side. Sides and back have matching 1 mm edge.

The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) tops are slightly different. It is recommended that only tops of the same type are specified in a given application. There may be sheen or texture differences when using Low-Pressure Laminate and High-Pressure Laminate in adjacent applications. Use caution when mixing and matching different work-surface types.

Reinforcing channels must be used with tops larger than 54"W for 54"W or more of unsupported kneespace. Any common top used as a table with legs equal to or larger than 30"D x 72"W requires two reinforcing channels.

Support plates are available to connect two work-surfaces and allow one to support the other.

Tie plates are available to provide added strength and alignment between two work-surfaces.

Square legs are 2" x 2" and available individually. Legs come in three heights. See **CRSQB** for more information.

Square legs can be used to create stand-alone table desk or a return. Specify two legs to create a return, and specify four legs to create a table desk.

Post leg is available individually. Leg is 27³/₈"H with glide. Glide adjusts 2".

Post legs can be used to create a stand-alone table desk or return. Specify two legs to create a return and four legs to create a table desk.

Column leg is 6", and 27³/₈"H with glide. Glide adjusts 1¹/₄".

Column leg can be used to create a return.

Application Topics

When specifying a Currency Enhanced parametric common top over a run of storage, use SmartTools to determine the correct dimension to be specified.

Common top dimensions are calculated in SmartTools using six major factors:

- Product combination—dimensions of common top vary pending storage combinations in the application.
- Top offset—the width of the common top is not equal to plan width and is undersized for panel-applications.
- Case offset—width of the top changes between HPL and LPL.
- Case vs. top offset—difference between end panel face to top.
- Ganging offset—width of the common top reduces if units gang together.
- Parametric rounding—parametric common tops round to the nearest ¹/₁₆th of an inch.

Common top width examples:

- Two pedestals HPL: 31¹³/₁₆"
- Two pedestals LPL: 31⁵/₈"

Product Details

Table tops have a wood core with either a Low- or High-Pressure laminate surface.

Table tops are available in $1\frac{3}{8}$ " and $1\frac{3}{8}$ " core thickness.

Table tops features a 3 mm square edge profile.

Currency Enhanced table tops are available in the following shapes: round, square, rectangle, racetrack, and boat.

All tops are available parametrically in $\frac{1}{16}$ " increments.

Two-piece tops will occur when the top is in Low-Pressure Laminate and larger than $95\frac{3}{4}$ "W, and in High-Pressure Laminate and larger than $119\frac{15}{16}$ "W. Tops will be split into two equal sections and ship with connecting hardware.

Two-piece tops will not have matching grain patterns.

Rectangular table base is available in Low- and High-Pressure Laminate, and accommodates routing of power and data cords. Access is provided by a hinged door.

Interior dimensions of rectangular base is $13\frac{5}{8}$ "W by $2\frac{1}{4}$ "D in the center to allow for floor power and data box placement.

Steel X- and T- bases are available in 26"W and 36"W.
Tip: When specifying a conference table, base size is predetermined by the selections made, and cannot be changed.

Steel post leg is 3" in diameter.

Steel column leg is 6" in diameter.

Steel square leg is available in three different heights to create a range of table applications, including conferencing, end tables, and coffee tables.

Round grommets are available as a separate style number, and are field installed. Grommets are $2\frac{3}{4}$ " in diameter and allows for cable and cord pass-through in the worksurface.

Currency Enhanced Pedestals

Fixed and Mobile

Fixed pedestals are floor standing and can support work surfaces at 21¹¹/₃₂"H or 27¹¹/₃₂"H.

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

► Specifying, page 109

Top is open on fixed pedestals and accommodates attachment to a work surface. Attachment hardware is included.

Drawer fronts are available in Low-Pressure Laminate and High-Pressure Laminate, and are full to the bottom of the case (no toe kick).

Finished back and sides are standard on pedestals.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Mobile pedestals can be moved wherever storage is needed. They provide an auxiliary work surface when you need more space to spread out your work.

► Specifying, page 111

Tip: Two-High mobile pedestals do not fit under desks with reinforcement channels.

Top on mobile pedestal is 1¹/₈" thick and is available in Low-Pressure Laminate and High-Pressure Laminate.

Pulls on pedestals are available in a variety of shapes.

Lock is standard on pedestals. Lock is located in the bottom drawer, and locks the drawer it is located in and the one above. Locks are specified with storage, but shipped separately. Locks are field installed.

Leveling glides adjust to install pedestals on uneven floors and have a 1¹/₂" adjustable glide range.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Cushion top is ordered separately and requires field installation.

► Specifying, page 113

Tip: Two-High mobile pedestals with a cushion top will not fit under a desk.

Four casters are hard composition and non-locking, with a full-rotation swivel.

- Nile: 160 mm or 320 mm (depending on storage type)
- Bar: 128 mm
- Inset: N.A.

Lock cylinders are available field-installed. Pedestals are shipped installed with plugs, with lock cylinders separate.

Optional field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately. When cylinders are ordered, the factory will omit lock cylinders from all Currency Enhanced storage products.
► Lock and Keying, page 478

Mobile pedestal cushion top is field installed with screws. See assembly instructions for details.

Counterweight packages are required to ensure product stability and are ordered as an option, or separately through service parts.

Counterweights are not needed when under work surface pedestals are installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are required when stacking storage (overheads and bookcases) is mounted to the work surface, and less than the full width of the work surface.

Counterweights are not required when stacking storage is mounted to the work surfaces, and is full width of the work surface.

Counterweights are available as a service part package for use when furniture is reconfigured into application which require the use of counterweights.

Connections

Fixed pedestals are intended to attach under a work surface for security and support. Pedestals match the depth of Universal work surfaces exactly, or can be paired with Currency Enhanced parametric common top.

Fixed pedestals are not to be used alone as a free-standing unit, and must be used with other furniture.

Pedestals using common tops must be attached to other storage, a perpendicular work surface, or a panel. A maximum 6" overhang of the work surface is allowed on either side, or back.

Surface Materials

Currency Enhanced storage can be specified with different case, headset, and top laminate finishes.

Application Topics

22³/₄"D and 29¹/₁₆"D pedestals are for use with desk and return shells. Their depth allows them to slide under a desk or return shell to create an array of storage configurations.

The thickness between Low-Pressure Laminate and High-Pressure Laminate

differs slightly. These slight dimensional differences are accounted for within SmartTools, and are important when specifying a parametric common top. Use SmartTools to specify an exact fit.

►Specifying, pages 114 and 121

Tops can be optioned on to low storage and laterals, and are either 1¹/₈" or 1³/₈" thick. If no top is selected, low storage and laterals accommodate attachment to a work surface or common top. Attachment hardware is included.

Drawer and door fronts are available in Low-Pressure Laminate and High-Pressure Laminate, and are full to the bottom of the case (no toe kick).

Finished back and sides are standard on low storage and lateral files. Recessed back option on 18⁷/₈" depth units have an unfinished back.

File drawers open their full depth for total access to the contents and have an integrated U-channel on the drawer bodies for hanging file folder frames.

Shelf thickness is 1".

Pull on low storage with doors and laterals is available in a variety of shapes.

Lock is standard on low storage with doors and lateral files. Lock is located in the top left corner of the right handed door of low storage with doors. Lock is located in the bottom drawer of lateral files, and locks the drawer it is located in and the one above. Locks are specified with storage, but shipped separately. Locks are field installed.

Recessed back option on 18⁷/₈" depth units provides access to power and data outlets in panel, beam, or wall.

Leveling glides adjust to install low storage and laterals on uneven floors and have a 1¹/₄" adjustable glide range.

Optional field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately. When cylinders are ordered, the factory will omit lock cylinders from all Currency Enhanced storage products. ▶ Lock and Keying, page 478

Counterweight packages are required to ensure product stability and are ordered as an option, or separately through service parts.

Counterweights are not needed when lateral files are installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are required when stacking storage (overheads and bookcases) is mounted to the worksurface, and less than the full width of the worksurface.

Counterweights are not required when stacking storage is mounted to the worksurfaces, and is full width of the worksurface.

Counterweights are available as a service part package for use when furniture is reconfigured into application which require the use of counterweights.

Counterweight type and quantity varies depending on size and storage configuration. Units with counterweights will ship with either standard or steel counterweights. Steel counterweight pricing will equal the price of two standard counterweights.

One adjustable shelf is included in 1.5-High and Two-High open and hinged door configurations.

42"W open configurations have a center support.

Recessed back storage includes laminate front and sides. The back of the storage is inset 3³/₄" to allow access to Answer beam power receptacles. Recessed back storage does not include a top.

Square edge tops with 1/2" cord drop are ordered separately through Universal Systems Worksurfaces. Specify option hinged door for power and data outlet access.

▶ See Answer Freestanding Specification Guide.

Currency Enhanced storage with recessed back should be used when storage will be placed in front of a power outlet.

When One-High or 1.5-High storage is used in conjunction with intermediate supports or stanchions, specify no top open and order square edge tops with 1/2" cord drop or common top separately.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Side-by-side units with individual tops will result in a nominal 3/32" gap.

Wiring and Cabling

Use mid storage supports attached to 1.5-High and Two-High laminate storage to support the opposite end of stanchion mounted storage on an Answer beam. ▶ See *Answer Beam and Answer Fence Specification Guide*.

Recessed back units cannot be used to conceal base power infeed. ▶ See *Answer Beam and Answer Fence Specification Guide*.

Application Topics

22³/₄" D low storage and laterals are for use with desk and return shells. Their depth allows them to slide under a desk or return shell to create an array of storage configurations.

Intermediate supports are used with Currency Enhanced One-High or 1.5-High storage as a work-surface support, allowing for nesting of low storage. Use square edge tops with 1/2" cord drop when used in beam applications.

Storage to beam connector attaches to One-High, 1.5-High, and Two-High storage to Answer beam to support a beam segment. Connector must attach to a finished back. One-High, 1.5-High, and Two-High storage can not be placed over Answer beam foot.

Storage-to-beam connector can not be used with Answer panels.

Currency Enhanced Storage Filler Panels

Currency Enhanced
Storage Filler Panels

Currency Enhanced

Fillers can be used with 18⁷/₈"D Currency Enhanced One-High, 1.5-High, and Two-High lower storage in conditions where 24"D worksurface is desired. The filler will fill the gap between storage and panel.

► Specifying page 117

Fillers attach to lower storage units and to the work-surface above. Fillers cannot be used with the storage-to-beam connector to provide support to beam.

Fillers are laminate with matching edge banding. They are available in three heights to match the height of Currency Enhanced One-High, 1.5-High, and Two-High storage without tops.

Fillers should not be used to enclose location of a base power feed.

Currency Enhanced Three-High and Four-High Lateral Files

Lateral files are ideal for high-density paper storage.
 ▶ Specifying, page 119

Product Details

Laterals cannot be placed over an Answer panel foot.

Pulls are available in a variety of shapes.

File drawer body is standard with integral top rail to accommodate hanging folder files. Drawers are a black miter-fold construction with a proud front.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

No-top option for lateral files is available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface.

- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (depending on storage type)
- Bar: 128 mm
- Inset: N.A.

Lateral files receive the 320 mm Nile pull. All other storage units receive the 160 mm Nile pull.

Locks are available field-installed. Lateral files are shipped installed with plugs, with the locks separate.

36"W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

30"W file drawers accommodate front-to-back and side-to-side letter filing, as well as front-to-back legal filing. 24"D file drawers also accommodate side-to-side legal filing.

Optional field-installed locks are available with consecutive, specific, and random keying options. Field-installed lock cylinders (**LOCK9201FR** or **LOCK9250FR**) must be specified separately. When cylinders are ordered, the factory will omit lock cylinders from all Currency Enhanced products.

Currency Enhanced One-High and 1.5-High Open Storage for Ology, Migration SE, and Slim Leg HAD Applications

Currency Enhanced One-High and 1.5-High open storage are available with options to accommodate Ology, Migration SE, and Slim Leg HAD leg integration. They provide a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with the open storage configuration.

► Specifying, page 121

Wire manager keeps wires tidy and functionally flexes vertically.

Grommet provides a clean area where the desk leg integrates.

Units come without tops. Currency Enhanced tops for Ology, Migration SE, and Slim Leg HAD applications are ordered separately.

Usable depth in One-High and 1.5-High open storage is 10⁴/₅"D for Ology application and 9⁵/₈"D for Migration SE and Slim Leg HAD applications.

Shelf thickness is 1".

Leveling glides adjust to install on uneven floors and have a 1¹/₄" adjustable glide range.

CAUTION

1.5-High HAD integrated storage can only be used with basic height Ology and Migration SE.

Actual Dimensions

	One-High	1.5-High
Depth	18 ⁷ / ₈ "	18 ⁷ / ₈ "
Usable Depth for Ology application	10 ² / ₅ "	10 ² / ₅ "

Height	15 ³ / ₈ "	21 ³ / ₈ "

Product Details

One-High open storage can be used with Ology extended range desks, Ology basic range desks, Migration SE extended range desks, Migration SE basic range desks, and Slim Leg HAD.

1.5-High open storage can be used with Ology basic range desks, Migration SE basic range desks, and Slim Leg HAD.

One-High and 1.5-High open storage have a merle painted steel, removable interior back panel to allow access to the base.

One-High and 1.5-High open storage cannot be interchanged. Use Ology open storage with Ology desk, Migration SE open storage with Migration SE desk, and Slim Leg HAD open storage with Slim Leg HAD.

Open back

Finished back

Ology, Migration SE, and Slim Leg HAD open units offer an option of open back or a finished back for use in applications where the back of the unit is exposed, such as an aisle-way.

Integrated storage options that apply to One-High and 1.5-High units are only meant for use with the specified height-adjustable desk. For example, open storage specified for Migration SE cannot later be blended with Ology.

Integrated open laterals do not accommodate 24"D, 30"D, or 36"D Migration SE worksurfaces. See actual dimensions chart on next page.

Application Topics

Base units are non-handed. Handedness is identified in the specification of the tops, which are ordered separately.

Application is determined by which leg of the desk is located inside the storage.

Location of the Ology, Migration SE, and Slim Leg HAD port in tops is determined by the application orientation. If right leg is integrated into storage, it is a right application. Ology or Migration SE desks cannot be placed in the middle of the Currency Enhanced common top.

Currency Enhanced tops for Ology, Migration SE, and Slim Leg HAD application feature a cutout for legs and are used on individual storage units.

Currency Enhanced common tops for Ology, Migration SE, and Slim Leg HAD application can be used with two units side-by-side when one storage unit is required for leg integration.

Currency Enhanced common tops for Ology, Migration SE, and Slim Leg HAD open units application are available when ganging height adjustable desk integrated storage units to other Currency Enhanced lower storage units of the same height and depth.

Universal privacy/modesty screens must be undersized and justified to the outside when used with a storage unit.

To help avoid pinch points, the Currency Enhanced One-High and 1.5-High lower storage for height-adjustable desk application extends 1" past the back of the height-adjustable desk worksurface.

Currency Enhanced Bookcases

Bookcases offer convenient storage for binders, books, and other objects.
► Specifying, page 140
Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

Top is standard 1"H laminate.

Finished back is standard.

Shelves adjust in 1¼" vertical increments using a reversible bracket.

Shelf thickness is 1".

Leveling glides adjust up to 1¼" to install bookcase on uneven floors.

Actual Dimensions

Product Details

Bookcases cannot be placed over an Answer panel foot.

Bookcases are available with adjustable shelves. Shelves can be repositioned without using tools.

The number of adjustable shelves per bookcase depends on case height:

- 41²⁵/₃₂"H – 2 adjustable shelves
- 47³¹/₃₂"H – 2 adjustable shelves
- 54¹/₈"H – 3 adjustable shelves
- 66¹/₂"H – 4 adjustable shelves
- 72¹¹/₁₆"H – 4 adjustable shelves

25⁵/₈"H stacking bookcases include adjustable shelf. All other heights include two adjustable shelves.

Standard-size binders will fit in bookcases with adjustable shelves.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both. Currency Enhanced bookcases 66¹/₂"H and larger must be placed against a wall, if not ganged back-to-back.

Stacking bookcases are designed to align with other Currency Enhanced tall storage. 25⁵/₈"H stacking bookcases + Two-High lateral file align with 54¹/₈"H tall storage. 37³¹/₃₂"H stacking bookcases + Two-High lateral file align with 66¹/₂"H tall storage. 44³/₁₆"H stacking bookcases + Two-High lateral file align with 72¹¹/₁₆"H tall storage.

When specifying stacking bookcases, selecting the correct worksurface thickness of the application ensures that the stacking bookcase aligns with other tall storage.

Stacking bookcases must be used with One-High, 1.5-High, or Two-High laterals or lower storage. Stacking bookcases cannot be freestanding.

- Ledge: 96 mm
- Handle: 96 mm
- Contemporary: 128 mm
- Jazz: 128 mm
- Transitional: 160 mm
- Nile: 160 mm or 320 mm (depending on storage type)
- Bar: 128 mm
- Inset: N.A.

Locks come standard on towers and wardrobes. Lock cylinders must be specified separately, and are field installed.

Field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately.

► Lock and Keying, page 478

Adjustable shelves on 47³¹/32"H, 54¹/8"H, and 66¹/2"H side access towers are recessed from the side of the tower.

CRTWSA, 41²⁵/32"H and 47³¹/32"H towers have one bottom fixed shelf.

- **54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

CRTW and CRTWD, Box/File configuration:

- **41²⁵/32"H towers** have one bottom fixed shelf.
- **47³¹/32"H and 54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

CRTW and CRTWD, File/File configuration:

- **41²⁵/32"H and 47³¹/32"H towers** have one bottom fixed shelf.
- **54¹/8"H towers** have one bottom fixed shelf and one adjustable shelf.
- **66¹/2"H towers** have one bottom fixed shelf and two adjustable shelves.

Ganging hardware is available to provide alignment by joining adjacent storage components side-by-side, back-to-back, or both.

Wardrobes must be attached to another wardrobe, another storage unit, or a wall to ensure stability and prevent wardrobe from tipping over. See Assembly Directions for further instruction, available from your Steelcase dealer or call 1-888-783-3522.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Side access tower construction is as follows:

- Front panel over top panel
- Top panel over back panel

Currency Enhanced Overheads and Organizers

Currency Enhanced overheads and organizers

provide storage above a worksurface and can be used in a variety of applications.

Tip: Using Currency Enhanced storage with Universal Steel storage is not recommended.

► Specifying, pages 150–157

Sliding door overheads

have a non-locking sliding door. Door is available in Low-Pressure Laminate, High-Pressure Laminate, and optional markerboard surface.

Tip: Markerboard is slightly thicker than the standard laminate.

Hinged door overheads

have two, three, or four locking doors depending on width. Doors are available in Low-Pressure Laminate and High-Pressure Laminate.

Tip: Markerboard is slightly thicker than the standard laminate.

Open overheads have two equal-spaced openings.

Stacking overheads

have end panels that allow the storage to sit on top of a worksurface. Stacking overheads allow for easy installation, and do not require anchoring to a wall. Stacking overheads must be placed up against a wall or back to back with a similar height unit.

Stacking overheads

include a 1½" reveal for cable management.

Personal overhead and organizer configurations provide access on one side of a unit. Cases have a fixed divider in the middle.

Lock is standard on overheads with hinged doors. Locks are specified with storage, but shipped separately. Locks are field installed.

Shared overheads and organizer configurations provide dual sided access.

Finished top, back, and sides are standard on overheads and organizers.

Currency Enhanced overheads and organizers provide support and storage for users in beam-based settings. A number of configurations are available to support storage in parallel and perpendicular orientation to the beam, in both shared and personal storage configurations.

Overheads mounted perpendicular to the beam and low storage provide personal storage and privacy between users.

► See *Answer Beam and Answer Fence Specification Guide* for stability guidelines.

Overheads mounted parallel to the beam provide shared storage and privacy along the beam.

*** Units are 1¹/₂" wider than module to partially overlap the Answer beam.

Product Details

Currency Enhanced overheads and organizers mount on Answer as face mount, top cap mount, and perpendicular face mount applications.

Overheads and organizers can mount parallel or perpendicular on FrameOne.

Two cap mount brackets are available in Answer Solutions Specification Guide for use with Currency Enhanced overheads and organizers.

► See Stability Guidelines in *Answer Solutions Specification Guide*.

Currency Enhanced overheads may be mounted at 38"H or lower if another panel mounted component prevents it from being seated upon. Overhead storage height accepts standard and A4 binders.

Organizers are available personal or shared. Personal provides storage on one side only. Shared storage is divided down the center, with half storage on one side and half storage on the opposite side. Personal storage has a center divider.

Currency Enhanced overheads are designed differently than Currency overheads. Please note Currency Enhanced overheads do not have a light-concealing valence.

Stacking overheads attach to the top of a credenza, desk, desk shell, or Two-High freestanding laterals or low storage, using hardware included with the overhead unit. When placed on top of multiple lateral files or low storage, the storage units must be ganged together. Stacking overheads have a 1½" reveal for cable pass-through.

Stacking overheads cannot be used with lateral file/lateral file credenza configurations.

Stacking overheads cannot be used with P- or D-shape freestanding worksurfaces.

Wall mount overheads have a 1" gap between the back panel and end panel.

Locks are standard on overheads with hinged doors. Lock cylinders must be specified separately, and are field installed.

Field installed locks are available with consecutive, specific, and random keying options. Field installed lock cylinders, **LOCK9201FR** or **LOCK9250FR** must be specified separately.

► Lock and Keying, page 478

Stacking overheads are designed to align with other Currency Enhanced tall storage heights. 38"H stacking overheads align with 66"H tall storage. 44"H stacking overheads align with 72"H tall storage.

Selecting the correct worksurface thickness of the application ensures that the stacking overhead aligns with other tall storage.

Application Topics

Clearance between work surface and bottom of overhead is 21³/₈" when storage unit is installed in the highest position on a 66"H panel and glides are adjusted all the way into the panel.

Hanging components cannot hang in front of a double-pane window.

Hanging components cannot be used next to a double-pane window at a 90° corner.

Bracket options

► Page 59

Stability Guidelines

► See *Answer Beam and Answer Fence Specification Guide*.

Currency Enhanced overheads cannot hang on stacking components.

Answer Beam Application

► See Answer Beam and Answer Fence Specification Guide.

Standard width overheads and organizers are on-module to align with Answer beam widths and should be used in parallel application with the beam.

Overheads and organizers for perpendicular application are intended for use only with Answer Beam. They are wider than module width to accommodate the width of the beam and remain on-module with storage below.

In all Answer Beam applications where overhead or organizer are being mounted on Answer Beam, select the appropriate bracket option. Mid-storage support and stanchion kits for mounting with Answer Beam must be ordered separately.

► See Answer Beam and Answer Fence Specification Guide.

Units for single-sided perpendicular application are dimensioned 3" wider than module width to fully overlap the beam and align with on-module storage on the other end.

Tip: Units for single-sided perpendicular application should only be used with Answer Beam.

Units for dual-sided perpendicular application are dimensioned 1 1/2" wider than module width to partially overlap the beam.

Tip: Units for dual-sided perpendicular application should only be used with Answer Beam.

Units for parallel application are on-module width and can be used anywhere along a beam.

Low storage or credenzas used to support one end of overheads or organizers must be connected to Answer Beam using storage-to-beam connector.

Storage-to-beam connector can not be used with Answer panels.

When overheads are placed side-by-side in parallel application to Answer beam, it is recommended that the units be ganged. **TSBAWAK** is the style number for the ganging bracket to use for low and mid-storage in beam applications.

► See Answer Beam and Answer Fence Specification Guide.

Shared storage in parallel application should always be centered over the beam.

Personal storage in parallel application can be used back-to-back.

Tip: Use centered stanchions and mid-storage supports to support the front edge of the overhead unit.

Overheads and organizers in parallel applications must not extend past end of beam.

Tip: Beam-mounted storage is not allowed in freestanding beam configurations.

► See Answer Beam and Answer Fence Specification Guide.

Stacking overheads can be shorter than the supporting worksurface as long as a worksurface support or side panel of a storage unit is used under the worksurface within 6" of where the side of the stacking bookcase is loaded.

Connections

On-module attachment brackets are used to mount overheads on panels of the same width as overheads and are available as an option.

Safety catch locks overhead storage unit to frame to prevent accidental removal.

Width of overhead must match the width of the panel or panels that it is attached to when using an on-module bracket. Overhead may span up to two frames.

Horizontal wall attachment brackets are available to attach overhead storage to the wall of building.

Laminate overheads and organizers up to 48"W can attach on-module to Answer panels. Sizes larger than 48"W cannot be panel mounted. Follow the Answer panel stability rules.

Tip: End-mount brackets are not available for use with Answer panels.

► See Answer Solutions Specification Guide.

Overheads and organizers have many different attachment methods.

► See page 59.

Overhead cabinets can attach so they align with tower, vertical cabinet, and panel heights.

Overhead cabinets and organizer shelves for FrameOne may be used in parallel and perpendicular applications. Brackets are ordered separately.

When used in parallel applications for FrameOne, storage attached to the top of the integrated rail in infinite locations. Storage can span over a dual-sided base and extension.

Storage is always centered on the dual-sided bench when used in parallel application.

Column height at shortest level is 29⁷/₈"H. Column will then adjust upward 3" for leveling. Height from floor to top of box is approximately 45".

When ganging storage units together for Answer Beam application, use ganging bracket **AWAK**. When ganging overheads and organizers for Answer Beam applications, use ganging bracket **TSBAWAK**. Use mid-storage supports or stanchion supports when mounting overheads and organizers for Answer Beam applications.
▶ See *Answer Beam and Answer Fence Specification Guide*.

Currency Enhanced overheads and organizers cannot be used as end counter storage on FrameOne.

Currency Enhanced Parametric Tackboards

Tackboards finish the space between an overhead unit and a worksurface. It is a fabric-covered tackable surface that is available parametrically by 1/16" increments in depth and height.

► Specifying page 160

Actual Dimensions

Tackboard

Parametric Width Range	30"—78"W
Parametric Height Range	9 1/2"—28"H
Thickness	1"

Tip: Thickness includes core tackboard, spacer, and attachment hardware.

Product Details

Tackboards provide a fabric covered tackable surface above the worksurface.

The ends of wall-mounted tackboards are finished.

Tackboards for use with stacking overhead applications will automatically deduct 2 1/4" from the overall width of the tackboard. Specify the width of the overhead it is being used with.

Stacking overheads include a 1 1/2" space at the bottom of the end panel for cable management. When specifying a tackboard with a stacking overhead, remove 1 1/2" from the overall height to account for this clearance.

- 37.98725"H stacking overheads should use a 21.4375"H tackboard for cable management.
- 44.17475"H stacking overhead would use a 27.6875"H tackboard or cable management.

Connections

Tackboards attach with hook and loop fasteners. The attachment hardware is standard with the tackboard for field installation.

Lecterns are on casters to provide easy mobility and includes a 6"H fixed shelf.

Service carts come in two widths to provide storage for conference supplies. The carts are available with and without casters to provide either easy mobility, or fixed storage.

Lock is standard on service carts. Lock cylinders must be specified separately, and are field installed.

► Lock and Keying, page 478

Casters come standard on lecterns, and are available as an option on service carts. Both include two locking and two non-locking casters. Locking casters are located on the front of the units for easy access.

Leveling glides are available on service carts without casters, and adjust to install carts on uneven floors.

Pulls on service carts are available in the following styles: ledge, handle, contemporary, jazz, transitional, Nile, bar, and inset.

Hinged Door Power Unit

Product Details

Hinged door power unit provides two electrical outlets and two open ports for data adapters. Power unit features a hinged door that opens 90° for access to power and data and is flush with the worksurface when closed. It has a 6' cord with grounded plug. Available on conference table tops only.

Hinged door power unit is field installed in a factory cut hole.

Currency Enhanced

The appearance of laminate may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

* 36"W–61½"W overhead back panels have vertical grain direction. 63"W–75"W overhead back panels have horizontal grain direction.
Towers, wardrobes, bookcases, returns, return shells, and bridges back/modesty panels have vertical grain direction.
Desks, desk shells, and credenza back/modesty panels have horizontal grain direction.

Desks and Desk Shells

Tip: The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications.

Tip: 36"D desks have a 6" overhang on the visitor side. Pedestals and end panels are 30"D.

Tip: Lock for the box/box/file configuration does not lock the top box drawer.

Tip: Full depth end panels are required for any stand alone desk shell. When one or more clear-access end panels are used, the desk shell must be attached to an adjoining worksurface(s).

Standard Includes

- Desk and desk shells with pedestal, if specified:
 - Low-Pressure Laminate case with matching or contrasting Low-Pressure Laminate headset
 - Low-Pressure Laminate case with High-Pressure Laminate headset, if selected
 - High-Pressure Laminate case with matching or contrasting High-Pressure Laminate headset, if selected
- 1 1/8" thick top:
 - Low-Pressure Laminate price group 01
 - High-Pressure Laminate price group 01, if selected
- 3 mm edgeband on user's side: plastic price group 01

Tip: 36"W–59 15/16"W rectangular shaped tops are also available. For the complete parametric size offering and pricing, please refer to SmartTools.

Tip: For laminate price group 2 and higher pricing, please refer to the electronic catalog or SmartTools.

Tip: Two-piece tops will occur when the top is in Low-Pressure Laminate and larger than 95 3/4"W, and in High-Pressure Laminate and larger than 119 15/16"W. Tops will be split into two equal sections and ship with connecting hardware. Two-piece tops will not have matching grain patterns.

Tip: Grommet options allow for either no grommet or hinged power door unit(s). Grommets are available for order as a separate style number, and are field installed.

Tackboard

Tip: Tackboard comes with a spacer for a shelf light cord to be routed to the cable passthrough at the bottom of the overhead storage cabinet.

Tip: Remove 1 1/2" in height from the tackboard if paired with a stacking overhead to utilize cable passthrough.

Tip: Width is specifiable in 1/16" increments.

Tip: Width denotes the width of the overhead the tackboard is pairing with. The application option will account for any dimensional changes needed. By selecting stacking, 2 1/4" will be removed from the overall width of the tackboard. By selecting wall mount, tackboard will ship with the exact specified width.

Tip: Tackboards cannot be attached to walls covered by textured paint or wallpaper.

Standard Includes

Height-adjustable desks support single users. They allow users to quickly and effortlessly raise and lower their desks between seated and standing positions.

Lifting column is activated by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Tip: The control box power cord is not to be installed inside the shroud.

Desk surface is 1 $\frac{1}{8}$ " thick and is available only with a square profile. The user and guest edge have a 3 mm edge band.

There is a 2" gap between the floor and the bottom of the end panel waterfall. As well as a $\frac{5}{8}$ " gap between the floor and bottom of the shroud.

The cable tray is metal. The width is driven from the worksurface plan width. There is a $\frac{1}{2}$ " gap between the bottom of the surface and the top of the cable tray.
► See page 175

A modesty panel is available as an option or as a separate style. The modesty width is driven by the worksurface width and is available in 1" parametric heights from 9" to 18".

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Active touch controller is standard.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Base supports a maximum distributed weight capacity of 295 pounds. For further information on weight limits, see Weight Limit Chart on page 178.

Height-adjustable base adjusts from 28 $\frac{1}{8}$ "H to 47 $\frac{13}{16}$ "H in any increment.

Shrouds include glides and conceal columns. Two glides per shroud are provided and have varying adjustment ranges per product. **SLHAD1S** adjusts $\frac{1}{2}$ " whereas **SLHAD2S** adjusts 1".

Integrated Storage

Height-adjustable desks support single users. They allow users to quickly and effortlessly raise and lower their desks between seated and standing positions.

Lifting column is activated by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Tip: The control box power cord is not to be installed inside the shroud.

There is a 2" gap between the floor and the bottom of the end panel waterfall. As well as a $\frac{5}{8}$ " gap between the floor and bottom of the shroud.

Desk surface is 1 $\frac{1}{8}$ " thick and is available only with a square profile. The user and guest edge have a 3 mm edge band.

Integrated Slim Leg HAD provides a standard 1" pinch point on the storage side of the surface. A 2" pinch point may be specified when nesting the application against a wall with a tack-board or other panel.

See Currency Enhanced specification pages for integrated storage style numbers. Styles shown: **CRHAD15H** and **CRHADCT**.

For integration with Elective Elements, please submit a special quote using styles shown: **E6PDHAD** and **E6WSHAD**.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Active touch controller is standard.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Base supports a maximum distributed weight capacity of 295 pounds. For further information on weight limits, see Weight Limit Chart on page 178.

Height-adjustable base adjusts from 28 $\frac{1}{8}$ "H to 47 $\frac{13}{16}$ "H in any increment.

A modesty panel is available as an option or as a separate style. The modesty width is driven by the worksurface width and is available in 1" parametric heights from 9" to 18".

The cable tray is metal. The width is driven from the worksurface plan width. There is a $\frac{1}{2}$ " gap between the bottom of the surface and the top of the cable tray. ▶ See page 175

Product Details

Wood Veneer, Low-Pressure Laminate, or High-Pressure Laminate Desks

Height-adjustable desks adjust 28 1/8"H to 47 13/16"H in any increment.

End panels connect to the outside of the metal shrouds. To remove the end panel(s), lift up and slide to the right. ▶ See assembly directions for further information.

End panels provide a gap of 50 mm (2") between the bottom of the end panel and the floor.

Wiring and Cabling

Low surge electric motor with whisper quiet operation adjusts at 1 1/2" per second. Motor is 120 VAC +/- 10% and includes a 10' power cord (9 foot for Illinois). Motor also has 0.1W standby power. The motor is rated for 300 watts (2.5 amps at 120V).

Tip: Travel speed does not slow. Collision detection is included as standard.

Soft stop DC motor eliminates abrupt stops and starts and is housed inside the lifting column. Max decibels: 55dB.

Built-in limiter switch is standard.

The control box power cord and other wires are not able to be routed through the interior of the shroud. The only power cable permitted to pass through the shroud is the cord from the Slim Leg HAD power distribution unit. The shroud cannot be placed directly over a power outlet.

Cable tray side view

A cable tray is provided to manage excess base controller wires and cables from surface electronics. Please see dimension page for cable tray measurements.

The cable tray has two molded attachment knobs that allow the installer to lower the cable tray so cables may be secured inside. Once cables are secure, the cable tray can be lifted and secured back into place by a quarter turn of the knobs.

Grain Direction

Worksurface grain directions default to long grain. Short grain laminate is only available on max 60"W surfaces. End panel grain direction defaults to vertical. Horizontal grain direction is available as an option.

Controllers

Both active touch and simple touch controllers are available on Slim Leg HAD. Active touch is the default.

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Simple touch controller is available as an option and easily adjusts height of desk at a rate of 1 1/2" per second, by lifting or pressing down on the controller.

Integrated Storage

Slim Leg HAD with integrated storage blends with Currency Enhanced One-High and 1.5-High storage elements.

Blending Slim Leg HAD with Elective Elements storage elements must be specified through a special quote request.

The integrated storage

Slim Leg HAD provides a 1" pinch point on the top surface side closest to the storage. If specifying the storage and HAD next to a tackboard, dry erase board, or other panel, a 2" pinch point may be specified as standard.

Power and Cable Management

Product Details

Slim Leg HAD offers an option to conceal the power cord through the shroud. The only power cord permitted to pass through the shroud is the cord from the Slim Leg HAD power distribution unit (PDU) that is specified with **SLHAD2S** or **SLHAD1S**. The power distribution cord may be routed through the left or right shroud, and then either the user or visitor side.

Requirements to conceal the power cord through a shroud include:

- The Slim Leg HAD power option must be selected. A four-outlet or six-outlet configuration is available. Convenience power is also available.
- The Slim Leg HAD PDU cord is the only cable permitted to pass through a shroud. No other power strip cord or HAD power cord is permitted to pass through the shroud.
- The metal shrouds must be grounded to the PDU.
- A data cable is permitted to pass through a shroud and should be secured to the power cord to ensure proper routing through the shroud.

On style number, SLHAD1S, the power cord may be routed through the shroud or the plastic vertebrae that feeds into the storage element.

Under Worksurface Power Distribution Unit (PDU)

The under worksurface power distribution unit installs underneath Slim Leg HAD, and is a black steel box with optional four or six outlets.

Clamp-on Power Configuration

Under worksurface PDU and clamp-on accessory installs below and above the worksurface and has the following optional power configurations:

- 3 power
- 2 power, 1 USB-A
- 2 power, 1 USB-C (18W), 1 USB-A
- 2 power, 1 USB-C (60W)

C-clamp is designed to accommodate worksurfaces up to 1 1/2" thick.

Routing the Slim Leg HAD Power Strip Cord

The following images and statements depict the general process of grounding and routing the PDU power cord. For detailed information, please reference the Slim Leg HAD assembly directions.

Ground wire that flows from the power strip to the shroud.

A **primary ground wire** connects and earths the upper shroud to the Slim Leg HAD PDU. A secondary ground wire connects and earths the lower shroud back to the Slim Leg HAD PDU. These ground wires run through the leg that routes power and are on the opposite side of the power cord.

Tip: The cable tray finish defaults to 7360 Merle.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Tip: A 2" pinch point is preferred when a tackboard or panel is mounted to the wall on the storage side of the height-adjustable desk.

Tip: When selecting an inside shroud for infeed location, select no cord management for the cord management option. The cord management option is used when an outside shroud is selected, as the infeed location and a vertical magnetic cable manager is desired.

Tip: Standard cord is available in black or white only. Braided cord is available in several colors. The cord type that is chosen drives the available cord color choices.

Convene Conference Tables and Coordinating Furniture

Convene coordinating furniture matches the aesthetic of the Convene conference tables and is ideal for use in conference rooms and large offices. Two furniture styles are available: Contemporary and Transitional.

Media carts are available with drawers, open shelves, and double doors in three configurations. 2½"-round grogmet is standard in cart top.

Wallboard is available 56"W and 70"W. Doors open 180° and the interior writing surface accommodates dry-erase markers.

Storage credenzas are available in various door and file drawer configurations. Buffet-height credenzas are also available. Translucent glass doors are available as an option on Contemporary-style furniture only. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 478

Conference tables are available in a wide variety of table top and base combinations.

► See *Conference Table Top and Base Combinations*, page 212.

Table bases are available in eleven styles. Various sizes are available in both metal and wood. All bases accommodate cords and cables to bring power and data to the worksurface.

Convene Conference Tables

Convene table collection allows tops and bases to be combined to create a wide variety of conference tables with numerous power and communication options.

Product Details

Conference tables include a top and bases that are ordered separately and combined in the field. Conference tables are 29"H. *Tip: Use the Conference Table Top and Base Combinations matrix to determine the type and number of bases you need to order for the table you choose.* ▶ Page 212

Seven conference table tops are available in a variety of sizes.

Standard Edge Profiles

Large Edge Profiles

Four edge profiles are available on table tops. To keep the proportions of edge profile and table size visually consistent, tables over a certain size receive a larger edge profile. Standard edge profile is 1¼"D x 1⅜"H, large edge profile is 1⅞"D x 1⅞"H. Edge profiles are solid wood.

Bullnose edge coordinates with the bullnose edge on Elective Elements.

Solid wood edge profiles are achieved by adding a specially shaped wood edge to table tops. Both wood and laminate table tops have solid wood edge profiles.

Solid wood edge profile finishes will not be an exact match to wood grain laminates. We highly recommend ordering physical samples to understand visual differences.

Grain direction on wood veneer tops runs the width on all tops up to 72"W. Grain direction runs the depth on all tops 84"W or wider.

Directional laminates run the width on all tops up to 60"D. Directional laminates run the depth on tops 66"D or deeper.

Conference table bases are available in nine styles—T-flex, X-flex, U-panel, X-panel, rectangular panel, circular drum, elliptical drum, and half drum. Not all bases can be used on all table tops.

▶ See *Conference Table Top and Base Combinations* matrix, pages 212–223.

Cylinder and square feet are available on certain conference table bases.

Metal T-flex and X-flex bases are available 24"W and 30"W.

U-panel and X-panel bases are available 24"W, 30"W, and 36"W. U- and X-panel bases are wood and standard with cylinder feet. Square feet are available as an option.

Rectangular panel bases are available 24"W, 30"W, and 36"W. Rectangular panel bases are wood and available with a recessed toe kick plate in a metallic or black finish, cylinder feet, square feet, or with wood molding.

Freestanding table base is available 28"W.

Circular drum bases are available 24"W, 30"W, and 36"W. Circular drum bases are wood and available with a recessed toe kick plate in a metallic or black finish or with wood molding.

Half drum bases are available 24"W, 30"W, and 36"W. Half drum bases are wood and available with a recessed toe kick plate in a metallic or black finish or with wood molding.

Half drum bases are available 24"W, 30"W, and 36"W. Half drum bases are wood and available with a recessed toe kick plate in a metallic or black finish or with wood molding.

Elliptical drum bases are available 24"W, 30"W, and 36"W. Elliptical drum bases are wood and available with a recessed toe kick plate in a metallic or black finish, or with wood molding.

Leveling glides adjust to install tables on uneven floors. Leveling glides are standard on all bases.

Leveling glides adjust to install tables on uneven floors. Leveling glides are standard on all bases.

Connections

Conference table combinations require a certain size and number of bases to support a specific top. ▶ Page 212

Wiring & Cabling

2 1/2"-round grommets are available factory installed on conference tables to allow cords and cables to pass through the top.

Power channels are available in the table top to provide lay-in cable routing and access to electrical outlets and voice and data receptacles. Technology covers are included to conceal outlets and receptacles. Tables can accommodate one or two power channels depending on table dimensions. Power channels are standard with a conduit and must be hardwired in the field.

Tip: Power channels cannot be used on any table supported with an X-panel base.
► See Availability of Conference Top Options, page 234.

Power units are available in the table top to provide access to electrical outlets and voice and data receptacles. Technology covers are included to conceal outlets and receptacles. Tables can accommodate one, two, four or six power units depending on table dimensions. Power units are standard with a conduit and must be hardwired in the field.

Tip: Power units cannot be used on any table supported with T-flex, or X-flex bases.
► See Availability of Conference Top Options, page 234.

Power channels and power units have an opening for data that can be filled. The first method is two simplex voice/data jacks (customer supplied).

The second method is two single space Extron Electronics Architectural Adapter Plates (AAPs) for data solutions. These are supplied by the customer and can be used in any combination.

Flip up power unit provides two electrical outlets at worksurface height. Power unit is flush with worksurface when not in use. It has a 6' power cord with grounded plug. This is field-installed only.

Power boxes and power/communication boxes are available to provide additional electrical outlets and voice and data receptacles where needed. They can be used under table tops, in media, and lecterns.

Removable wire access covers on power channels and power units allow cords and cables to pass through the table top. The cover, when replaced, holds cords in place.

Factory-cut holes for power and communication spheres and ports are available as options on conference table tops. Tables can accommodate one, two, or four holes depending on table dimensions. Power and communication spheres and ports must be specified separately.
► See Availability of Conference Top Options, page 234.

Decorative round and oval port covers snap on to the plastic cover that ships standard with the ports. Covers are metal and available in two metallic finishes.

Power and Communication Accessory Locations

X-panel and U-panel bases can accommodate cords and cables through cutouts in the top and cavities that run all the way through to the floor.

Rectangle panel, half drum, elliptical drum, and round drum bases can accommodate cords and cables through a wire access cavity with a removable panel. A hole is standard in the bottom of the half drum, elliptical drum, and round drum for direct access to floor monuments.

T-flex and X-flex bases can accommodate cords and cables routed through the center and out through an opening in the bottom.

Verlay Collaboration Tables

Verlay is a suite of tables created for collaborative environments and was designed to encourage the smooth flow of ideas across the office landscape. Verlay's wood design offers a material range that provides a comfortable presence to the workplace.

Verlay consists of a series of table shapes and sizes, supporting a wide array of settings from small collaboration to large conference rooms with a modern design aesthetic with multiple leg materials and types.

Solid wood legs offered in oak, maple, or walnut.

CC grommet is available.

Top in wood veneer or High-Pressure Laminate.

Leg bracket below the worksurface of wood leg tables adjusts from 28½" to 29⅓¼" to level the table on uneven floors.

Tan, flat, plastic foot glides.

Metal legs offered with furniture grade linoleum inserts. Glide adjustment on metal legs is 1¼".

Leg ring is painted metal, providing a foot rest when standing or seated.

CC grommet is available in standard power, USB type A, and USB type C.

Long grommet is available in standard power with data knockouts only.

Product Details

Verlay table top has a wood composite core with a wood veneer or laminate surface and is available in five different shapes; round, gumbdrop, square, rectangle, and sightline.

Round

Square, Straight

Rectangle, Straight

Sightline, Straight

Straight shapes are available on round, square, rectangle, and sightline tables and feature a choice of square or rounded corners.

Square corners, available as an option on straight shapes, have 90° corners on all four sides.

Rounded corners, available as an option on straight shapes, have a 4" radius on all four sides with a continuous edge banding.

Gumbdrop

Square, Softened

Rectangle, Softened

Sightline, Softened

Softened table shapes offer a continuous radius pillow aesthetic for seated-height tables.

Softened table shapes are available on gumbdrop, square, rectangle, and sightline tables.

Gumbdrop table is only offered with wood legs in a softened shape.

3 mm Edge, Plastic or Wood Veneer

Slice Edge, Plastic or Wood Veneer

Drop Edge, Solid Wood

Eased Edge, Wood Veneer

Edge detail is available in four options—3 mm, slice, drop, or eased edge.

Tops are 1 1/8" thick.

Slice edge gives the appearance of a thinner top which is 1/2" thick and tapers to an overall thickness of 1 1/8".

Slice edge on laminate tops with square corners will be laser edge banding.

Underside of slice edge exposes MDF core.

Drop edge gives the appearance of a thicker profile with a 1 5/8" solid wood edge. Drop edge is not available in softened shapes.

Tip: Solid wood edge profile finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Eased wood edge transitions from 1/2" profile to an overall thickness of 1 1/8".

Eased edge tops are only available with select veneer finishes and are not available on tables with square corners.

► See *Color Availability Matrices for Wood*, page 462.

Wood legs are available in solid wood, maple, oak, or walnut.

Wood leg species is specifiable for laminate top tables but for veneer top tables will default to match the veneer species.

Leg brackets are painted metal.

Leveling of wood legs occurs between the wood leg and the metal bracket. This eliminates the need for additive levelers, resulting in a visually clean interaction between floor and leg. Leg bracket adjusts from 28 1/2" to 29 13/16".

Standing-height tables are available as square or rectangle shapes, with rounded or square corners.

Leg ring is painted metal, providing a foot rest when standing or seated.

Metal legs come in a variety of types: X-leg, U-leg, trestle leg, split trestle leg, and asymmetric trestle leg.

Tip: The number of U-legs is driven by the width of the table.

► See page 288 for Verlay Leg Configurations.

A soft-touch linoleum insert lines the interior of the metal leg to conceal power and provide an accent of color. It is a flexible furniture grade linoleum.

Leveling of metal legs occurs with leveling glides that adjust for installations on uneven floors. Adjustability range is 1¹/₄".

Sectioned tops will occur when the top is larger than 120"W. The top will be split into two equal sections that ship with connecting hardware.

Woodgrain laminate sectioned tops cannot guarantee a perfect match of grain pattern at the seam where the two sections join. However, the best match of grain pattern possible will be pursued.

Short grain direction

Long grain direction

Rectangular
Worksurface

Grain direction on woodgrain laminate tops less than or equal to 60"W are available in short or long grain. Tops greater than 60"W will always have long grain direction.

Grain direction on veneer tops less than or equal to 96"W are available in short or long grain. Tops greater than 96"W will always have short grain direction.

Power, Wiring & Cabling

Surface power is available with two options—CC grommet or long grommet. Both are field installed.

CC grommet features an exposed power outlet or USB port on one side, lid concealing additional power and USB ports. The grommet bezel and lid can be specified in contrasting finishes.

Power, Power, Power

USB-C, Power, 2 USB-A

USB-C, Power, Power

Power, Power, 2 USB-A

Four power and USB configurations are available to accommodate a variety of user needs.

CC grommet is available in either single or stacked configurations.

► See Verlay Grommet Availability Matrix, page 304

Power infeed for CC grommet is available as cord and plug or hardwired. Cord and plug version has a 9' cord.

Hardwire is available in 72" or 144" conduit length options.

Tables with three or more CC grommets include a junction box which mounts to the underside of the worksurface and replaces the infeed. Electrician supplied conduit feeds the junction box and connects to the hardwire conduit of the grommet electrical system.

Wire management tray for CC grommet attaches to the underside of the table. The tray houses the CC grommet power squid box and manages cables. Cables can route out of the tray through side access holes or bottom center hole.

Plastic knobs allow the tray to drop and tilt for easy access to the contents of the tray.

36"W

26"W

20"W

2 13/16"

varies with table width

2 5/16" dia.

10 1/16"

Number of trays and tray size varies based on table size and number of CC grommets. Tray sizes are 20"W, 26"W, and 36"W.

Tip: Wire management tray is only included when CC grommet is specified and is not available on square tables less than 48" and round tables less than 54".

Long grommet features two metal hinged doors that allow for access to power and data tray.

Long grommet has an internal depth of 3 1/2". Below the worksurface depth extends to 4 1/2". This includes the added dimension of power outlet boxes.

The tray includes four power receptacles and two cutouts for modular data housings located at each end of the tray.

Number of long grommets can be specified from one to four but is dependent on table size.

► See Verlay Grommet Availability Matrix, page 304

Power infeed for long grommet is available as cord and plug or hardwired.

Cord and plug version has a 9' cord.

Hardwire conduit is 72" or 144".

Tables with two or more metal grommets include a junction box which mounts to the underside of the worksurface and replaces the infeed. Electrician supplied conduit feeds the junction box and connects to the hardwire conduit of the grommet electrical system.

Interior of tray is accessible by the user and has ample room to manage cords and power bricks.

Black mesh cable manager with velcro attachment manages cables down the inside of wood leg tables. Leg features a routing for cable manager to nest. Cable manager ships standard with wood leg tables.

Interior of metal legs allow for cable routing concealed by the linoleum insert.

Access holes at the bottom of each leg

allows cables to exit. When fully recessed, glides allow cables to route from underneath the leg. One leg will accommodate grommet power cord or hardwire conduit. Each other leg can house either one power cord or up to three category six cables.

**Parametric Sizes****Parametric dimensions**

are available on Verlay tables.

Tables are available in $\frac{1}{16}"$ increments with the following exceptions:

- Softened shape tables with laminate tops are only available in 3" increments.
- Tables with eased edge are only available in 3" increments.
- Standing-height tables are not available parametrically.

Surface Material**Table top**

- Laminate
- Wood veneer
- Customiz stain (optional on wood)
- Full-fill finish (optional on wood)

Tip: Wood veneer tops with eased edge are available in select finishes only. See Color Availability Matrices for Wood, page 462.

Edge profile

- Plastic edge on laminate tops with 3 mm and slice edge
- Wood veneer edge on wood veneer tops with 3 mm, slice, and eased edge
- Solid wood edge on wood veneer or laminate tops with drop edge

Tip: Solid wood edge profile finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Laser edge band

finishes (for laminate table tops with square corners and slice edge):

- 6000 Black
- 6052 Milk
- 6053 Seagull
- 6213 Acacia
- 6654 Sand

Wood leg species

- Oak
- Maple
- Walnut

Tip: Leg species is driven by the veneer top species.

Leg bracket for wood legs

- Painted metal
- PerfectMatch paint
- Lux Coatings on metal

Metal legs

- Painted metal
- PerfectMatch paint
- Lux Coatings on metal

Metal leg insert

- Furniture grade linoleum

CC grommet

- Painted metal bezel and lid
- Lux Coatings on metal bezel and lid
- 6527 Merle plastic power insert

Long grommet

- Silver metallic painted metal doors
- Black power insert

Big Table

Big Tables are offered in Low-Pressure Laminate, High-Pressure Laminate, and veneer. Table tops and end panels are 1 $\frac{3}{8}$ " thick and center panel is 1" thick. Table top comes standard with two reinforcing channels built into the worksurface for added strength.

► Specifying, pages 403–406

Big Tables are available at seating height of 28" high or standing height of 40" high.

Big Tables are available with an uninterrupted worksurface, uninterrupted worksurface with pop-up power, or Big Tables can be specified with a split worksurface top with a trough that runs down the center of the table.

Big Table Half Depth comes as an uninterrupted worksurface, where the center panel is moved to the end. Half-depth tables are available in two heights like the other Big Tables.

Big Table Trough has a 10" depth, with a 6" open inside the split worksurface and 2" open each side underneath the Big Table worksurface.

Product Details

Low-Pressure Laminate Table Drawer is 3"D x 48"W, can be placed in three locations on either side of the Big Table and Big Table with Trough. Trough must be ordered separately. *Tip: When used on a 28"H Big Table knee clearance will be reduced by 3".*

Flip grommets come standard on each end of Big Table with Trough when power is not optional.

Actual Dimensions

Depth	24" or 48"
Width	96"
Height	28" or 40"

Two Receptacles for power (TS4TPWR) are available in place of the standard grommet on each end.

Big Table trough is a painted platinum open steel technology tray that allows for cable management. Either end of the trough comes standard with grommet that has a flip-top panel for access to route cables. Trough comes standard on split worksurface.

Optional anodized aluminum table Center Rail installs in the table trough and allows for SOTO rail accessories. Can be ordered separately.

Wiring and Cabling

Dual power, data, and USB solutions are available as a standard option or field installed. 15-amp, one-circuit power solution with a 10' cord is standard. TS4TPWR, TS4TPWRD, and TS4TPWRUSB require one building outlet and provide four user outlets. When ordering data TS4TPWRD, user will get one outlet and one data opening on each end.

One receptacle and one data (TS4TPWRD) are available in place of the standard grommet on each end.

Tip: Includes open data port. Communication voice/data jacks are customer provided.

One receptacle and one USB (TS4TPWRUSB) are available in place of the standard grommet on each end.

Single power, data, and USB solutions are also available for field installation. They replace one of the standard grommets. 15-amp, one-Circuit power solution with a 10' cord is standard. TS4TPWR1 and TS4TPWRD1 provide a lower cost solution that requires one building outlet and provides two user outlets. When ordering data TS4TPWRD1, user will get one outlet and one data opening.

Two receptacle (TS4TPWR1) replaces one of the standard grommets.

One receptacle/one data (TS4TPWRD1) replaces one of the standard grommets.

When using two single power, data, and USB solutions, a second building outlet is required.

Vertical Cord Covers (TS4TVWM28 and TS4TVWM40) come in two heights, 28"H and 40"H. Vertical Cord Covers are used to route electrical cords vertically on Big Table with Trough.

Thread Power Application

When using Thread power solutions in conjunction with Big Table power, please specify the following Thread power options to create a connection for Big Table power options to Thread power system:

- **Thread connector (PFLCNCTR)** Please note there are one-door and two-door options available.
- **Thread plug adapter (PFLADPTR)** Thread plug adapter is needed to connect Big Table power plug to Thread power system.

Divisio Side Screen

Divisio Side Screen

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 420

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For worksurfaces 1" thick or less; c:scape, FrameOne, Ology, Migration, a #10 x 3/4" countersunk wood screw is recommended. For work-surfaces over 1", a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)
Width	1 1/4"
Height	14 1/4" (total), 11 5/8" (above worksurface)

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable workspaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Power and Communication Spheres and Ports

Power and communication spheres and port provide convenient desktop access to power outlets and data jacks.

Power spheres have four electrical outlets and two 6' cords with plug or conduit for hardwired applications.

► Specifying, page 427

Power and communication spheres provide two electrical outlets, face plates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.

► Specifying, page 427

Communication sphere includes face plates for four customer-supplied voice/data jacks.

► Specifying, page 428

Oval and round power and communication ports have low-profile covers that are almost flush with worksurface.

► Specifying, page 428

Round power and communication port includes two outlets and two adapters to accommodate customer-supplied standard voice/data jacks.

Oval power and communication port includes four outlets and can accommodate up to six voice/data jacks. Port ships with six Cat 5e RJ 45 jacks and six Cat 3 RJ11 jacks.

Product Details

Power and communication spheres are field installed. You can specify a factory-cut mounting hole in Convene tables to accommodate spheres, or use a 3"-diameter drill to cut mounting hole at desired location.

Oval and round power and communication ports contain an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Round port is field installed. You can specify a factory-cut mounting hole in Convene tables to accommodate port, or use a 3½" diameter drill to cut mounting hole at desired location.

Oval port is ideal for use with conference tables or other installations requiring high-capacity power and communication. You must specify a factory-cut mounting hole to accommodate oval ports in Convene tables.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Lid on oval port can drop down when not in use and conceal outlets. Turn lid 180° and push down so lid will be flush with housing.

Wire manager is available to organize cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.
► Page 430

Wire guide clip has an adhesive back to allow it to stick to painted metal components under a worksurface for routing and managing cords. Double clip can be screwed to the underside of a worksurface.
► Page 430

Cable storage trays, field installed under the worksurface, hold cables out of the way.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Hardwired version of power and communication sphere is available with 6' Greenfield conduit.
Tip: Hardwiring must be done by a licensed electrician.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Shelf Lights

Standard

► Specifying, page 451

End cap cord managers, molded into the durable plastic end caps, allow you to route and manage excess cord.

Plug is flat so it remains close to the receptacle.

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Housing is painted black. Optional paint colors are available.

On-off switch is centered on the front edge of the Standard shelf light.

Cord exits from the center of the back of the light for Standard shelf light.

Daisy chain cords have modular connectors to link Standard shelf lights together.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Specify Underline task light or LED shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath overhead storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately $\frac{1}{2}$ amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet.
► Page 450

Starter cord for Standard powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power factor ballast that is roughly 45% more efficient than a normal power-factor ballast is available on Standard.

LED Shelf Lights

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply is used on the LED standard light; it is 9" long with a two prong driver plug. *Tip: Energy saving mini-LEDs greatly reduce power use.*

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood shelves.

Specify Underline task light or LED shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy Chaining

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

Additions to a chain are possible at any time by adding a jumper cord.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

 ▶ See page 450 for more information.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: Remember to order a daisy chain starter cord.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials.

Wood

► See *Wood Color Availability Matrix* on page 462 for color availability by product line.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Wood veneers and solid wood finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Veneer

Veneers are matched for proper balance and consistency. Veneers are available on quarter cut, except for Oak, which is rift cut.

► Refer to the *Veneer Cut Guidelines* on page 461 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surface program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1000 fee at any point within five years after the \$1500 initiation fee was paid. If the finish is not reactivated within five years after the \$1500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Specification Guidelines for Vertical Fabric Applications

Specification Guidelines for
Vertical Fabric Applications

Warp horizontal means the height dimension of the tackboard is perpendicular to the warp of the fabric.

Application Topics

Tip: Fabric warp direction cannot be altered from standard on tackboards.

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

Surface Materials Representatives

are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

For further information regarding COM fabrics, refer to the *Steelcase Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

Lock and Keying

Currency Enhanced and Convene

All locking products, for Convene are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Currency Enhanced products are available with field-installed lock plugs only. Lock cylinders are ordered separately.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (optional on some product lines). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
▶ See below.

Key Random

Required to Specify

Master key random +\$36 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool
