

NOTICE TO AUTHORIZED USERS OF AWARD #23295 - Furniture, All Types (Except Hospital Room and Patient Handling)

This pricelist/catalog **may** contain items that are not within the Scope of the Contract Award and/or not within this Contractors approved furniture Categories. All Authorized Users are strongly encouraged to review the Scope of the Award and the Contractors Category Matrix prior to selecting items for purchase under the Contract. Per Solicitation Section 4.5 (D) - Procurement Instructions for Authorized Users: When placing orders under this Award, the Authorized User should follow and be familiar with the terms and conditions governing the Contract and are responsible for determining that the product(s) they intend to purchase fit within the scope of the Award.

References to other government contracts that may be included in a Contractor's pricelist/catalog, including any additional terms or conditions, are void under the OGS Award and should be disregarded. Only OGS' Terms and Conditions, including those within a Contractor's posted Contractor Information and Supplemental Information sheet, are valid under the Contract.

Additionally, Authorized Users are reminded that where discrepancies exist between Price List documents, the lowest price shall prevail (see Section 5.3 Price).

All orders must be placed with the Contractor, or the Contractor's OGS approved Authorized Reseller listed on the OGS website under the Award. Orders placed with a reseller not approved by OGS are not considered contract orders and therefore are not subject to the same terms and conditions of the OGS Award.

Authorized Users should contact the OGS Contract Manager listed on the Award with any questions pertaining to this pricelist/catalog.

NYS Price List Effective 3/4/24

Steelcase Pricing and Specification Guides

Specification Guide

Availability

Electronic price list updated with release 200.G (U.S.) and 156.G (Canada), dated June 19, 2023.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a **T**. Products that are scheduled to be culled are indicated with an **X**, followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at <https://finishlibrary.steelcase.com/>.

This specification guide contains multiple Steelcase product lines which are designed into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions.

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1
Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2
Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3
Find cross references by looking for page numbers flagged with an arrow.

Tip 4
Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

The image shows two sample specification pages. The left page is for 'Base Horizontal Frame Packages—Thin Trim' and the right page is for 'Panel—Thin Trim'. Both pages feature a teal header with the product name. Below the header, there are several sections: 'Standard Includes' (under a red band), 'Required to Specify' (under a dark grey band), 'Options' (under a black band), 'Specification Information' (under a teal band), and a 'Product Drawing' (under a light grey band). The 'Required to Specify' section contains a table with columns for 'Material', 'Style Number', 'Price', and 'Option'. The 'Options' section lists various options with their respective prices. The 'Specification Information' section provides dimensions and style numbers. The 'Product Drawing' shows a technical drawing of the product.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with *Customiz Stain*

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you need to find the page that has more details about the product.

Things to Know About Avenir

Panels

Panels are available to define spaces and create privacy for individuals and teams. Panels can be used to support shelves and storage bins and worksurfaces. Worksurfaces can be freestanding.

Tackable acoustical panels comprise a steel frame and acoustical surfaces attached to each side.

Worksurfaces

Worksurfaces are available in four types:

- Avenir Universal worksurfaces
- Avenir 1½"-thick panel-supported worksurfaces
- Curvilinear worksurfaces

Avenir Universal worksurfaces are available in a broad range of shapes, including panel-hung and freestanding. Avenir Universal worksurfaces have a wood core and a laminate surface.

Avenir 1½"-thick worksurfaces are available in a broad range of shapes. Avenir 1½" Thick worksurfaces have a wood core and a wood or laminate surface.

Curvilinear worksurfaces are available to allow a broader range of workstation layouts. The worksurfaces have a wood core with a laminate surface.

Storage

Storage with 200 Series pulls includes a broad array of choices, including fixed pedestals, worksurface-supported pedestals, mobile pedestals, and 200 Series lateral files.

(TS 200 Series lateral files)

Wiring and Cabling

Power distribution systems can be built using powerways in Avenir.

Powerways can be used to build power distribution networks within the bases of Avenir panels. A full range of components are available to allow power networks to go wherever there are panels and to provide access where the user needs it.

Internode components can be used to build power distribution networks and data/voice networks. These components attach above and below Avenir worksurfaces. Internode components cannot connect to Avenir powerways.

Additional Resources

Avenir is supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Product Brochures

Avenir

This brochure is designed to give you a general overview of Avenir, and ways to renew and refresh Avenir with Universal Storage and Universal Worksurfaces.
Form number 05-0000976

Planning Tools

Quick Ship Guide

This handbook describes all Steelcase and Coalesse products that are available for Rapid2 (ships in 2 days), Rapid5 (ships in 5-7 days), or Coalesse Rapid10 (ships in 10 days).

Printed Materials

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Product Comparison CD

This interactive tool is filled with basic product information and comprehensive data detailing how Steelcase and competitors position their products, enabling you to compare Steelcase products to the competition. Invaluable in helping to prepare bids, proposals, and presentations.
Form number S10847

Avenir Product Training

Basic training for Avenir is available as part of the Building Product Muscle (BPM) curriculum on the Steelcase University Web site at village.steelcase.com.

The Avenir BPM is a self-paced, printable module designed to build knowledge of the Avenir's positioning, statement of line, features and benefits, competitive products, application, and sales presentation for Steelcase and dealer salespeople. The Avenir BPM is course SAL119.

Installation Training

is available for salespeople. This Avenir sales-focused product training gives hands-on learning opportunities on how products work and how to present features and benefits. The course code is SAL 133.

Enhancing Your Avenir Environments CD-ROM

This interactive CD tool helps customers leverage their existing Avenir products.
Form number 04-0012964

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality or warranty concerns or service parts questions.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939, or visit our Web site: steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/ProductEnvironmentalProfiles>, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

Steelcase and other manufacturers produce products that are ideal to use with Avenir. Some of them are listed here along with details about how to get product literature.

Huddleboard products were designed to complement the ways you work, individually or as a group. Huddleboard markerboards and photo album can be used either horizontally or vertically. These ultra-light boards attach to a panel, panel-mounted worktool rail, or can be used with any of the Huddleboard support tools. Huddleboard products offer new ways to manage your information by supporting the capture, transfer, and display of individual or group information.
▶ See *Meeting Spaces Specification Guide*.

TS 200 Series storage products are equipped with pulls that match Avenir 200 Series drawer pulls.
▶ See *Storage Specification Guide*

Steelcase worktools include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.
▶ For additional information refer to *Steelcase Worktools Specification Guide*.

Tackable Acoustical Panels

Tackable acoustical panels are constructed with a steel frame and acoustical surfaces that are attached to each side.
 ▶ Specifying, page 192

Septum and low-density fiberglass (acoustical insert) is included on 65" and higher panels.

Fiberglass material construction provides a tackable surface, serves as a sound barrier, and improves acoustical qualities.

Panel surface is covered with fabric.

End trim finishes the vertical edge of the panel.

Base-end door slides up to provide access to base cavity and has a knockout for routing cables through a panel run.

Leveling glides adjust to install panels on uneven floors.

Steel top caps are available in two heights—low (L) and medium (M). Wood top caps are available in two heights—low (L) and medium (M).

Frame is constructed with rigid, tubular steel.

Slotted channel accepts panel-supported components in 1" increments.

Communication cord knockouts allow cables to pass through the base cover.

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.

Base cover is removable to allow access to cavities in panel base. Base cover has receptacle knockouts. Base covers have a receptacle opening on the left and right side of the base cover.
Exception: 24"W base covers have a receptacle opening in the center of the base trim.
 ▶ Page 46

Product Details

Top caps come in two height options that will alter the panel height according to the top cap selected. See dimensions table below.
 ▶ Page 24

Panel surface is removable for replacement with a new surface. The top cap, end trim, and base cover can remain intact during the replacement process. Special tools are not required. Adjacent panels are not disrupted.

Panel stabilizer feet are designed to provide additional support for panels when they aren't stabilized by components. Each foot extends 16" from the side of the panel.

Actual Dimensions

Depth (thickness)	2"	
Width	18 ⁵ / ₁₆ ", 24 ⁵ / ₁₆ ", 30 ⁵ / ₁₆ ", 36 ⁵ / ₁₆ ", 42 ⁵ / ₁₆ ", 48 ⁵ / ₁₆ ", or 60 ⁹ / ₁₆ "	
Low top cap height	5/8"	
Medium top cap height	1 ³ / ₈ "	
Leveling glide range	1 ¹ / ₁₆ "	
Height	with low top cap	with medium top cap
33"H panel	32 ¹ / ₂ "	33"
41"H panel	40 ¹ / ₂ "	41 ¹ / ₄ "
53"H panel	51 ⁵ / ₈ "	52 ³ / ₈ "
65"H panel	63 ¹⁵ / ₁₆ "	64 ¹¹ / ₁₆ "
80"H panel	79 ³ / ₄ "	80 ¹ / ₂ "

Connections

Universal connector package, shipped with every panel, joins panels of the same height in a straight line or in L-, T-, Y-, or X-configurations.
▶ Page 25

Connectors are available to attach panels to adjacent panels and walls.
▶ Pages 26–30

Change-of-height panel connector provides a finished edge when panels of varying heights are joined in a straight line, L-, T-, or X-configuration. It will not work with fillers, power poles, or cable poles that are in a T-configuration.
▶ Page 31

Panels can support components, including work-surfaces, shelves, and storage bins.

Panel-run stability recommendations vary depending on the width of the panel run and use of panel-supported components.
▶ Pages 56–59

Wiring & Cabling

Base or end power-ins bring power to the panel run by connecting at a designated receptacle location or at the end of a powerway.
▶ Page 38

Power poles and cable poles attach to the panel end or at L-, T- and X-connections. They bring power or communication cables from the ceiling.
▶ Pages 40–43

For panels 24"W and wider, powerways can be factory or field installed in the base cavity. Three-circuit or four-circuit powerways are available. All powerways include harness connectors that connect the powerway to the powerway in an adjacent panel. Harness connectors come attached to the powerway.

- 18"W panels accommodate pass-through powerways. These panels are shipped with two plain base covers. Pass-through powerways are shipped with a wire separator in a separate carton for field installation.
▶ Page 44

Base cavity can be accessed on either side of the panel. It is easier to route cords and cables, and to field install powerways, on the surface-one side because the C-shape foot opens to that side.

Panel-base end grommet is available to fit in base-end door knockout to protect cords and cables.

Cable knockout allows cable routing through steel medium top caps.
Exceptions: Wood top caps and low top caps do not allow for cable routing.
▶ Page 24

Cable-management panel option is available to allow vertical cable routing.

All cable-management panels have cable-routing openings in the frame to allow cables to be routed vertically inside the panel.

Interior frame of panel surface is notched at bottom to avoid blocking the cable routing channels.

Openings in panel frame for vertical cable routing accommodate a wide variety of voice and data cables.

Cable-management panel option is available only on tackable acoustical panels that are 24⁵/₁₆"W or wider.

Fillers aesthetically fill in the space at L-, T-, and X-connections. End-of-run fillers cover the exposed vertical edge of the last panel in a run. All fillers allow cables to run vertically.
▶ Pages 32–34

Powerways include a wire separator to separate data and telecommunication cables from the powerway. For panels without power, there is an option to include a factory-installed wire separator to organize cables. Also, a wire separator can be obtained from Service Parts and can be field installed to panels without powerways.

All panels are UL listed and CSA certified.

Surface Materials

Top cap

- Paint (standard)
- Wood (option on low and medium top caps)
- Customiz stain (option on wood)

End trim

- Paint (standard)
- Fabric (option)

Base cover

- Paint (standard)

Panel surface

- Fabric

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

▶ See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Tip: If a panel has different surfaces, use these guidelines: the first surface you specify is considered to be surface one. The second surface you specify is surface two. End trims, left, right, or both, are specified while you're facing surface one. Factory-installed powerways are always installed with the green end of the powerway on the left-hand side as you face surface one.

▶ Pages 44

Slotted channel

- Black paint only

Leveling glides

- Black only

Panel-base end grommet

- Black plastic only

Pricing

To price a panel with surface materials at different prices, add the two prices together and divide by two.

Cable Capacities

▶ Pages 182–183

Transparent Panels

Transparent panels define boundaries while remaining visually open.
 ▶ Specifying, page 194

Transparent panel inserts are available with clear tempered glass.

End trim finishes the vertical edge of the panel.

Frame surface surrounding the transparent panel insert is covered with paint. Frame is constructed with rigid, tubular steel.

Base-end door slides up to provide access to base cavity and has a knockout for routing cables through a panel run.

Leveling glides adjust to install panels on uneven floors.

Steel top caps are available in two heights—low (L) and medium (M). Wood top caps are available in two heights—low (L) and medium (M).

Slotted channel accepts panel-supported components in 1" increments.

Communication cord knockouts allow cables to pass through the base cover.

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.

Base cover is removable to allow access to cavities in panel base. Base cover has receptacle knockouts. Base covers have a receptacle opening on the left and right side of the base cover.
Exception: 24"W base covers have a receptacle opening in the center of the base trim.
 ▶ Page 46

Half Glass, Half Fabric Transparent Panels

Half glass, half fabric transparent panels

define boundaries while remaining visually open.

► Specifying, pages 196-197

Transparent panel inserts are available with clear or tinted tempered safety glass.

End trim finishes the vertical edge of the panel.

Frame surface surrounding the transparent panel insert is covered with paint. Frame is constructed with rigid, tubular steel.

Fabric panel is a non-replaceable, nontackable steel surface.

Base-end door slides up to provide access to base cavity and has a knockout for routing cables through a panel run.

Leveling glides adjust to install panels on uneven floors.

Actual Dimensions

Depth (thickness)	2"	
Width	24 ⁵ / ₁₆ " or 48 ⁵ / ₁₆ "	
Insert depth (thickness) on glass	1/4"	
Insert width on glass	19 ¹ / ₈ ", 25 ¹ / ₈ ", 31 ¹ / ₈ ", 37 ¹ / ₈ ", or 43 ¹ / ₈ "	
Insert height on glass	32 ¹ / ₁₆ " or 48 ¹ / ₂ "	
Low top cap height	5/8"	
Medium top cap height	1 ³ / ₈ "	
Leveling glide range	1 ¹ / ₁₆ "	
Height	with low top cap	with medium top cap
65"H panel	63 ¹⁵ / ₁₆ "	64 ¹¹ / ₁₆ "
80"H panel	79 ³ / ₄ "	80 ¹ / ₂ "

Steel top caps are available in two heights—low (L) and medium (M). Wood top caps are available in two heights—low (L) and medium (M).

Slotted channel accepts panel-supported components in 1" increments.

Sill height is 28¹/₂" high.

Communication cord knockouts allow cables to pass through the base cover.

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.

Base cover is removable to allow access to cavities in panel base. Base cover has receptacle knockouts. Base covers have a receptacle opening on the left and right side of the base cover. *Exception: 24"W base covers have a receptacle opening in the center of the base trim.*

► Page 46

Product Details

Top caps come in two height options that will alter the panel height according to the top cap selected. See dimensions table below.

► Page 24

Panel stabilizer feet are designed to provide additional support for panels when they aren't stabilized by components. Each foot extends 16" from the side of the panel.

► Page 36

Connections

Universal connector package, shipped with every panel, joins panels of the same height in a straight line or in L-, T-, Y-, or X-configurations.
▶ Page 25

Connectors are available to attach panels to adjacent panels and walls.
▶ Pages 26–30

Change-of-height panel connector provides a finished edge when panels of varying heights are joined in a straight line, L-, T-, or X-configuration. It will not work with fillers, power poles, or cable poles that are in a T-configuration.
▶ Page 31

Panel-supported components should not be used on transparent panels.

Panel-run stability recommendations vary depending on the width of the panel run and use of panel-supported components.
▶ Pages 56–59

Wiring & Cabling

Base or end power-ins bring power to the panel run by connecting at a designated receptacle location or at the end of a powerway.
▶ Page 38

Power poles and cable poles attach to the panel end or at L-, T- and X-connections. They bring power or communication cables from the ceiling.
▶ Pages 40–42

Powerways can be factory or field installed in the base cavity. Three-circuit or four-circuit powerways are available. All powerways include harness connectors that connect the powerway to the powerway in an adjacent panel. Harness connectors come attached to the powerway.
▶ Page 44

Base cavity can be accessed on either side of the panel. It is easier to route cords and cables, and to field install powerways, using the open side of the C-shape foot.

Panel-base end grommet is available to fit in base-end door knockout to protect cords and cables.

Cable knockout allows cable routing through steel medium top caps.
Exceptions: Wood top caps and low top caps do not allow for cable routing.
▶ Page 24

End-of-run filler covers the exposed vertical edge of the last panel in a run. Fillers allow cables to run vertically at the end of a run of panels.
▶ Page 34

Fillers can conceal cables running vertically and aesthetically fill in the space at L-, T-, and X-connections.
▶ Page 32

Powerways include a wire separator to separate data and telecommunication cables from the powerway. For panels without power, there is an option to include a factory-installed wire separator to organize cables. Also, a wire separator can be obtained from Service Parts and can be field installed to panels without powerways.

All panels are UL listed and CSA certified.

Surface Materials

Top cap

- Paint (standard)
- Wood (option on low and medium top caps)
- Customiz stain (option on wood)

Frame surface

- Paint (standard)

End trim

- Paint (standard)
 - Fabric (option)
- Tip: For most fabrics, fabric application is standard in the warp horizontal direction.*
▶ See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Base cover

- Paint (standard)

Panel insert

- 6500 Clear glass

Slotted channel

- Black paint only

Panel Stackers

Tackable and Glass

Panel stackers provide visual privacy to existing panels.

Panel stackers are constructed of extruded, painted, aluminum frame. Choices include tackable—skin on each side covered with vertical surface fabric, and glass—single panel of clear, tempered safety glass on panel centerline.

Panel stackers are not designed to fit over Avenir panel doors or on the top of glass panels.

► Specifying, pages 198–201

Stackers are designed for single stacking. Panel stackers cannot be stacked on top of one another.

Top cap from base panel is used to trim the top of the stacker. Wood top caps can be field modified to fit onto stackers.

Stacker panels do not have slotted channels and thus are non-load bearing for components.

Product Details

Top caps are removed from the base panel and are used to trim the top of the stacker. Fabric panel surface is non-removable and non-replaceable.

Stacker panels are connected to the base panels with two attachment brackets that use existing holes in the Avenir panel frame. For panels manufactured prior to 1999, optional screws are required. They are included in the stacker hardware package. The top reveal from the base panel is removed and used on the top of the stacker.

Connections

Panel stackers are provided with a panel attachment bracket to align and connect stackers at the same height to adjoining panels or other panel stackers. The panel attachment bracket helps stabilize and align the stackers for proper fit and finish.

Actual Dimensions

Depth (thickness) 2"

Width 18⁵/₁₆", 24⁵/₁₆", 30⁵/₁₆", 36⁵/₁₆",
42⁵/₁₆", 48⁵/₁₆", or 60⁹/₁₆"

Height 11¹/₈", 12⁵/₁₆", 15¹³/₁₆", or 23⁷/₁₆"

Wiring & Cabling

Power and cables cannot be routed vertically or horizontally or accessed in panel stackers. There is no change-of-height cable management available with panel stackers.

Surface Materials

The fabric specified for tackable fabric stackers is the same on both sides of the panel stacker. The glass stacker is offered in 6500 Clear Tempered glass and 6530 Frosted Glass (option).

For most fabrics, fabric application is standard in the warp horizontal direction.
 ▶ See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Application Topics

Panel stackers are available in four heights. 11" heights are used when aligning stackers on 42"H base panels to adjoining 53"H base panels. 12" heights are used when aligning 53"H base panels to adjoining 65"H base panels. 15" heights are used when aligning 65"H base panel to adjoining 80"H base panels. 24" heights are used when aligning 41"H base panels to adjoining 65"H base panels. In applications where the stackers are not aligning to adjacent base panels, any of the four heights can be used.

Hanging components cannot be used on panel stackers. Panel stackers are non-load bearing.

Panel stackers cannot be stacked on top of another panel stacker.

Panel stackers are UL-listed and CSA-certified.

Panel stackers are not designed to fit over Avenir panel doors or on the top of glass panels.

Rules for Panel Stacker Stability

▶ See Page 59

Panel Door with Frame

Panel door can be added to workstations for additional privacy.
 ▶ Specifying, page 202

Door has a honeycomb core with a laminate surface.

Frame is constructed with rigid, tubular steel.

Hinges are standard on the left, but are field reversible allowing the door to swing inward or outward.

Side jambs support the hinged door.

D-shape molding seals the side jambs and door. It also absorbs sound when the door is opened and closed.

Steel top caps are available in two heights—low (L) and medium (M). Wood top caps are available in two heights—low (L) and medium (M).

Doorknob and lock are centered on the door and are standard on the right, but can be reversed in the field. Optional door handle with lock is available.

Threshold has an adjustable assembly for installation on an uneven floor.

Product Details

Top caps come in two height options that will alter the frame height according to the top cap selected. See dimensions table below.
 ▶ Page 24

Frame alone may be used with locally obtained, non-drilled door and hardware.

Door frame can be installed so that door swings in or out 180°.

Hinges, lock, and hardware are included in the package with the door.

Lock on the panel door is a Schlage brand lock. Knob and latch are heavy-duty residential grade with 3/4"-diameter latch.
Tip: A typical industrial-grade latch is 1" diameter and won't fit this door.

Width of door frame meets barrier-free standards.

Actual Dimensions

Panel door

Depth (thickness)	1 ¹⁵ / ₃₂ "
Width	35 ²⁵ / ₃₂ "
Height	77 ⁷ / ₈ "

Frame

Depth (thickness)	2"
Width	42 ⁵ / ₁₆ "
Low top cap height	5 ⁵ / ₈ "
Medium top cap height	1 ³ / ₈ "
Height with low top cap	79 ³ / ₄ "
Height with medium top cap	80 ¹ / ₂ "

Interior clearance

Width	36"
Height	78 ⁵ / ₁₆ "
Threshold adjustment range	1"

Connections

Universal connector package, shipped with every door frame, joins panel doors in a straight line or in L- or T-configurations with adjacent 80"H panels.
▶ Page 25

Panel run stability recommendations vary depending on the use of adjacent panels or panel-supported components.
▶ Pages 56–59

Building wall connection is not possible.

Panel stackers are not designed to fit over Avenir panel doors.

Wiring & Cabling

Cable knockout allows for cable routing through steel medium top caps.
Exceptions: Wood top caps and low top caps do not allow for cable routing.
▶ Page 24

Surface Materials

Top cap

- ▶ See *Surface Materials Reference Manual*.

Hinge

- Brushed Chrome only

Doorknob

- Brushed Chrome only

Application Topics

⚠ CAUTION

Panel door with frame cannot ship to customer locations in Canada. The frame only style number in conjunction with a locally obtained door should be used for customers in Canada in need of a swing door solution.

Recommended specifications for locally obtained doors are:

- Thickness - 1½"
- Width - 35²⁹/₃₂"
- Height - 77⁷/₈"
- Weight - 55 pounds

Hardware recommendations, when the frame is ordered alone and a locally obtained door is used, are as follows:

- Orbit—Schlage F5IN
- Finish—626
- Latch Bolt—16-107
- Strike—10-026
- McKinney Hinge—T-2714
- Hagger Hinge—1279

Panel Creep

Wiring and Cabling

- ▶ Pages 161–183

Cable Capacities

- ▶ Page 182

Top Caps

Steel top caps are available in two heights—low (L) and medium (M). Wood top caps are available in two heights—low (L) and medium (M).

Cable knockouts allow for cable distribution through steel medium top caps.

Product Details

Panel height varies depending on which of the two top cap heights you choose.

Wood or steel low top caps provide a clean profile for use when no cabling is required.

Steel medium top caps have a cavity that allows cords and cables to pass through on straight panels. Cable knockouts are available as an option. Wood medium top caps do not allow for cord and cable routing.

Connections

Continuous clip, located on the top of the panel, allows the steel top cap to snap into place. Wood top cap slides onto compression dowels.

Substituting different height top caps can be accomplished in the field.

Wiring & Cabling

Cable knockouts are optional on steel medium top caps to allow cables to be routed through a panel run or to exit the top cap. *Exception: Wood top caps and low top caps are not equipped with knockouts.*

Cable knockout filler package inserts in the top cap to fill the knockout holes when they are no longer needed.

Surface Materials

Top cap

- Paint (standard)
- Wood (option on low and medium top caps)
- Customiz stain (option on wood)

Application Topics

Medium top cap cable knockout dimensions.

Actual Dimensions

Depth	2"
Width	18 ¹⁷ / ₆₄ ", 24 ¹⁷ / ₆₄ ", 30 ¹⁷ / ₆₄ ", 36 ¹⁷ / ₆₄ ", 42 ¹⁷ / ₆₄ ", 48 ¹⁷ / ₆₄ ", or 60 ¹ / ₂ "
Low top cap height	5/8"
Medium top cap height	1 3/8"

Universal Connector Package

Universal connector package is shipped with every panel. Additional packages are available through Service Parts.

Top connector plate for steel top cap

Top connector plate for wood top cap

Bottom connector plate

Tear-drop filler

End filler

Pins

Connections

Connects panels of the same height in straight, L-, T-, Y-, or X-configurations.

Each panel is provided with two connector plates, fillers, mounting screws, and pins.

Top connector plate attaches to tops of panels.

Bottom connector plate connects panels in the same way as the top connector plate.

Straight configuration

L-configuration

T-configuration

Y-configuration can be achieved at any angle when two universal connectors are used, because one panel can pivot from where it is attached. A Y-configuration with three 120° angles can be locked in place by using three connectors instead of two.

X-configuration

Tear-drop fillers continue the black reveal line below the top cap and create a uniform appearance at panel junctions.

Wood top caps are standard with a top connector plate that has countersunk holes for the screws so the connection is flush.

End fillers continue the black reveal line below the top cap and create a uniform appearance at the end of a panel run.

Surface Materials

Universal connector
• Black paint only

Application Topics

Power and cable poles can be attached in the recess that results when panels are joined with the connector in L- or T-configurations.

Panel Creep

Varying-Height Connector Packages (PAB2)

► Specifying, page 204

Right-hand straight connector

Left-hand straight connector

Right-hand angle connector

Left-hand angle connector

End Filler

Tip: See page 51 for details about relationships between PAB2 brackets and panel-supported overhead storage components.

Product Details

Three versions of both of these connectors are available. You must specify the connector package that corresponds with the height of the shorter panel.

Connections

Straight connectors attach panels of varying heights in a straight configuration.

Angle connectors attach panels of varying heights and pivot to different angles.

Straight connectors attach to the top of the shorter panel, and hook into one or both sides of the taller panel in a straight line. Alternative connectors and mounting screws are shipped in each package.

Angle connectors attach to the top of the shorter panel, and hook into one side of the taller panel. Alternative connectors and mounting screws are shipped in each package.

Angle connector allows a panel to be positioned at any angle up to 90°.

Connector occupies two slots in the taller panel's slotted channel.

Bottom connector plate, part of the universal connector package shipped with every panel, must be attached to the bottom of the shorter panel.

Surface Materials

Varying-height connectors

- Paint

Application Topics

If you plan to attach overhead storage while using a straight connector, plan the storage location to avoid the connector position because a portion of the slotted channel is blocked on both sides of the taller panel.

If you plan to attach overhead storage while using an angle connector, plan overhead storage location to avoid the connector position.

► Page 51

Power poles and cable poles can be attached in the recess that results when panels are joined with the angle connector.

► Page 51

Varying-Height Perpendicular Connector Packages (PAB3)

► Specifying, page 204

Varying-height connector

Bottom connector plate

End Filler

Product Details

Three versions of this connector are available. You must specify the connector package that corresponds with the height of the shorter panel.

Connections

Connects shorter perpendicular panel to a straight panel run of taller panels. Any height combinations are possible.

Attaches to the top of the shorter panel and hooks into the slotted channels of the taller panels. Mounting screws are included in each package.

Bottom connector plate attaches to all three panels.

Wiring & Cabling

Powerway routing through the base cavity ends when it reaches the perpendicular panel. There are no pass-through or bridging capabilities.

Surface Materials

Varying-height perpendicular connector

- Paint

Application Topics

Shorter perpendicular panel blocks a portion of the slotted channels and covers one inch of the surfaces of both adjacent panels. Some panel-supported components may fit depending on the height difference of the panels.

Change-of-height panel connector offers an alternative way to connect panels of different heights.

► Page 31

Panel Creep

► Page 49

Solutions to Overhead Storage Problems Caused by PAB2 Brackets

How Connectors Affect Power Flow

► Page 55

Closed-Configuration Connector Package (PAB9)

► Specifying, page 206

L-connectors

T-connectors

Pins

Connections

Connects two perpendicular panels of the same height and forms a flush corner without the two-inch recess that results when you use a universal connector package in an L-configuration.

Package also contains hardware to form a flush T-configuration. Panels must be the same height.

Attaches to tops of the panels underneath the top caps. Mounting screws are included in each package.

Bottom connector attaches to the bottom of the panels. Mounting screws are included.

Wiring & Cabling

Powerway routing through the base cavity ends when it reaches the perpendicular panel.

Electrical routing is possible through lap joints. Shorter base covers are available upon request to complete this type of installation and to allow access to the base cavity.

Surface Materials

Closed-configuration connector

- Black paint only

Application Topics

Slotted channel and two inches of the perpendicular panel's surface will be blocked. Plan location of panel-supported components accordingly.

Panel Creep

► Page 49

Solutions to Overhead Storage Problems Caused by PAB2 Brackets

► Page 51

How Connectors Affect Panel-Supported Components

► Page 54

How Connectors Affect Power Flow

► Page 55

Perpendicular Connector Package (PAB4)

► Specifying, page 206

Top connector plate

Bottom connector plate

Connections

Connects a perpendicular panel to a straight panel run. Panels must be the same height.

Perpendicular connectors eliminate the two-inch gap that results when you use a universal connector in a T-configuration.

Attaches to the tops of panels underneath the top caps of panels. Mounting screws are included in each package.

Bottom connector plate attaches to all three panels.

Wiring & Cabling

Powerway routing through the base cavity ends when it reaches the perpendicular panel. There are no pass-through or bridging capabilities.

Surface Materials

Perpendicular connector

- Black paint only

Application Topics

Perpendicular panel blocks the slotted channels and covers one inch of the surfaces of both adjacent panels. Plan location of panel-supported components accordingly.

Panel Creep

► Page 49

Solutions to Overhead Storage Problems Caused by PAB2 Brackets

► Page 51

How Connectors Affect Panel-Supported Components

► Page 54

How Connectors Affect Power Flow

► Page 55

Change-of-Height Panel Connectors

Change-of-height panel connector joins panels at varying heights in a straight line or at a 90° angle. The panel connector is divided into two pieces at the height of the lower panel. It attaches to the taller panel.

► Specifying, page 207

Product Details

Change-of-height panel connector can be field installed on all panels.

Change-of-height panel connector provides a cleaner look than the varying-height connector package (PAB2).

Connections

Straight-line or L-configurations can use the change-of-height panel connector.

T-configurations can use the change-of-height panel connector when the wings of the "T" are the same height and the perpendicular panel of the "T" is the higher panel.

A varying-height connector package (PAB2) must be used when the perpendicular panel of the "T" is shorter than the wings of the "T".

X-configurations require two change-of-height panel connectors and two varying-height connector packages (PAB2). The change-of-height panel connectors are used to connect a taller panel to a shorter panel at a 90° angle. The varying-height connector package (PAB2) joins these two 90° connections.

Surface Materials

Panel connector

- Paint (standard)
- Fabric (option)

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

► See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Upper storage can be attached anywhere to a panel when a change-of-height connector is used.

Varying-Height Connector Packages (PAB2)

► Page 51

Actual Dimensions

Depth 5/8"

Width 2"

Filler Packages

Fillers close the gap that results when panels form L-, T-, and X-configurations. They also conceal cables that run between and vertically through panels of the same height or different heights.

► Specifying, page 208

Top cap, available in two heights, matches the height of the panel top cap and is available in wood or paint.

Top caps are available in two heights—low (L) and medium (M).

Wood top caps are available in two heights—low (L) and medium (M).

Carrier fastens to the edge of the panel and allows the cover to snap into place.

Filler package allows cables to be laid in before the cover is snapped into place.

Fillers are fabric covered.

Base cover matches the base of adjacent panels.

Product Details

Carrier must attach to specific panels in each configuration. In L-configurations, the carrier must attach to the tallest panel. In T-configurations, the carrier must attach to the center panel. In X-configurations, the carrier must attach to the panel opposite the lowest panel in the configuration.

Back filler closes the open segment of a filler when the filler extends above its carrier in some T- and X-configurations.

Knockouts are provided to accommodate lay-in cable routing through panels of varying heights.

Reusable doors in top cap can be removed to permit cable routing.

Connections

Carrier fastens to the end of a panel with screws that attach below the top cap. Panel remains intact so fillers can be removed and relocated later.

Filler snaps onto the carrier.

Top cap and reveal snap into the top of the filler.

Base cover is attached to the filler.

Surface Materials

Filler cover

- Fabric
- *Tip: For most fabrics, fabric application is standard in the warp horizontal direction.*

Carrier

- Black paint only

Top cap

- Paint (standard)
- Wood
- Customiz stain (option on wood)

Base cover

- Paint (standard)

Application Topics

Panels with low or wood top caps have no cable routing capability.

Actual Dimensions

Depth	1 ⁵ / ₈ "	
Width	1 ⁹ / ₁₆ "	
Height	with low top cap	with medium top cap
41"H panel	40 ¹ / ₂ "	41 ¹ / ₄ "
53"H panel	51 ⁵ / ₈ "	52 ³ / ₈ "
65"H panel	63 ¹⁵ / ₁₆ "	64 ¹¹ / ₁₆ "
80"H panel	79 ³ / ₄ "	80 ¹ / ₂ "

L-Configurations

Carrier always attaches to the tallest panel in an L-configuration.

Panels of same height

Panels of different heights

T-Configurations

Carrier must connect to center panel in a T-configuration.

Back filler is needed when the center panel of the T-configuration is exceeded in height by one or more other panels.

Panels of same height

Panels of different heights

Panels of different heights

X-Configurations

Carrier must attach to the panel opposite the lowest panel in an X-configuration.

Back filler is needed when the panel that the carrier is attached to is exceeded in height by one or more other panels.

Panels of same height

Top cap (without carrier, filler, or base cover) finishes X-configuration with panels of the same height.

Panels of different heights

Carrier attaches to panel opposite the shortest panel.

Panels of different heights

Filler is positioned against the panel opposite the shortest panel and is held in place beneath the top cap of the tallest panel. Back filler closes gap in filler.

Panels that form a gap

Filler fits in gap and is held in place with screws beneath the top cap of the tallest panel. Back filler closes gap in filler.

End-of-Run Fillers

End-of-run fillers cover the exposed vertical edge of the last panel in a run. They allow cables to run vertically at the end of a panel run.

► Specifying, page 211

Actual Dimensions

Depth	1¾"
Width	1¾"
Medium top cap height	1⅝"
Height	with medium top cap
41"H panel	41¼"
53"H panel	52⅞"
65"H panel	64 ¹¹ / ₁₆ "
80"H panel	80½"

Product Details

Filler must match the height of the panel.

Connections

Carrier fastens to the end of a panel with screws that attach below the top cap. Panel remains intact so filler can be removed and relocated later.

Filler snaps onto the carrier.

Top cap and reveal snap into the top of the filler.

Base cover is attached to the filler.

Panel-to-Wall Bracket Package (PAB6)

► Specifying, page 212

Top bracket

Bottom bracket

Connections

Attaches the top and bottom of the panel perpendicular to concrete block or reinforced plaster walls. Mounting screws that connect the brackets to the panel are included in each package.

Also attaches to large storage units that are the same height or taller than the panel (excluding the top cap).

Bracket is 1/8" deep.

Surface Materials

Panel-to-wall bracket
• Black paint only

Panel-to-Furniture Bracket Package (PAB7)

► Specifying, page 212

Right-hand bracket

Left-hand bracket

Connections

Bracket screws to the back of freestanding furniture and hooks into the slotted channel of the panel. Mounting screws are provided.

Surface Materials

Panel-to-furniture bracket
• Black paint only

Application Topics

Bracket allows panels to be stabilized with freestanding furniture.

Rules for Panel Stability with Components

► Page 56

Anchor Bracket

► Specifying, page 212

Connections

Attaches to the panel glide located at the base of a panel.

Anchors a panel to the floor at the power entry point, such as a power pole or base power-in connection, to prevent panel movement and possible electrical wire damage.

Surface Materials

Anchor bracket
• Black paint only

Application Topics

Breakaway base power-in may eliminate the need for an anchor bracket on a powered panel if the panel is 65"H or shorter.

Special Requirements for Los Angeles

► Page 179

Panel Accessories

Panel Stabilizer Foot

► Specifying, page 213

Application

Increases the stability of panel runs when furniture or perpendicular panels are not available to provide stability.

Pairs provide the most stability.

Connections

Attaches to all panels, including curved panels. Non-handed design allows foot to attach to either side of the panel.
Tip: Panel-stabilizer foot must not be used as the sole source of support for panels.

Each foot extends 16" from the base of the panel.

Surface Materials

Foot

- Paint

Application Topics

Stabilizes up to three panels if the panel run doesn't exceed 12'.
► Pages 56–57

Panel stabilizer foot must not be used as the sole source of support for panels.

Actual Dimensions

Width	2 ³ / ₄ "
Height	11 ¹ / ₄ "

Panel Coat Hook

► Specifying, page 213

Application

Provides a convenient place for hanging coats and similar light objects in workstations.

Connections

Fits anywhere under the top cap reveal of panels with a painted top cap only. Panel coat hook cannot be used with wood top cap.

Surface Materials

Coat hook

- Paint

Actual Dimensions

Depth	1 ⁷ / ₈ "
Width	1 ¹ / ₂ "
Height	4 ⁵ / ₁₆ "

Markerboard and Tray

► Specifying, page 214

Application

Provides a writing surface on the side of a panel.

Laminate surface on board cleans easily.

Tray to hold pens and accessories is available as an option.

Connections

Markerboard attaches to panels at any height using brackets that are included.

Tray is built into the marker board bottom frame and is available as an option.

Surface Materials

Markerboard surface

- White laminate only

Border and tray

- Black only

Application Topics

Wall channels are available to attach marker boards to interior walls.

Actual Dimensions

Board	
Depth	3 ⁴ / ₄ "
Width	30" or 36"
Height	33"
Tray	
Depth	1 ¹ / ₂ "
Width	29 ¹ / ₂ " or 35 ¹ / ₂ "

Tackboard

► Specifying, page 214

Application

Provides increased tackability between overhead storage and work-surface when non-tackable panels are used.

Connections

Wall channels are available to attach tackboards to interior walls.
► Page 143

Brackets, which are factory installed on the back of the tackboard, lock into the slotted channel of panels or into wall channels.

Surface Materials

- Tackboard**
- Fabric
- Tip: Horizontal application is standard. Vertical application is available as an option.*
- Hardware**
- Black paint only

Actual Dimensions

Depth	3/4"
Width	30", 36", 42", 48", 60", or 72"
Height	17 ³ / ₄ "

Base Power-Ins

Base power-ins are field installed and connect the panel electrical system to the building power source. All five wiring schematics are available.
 ▶ Specifying, page 215

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.
 ▶ See *Avenir Power Component Transition Details* on page 170.

Product Details

Power-in brings power to panel run by connecting to a receptacle location of the powerway.

Base power-ins can use any of the powerway receptacle locations.

Conduit connects power-in to building's power source.

End power-ins interface the building power by entering at the end of a panel and connecting to a modular connection at the end of a powerway. A receptacle opening is not used.

▶ Page 216

Actual Dimensions

Depth	2½"
Width	5½"
Height	1¾"
Conduit diameter	½"
Conduit length	6'
Elbow depth	1⅝"

Wiring & Cabling

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Building power source can come from the floor, wall, or column.

Conduit leads must be hardwired to the building wiring by a qualified electrician or engineer.

Power-ins are UL listed and CSA certified.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Chicago, San Francisco, and Los Angeles have special requirements.

▶ Pages 177–179

Understanding Building Wiring

▶ Page 180

Surface Materials

Conduit

- Black plastic only

Application Topics

18"W panels cannot be connected to power-ins because these panels only accommodate pass-through powerways.

2" x 2" Power Poles and Cable Poles

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. All five wiring schematics are available. They can also be used to run cables into the top cap or into the panel base cavity.

► Specifying, page 217

Cable poles provide a space to route cables from the ceiling to the top cap or base cavity of a panel.

► Specifying, page 219

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

► See *Avenir Power Component Transition Details* on page 170.

Junction box, at the top of the power pole, encloses the hardwire connection to the building's electrical service.

Hanger bar secures the top of the pole to the ceiling grid.

Ceiling trim plate

Carrier fastens to the edge of the panel and allows the cover to snap into place.

Filler conceals power harness and cables routed to the base of the panel.

Power pole harness attaches to either end of a powerway.

Base cover matches the base of adjacent panels.

Actual Dimensions

Depth	1½"
Width	1⅝"
Hanger bar length	36"

Product Details

Four pole heights are available to correspond to panel heights.

Ceiling heights up to 10'4" can be accommodated.

Connections

2" x 2" poles can connect to end-of-run or to an L- or T- configuration. Carrier must always attach to tallest panel. Carrier must attach to center panel in T-configuration.

Height of the pole must correspond with the height of the panel it is attached to so that it will connect under the top cap. Adjacent panels can be lower.

Alignment rod links upper and lower parts of pole to ensure straight connection.

Carrier fastens to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later.

Wiring & Cabling

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

The power pole harness attaches to either end of powerway. It does not interfere with a receptacle location.

Six to eight 3/8" diameter cables can be accommodated inside the 2" x 2" power pole or cable pole.

Surface Materials

Upper part of pole

- Paint

Lower part of pole

- Fabric

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

► See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Base

- Paint (must match upper part)

Ceiling trim plate

- White paint only

2" x 6" Power Poles and Cable Poles

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. All five wiring schematics are available. They can also be used to run cables into the top cap or into the panel base cavity.

► Specifying, page 218

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

► See *Power Component Transition Details* on page 170.

Actual Dimensions

Depth	2"
Width	6"
Hanger bar length	36"

Product Details

Four pole heights are available to correspond to panel heights.

Ceiling heights up to 10'4" can be accommodated.

Connections

2" x 6" pole is used in-line with tackable acoustical or transparent panels. It can also be used in L, T, and X configurations.

Height of the pole must correspond with the height of the panel it is attached to so that it will connect under the top cap. Adjacent panels must be the same height.

Alignment rod links upper and lower parts of pole to ensure straight connection.

Connector plate attaches to the top of a panel at the same height as the panel and to the bottom of the panel.

Carrier fastens to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later. Plate will be visible after installation.

Wiring & Cabling

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

The power pole harness attaches to either end of powerway. It does not interfere with a receptacle location.

Surface Materials

Upper and lower part of pole

- Paint

Connector plate

- Paint

Ceiling trim plate

- White paint only

Application Topics

2" x 6" power poles cannot be used in end-of-run applications.

2" x 6" power poles cannot be used in a panel change-of-height application.

Worksurfaces, storage bins, or shelves cannot be hung from a 2" x 6" power pole.

Corner fillers for use with 2" x 6" power poles are available, contact Specials for further information.

Powerway

Powerways that are installed in the panel base cavity allow power to be distributed wherever panels go. All five wiring schematics are available.

► Specifying, page 220

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

► See *Power Component Transition Details* on page 170.

Wire separator tray supports the powerway and provides some space for cable routing.

Product Details

18"W panels support a pass-through powerway which connects powerways of adjacent panels.

18"W panels with pass-through powerways cannot accommodate receptacles or base power-ins. End power-ins and power poles harnesses can connect to the pass-through powerway.

Connections

Straight connection is formed when a harness connector from one powerway attaches to the powerblock of the adjacent powerway.

L-connection is formed when a powerway connector harness turns to the left or right and connects to the powerblock of the adjacent panel.

T-connection is formed by two powerway connector harnesses each turning in the same direction.

X-connection is formed by three powerway connector harnesses each turning in the same direction.

The powerway connector harness comes attached to each powerway and can be removed in the field.

Removing the powerway connector harness and adding it to the opposite end of the powerway powerblock can be used to correct planning and installation oversights.

Powerways include a wire separator to separate data and telecommunication cables from the powerway. For panels without power, there is an option to include a factory-installed wire separator to organize cables. Also, a wire separator can be obtained from Service Parts and can be field installed to panels without powerways.

Wiring & Cabling

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment.

Chicago and San Francisco have special requirements.
▶ Pages 177–179

Powerways are concealed when they are properly installed.

Application Topics

How Connectors Affect Power Flow

▶ Page 55

Steps to Plan an Electrical Network

▶ Page 175

Base Covers and Receptacles

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.
 ▶ See *Avenir Power Component Transition Details* on page 170.

Receptacles are ordered separately and installed in the field in the base cover knockout opening.
 ▶ Specifying, page 223

Openings for receptacles are visually unnoticeable until the knockout is removed.

Knockout can be removed in the field to allow receptacle to be installed.
Tip: Once removed, knockout cannot be replaced; a filler plate must be ordered from Service Parts.

Actual Dimensions

Base cover

Width	17 ³ / ₃₂ " , 23 ³ / ₃₂ " , 29 ³ / ₃₂ " , 35 ³ / ₃₂ " , 41 ³ / ₃₂ " , 47 ³ / ₃₂ " or 59 ²¹ / ₆₄ "
Height	3 ²³ / ₃₂ "

Receptacle opening

Width	2 ³ / ₄ "
Height	1 ³ / ₈ "

Product Details

Base cover is removable to allow access to cavities in panel base. Base cover contains "invisible" knockouts for receptacles.

Receptacles snap into the powerblock in the field.

Base cover has receptacle knockouts. Base covers have a receptacle opening on the left and right side of the base cover.
Exception: 24"W base covers have a receptacle opening in the center of the base trim.

Knockouts cannot be accidentally removed by kicking them or striking them with a vacuum cleaner because the pressure to remove the knockout must be applied from the back of the panel. Once removed, knockout cannot be replaced.

Reusable filler plates are available to replace the knockout or to fill the gap that results when you use a standard-size receptacle in an oversize opening. Filler plates are available through Service Parts.

Receptacles are available in 15-amp and 20-amp versions and are designed to link to a specific circuit. Receptacles are duplex, meaning that they have two outlets.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

Numbers printed on the receptacles indicate the line number. With the 3-circuit, separate neutral system these designations are with letters A, B, or C as compared to 1, 2, 3, or 4 in the other systems.

Label on receptacle indicates which circuit the receptacle connects to, so the user can control which devices are on specific circuits.

Orange triangle indicates to users the receptacles that are connected to isolated grounds. The following receptacles have isolated ground circuits.

3 circuit, separate neutrals

Line C

4 circuit, 3+D

Line 4

4 circuit, 3I+1

Line 1

Line 2

Line 3

4 circuit, 2+2

Line 3

Line 4

Connections

Base covers are attached to panels with concealed clips and are removable.

Wiring & Cabling

Any circuit can be accessed at any receptacle location by using the appropriate receptacle. All five wiring schematics are available.

Tip: All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Cable grommets can be inserted in duplex-size receptacle openings to route cables from the panel base to the worksurface.

Cable knockouts at each end of every base cover allow cables to pass through.

Powerways include a wire separator to separate data and telecommunication cables from the powerway. For panels without power, there is an option to include a factory-installed wire separator to organize cables. Also, a wire separator can be obtained from Service Parts and can be field installed to panels without powerways.

Surface Materials

Base covers

- Paint (standard)

Receptacle

- Plastic

Application Topics

18"W panels accommodate pass-through powerways only, so their base covers do not have receptacle openings.

Receptacle Locations

Straight Non-Tackable and Tackable Acoustical Panels

All panels can be part of a distribution network, but receptacles are available only in the base covers shown below.

18"W panels accommodate pass-through powerways only, so their base covers do not have receptacle openings.

Base covers can be moved to the other side of a panel in the field.

Small increments are added or deducted to the length of a run of panels because of the different ways that panels are connected to each other. The accumulation of these increments is called panel creep.

Deduct $\frac{5}{64}$ " at each panel seam when panels are connected in line.

$$30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + -\frac{5}{64}'' = 121\frac{1}{64}''$$

Add $1\frac{27}{32}$ " each time a perpendicular panel is joined to the end of a panel run with a universal connector.

$$30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + 1\frac{27}{32}'' + 1\frac{27}{32}'' = 124\frac{45}{64}''$$

Add $1\frac{43}{64}$ " each time a perpendicular panel is inserted into a run of panels with universal connectors.

$$30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + 1\frac{27}{32}'' + 1\frac{27}{32}'' + 1\frac{43}{64}'' = 126\frac{29}{64}''$$

Add $2\frac{1}{32}$ " each time a closed-configuration connector is used to join a perpendicular panel at the end of a panel run.

$$30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + 2\frac{1}{32}'' + 2\frac{1}{32}'' = 125\frac{5}{64}''$$

Add $2\frac{1}{16}$ " each time a closed-configuration connector is used to insert a perpendicular panel into a run of panels.

$$30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + 30\frac{5}{16}'' + -\frac{5}{64}'' + -\frac{5}{64}'' + 2\frac{1}{32}'' + 2\frac{1}{32}'' + 2\frac{1}{16}'' = 127\frac{7}{32}''$$

How Panel-Supported Components Fit

Dimensions of panels and panel-supported components, such as worksurfaces, shelves, and overhead storage bins, don't match exactly. Panels are slightly larger to allow for the $\frac{5}{32}$ " overlap of perpendicular panels.

▶ Page 49

Two smaller worksurfaces can fit in the space of a single large worksurface, but a slight gap will result where the worksurfaces meet. For example, two 30"W worksurfaces can be used in place of a single $60\frac{9}{32}$ "W worksurface.

Worksurface fillers can be used to fill in the slight gaps that result in unusual configurations.

Tip: Because of different furniture applications and installation techniques, it is suggested that worksurface fillers be ordered after the worksurface installation.

Corner worksurfaces are never wrapped by panels on both ends, like rectangular worksurfaces. Therefore, they are slightly larger to reduce or eliminate gaps.

How Furniture Relates to Panel Sizes

Solutions to Overhead Storage Problems Caused by PAB2 Brackets

Solutions to Overhead Storage Problems Caused by PAB2 Brackets

PAB2 brackets are used to connect panels of different heights. Because PAB2 brackets occupy a portion of the slotted channel in the taller panel, they prevent overhead storage cabinets and shelves from being attached in some configurations.

► Page 26

When a PAB2 bracket is used to attach a 53"H or 65"H panel to a taller panel, the slotted channel of the taller panel will be partially blocked and prevent the overhead storage component from being attached to the taller panel.

Tip: Mounting overhead storage components higher or lower than the standard height or mounting them on adjacent panels may be an acceptable solution in some installations.

Change-of-height panel connectors can be used instead of PAB2 connectors in many configurations to allow overhead storage components to be attached.

► Page 31

Diagrams below and on the following pages

show how to configure change-of-height installations to avoid blocking the slotted channels. Most use one or more change-of-height panel connectors.

The style numbers are shown under the individual drawings. Some installations also require the special connector bracket. The frames and quantities of all the components needed are listed underneath the round detail drawings.

How Connectors Affect Panel-Supported Components

Panel's ability to support components is directly affected by the way panels are connected. Choose a connector that will accommodate your workstation's needs.

Straight Connections

Universal connectors do not interfere with panel-supported components.

Varying-height connector packages (PAB2) block a portion of the slotted channel on both sides of the taller panel.

L-Connections

Universal connectors do not interfere with panel-supported components.

Closed-configuration connector packages (PAB9) block the slotted channel on one side of the perpendicular panel.

Varying-height connector packages (PAB2) block a portion of the slotted channel on one side of the taller panel.

T-Connections

Universal connectors do not interfere with panel-supported components.

Closed-configuration connector packages (PAB9) block the slotted channel on both sides of the perpendicular panel.

Perpendicular connector packages (PAB4) block the slotted channels of the two in-line panels.

Varying-height perpendicular connector packages (PAB3) block a portion of the slotted channel on one side of each of the taller panels.

X-Connections

Universal connectors do not interfere with panel-supported components.

Perpendicular connector packages (PAB4) block the slotted channels of the two in-line panels.

Varying-height perpendicular connector packages (PAB3) block a portion of the slotted channel on each side of each of the taller panels.

Panel connections affect how power flows through panels. Choose a connector that will accommodate your workstation's needs.

Straight Connections

Universal connectors do not interrupt power flow.

Varying-height connector packages do not interrupt power flow.

L-Connections

Universal connectors do not interrupt power flow.

Closed-configuration connector packages do not interrupt power flow if lap joints and shorter base covers are used. They are available upon request.

Varying-height connector packages do not interrupt power flow.

T-Connections

Universal connectors do not interrupt power flow.

Closed-configuration connector packages do not interrupt power flow if lap joints and shorter base covers are used. They are available upon request.

Perpendicular connector packages disrupt power flow in the perpendicular panel.

Varying-height perpendicular connector packages disrupt power flow in the perpendicular panel.

X-Connections

Universal connectors do not interrupt power flow.

Perpendicular connector packages disrupt power flow in both perpendicular panels.

Varying-height perpendicular connector packages disrupt power flow in both perpendicular panels.

Rules for Panel Stability

Avenir, when properly installed, is designed to be a very stable furniture system. The guidelines presented here are methods that will help you maximize the performance of workstations using panels alone or panel-supported components. To maximize performance and stability, the installation instructions that accompany each furniture should be strictly observed.

An “X” over a drawing means that this application is not recommended.

Panel doors and door frames follow the same stability rules as non-tackable and tackable acoustical panels.

Change of height has no effect on these stability rules.

Rules for Non-Tackable and Tackable Acoustical Panels

Two-Panel Runs

Three-Panel Runs

Unstable. Requires additional support at end of panel run.

Stabilizer feet provide stability at end of panel run.

Perpendicular panel provides stability at end of panel run.

Furniture provides stability at end of panel run.
Tip: Not recommended on 80"H panels in a 12' run.

Four-Panel Runs

Unstable. Requires additional support at end of panel run.

Unstable. Requires a perpendicular panel or furniture as support at end of panel run.

Perpendicular panel provides stability at end of panel run.

Furniture provides stability at end of panel run.
Tip: Not recommended on 80"H panels in a 16' run.

Five-Panel Runs

Unstable. Requires additional support.

Rules for Transparent Panels

Two-Panel Runs

Two transparent panels require additional support.

Two panels are stable if transparent panel is not at end of run.

Stabilizer feet provide stability at end of panel run.

Perpendicular panel provides stability at end of panel run.

Furniture used in front of transparent panels adds stability but blocks the view.

Three-Panel Runs

Unstable. Requires additional support at end of panel run.

Unstable. Requires a perpendicular panel or furniture as support at end of panel run.

Stabilizer feet provide stability if last panel is not a transparent panel.

Straight transparent perpendicular panel provides stability at end of a three-panel run of straight transparent panels.

Tackable acoustical panel provides stability if two transparent panels are not at the end of a run.

Unstable. Two transparent panels require additional support if they're at the end of a three-panel run.

Tackable acoustical panel provides stability if only one transparent panel is at the end of a run.

Furniture provides stability if transparent panel is not at the end of a run.
Tip: Not recommended on 80\"/>

Furniture used in front of transparent panels adds stability but blocks the view.

Four-Panel Runs

Unstable. Transparent panels do not provide stability as a complete panel run.

Perpendicular panel provides stability at end of panel run.

Straight transparent panels can only be used in the first and second positions.

Furniture provides stability at end of panel run.

Straight transparent panels can only be used in the first and second positions.

Unstable. Transparent panel requires additional support at the end of a run.

Unstable. Transparent panel requires additional support at the end of a run.

Rules for Panel Stacker Stability

Avenir, when properly installed, is designed to be a very stable furniture system. The guidelines presented here are methods that will help you maximize the performance of workstations using panels alone or panel-supported components. To maximize performance and stability, the installation instructions that accompany each furniture should be strictly observed.

An “X” over a drawing means that this application is not recommended.

In general, the rules for panel stackers apply the same as if the stacker and base panel were one panel (See Rules for Panel Stability).

Maximum height. Stackers are not designed to go from floor to ceiling. Consult local building codes when stacking above standard panel heights, especially above 72”H.

Rules for Glass and Fabric Panel Stackers

Doors

Unstable. Stackers do not mount above Avenir panel frames with doors.

Unstable. Door cannot be connected to a panel with a stacker.

Freestanding Applications

Unstable. Requires a connection to a perpendicular return stacker or panel for rigidity.

Perpendicular panel provides rigidity at end of stacker run.

Perpendicular panel provides rigidity at end of stacker run.

60”W Stacker Panels

For stackers on panels, minimum of 30”W same height return panels are required.

Rules for Panel Stability with Components*

Rules for Panel Stability
with Components*

Maximum panel stability is always achieved when loads are counterbalanced by similar loads on the opposite side of the panels. The recommendations shown here apply to non-tackable. Components cannot be supported by straight transparent panels.

An "X" over a drawing means that this application is not recommended.

Methods for Stabilizing Panels

60" minimum

Connect to a wall or a perpendicular run of panels at least 60"W.

Stabilizer feet should not be used when panels have panel-supported components.

Connect to perpendicular panels or a worksurface with at least one end panel or clear-access end panel.

Rules for Panel Stability

Panel runs with one panel-supported component per panel require stability every three panels.

Minimum two 18"W panel run-offs

Panel runs with two panel-supported components per panel require stability every two panels.

Minimum two 24"W panel run-offs

Panel runs with two panel-supported components per panel can be extended for three panels, if the center panels only support one component and all loads are counterbalanced.

Tip: Not recommended on 80"H panels in a 16' run.

Tip: Not recommended on 80"H panels in a 16' run.

Fully loaded panels must be counterbalanced. In addition, panel run-offs are required at both ends of the panel.

Minimum two 18"W panel run-offs

Tip: For widths up to 4', a maximum of five shelves or four storage bins per side is allowed.

Tip: For 5' widths, a maximum of four shelves or three storage bins per side is allowed.

Tip: Loading the top of one storage bin per side is allowed.

*Panel components include storage bins, shelves, worksurfaces, and worksurface-supported pedestals.

Transaction Worksurfaces

Avenir Universal Systems Worksurfaces

► Specifying Avenir Universal Systems Worksurfaces, pages 228–240

Cable scallops allow cords and plugs to pass behind the worksurface. An option to omit cable scallops is available.

Worksurfaces are sized to create a 1/2" cord drop gap at the back edges.

Avenir Universal Systems worksurfaces are available in three depths. 18 3/8"D worksurfaces match the depth of Universal proud front storage components. 23 1/2"D and 29 1/2"D worksurfaces match the depth of return panels, end panels, and Universal proud front storage components.

Worksurface has a wood core with laminate surface and is 1 3/16" thick.

Product Details

High-Pressure Laminate Worksurfaces

3 mm edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and 7 woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Spanner worksurfaces with 2" notch accommodate Avenir panels. Legs and cantilevers or adjustable column and cantilevers must be used for support.

Bullet peninsula and jetty worksurfaces require three supports:

- Cantilever
- Side support bracket
- Adjustable column or legs

Edge Profiles

Edge profile is applied to front (user's) edge only.

Visitor worksurfaces must be supported by a cantilever, a side support bracket, and a leg.

Connections

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For panel-supported installations you can use:

- Side support brackets
- Cantilever with tie plate
- End panel
- Support plate
- Adjustable column or legs

▶ See page 76 for *Panel-Mounted Universal Systems Worksurface Supports*.

- Avenir pedestal with filler
- ▶ Page 77

For freestanding installations you can use:

- Post legs
- Double post C-leg
- Adjustable legs
- Adjustable column
- Support plate

▶ See page 78 for

Legs and Supports for Universal Systems Worksurfaces.

Tip: Pedestal can also be used in freestanding installations.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

▶ Page 245

Wiring & Cabling

Worksurface depth is $\frac{1}{2}$ " less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers for use with laminate worksurface must be ordered separately.

▶ Page 224

Corner worksurfaces have scallops located $12\frac{1}{2}$ " from the rear corner of the worksurface to the center of the scallop. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

▶ See *Worksurface Power and Communication in Montage Solutions Specification Guide*.

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Application Topics

Avenir Universal Systems Worksurfaces

follow the same application rules as Avenir curvilinear worksurfaces. Not all installations can be panel wrapped.

- ▶ See *Rules for Using Avenir Universal Systems Worksurfaces with Avenir Panels*, page 74.

Screens mount to work-surfaces in privacy position or below the worksurface for modesty.

- ▶ See *Answer Solutions Specification Guide*.

Worksurfaces used in panel-supported installations

must follow applicable panel stability guidelines.

- ▶ Page 56

Do not use an Avenir Universal Systems Worksurface

as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are sized for Avenir panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

- ▶ See *Storage Specification Guide*.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.

Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

▶ Page 245

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.

Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" ($72" - 6" = 66"$). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left-Hand Support	End Panel	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg-Table Application	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	Intermediate Support	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	DBL Post Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	Cantilever	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	All other Legs/Supports	-6"	-6"	-9"	-9"	-6"	-6"	-6"

Note: Not all supports shown work effectively with this panel system. Please check with your field sales representative for clarification and understanding prior to ordering.

Reinforcing Channel Sizes		
Style Number	Nominal	Actual
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Note: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Support Requirements for Peninsula Worksurfaces

Peninsula worksurfaces smaller than 60"W do not require a reinforcing channel. Location of leg or column support, determined by pilot holes, meets the requirements for worksurface support every 54". Sizes 60"W or greater require a reinforcing channel. Determining brace size for peninsula worksurfaces: worksurface is supported by a single column or legs, subtract 21" from span of worksurface to determine reinforcing channel size. Example: 72"W measured span has a span deduction of 21" for a reinforcing channel size of 51" ($72" - 21" = 51"$). For this application, use reinforcing channel TS7WKSPT51.

Rules for Using Avenir Universal Systems Worksurfaces with Avenir Panels

Perpendicular panels

intrude slightly into the neighboring space. Avenir Universal Systems Worksurfaces are special sizes to align with panel dimensions in typical applications.

► For more information, see understanding Panel Creep, page 49.

Corner and extended corner worksurfaces

fit flush with panels.

The ends of the work surface that are not panel wrapped

can be supported by an end panel or a pedestal with filler.

Any individual work surface

can be wrapped on one side only. To wrap both sides, replace the single work surface with two smaller ones, or use a conventional Avenir work surface.

Tip: In many cases, Universal Systems Worksurfaces that are sized to fit Answer panels will allow this type of application.

► See Answer Solutions Specification Guide.

Panel wrapping

any two worksurfaces in-line is possible because the worksurfaces are sized to account for the exact amount of panel creep occurs.

Transaction worksurface provides a surface that can be used by standing visitors or serve as a shelf.

► Specifying, page 242

Worksurface has a wood core with a laminate surface and is $1\frac{3}{16}$ " thick.

Attachment brackets are included.

Actual Dimensions

A	B
15"	30 $\frac{15}{64}$ "
15"	36 $\frac{15}{64}$ "
15"	42 $\frac{15}{64}$ "
15"	48 $\frac{15}{64}$ "
15"	60 $\frac{15}{64}$ "

Product Details

Laminate Worksurfaces

3 mm edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and 7 woodgrain finishes.

► See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Connections

Transaction worksurface support brackets connect to the vertical upright.

Spanning two panels is possible.

Top view

Width of transaction worksurface is the same width of corresponding panel.

Panels on both sides of the transaction worksurface must be the same height or lower than the panel that supports the transaction worksurface.

Recommended standing height for transaction worksurface is achieved by attaching it to 41"H panels. *Tip: Transaction worksurfaces can only be used with 41"H panels.*

Transaction worksurface must be centered on the panel.

Panel-Mounted Universal Systems Worksurface Supports for Avenir Panel Applications

On-module supports can be used to panel support worksurfaces in various configurations.

Avenir clear-access end panel connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version.
 ▶ Specifying, page 262

Product Details

Avenir end panel can be used to support the end of a worksurface.
 ▶ Specifying, pages 260-261

On-module worksurface supports engage the slots in the vertical uprights of Avenir panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Avenir L-shaped shared cantilever connects to a panel and supports two adjacent worksurfaces.
 ▶ Specifying, page 259

Cantilever can be used to panel-support a worksurface at any height.
 ▶ Specifying, page 243

Rear corner bracket can be used to support the back corner of any corner worksurface.
 ▶ Specifying, page 243

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.
 ▶ Specifying, page 257

Avenir handed cantilever connects to a panel and supports the end of a worksurface. You must order either left- or right-hand version.
 ▶ Specifying, page 258

Actual Dimensions

	Universal cantilever	Avenir cantilever	End panel
Height	12 ¹ / ₄ "	12 ⁵ / ₈ "	28 ¹ / ₂ "*
Depth	15 ¹ / ₂ "	17 ⁵ / ₁₆ ", 23 ¹⁵ / ₁₆ ", or 29 ³ / ₄ "	17 ⁵ / ₁₆ ", 23 ³ / ₄ ", or 29 ³ / ₄ "

*Height dimensions include the thickness of a worksurface.

Single side support bracket can be used to support the rear corner of corner, extended corner worksurfaces.

Single side support bracket can be used to support the user's side rear corner of visitor and jetty worksurfaces.

Left

Shared

Cantilevers support worksurfaces at any height in 1" increments. Universal cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, leg, side support bracket, or an adjacent return worksurface.

Avenir clear-access end panel is an alternative to a cantilever in supporting longer runs of worksurfaces for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Avenir pedestals with a filler can be used to support the end of a worksurface in place of an end panel.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Page 245

Surface Materials

Side support bracket

- Black paint only

Cantilever

Application Topics

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

- ▶ Page 56

Legs and Supports for Avenir Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in free-standing or panel-supported applications.

► Specifying, pages 246-249

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Column is 4" in diameter and can be used as a column support on a single worksurface. Adjustable and non-adjustable versions are available.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Double post C-leg can be used on a single worksurface or in a shared application.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14"D or 20"D and 3¹¹/₁₆"W.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Adjustable-height leg adjusts from 25¹/₂"H to 31¹/₂"H in ³/₄" increments.

Actual Dimensions

	Column	Adjustable column	Double post leg	Post leg	Adjustable-height leg	Double post C-leg	Support plate
Height*	28 ¹ / ₂ "	28 ¹ / ₂ "–31 ⁵ / ₈ "	28 ¹ / ₂ " or 40 ⁷ / ₈ "	26", 28 ¹ / ₂ ", or 40 ⁷ / ₈ "	25 ¹ / ₂ "– 31 ¹ / ₂ "	28 ¹ / ₂ "	N.A.
Glide range, for legs equipped with glides	1 ¹ / ₂ "	3 ¹ / ₈ "	³ / ₄ "	³ / ₄ "	³ / ₄ "	³ / ₄ "	N.A.

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28½"H standard, 40⅞"H standing or 25½"H to 31½"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28½"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, and bullet peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, and bullet peninsula worksurfaces for added stability.

Standing-height post or double post legs can be used as column support in panel-mounted applications only.

Column can be used on spanner, bullet peninsula, linking peninsula, and jetty worksurfaces in panel-supported applications. For freestanding desk applications, column can be used on bullet peninsula and jetty worksurfaces. Adjustable and non-adjustable versions are available.

Column cannot be used in a shared application.

Bottom View
Column

Bottom View
Post Leg

Column is not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25½"H to 31½"H in ¾" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

Worksurface spans greater than 54"

require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 245.

Freestanding Guidelines for Systems Worksurfaces

- ▶ Pages 80-81

Freestanding Guidelines for Systems Worksurfaces

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations.

There are several ways to support the ends of a freestanding worksurface:

With single post legs or single post legs with casters. Nesting post legs can also be used.

With a double post C-leg.

With adjustable-height legs.

With a pedestal. Other storage products can be used. Counterweights are required in each pedestal or lateral file in a freestanding desk unless the desk is attached to another worksurface in an L-configuration.

Double post C-legs can be used on a single worksurface or in a shared application.

Tie plate is recommended to align worksurfaces.

48"W corner worksurface can be used in freestanding applications; however, it must be supported by adjacent worksurfaces on both sides.

18"D straight and transition worksurfaces must be connected to an adjacent worksurface for additional support.

Combined worksurfaces can give each other support when joined with a double post leg and support plate. Use 14"D support plate on 18"D and 24"D worksurfaces and 20"D support plate on 30"D worksurface. Tie plate is recommended to align the worksurfaces.

Double post C-leg can be used to support a corner or extended corner worksurface and adjacent worksurfaces.

Double post C-leg can be used to support an extended corner worksurface and adjacent worksurfaces.

Transaction Worksurfaces

1³/₁₆"-Thick

Transaction worksur-
faces provide a surface
that can be used by standing
visitors or serve as a shelf.
▶ Specifying, page 252

Worksurface has a
wood core with a laminate
surface.

**Plastic radius T-mold
edge** is located on the front
and back.

Plastic edge is located on
the sides of the worksurfaces.

Support brackets attach
the transaction worksurface
to a panel.

Actual Dimensions

Depth	16 ⁵ / ₈ "
Width	30 ¹ / ₄ ", 36 ¹ / ₄ ", 42 ¹ / ₄ ", 48 ¹ / ₄ ", or 60 ¹⁵ / ₃₂ "
Thickness	1 ³ / ₁₆ "

Connections

Supports, included, attach
transaction worksurface to
any panel. The worksurface
may be panel wrapped by a
higher panel on one or both
sides.

Perpendicular panels
cannot be higher than the
transaction worksurface.

Recommended stand-
ing height (42¹/₂"H) for
transaction worksurfaces is
achieved by attaching them
to 41"H panels.

Tip: Transaction worksur-
faces can only be used with
41"H panels.

Panel top caps remain
in place beneath the trans-
action worksurfaces. Two
support bracket types are
available—one for use with
low top caps and one for
medium top caps. Trans-
action worksurfaces cannot
be attached to panels with
high top caps.

Wiring & Cabling

Cable routing through medium top caps is not impaired.

Examples:

Corner Worksurfaces

1 1/2"-Thick

Curvilinear worksurfaces

are available to allow a broader range of workstation layouts with Avenir.

► Specifying, pages 253 and 257-261

Worksurface has a wood core with a laminate surface.

Plastic straight edge is located on the back and sides of the worksurface.

Rear corner bracket is included with corner worksurfaces to support back corner.

Cable scallops are included to allow cords and cables to pass behind the worksurface.

Radius edge is located on the user's front edge of the worksurface. This edge is a plastic T-mold.

Additional supports are available and must be ordered separately.

Product Details

1 1/2"-thick straight Avenir worksurfaces with radius edge can be used with curvilinear worksurfaces. Fit between worksurfaces will not be snug.

Tip: Avenir non-curvilinear worksurfaces have a laminate edge and curvilinear worksurfaces have a T-mold edge.

User's edge(s) of the worksurface are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Color of these edges must be specified separately, unlike the edges of other Avenir worksurfaces which are defaults determined by the laminate color that you select.

► See page 323 for a list of suggested plastic T-mold edge colors.

Plastic edge finishes the sides and back of worksurfaces. The color of these edges are determined by the laminate color you select.

► See page 323 for a list of default plastic edge colors.

Articulated keyboard shelf can be installed beneath curvilinear worksurfaces.

Field-installed center drawer can be installed beneath curvilinear worksurfaces wherever space permits—requires 19 1/2"D x 21"W.

Actual Dimensions

Connections

Straight segment of extended corner worksurface varies depending on worksurface size. Refer to the following chart to determine if one or more pedestals will fit. When straight segment is 15"W, it can accommodate a pedestal without the curved portions of the user's edge of the worksurface overhanging the pedestal. 30"W straight segment will accommodate two pedestals side by side.

A	B	C	D	E
24"	24"	60"	48"	18 ²⁹ / ₆₄ "
30"	30"	60"	48"	12 ²⁹ / ₆₄ "
24"	30"	60"	48"	12 ²⁹ / ₆₄ "
30"	24"	60"	48"	18 ²⁹ / ₆₄ "
24"	24"	72"	48"	30 ²⁹ / ₆₄ "
30"	30"	72"	48"	24 ²⁹ / ₆₄ "
24"	30"	72"	48"	24 ²⁹ / ₆₄ "
30"	24"	72"	48"	30 ²⁹ / ₆₄ "

Tip: Illustration and dimensions show left-hand unit. Right-hand units have the same dimensions.

End panel connects to a panel and supports either a left- or right-hand end of a worksurface at 28½"H.

Cantilever connects to a panel and supports the end of a worksurface. You must order either the left- or right-hand version. Triangular-shaped cantilever can also be used to support curvilinear worksurfaces.

Shared cantilever connects to a panel and supports two adjacent worksurfaces. Triangular-shaped shared cantilever can also be used to support curvilinear worksurfaces.

Side-support brackets can be used to support the ends of worksurfaces when they are wrapped by panels with a width dimension that matches the Worksurfaces depth. Side-support brackets are shipped in pairs. ▶ See *Rules for Using Curvilinear Worksurfaces with Avenir Panels*, page 88

Center support is included and must be used to provide additional support for worksurfaces wider than 60".

Wiring & Cabling

Cable scallops are included in the back edges of these worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a 3/16" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

Surface Materials

Directional laminates and wood veneer are not available on curvilinear worksurfaces.

Straight Curvilinear Worksurfaces

1 1/2"-Thick

Curvilinear worksurfaces

are available to allow a broader range of workstation layouts with Avenir.

► Specifying, pages 254 and 257-261

Worksurface has a wood core with a laminate surface.

Product Details

1 1/2"-thick Avenir worksurfaces with radius edge

can be used with curvilinear worksurfaces. Fit between worksurfaces will not be snug.

Tip: Avenir non-curvilinear worksurfaces have a laminate edge and curvilinear worksurfaces have a T-mold edge.

User's edge(s) of the worksurface are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Color of these edges must be specified separately, unlike the edges of other Avenir worksurfaces which are defaults determined by the laminate color that you select.

► See page 323 for a list of suggested plastic T-mold edge colors.

Plastic edge finishes the sides and back of worksurfaces. The color of these edges are determined by the laminate color you select.

► See page 323 for a list of default plastic edge colors.

Field-installed center drawer

can be installed beneath curvilinear worksurfaces wherever space permits—requires 19 1/2"D x 21"W.

Actual Dimensions

Connections

Pedestals are available to support the end of a straight worksurface. They can be used at either end and will support these worksurfaces at 28½"H.

▶ Page 120

End panel connects to a panel and supports either a left- or right-hand end of a worksurface at 28½"H.

Cantilever connects to a panel and supports the end of a worksurface. You must order either the left- or right-hand version. Triangular-shaped cantilever can also be used to support curvilinear worksurfaces.

Shared cantilever connects to a panel and supports two adjacent worksurfaces. Triangular-shaped shared cantilever can also be used to support curvilinear worksurfaces.

Side-support brackets can be used to support the ends of worksurfaces when they are wrapped by panels with a width dimension that matches the Worksurfaces depth. Side-support brackets are shipped in pairs.

▶ See *Rules for Using Curvilinear Worksurfaces with Avenir Panels*, page 88

Side support bracket is included and must be used to provide additional support for worksurfaces wider than 60".

Wiring & Cabling

Cable scallops are included in the back edges of these worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a 3/16" gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Worksurface edges that are 66"W or wider have two scallops. Scallops are located 20" from the center of the scallop to the ends of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

Surface Materials

Directional laminates and wood veneer are not available on curvilinear worksurfaces.

Worksurface

- Laminate (standard)
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates that are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

User's edge(s)

- Plastic T-mold
- Tip: The color of these edges must be specified separately.*
- ▶ See page 323 for a list of suggested plastic T-mold edge colors.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood worksurfaces cannot be palletized.

Jetty Curvilinear Worksurfaces

1 1/2"-Thick

Curvilinear worksurfaces are available to allow a broader range of workstation layouts with Avenir.
▶ Specifying, page 256

Additional supports are available and must be ordered separately.

Worksurface has a wood core with a laminate surface.

Radius edge is located on the user's front edge of the worksurface. This edge is a plastic T-mold.

Plastic straight edge is located on the back and sides of the worksurface.

Cable scallops are included to allow cords and cables to pass behind the worksurface.

Column base is included with the worksurface. It adjusts from 26 1/8"H to 30 1/8"H to accommodate uneven floors.

Product Details

1 1/2"-thick Avenir worksurfaces with radius edge can be used with curvilinear worksurfaces. Fit between worksurfaces will not be snug.
Tip: Avenir non-curvilinear worksurfaces have a laminate edge and curvilinear worksurfaces have a T-mold edge.

User's edge(s) of the worksurface are finished with a plastic T-mold radius edge detail that can be specified to match or contrast with the laminate worksurface. Color of these edges must be specified separately, unlike the edges of other Avenir worksurfaces which are defaults determined by the laminate color that you select.
▶ See page 323 for a list of suggested plastic T-mold edge colors.

Plastic edge finishes the sides and back of worksurfaces. The color of these edges are determined by the laminate color you select.
▶ See page 323 for a list of default plastic edge colors.

Field-installed center drawer can be installed beneath curvilinear worksurfaces wherever space permits—requires 19 1/2"D x 21"W.

Actual Dimensions

Connections

Shared cantilever connects to a panel and supports two adjacent worksurfaces. Triangular-shaped shared cantilever can also be used to support curvilinear worksurfaces.

Pedestals should not be installed below jetty worksurfaces. Use adjacent worksurfaces instead.

Wiring & Cabling

Cable scallops are included in the back edges of these worksurfaces to provide space for plugs to pass over the back edge of the worksurface.

Worksurfaces are installed with a $\frac{3}{16}$ " gap separating the back of the worksurface from the supporting panels. This small space permits cord movement. Worksurface supports have stop tabs to ensure proper installation.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

Surface Materials

Directional laminates and wood veneer are not available on curvilinear worksurfaces.

For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood worksurfaces cannot be palletized.

Worksurface Supports

Side Support

► Specifying, page 257

Product Details

Side supports hold up a straight worksurface that is the same dimension as the panel it is linked to.

Panel width must equal the worksurface depth.

Side supports are ordered separately.

Connections

Side supports can be used to support Avenir worksurfaces.

Side supports hook into the panel at any height and fasten to the worksurface with screws.

One pair of side supports is used to support the front and the back of the work surface on the same end. You can use an alternative support at the other end of the worksurface.

Surface Materials

Side support

- Grey V2 paint only

Locking Side Support

► Specifying, page 257

Product Details

Locking side supports attach the worksurface to a panel when the worksurface is not panel wrapped and is supported by a pedestal on the opposite end.

Locking side supports are ordered separately.

Connections

Locking side supports can be used to support Avenir worksurfaces.

Locking side support hooks into a panel and fastens to the worksurface with screws.

Surface Materials

Locking side support

- Black paint only

L-Shaped Cantilevers

► Specifying, page 258

Actual Dimensions	
Depth	17 ¹⁵ / ₁₆ " , 23 ¹⁵ / ₁₆ " , or 29 ⁷ / ₈ "
Width (thickness)	3/4"
Height	12 ⁵ / ₈ "

Product Details

Cantilevers support work-surfaces and leave the floor unobstructed.

Cantilevers are ordered separately.

Return panel must be the same width as the work-sur-face depth. Side supports must be used.

Connections

Cantilevers can be used to support Avenir work-surfaces.

Cantilever hooks into a panel at any height and fas-tens to the work-surface with screws.

Cantilever depth must correspond with the depth of the work-surface.

Spring-activated safety catch automatically locks the work-surface supports onto the panel to secure the work-surface.

Cantilever-to-cantilever clamp is used to align side-by-side work-sur-faces of the same height that are supported by a pair of cantilevers.

Change-of-height can-tilever-to-cantilever clamp aligns work-sur-faces at different heights that are supported by cantilevers. Change of height is three inches.

Surface Materials

Cantilever
• Paint

Cantilever-to-cantilever clamp
• Black paint only

Application Topics

Alternative work-sur-face supports can be used at the opposite end of the work-surface.

30"D work-sur-faces cannot be supported by two cantilevers. Support one end with side support, end panel, clear-access end panel, or a ped-estal to achieve adequate stability.

Corner Worksurfaces

► Page 90

Triangular-Shaped Cantilevers

► Specifying, page 258

Product Details

Cantilevers support worksurfaces and leave the floor unobstructed.

Cantilevers can be used on all Avenir worksurfaces. They must be ordered separately.

Return panel must be the same width as the work surface depth. Side supports must be used.

All cantilevers are ordered separately.

Connections

Cantilever hooks into a panel at any height and fastens to the worksurface with screws.

Cantilever can be used on 18\"/>

Safety catch locks the worksurface supports onto the panel to secure the worksurface.

Non-handed so it can accommodate left- and right-hand applications.

Tie plate is used to align side-by-side worksurfaces of the same height that are supported by a pair of cantilevers.

Surface Materials

Cantilever

- Paint

Tie plate

- Grotto paint only

Application Topics

Alternative worksurface supports can be used at the opposite end of the worksurface.

30\"/>

Support one end with side support, end panel, clear-access end panel, or a pedestal to achieve adequate stability.

Corner Worksurfaces

► Page 90

Actual Dimensions

Depth	16"
Width (thickness)	1"
Height	12"

L-Shaped Shared Cantilevers

► Specifying, page 259

Actual Dimensions

Depth	8 ⁹ / ₁₆ " or 14 ⁹ / ₁₆ "
Height	12 ⁹ / ₁₆ "
Support plate	14"D x 3 ¹ / ₁₆ "W

Product Details

Shared cantilevers support adjacent worksurfaces at the same height.

Two versions of the shared cantilever are available for 24"D and 30"D worksurfaces.

Shared cantilevers are ordered separately.

Connections

Shared cantilever can be used to support other Avenir worksurfaces.

Shared cantilever hooks into a panel at any height and fastens to the worksurface with screws.

Spring-activated safety catch automatically locks the worksurface supports onto the panel to secure the worksurface.

Surface Materials

Shared cantilever

- Paint

Support plate

- Black paint only

Application Topics

Corner Worksurfaces

Triangular-Shaped Shared Cantilever

► Specifying, page 259

Actual Dimensions

Depth	16"
Height	12"
Top plate depth	11 ³ / ₄ "
Top plate width	4 ¹ / ₂ "

Product Details

Cantilevers support two adjacent worksurfaces and leave the floor unobstructed.

Cantilevers can be used on all Avenir worksurfaces and curvilinear worksurfaces.

Connections

Cantilever hooks into a panel at any height and fastens to the worksurfaces with screws.

Alignment plate is included to join adjacent worksurfaces at the same level.

Cantilever can be used on 18"D, 24"D, and 30"D worksurfaces.

Worksurface supports lock onto the panel to secure the worksurface.

Surface Materials

Shared cantilever

- Paint

Alignment plate

- Grotto paint only

Support Plates

► Specifying, page 259

Actual Dimensions

Depth	14", 20", or 25 ¹⁵ / ₁₆ "
Width	3 ¹ / ₁₆ "

Product Details

Support plate joins worksurfaces at the same height and allows adjacent worksurfaces to provide support at a 90° angle.

Three support plate sizes are available to correspond with the three worksurface depths. Each plate is 4" less deep than the worksurface depth: 14"D on an 18"D worksurface, 20"D on a 24"D worksurface, and 25¹⁵/₁₆"D on a 30"D worksurface.

Support plates are ordered separately.

Connections

Support plates can be used to support 1½"-thick worksurfaces.

Support plate attaches to adjacent worksurface with screws.

Surface Materials

Support plate

- Black paint only

Application Topics

Adjacent worksurface must be supported at both ends.

End Panels with Base

► Specifying, page 260

Actual Dimensions

Depth	18", 24", or 30"
Width (thickness)	1 ⁵ / ₁₆ "
Height	27"
Leveling glide range	1"

Product Details

End panels support 1½"-thick worksurfaces at an overall height of 28½".

End panels are ordered separately.

Connections

End panels can be used to support 1½"-thick worksurfaces.

Panel-attachment hardware is fastened to the end panel in the field to accommodate left- or right-hand applications. They are not freestanding units.

End panel hooks into the panel and fastens to the worksurface with screws.

Surface Materials

End panel

- Paint

Leveling glides

- Black only

End Panels without Base

► Specifying, page 260

Actual Dimensions

Depth	24" or 30"
Width (thickness)	1"
Height	27"
Leveling glide range	1"

Product Details

End panels without base support 1 1/2"-thick worksurfaces at an overall height of 28 1/2".

End panels are ordered separately.

Connections

Panel-attachment hardware is fastened to the end panel in the field to accommodate either left- or right-hand applications, but should not be used to support both. They are not freestanding units.

End panel hooks into the panel and fastens to the worksurface with screws.

Surface Materials

End panel

- Paint

Leveling glides

- Black only

Floor-Support End Panels

Attachment hardware engages slotted channel in panel seam.

Adjustable-height base accommodates worksurface heights from 25"H to 28 3/4"H.

► Specifying, page 261

Actual Dimensions

Depth	24" or 30"
Width (thickness)	1 5/16"
Height	25" to 28 3/4"
Leveling glide range	1/4"

Product Details

Left- and right-hand versions of the floor-support end panels are available.

Depth of floor-support end panel corresponds to either 24"D or 30"D worksurfaces.

Surface Materials

End panel

- Paint

Leveling glides

- Black only

Clear-Access End Panels

Right- and left-hand versions of the clear-access end panel are available.

► Specifying, page 262

Actual Dimensions

Depth 24" or 30"

Width (thickness) 1⁵/₁₆"

Height 26¹/₄" to 29³/₄"

Leveling glide range ¼"

Product Details

Clear-access end panel supports a worksurface and provides kneespace.

Clear-access end panels provide more support and stability than cantilevers, but still allow users to swivel their chairs without running into the worksurface supports.

Clear-access end panels are ordered separately.

Connections

Clear-access end panels can be used to support 1½"-thick worksurfaces.

Clear-access end panels hook into the panel and fasten to the worksurface with screws. They are not freestanding units.

Spring-activated safety catch automatically locks the worksurface supports onto the panel to secure the worksurface.

Surface Materials

Clear-access end panel

- Paint

Leveling glides

- Black only

End Panel Stabilizer Bracket

► Specifying, page 264

Application

Use to stabilize the 90° connection between the end panel and the worksurface when the end panel doesn't meet a panel seam.

End panel stabilizer bracket is available in left- and right-hand versions.

Connections

Connects with screws to the underside of the worksurface and the inside of the end panel.

Surface Materials

Bracket

- Black paint only

Specifying

Must be ordered separately.

Worksurface Accessories

Metal Center Drawers

► Specifying, page 265

Product Details

Metal center drawer provides convenient personal storage beneath the worksurface.

Tray for pencils and paper clips is included.

Locks are not available on center drawers. For secure storage, use pedestals and other lower storage with locks.

Connections

Fits on all 24"D and 30"D panel-supported worksurfaces and 24"D, 30"D, and 36"D desks.
Tip: 24"D desk can only use the 18¹/₈"D center drawer.

Installation is in the field.

Drawer frame and attaching hardware are included for field installation.

Wiring & Cabling

Grommets cannot be used over center drawers.
► Page 106

Surface Materials

Center drawer

- Paint

Tip: Drawer will match the color of the supports. If you want a complementary color, you should order the drawer separately for field installation.

Application Topics

Drawer should be placed approximately 4" from the left or right end to allow for the attachment of cantilevers or end panels.

Kneespace clearance needed is 23"W.

Actual Dimensions

Depth	18 ¹ / ₈ " or 23"
Inside depth	14 ¹ / ₂ " or 19 ¹ / ₂ "
Width	21 ¹ / ₂ "
Inside width	19 ¹ / ₂ "
Height	2 ³ / ₈ "
Inside height	2"

Worksurface Fillers

► Specifying, page 251

Product Details

Worksurface fillers are used to fill in the slight gaps that may result when worksurfaces are connected in perpendicular or straight-line applications.

Connections

Worksurface fillers are available for use with 1 1/2"-thick worksurfaces.

Perpendicular configurations require a worksurface filler that conforms to a radius worksurface edge on one side and a straight worksurface edge on the other side.

Straight-line configurations require a worksurface filler that accommodates straight worksurface edges on both sides.

Worksurface filler sizes are available to correspond with worksurface depths.

Surface Materials

Worksurface filler, 1 1/2"-thick

- Plastic
- Page 320

Application Topics

Order worksurface fillers after the worksurface installation because different furniture applications and installation techniques may not require a worksurface filler or worksurface filler may not fit.

How Panel-Supported Components Fit

- Page 50

Actual Dimensions

Depth 24" or 30"

Width 5/16"

Height 1 1/2"

Grommets

Product Details

Grommets are factory installed to allow cords and cables to pass through the worksurface.

Snap-out cover allows numerous cords and cables to pass through the worksurface. Three-prong plugs will fit through the opening. The cover holds cords in place when replaced.

Surface Materials

Grommet

- Plastic

Tip: If a plastic color is not specified, 6000 Black will be provided.

▶ Page 320

Application Topics

Center drawers will block access to grommets, so avoid specifying center grommets when installing center drawers.

Pedestals will block access to some grommets, so avoid left and right grommets when specifying worksurfaces that will have pedestals installed beneath the grommets.

Grommet Locations

▶ Page 107

Center Drawer Fit and Grommet Obstruction

Power and Communication Spheres and Port

Power and communication spheres and port

provide convenient desktop access to power outlets and data jacks. Spheres and ports are field installed only.

Power spheres have four electrical outlets and two 6' cords with plug or conduit for hardwired applications.

► Specifying, page 268

Power and communication spheres provide two electrical outlets, faceplates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.

► Specifying, page 268

Communication sphere includes faceplate for two customer-supplied voice/data jacks.

► Specifying, page 269

Power and communication port has a low-profile cover that is almost flush with worksurface.

► Specifying, page 269

Power and communication port includes two outlets and two adapters to accommodate customer supplied standard voice/data jacks.

Power and Communication Spheres and Port, continued

Product Details

Power and communication spheres are field installed. Use a 3"-diameter drill to cut mounting hole at desired location.

Round power and communication port contains an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear. ▶ Specifying, page 269

Port is field installed. Use a 3½"-diameter drill to cut mounting hole at desired location.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use, and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Hardwired version of power and communication sphere is available with 6' Greenfield conduit. *Tip: Hardwiring must be done by a licensed electrician.*

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power spheres, communication spheres, and round power and communication port
• Black plastic only

Cable and Fiber Reel

Cable and fiber reel is available to store excess fiber-optic cable lengths. It is also suitable for storing power cables.

► Specifying, page 266

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Actual Dimensions

Depth	1¼"
Width	8"
Height	8 ⁵ / ₁₆ "

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the knee space of panel-supported worksurfaces.

Wiring & Cabling

Chicago, New York, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Reel

- Black plastic only

Termination Plate

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.

► Specifying, page 266

Bracket allows termination plate to be connected to worksurface.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Opening provides access to termination device.

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Wiring & Cabling

Chicago, New York, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Termination plate

- Black plastic only

Pedestals with Avenir Pulls

Fixed pedestals rest on the floor and support all rectangular worksurfaces.
 ▶ Specifying, page 272

Mobile pedestals fit under a worksurface or can be moved wherever storage is needed.
 ▶ Specifying, page 274

Top is 1/8"H steel. Additional top options are available.

Lock is standard on all pedestals. It controls all of the drawers in the pedestal. Locks are standard factory-installed, keyed random.
 ▶ *Lock and Keying*, page 334

Four casters are hard composition and non-locking, with a full rotation swivel mechanism. Casters are exposed at the base of box/file pedestals.

Top is open to attach beneath the worksurface.

Worksurface-supported pedestals attach beneath all Avenir 1 1/2"-thick worksurfaces.
 ▶ Specifying, page 273

Drawers open their full depth for total access to the contents. Box- and file-size drawers are available.

Back and sides are finished.

Leveling glides adjust to install pedestals on uneven floors.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Handle can be extended to easily transport mobile pedestal. Available factory-installed.
 ▶ Page 276

Product Details

Steelcase 730 Series storage cabinets are available with an Avenir-style pull to make these products compatible with Avenir. The Avenir-style pull complements the Avenir pull, but it is not identical. The Avenir-style pull is flush so it will allow the lateral file receding door to go back into the file.

Box drawers are a welded steel construction with proud fronts. One divider is included with each box drawer.

File drawers are a welded steel construction with proud fronts. Drawer body sides are full-height and accommodate front-to-back filing of hanging letter-size file folders. Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders.

Actual Dimensions

	Fixed pedestal	Worksurface-supported pedestal	Mobile pedestal	Mobile pedestal with factory-installed cushion top
Depth	23 1/2" or 29 1/2"	23 1/2" or 28 1/2"	23 1/2"	23 1/2"
Width	15"	15"	15"	15"
Height	27"	18 1/2"	21"	23 1/4"
Leveling glide range	1 7/8"	N.A.	N.A.	N.A.

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Pencil tray to hold small office supplies is included with each box/file or box/box/file pedestal.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 334

Individual drawer locks

are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 334

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops, 1 3/16"H laminate with square edge profile, 1 7/16"H laminate with bullnose edge profile on the front edge, and 1 3/16"H wood veneer with square edge profile.

Safety interlock system on mobile pedestals allows only one drawer to be opened at a time for added stability.

Counterweights are included on mobile pedestals to provide added stability. All pedestals are shipped with a factory-installed counterweight package that meets or exceeds standards for the industry.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, the handle is completely extended and articulates upward for transport.

Field-installed accessories are available, including pencil trays, dividers, and rails. ▶ Pages 277-278

Connections

Fixed pedestals attach anywhere underneath a rectangular worksurface. They cannot attach to panel-supported tables. Attachment hardware is shipped with each fixed pedestal.

Worksurface-supported pedestals can be suspended beneath panel-supported 1 1/2" thick worksurface. Order pedestals separately and install them in the field.

Side supports are not required when pedestals support the worksurface.

A 1/2" gap between the panel and the back of the pedestal allows for cord routing and storage behind the pedestal.

A filler is included with each pedestal to conceal the gap and to provide panel stability for configurations that are not panel-wrapped. *Tip: The filler can be omitted for applications where the gap is not visible, or additional panel stability is not required.*

Wiring & Cabling

Left and right grommet locations are blocked when pedestals are installed under them. ▶ Page 110

Accessories for Pedestals

Pencil Tray and Reference Shelf

► Specifying, page 278

Product Details

Pencil tray and reference shelf are used in:

- Fixed pedestals (manufactured after February 22, 2004)
- Worksurface-supported pedestals (manufactured after February 22, 2004)
- Mobile pedestals (manufactured after February 22, 2004)

Tip: For pedestals manufactured on or before February 22, 2004, see Service Parts catalog.

- Universal towers
- Universal workstation verticals

Pencil tray is available to hold small office supplies.

Tip: Pencil trays are standard in box drawers of pedestals. One pencil tray per pedestal is included.

Reference shelf protects reference papers in box drawers. Shelf rests on top of drawer edges and can slide the entire depth of the drawer. A clear plastic insert is standard with each reference shelf.

Rails

► Specifying, page 277

Product Details

Rails accommodate both front-to-back and side-to-side filing of letter-, A4 international-, and legal-size hanging folders.

Rail packages are available in quantities of two or four rails.

Rails can be used for side-to-side filing in 12"H file drawers of:

- Fixed pedestals (manufactured after February 22, 2004)
- Worksurface-supported pedestals (manufactured after February 22, 2004)
- Mobile pedestals (manufactured after February 22, 2004)

Universal Sliding Door Bins

For Use with Avenir

Universal sliding door bins attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.
 ▶ Specifying, pages 279-281

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Metal backstop prevents notebooks and equipment from damaging panel surface.

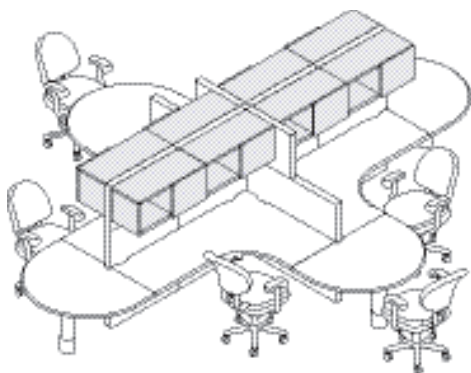

Bin ships assembled.

Steel, laminate, and wood front doors glide smoothly from one side of the case to the other.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.
 ▶ *Lock and Keying*, page 334

Recess beneath unit can accommodate a shelf light.
 ▶ Page 152

Actual Dimensions

Depth	15 ³ / ₄ "
Width	36", 42", 48", 60", 66", and 72"
Height	16 ¹ / ₄ "

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Upmount brackets, optional, are for use on Answer, Kick, Avenir, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side-by-side in an in-line, T- or X- application. Universal in the case bins can be up-mounted over or adjacent to a slatwall.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Universal sliding door bin may be mounted at desk height elevations or lower if another panel mounted component prevents it from being seated upon.

Lock in bin is concealed from view beneath the shelf. Locks are available factory or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 334

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► Page 152

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.

Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.
▶ Page 143

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".
▶ Page 143

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Universal Over the Case Bins

For Use with Avenir

Universal over the case bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.

► Specifying, pages 282–289

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.

► *Lock and Keying*, page 334

Recess beneath unit can accommodate a shelf light.

► Page 152

Product Details

On-module attachment brackets

are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:

TAK = Answer and Kick

AVR = Avenir

MON = Montage

If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets

, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets

are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", 66", and 72"

Height 16¹/₄"

Upmount brackets are optional for use on Answer, Kick, Avenir, and Montage. Brackets attach the bin near the top of 53"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side by side in an in-line, T- or X-application. Universal over the case bins can be upmounted over or adjacent to a slatwall.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin.

The weight of a custom insert on a Universal over the case bin can not exceed 10½ pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of 7¼ pounds to 10½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes.

Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.
▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 131

Door assist mechanism, optional, consists of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal over the case bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 334

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

▶ Page 152

Divider is available as an option on overhead bins. Dividers ship in a package of four.

▶ Page 144

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number. *Tip: Select the omit brackets option when ordering the bin.*

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. ▶ Page 143

66"	33" (per door)	15.933"	32.314"	0.138"
70"	35" (per door)	15.933"	34.314"	0.138"
72"	36" (per door)	15.933"	35.314"	0.138"
75"	37½" (per door)	15.933"	36.314"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal In the Case Bins

For Use with Avenir

Universal in the case bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.
 ▶ Specifying, pages 284–288

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Flat-front lift-up doors (steel, laminate, or wood) recess into the overhead storage bin.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.
 ▶ *Lock and Keying*, page 334

Recess beneath unit can accommodate a shelf light.

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:
TAK = Answer and Kick
AVR = Avenir
MON = Montage
 If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	15¾"
Width	24", 30", 36", 42", 48", 60", 66", and 72"
Height	16¼"

Upmount brackets, optional, are for use on Answer, Kick, Avenir, and Montage. Brackets attach the bin near the top of 53"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side-by-side in an in-line, T- or X- application. Universal in the case bins can be upmounted over or adjacent to a slatwall.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal in the case bin can not exceed 9½ pounds. An insert for a Universal in the case storage bin door with an assist mechanism must weigh within the range of 5½ pounds to 9½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix. ▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 135

Door-assist mechanism, optional, consists of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal in the case bins ship with one assist mechanism per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 334

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit. ▶ Page 152

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Additional support for stability may be required when overhead bins are attached to panels. Counterbalancing loads on opposite sides of the panels increases stability.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.

Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. ▶ Page 143

75"	37½" (per door)	15.000"	36.664"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Hutch Kits

Hutch kits allow one Universal sliding door, or in the case bin to be mounted above a desk or credenza, to provide privacy and overhead storage. A hutch kit includes two end supports, a back panel for the bin, an accessory rail, a double-sided tackboard, one cable manager, and attachment hardware.
 ▶ Specifying, page 290

Bins are sold separately. Any Universal sliding door, over the case, or in the case bin can be used. Select the omit brackets option when ordering the bin.

Painted steel back panel encloses the storage bin so the hutch does not need to be panel wrapped.

Double-sided tackboard can be ordered with matching or contrasting fabrics.

Accessory rail accepts the hutch kit receptacle, selected worktools, and the dividers that are an option to the storage bin.

End panels support the storage bins and are attached to the worksurface with screws.

1 1/2" gap below the accessory rail allows plugs and cords to be routed between the rail and the worksurface. A painted metal access cover slides up and down to allow plugs to pass through without creating a large visible gap.

Actual Dimensions

Depth	14 ⁷ / ₈ "
Width	48", 60", 66", or 72"
Height	21 ¹ / ₈ "

Product Details

Double-sided tackboards are standard with hutch kits. They divide space, increase privacy, and provide a display surface.

Accessory rail accepts the dividers that are available as an option to the storage bin and the hutch kit receptacle. The rail also accepts selected worktools. A 1½" gap below the accessory rail allows plugs and cords to be routed between the rail and the worksurface. A painted metal access cover slides up and down to allow plugs to pass through without creating a large visible gap.

Power receptacles are available for field installation on the accessory rail, providing access to power at worksurface height.

Connections

Hutches can be used on full-depth corner and extended corner worksurfaces.

Hutch end supports attach to the worksurface using screws that are shipped with the hutch kit.

Hutch connector bracket is available to connect two or more hutch kits side by side.
 ▶ See *Desk Stability Guidelines* in the *Answer Solutions Specification Guide*.

Shelf lights are available to recess into the bottom of storage bins.

Wiring & Cabling

Light cords can be routed through a hutch vertical cable manager, and then through the gap between the accessory rail and the worksurface. One non-handed, painted steel vertical cable manager is shipped with each hutch kit. Additional cable managers ordered separately, are available.

Surface Materials

End supports, back panel, vertical cable manager, and accessory rail
 • Paint

Tackboard
 • Vertical surface fabric

Power receptacle
 • Black plastic only

Pricing

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Application Topics

Clearance between the worksurface and the bin is 21⅞".

Hutch end panels must be located immediately above a floor support that stabilizes the front and back edges of the worksurface, such as a pedestal, an end support, or a pair of legs.

Steelcase Worktools are available for use on accessory rail including letter tray, pencil cup, double square cup, shallow dish, office in a file, mini shelf, personal shelf, and slatshelves. For product information, see *Steelcase Worktools Specification Guide*.

Shipping

Hutch kits are assembled in the field.

Universal Shelves and Universal Personal Shelves

Universal shelves—supported by Answer, Kick, Avenir, and Montage—provide overhead storage in the work space.
 ▶ Specifying, page 293

Universal personal shelves provide a wall-supported surface that attaches to Answer, Kick, and Avenir.
 ▶ Specifying, page 294

Metal backstop on Universal shelves prevents notebooks and equipment from damaging panel surface. Universal personal shelves do not have a backstop.

On-module attachment hooks are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Product Details

Shelf lights are available for use beneath shelves. Lights recess into the bottom of the overhead storage unit.
 ▶ Page 152

Dividers are available field installed for use on Universal shelves. Dividers ship in a package of four. Dividers cannot attach to Universal personal shelves.

A 1½" gap exists between the personal shelf and the panel to allow for cable routing.

The height dimension of the bracket (from top of personal shelf to the bottom of the bracket) is 6½"H.

Actual Dimensions

	Universal shelves	Universal personal shelves
Depth	14¾"	13¹¹⁄₁₆"
Width	24", 30", 36", 42", 48", 60", and 72"	24", 30", 36", 42", and 48"
Height	7½" (Kick, Answer, and Avenir)	1¹¹⁄₁₆" (thickness of shelf)

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Wall channels are available to attach shelves to concrete or block walls. Wall channels can be used to attach shelves to wood, dry wall, or plaster walls, if wall is reinforced.
▶ Page 143

Wiring & Cabling

Vertical wire managers conceal cords and cables that are routed vertically outside of the panels.

Avenir	•	•	•		•
Montage	•	•	•	•	•

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.

Tip: See Stability Guidelines in each corresponding specification guide.

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" larger than the panel, allowing them to overhang the panel seam.

Off-Module Brackets

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel $\frac{5}{8}$ " on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount Brackets

Upmount brackets, optional, can be used with Universal sliding door, Universal over the case, and Universal in the case bins. Brackets attach bins near the top of 54"H panels. TS 200 Series bins and Universal shelves cannot be attached to upmount brackets.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Omit Brackets

Omit brackets option must be specified when bin is used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Hutch kit supports bin at 66" height.

Accessories

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins
Introduced in March 2007

Horizontal wall attachment brackets can attach to wall of building to accept Universal Sliding Door, Universal Over the Case, and Universal In the Case storage bins. Brackets will not accept bins introduced prior to March 2007 or TS 200 Series bins.
► Specifying, page 295
Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.

Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach Universal Sliding Door, Universal over the case, and Universal in the case bins to a building wall. TS 200 Series cannot attach to horizontal wall attachment brackets.

Shelves can not hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}$ " thick Toggler R-type $\frac{3}{16}$ " wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksurfaces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width 24", 30", 36", 42", 48", 60", and 72".

Surface Materials

Brackets and steel back

- Paint

Accessories

Wall Channels

For Use with Overhead Storage

Slotted steel channel accepts shelves, overhead storage bins, worksurfaces, or tackboards. Channel will accept all Universal bins and shelves, TS 200 Series bins, and bins and shelves introduced prior to March 2007.
 ▶ Specifying, page 295

Product Details

Wall channel can be positioned on wall at varying heights.

Order wall channel height according to its intended use. Cutting wall channels is not recommended.

Connections

Wall channels can be used to support shelves, storage bins, worksurfaces, and tackboards.

Field install on:

- Concrete walls: Hilti type anchors
- Drywall or plywood: 5/8" thick Toggle type 3/16" wall anchor
- Steel and wood studs: #10 sheet metal or wood screws of appropriate length

Anchors must be used on each screw hole location of the wall channel.

Components attach at 1" increments, but screws block some slot locations.

Screw hole positions

Actual Dimensions

Depth	1 1/8"
Width	15 1/16"
Height	39 3/4", 49 3/4", or 64 3/4"

Component limits for each pair of wall channels are as follows:

- Two bins or shelves
- One worksurface and two shelves
- One worksurface and one bin

Horizontal brace is available to reinforce vertical wall channels that support storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All worksurfaces require horizontal braces.

▶ Page 296

Wall channel horizontal brace is required for each storage bin or shelf that is wider than 48". The brace should be positioned at the top location of each bin or shelf on the vertical wall channel.

Width of horizontal brace must match width of shelf of storage bin.

Wall channel horizontal brace is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Worksurfaces may be attached to wall channels with L-shaped cantilevers, subject to the following application guidelines:

- All worksurfaces must be 24"D or less
- Worksurfaces must be supported by an L-shaped cantilever or legs every 42 or 48 inches. Cantilevers can be shared when worksurfaces are adjacent.
- Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
- Triangular cantilevers and Avenir universal cantilevers may not be used.
- Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Surface Materials

- Wall channel**
 - Paint
 - Wall channel horizontal brace**
 - Paint
- Tip: Horizontal brace will be visible until hidden by contents of shelf or storage bin.*

Accessories

For Overhead Bins and Shelves

Dividers

► Specifying, page 296

Product Details

Divides space in panel-supported bins and Universal shelves. Dividers will not work in bins and shelves introduced prior to March 2007.

Divider can be used on hutch kit.

Specifying

A carton of four dividers is available as an option on overhead bins and Universal shelves.

Surface Materials

Divider

- White plastic only

Actual Dimensions

Depth 7½"

Width ¼"
1½" at the back

Height 6½"

Slim shelves provide a panel-supported surface that attaches to Answer, Kick, Avenir, and Montage with panel-specific brackets.
 ▶ Specifying, page 298

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Answer, Kick, Avenir, and Montage with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Surface Materials

Shelf Lights

Standard

► Specifying, page 302

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Daisy chain cords have modular connectors to link Standard shelf lights together.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Specify LED shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Actual Dimensions

Standard

Depth	9 ¹ / ₄ " (235 mm)
Width	24 ⁵ / ₈ ", 36 ⁵ / ₈ ", or 48 ⁵ / ₈ " (625 mm, 930 mm, or 1235 mm)
Height	1 ³ / ₄ " (44 mm)

Width	Lamp width	Lamp wattage	Replacement lamps
24 ⁵ / ₈ "	24"	17 watts	F17T8-TL735
36 ⁵ / ₈ "	36"	25 watts	F25T8-TL735
48 ⁵ / ₈ "	48"	32 watts	F32T8-TL735

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath over-head storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet.
▶ Page 159

Starter cord powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power-factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard.

- Power Supply 18 Watt Cord
 - 9' with two prong driver plug
- Power Supply 60 Watt Cord Set (11')
 - Line voltage cord: 6'
 - Low voltage cord: 5'

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply, is used on the LED standard light; it is 9' long with a two prong driver plug.
Tip: Energy saving mini-LEDs greatly reduce power use.

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood shelves.

Specify LED shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Wiring & Cabling

Shelf light includes the lamp and power supply with cord set. Daisy chain starter light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

Power supply for LED daisy chain starter light uses a 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light. An 18 watt power supply is used on the LED standard light, it is 9' long with a two prong driver plug.

Tip: Daisy chain starter light comes with a 60 watt power supply to support up to three lights. Daisy chain secondary lights do not come with a power supply, but instead come with a daisy chain cord set.

LED Linear Shelf Lights

A properly diffused light source under the linear head provides a softly blended light pattern that reduces eye strain.

► Specifying, pages 306–307

Optional occupancy sensor turns off after 30 minutes of no activity and will turn back on upon return.

Single touch on/off pad plus touch and hold dimming for easy individual user control.

Continuous dimming from 100% to 15% with last state memory.

Cord exits from either end of the light.

Magnetic mounts and wood mount bracket hardware, both come standard with both LED light and optional occupancy sensor.

Light widths available in 17", 31", 44", and 58".

Product Details

LED linear stand alone and daisy chain starter lights include the lamp, power supply, and both magnetic mounts, and wood bracket hardware with adhesive cord managers.

LED linear daisy chain lights include the lamp, daisy chain cords, and both magnetic mounts, and wood mount bracket hardware with adhesive cord managers.

Optional occupancy sensor is a separate component that connects to the light fixture and activates in 30 minutes when no movement is detected to conserve energy. It will also turn back on upon return.

Average rated lamp life of LED linear shelf lights is 50,000 hours.

Color temperature of LEDs is 3500K.

Color rendering index of LEDs is 84.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Connections

Lights mount recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnet mounts allow shelf lights to be installed without tools under most metal overhead storage bins or shelves.

Wood mount brackets allow shelf lights to be mounted to wood shelves.

Actual Dimensions

	Light	Occupancy Sensor
Depth	2"	2"
Width	17", 31", 44", or 58"	2 ⁹ / ₁₀ "
Height	1/2"	7/10"

44"	72 / 141	25.9 / 34.3
58"	96 / 188	33.6 / 43.5

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply for 17" linear stand alone only uses a straight plug with a 9' 18 watt 24 volt wall transformer.

Power supply for 31", 44", 58", or 17" starter light; 60 watt compact in-line brick straight plug. The cord is 11', 6' from power supply to power outlet and 5' from power supply to fixture.
Tip: Daisy chain starter light comes with a 60 watt power supply to support up to a limited number of lights – refer to chart for daisy chaining fixtures. Daisy chain secondary lights do not come with a power supply, but instead come with two daisy chain jumper cords, one 8" and one 30" set.

Chart for Daisy Chaining Fixtures

Standard Output Linear Shelf Light											
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light										
	17"	6	4	3	2	2	1	1	-	-	-
31"	-	1	-	2	-	2	1	3	1	1	-
44"	-	-	1	-	-	-	1	-	1	-	2
58"	-	-	-	-	1	-	-	-	-	1	-

High Output Linear Shelf Light				
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light			
	17"	4	2	1
31"	-	1	-	2
44"	-	-	1	-

- A 60 watt power supply is required for daisy chaining.
 - Total system wattage of all fixtures together cannot meet or exceed 60 watts, see chart.
 - Cannot daisy chain standard output and high output together.
 - Cannot daisy chain 58" high output fixtures.
 - Occupancy sensor must be positioned between the power supply and the first starter fixture.
 - Only need one sensor when daisy chaining.
- Tip: Each column is the maximum number of fixtures that can be daisy chained together.*

Occupancy Sensor

- Turns off after 30 minutes of no activity and will turn back on upon return
- 360° lens view
- 90° outward detection angle
- 30" diameter coverage if mounted 15" above worksurface
- 36" diameter coverage if mounted 18" above worksurface
- Connects to fixture with one end-to-end connector. 8" or 30" jumper cords

Daisy Chaining

For Standard Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

Additions to a chain are possible at any time by adding a jumper cord.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Vertical Wire Managers

Vertical wire managers

conceal cords and cables that are routed along the edge of panels.

► Specifying, page 308

Top cap is for use with medium top caps.

Reveal is a black detail that separates top cap from cover. It matches the reveal on the panel.

Cover conceals cords or cables.

Product Details

Top cap covers the cable knockouts on the side of steel medium panel top caps.

Exception: Version for use between a shelf or storage bin and a worksurface ships without a top cap or reveal.

Four different sizes of wire managers are available for use between the panel top cap and the worksurface— $10\frac{7}{16}$ "H, $21\frac{9}{16}$ "H, $33\frac{7}{8}$ "H, and $49\frac{11}{16}$ "H.

17 $\frac{1}{2}$ "H wire manager is available for use between the bottom of a shelf or storage bin and a worksurface. It doesn't have a top cap or reveal.

Plastic wire manager is available to cut to special lengths for other applications. It is not available fabric covered.

Tip: Use the plastic wire manager to conceal cords going to a junction box because the wire manager has to be cut to fit.

Wire manager can also be used below the worksurface.

Connections

Snaps into the slotted channel of the panel.

Surface Materials

Cover

- Fabric
- Plastic

Top cap

- Paint (standard on fabric-covered vertical wire manager)
- Plastic to match color of plastic cover

Application Topics

Plastic version can be cut to length. Fabric-covered version must be ordered to fit height dimension of panel or clearance between storage and worksurface.

Actual Dimensions

	Fabric-covered	Plastic
Depth	$\frac{5}{8}$ "	$\frac{1}{2}$ "
Width	$1\frac{3}{8}$ "	$1\frac{5}{16}$ "
Height	$10\frac{7}{16}$ ", $17\frac{1}{2}$ ", $21\frac{9}{16}$ ", $33\frac{7}{8}$ ", or $49\frac{11}{16}$ "	$49\frac{11}{16}$ "
Medium top cap height	$1\frac{9}{16}$ "	$1\frac{9}{16}$ "

Wiring and Cabling: Interface

Interface refers to the point at which the utilities (electrical and cables) for your panel installation connect with the building's power and communications.

Power poles route building power from the ceiling through the panel to the powerway in the panel base cavity. They can also be used to run cables into the top cap or into the panel base cavity.
▶ Pages 40–43

Cable poles route communication cables from the ceiling to the top cap or to the panel base cavity.
▶ Pages 40–43

Base power-ins connect building power from the wall or floor to a receptacle opening on a powerway in the panel base.
▶ Page 38

Cable grommets are available to bring cables into the panel base from the floor. Cables can also enter the panel base at the end of a panel.

End power-ins connect building power from the wall or floor to the end of a panel.
▶ Page 38

Product Details

2" x 2" power pole is equipped with one electrical harness. The 2" x 6" power pole has two electrical harnesses. Both poles have an inner sleeve that separates power from communication cables.

Power pole circuit can be specified as 3-circuit or 4-circuit models.

Base power-ins supply building power to a panel run by connecting to the powerway at a receptacle location.

End-entry power-ins connect a modular connection at the end of the powerway, without taking up a receptacle opening. They are available in 3-circuit and 4-circuit models.
▶ Page 38

Cable grommets can be used to route cables from a floor source to the panel base cavity.

Connections

Power or cable poles can attach at the end of a panel run, or at an L-, T-, or X-junction. A pole must be specified to match the height of the panel it is attached to.
▶ Pages 40–43

Ceiling attachment kit secures the power pole or cable pole to the suspended ceiling grid. Junction box at the top of a power pole can be hardwired to building power.

Ceiling heights up to 10' 4" can be accommodated by a power or cable pole. The ceiling attachment kit adjusts for lower ceilings.

L-junction allows the power or cable pole to attach to either panel.

T-junction allows the power or cable pole to attach to, and run power into, the center panel.

Panels of different heights at a junction require a varying height connector package (PAB2) to attach to either type of pole. Change-of-height end trim cannot be used.

Application Topics

Some locations have electrical codes that vary from the national code and impose special requirements.

Form number S270.

▶ **TechnoLogical Binder**
Form number S2402.

Wiring and Cabling: Distribution

Distribution refers to how the power and cables get from one place to another through the panel and work-surface components.

Top caps accommodate lay-in cable routing within a workstation or cluster.

Grommets allow cords and cables to be routed from a panel top cap through an overhead storage bin to the worksurface.

Vertical wire managers conceal cords and cables that are routed along the edge of panels.

Fillers create a vertical channel for routing cables between the top cap and panel base on panels that are the same height.

Grommets permit you to access cords at worksurface level.

Cable grommets allow the cables to be routed from the panel base to the worksurface.

Communication cord knockouts permit communication cables to run between the worksurface and a panel base.

Panel base cavity conceals powerways. The base cavity can also be used to route and conceal cables.

Cable knockouts permit cables to exit the top cap.

Product Details

Powerways, within the panel base cavities, connect to route power through a cluster of workstations and provide terminals for receptacles or base power-ins.
▶ Page 44

Wire separator are included with panel that have a powerway. Wire separator can be specified for a panel without a powerway. A wire separator provides a separate, isolated space for routing data and telecommunication cables. It also serves as a metallic barrier between low-voltage communication wires and 120-volt electricity.

Wire separators manufactured after June 19, 2023 can be added to Avenir panels manufactured before June 19, 2023.

Medium steel top caps create a space for routing cables from panel to panel, and include cable knockouts to let cables in or out.
▶ Page 24

Corner wire covers conceal cables and powerways in the panel base cavity at L- and T-connections.

Fillers conceal cables running vertically and aesthetically fill the space at L-, T-, and X-connections.
▶ Page 32

Vertical wire managers snap into the panel's slotted channel. They conceal cables or task light cords or harnesses running to the worksurface or base receptacles. They come with a cap to conceal a cable knockout.
▶ Page 160

Cable grommets can be inserted in duplex-size receptacle openings to route cables from the panel base to the worksurface.

Communication cord knockouts allow cables to pass from the panel base to the worksurface.

Connections

Powered panels may be joined to form straight line, L-, T-, Y-, or X-configurations. Some panel connections can affect how power flows or cables are routed from panel to panel.
▶ Page 44

18"W panels do not have receptacles, but power and cabling can pass through them.

Wiring and Cabling: Access and Storage

Access refers to the points at which you'll place electrical outlets so people can plug in equipment. Access also includes the links between communication and computer networks.

Storage refers to the ways in which you manage excess lengths of cords and cables.

Product Details

Receptacles are installed in the panel base. Each 30"W or wider powered panel has four receptacle openings, accepting up to eight outlets (four per side).

18"W panels accommodate pass-through powerways only, so their base covers do not have receptacle openings.

Grommets in standard worksurfaces have removable covers to admit three-prong plugs. They can be specified in a range of locations to avoid conflict with center drawers and pedestals.
▶ Page 106

Grommet convenience receptacle can be used to provide access to power wherever there is a grommet.

Cable and fiber reel stores lengths of excess fiber-optic cable or conventional cables.
▶ Page 113

Termination plate accommodates the oversized junction boxes used for installation of fiber-optic cables.
▶ Page 114

Cable storage trays assist with horizontal routing and conceal large quantities of cords and cables under a worksurface.

Cord reel takes up excess cord or cable under the worksurface.

Wire guide clip has an adhesive back to allow it to stick to painted metal components under a worksurface for routing and managing cords.

Power Components Transition Details

On June 19, 2023, Avenir power components changed design. Power components manufactured before June 19, 2023 are not compatible with power components manufactured after June 19, 2023.

The style numbers of power component have changed. The panel style numbers have not changed. Any panel segment ordered with power after June 19, 2023 will include the new power component design.

How power is specified remains unchanged. Power can be optioned on to the panel segment. Powerways can be specified as installed in the factory or installed in the field.

Components included in the design change are powerways, receptacles, base power-ins, and the harness included in the power pole.

Power before June 19, 2023	Power after June 19, 2023
Powerways	
	
Receptacles	
  Standard Larger	
Base Power-Ins	
	
Power Harness in Power Pole	
	

Difference between power components		
What is Different	Power before June 19, 2023	Power after June 19, 2023
Connector flag/harness	Mesh connector flag is not removable from the powerway.	Mesh connector flag is removable from the powerway.
Power access in 24" and 30" wide panel segments	24"W and 30"W base covers have a standard-size opening on one side of the panel and larger size opening on the reverse side.	24"W and 30"W base covers have standard-size openings on both sides of the panel.
Receptacle size	Receptacles were available in two sizes– standard and larger.	All receptacles are standard size.
Receptacle cutout locations on base covers	Receptacle location differs before and after June 19, 2023. See details under <i>Receptacle Location Change</i> . Page 173	Receptacle location differs before and after June 19, 2023. See details under <i>Receptacle Location Change</i> . Page 173
Base power-in	Connection at receptacle location does not include an aesthetic cover.	Connection at receptacle location includes an aesthetic cover.
Receptacle connection to powerway	Receptacle connect to powerway with screws.	Receptacle snaps into the powerway without any screws.
Wiring schematics	All five wiring schematics available. Color-coding and keying have changed.	All five wiring schematics available. Color coding and keying have changed.

Planning with power components manufactured before and after June 19, 2023.

Power components manufactured before June 19, 2023 can still be used but do not connect to power components manufactured on or after June 19, 2023. The following two approaches can be used when both power systems are used:

Cluster with all power components manufactured before June 19, 2023.

Cluster with all power components manufactured on or after June 19, 2023.

Organize by cluster: Power systems can be organized by workstation cluster. Some clusters can use power components manufactured before June 19, 2023 and other clusters can utilize power components manufactured on or after June 19, 2023.

Utilize multiple infeed in a single cluster: A single workstation cluster can use both power systems by utilizing multiple infeeds. Power components manufactured before June 19, 2023 can power part of the workstation and have its infeed and power components manufactured on or after June 19, 2023 can power part of the workstation and have its infeed. Each power system covers part of the workstation and the two systems do not connect to one another.

Receptacle location change

**Receptacle location for base
Trims manufactured before
June 19, 2023**

**Receptacle locations for base trims
manufactured after June 19, 2023**

Status of power components manufactured before June 19, 2023

Powerways, panel connectors, receptacles, base power-ins and harnesses included in the power pole manufactured before June 19, 2023 are no longer supported.

Basecovers with receptacle cutouts for the receptacle locations of the pre-June 19, 2023 powerways are supported as service parts.

Receptacle knockout fillers for both the pre-June 19, 2023 and post-June 19, 2023 are available as a service part.

The pre-June 19, 2023 wire separator, which supports the powerway in the panel, is available as a service part.

How to convert an Avenir panel manufactured before June 19, 2023 with post June 19, 2023 power components.

1. Remove all pre-June 19, 2023 power components and the pre-June 19, 2023 wire separator.
2. Order from service parts a post June 19, 2023 wire separator, a post June 19, 2023 powerway and a post June 19, 2023 set of base covers of the appropriate width. Powerways, wire separators, and base covers are not available as style numbers.
3. Add post June 19, 2023 components to base area of the panel frame manufactured before June 19, 2023.

Steps to Plan an Electrical Network

There are four steps to planning an electrical network.

1
On a drawing of your panel layout, indicate where you want receptacles.

2
Designate which circuit (1, 2, 3, or dedicated) you want each receptacle to link to.

► For more information about dedicated and designated circuits, see page 170.

3
Determine how many power-ins are needed to supply enough power to each cluster of workstations.

► For more information about calculating power needs, see page 176.

4
Indicate the position of each base power-in, power pole, or cable pole on your floor plan.

You're done. If your layout includes panels with different surface materials on the two panel surfaces, the powerway connector harness may need to be switched to opposite side of the powerway upon installation to ensure proper power routing and surface material positioning.

Five wiring schematics

are available for Avenir—two 3-circuit systems and three 4-circuit systems.

All the components in an electrical distribution network must use the same wiring schematic.

The components (power poles, base power-ins, powerways, and receptacles) snap together and are keyed to make it impossible to connect mismatched parts.

Color-coded and labeled components make it easy for installers to identify which wiring schematic each component is dedicated to.

Color coding

For power components manufactured before June 19, 2023:

- 3 circuits shared = Black
- 3 circuits separate = White
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Tan
- 4 circuit 2+2 = Grey

For power components manufactured on or after June 19, 2023:

- 3 circuits shared = Blue
- 3 circuits separate = Rust
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Black
- 4 circuit 2+2 = Brown

Overview

Three-circuit electrical components with shared neutrals are standard with 5 wires to provide three circuits that share one oversized neutral and one ground. This is the traditional 3-circuit power alternative that is specified by adding the suffix P3 to the panel style number.

Three-circuit with separate neutrals have 8 wires providing three circuits, each with its own separate neutral. The first two circuits share an isolated ground; the third uses the system ground.

Four-circuit 3+D are standard with 8 wires to provide four circuits. Three of these circuits share an oversized neutral and a system ground while the remaining circuit has its own neutral and isolated ground. This is the traditional 4-circuit power, also known as 3+D, that is specified by adding the suffix P4 to the panel style number.

Four-circuit, 3I+1 again have 8 wires but with three circuits that share an oversized neutral and isolated ground. The fourth circuit has its own neutral and is attached to the system ground. This electrical system is like the standard 3+D, but the grounds are switched, providing three isolated circuits and one general purpose circuit as compared to one isolated circuit and three general purpose circuits.

Four-circuit 2+2 also have 8 wires but provide two circuits that share an oversized neutral and a system ground and an additional two circuits with a second oversized neutral and an isolated ground.

3 Circuit Shared Neutral, 5 Wires

3 Circuit Separate Neutral, 8 Wires

4 Circuit 3+D, 8 Wires

4 Circuit 3I+1, 8 Wires

4 Circuit 2+2, 8 Wires

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 39 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

Device	Wattage	Amperage	Voltage	Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	3.6	110	1
Microwave (low)	150	1.4	110	3
Refrigerator (high)	1500	13.6	110	1
Refrigerator (low)	200	1.8	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Special Requirements for Chicago

	Chicago code	Specification:	Electrician will supply:
Panel Requirements	<p>Panels must be hardwired in the field.</p> <p>Electrician hardwires all receptacle boxes and conduits into panel bases in the field.</p> <p><i>Tip: Panel depth prohibits use of standard device boxes for back-to-back receptacles in Chicago. If back-to-back receptacles are required or if additional circuits are required, contact the Steelcase Solutions Resource Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com for additional information on how to order back-to-back hardware junction boxes.</i></p>	<ul style="list-style-type: none">• Order panels with factory-installed power base covers with receptacle knockouts where you intend to install receptacles. <i>Tip: Chicago code doesn't require a special base cover with different receptacle locations.</i>• Receptacles in Chicago are supplied by electrician. Because these receptacles will be duplex size, you must order a filler plate to occupy the remaining space in larger-size openings. Reusable filler plates are available from Service Parts. <i>Tip: Because receptacles in Chicago cannot be installed back to back, you may want to avoid powered panels that are 30"W or less. These panels only have one receptacle location on each side, so these panels can only accommodate one duplex-size receptacle.</i>• Order corner fillers for L-, T-, and X-configurations separately to conceal electrical conduits.	<ul style="list-style-type: none">• Connection to building power supply• Wires• Fittings• Duplex receptacle (Leviton 5325-Decora style)• Electrical components
Lighting Requirements	<p>Cords must include integral overload protection.</p>	<ul style="list-style-type: none">• Order Chicago version of shelf lights.	

Special Requirements for New York City

	New York City code	Specification:	Electrician will supply:
<p>Panel Requirements</p> <p>New York City code requires that all electrical components be field installed.</p>	<p>Powerways must be installed in the field.</p>	<ul style="list-style-type: none"> • Order panels with factory-installed power base covers with receptacle knockouts where you intend to install receptacles. If duplex receptacle, or base power-in, is to be installed in oversized receptacle opening, order a filler plate to occupy the remaining space. Reusable filler plates are available from Service Parts. • Order powerways for field installation. • Order Steelcase receptacles. 	<ul style="list-style-type: none"> • Connection to building power supply
<p>Worksurface Requirements</p>	<p>Utility modules must be hardwired in the field.</p> <p>Code does not allow use of cord-and-plug devices in commercial buildings. This includes:</p> <ul style="list-style-type: none"> • Power strips • Grommet convenience receptacles • Panel-supported receptacles 	<ul style="list-style-type: none"> • Order hardwire-version of utility module. 	<ul style="list-style-type: none"> • Face plate • Wires • Fittings • Connection to building power
<p>Lighting Requirements</p>	<p>Lights cannot require tools to install.</p> <p>Light harnesses are prohibited.</p>	<ul style="list-style-type: none"> • Order shelf lights, which require no tools to install. 	

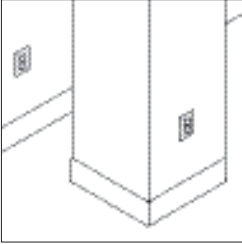

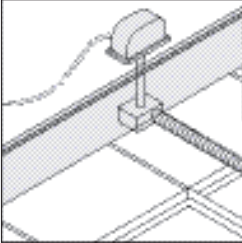

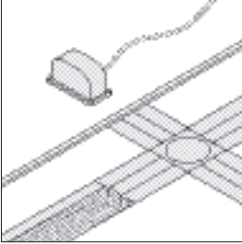

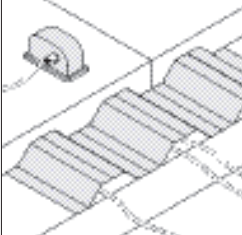

Special Requirements for Los Angeles

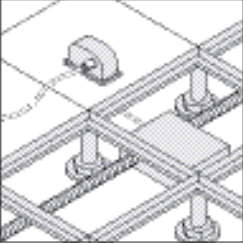

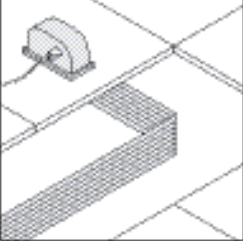

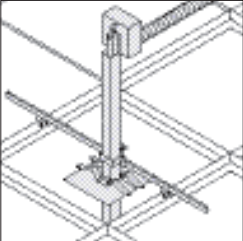

Special Requirements
for Los Angeles

Los Angeles

	Los Angeles code	Specification:	Electrician will supply:
Panel Requirements	Code prohibits concealed cords.		
Worksurface Requirements	<p>Utility modules must be hardwired in the field.</p> <p>Code does not allow use of cord-and-plug devices in commercial buildings. This includes:</p> <ul style="list-style-type: none"> • Power strips • Grommet convenience receptacles • Panel-supported receptacles 	<ul style="list-style-type: none"> • Order hardwire-version of utility module. 	<ul style="list-style-type: none"> • Face plate • Wires • Fittings • Connection to building power
Lighting Requirements	<p>Lights cannot require tools to install.</p> <p>Light harnesses are prohibited.</p>	<ul style="list-style-type: none"> • Order shelf lights, which require no tools to install. 	

Understanding Building Wiring

System	Characteristics	Advantages	Disadvantages	Comments
Fixed Wall and Column 	<ul style="list-style-type: none"> • Common to most buildings. • Power and telecommunication run through permanent walls to wall receptacles. 	<ul style="list-style-type: none"> • Low cost for initial installation. • Provides power in corridors and small rooms. 	<ul style="list-style-type: none"> • Must be used with other systems to reach areas away from walls. • Moving wall receptacles is difficult and expensive. 	<ul style="list-style-type: none"> • Workstation layout depends on location of wall receptacles and must be carefully planned. • Usually used with other systems such as poke through or flat wiring.
Poke Through 	<ul style="list-style-type: none"> • Wiring concealed in ceiling space of floor below and fed through holes in floor. • Electrical receptacles and telecommunications outlets located in floor-attached monuments. 	<ul style="list-style-type: none"> • More flexible than underfloor duct because wires can be pulled up at any location. 	<ul style="list-style-type: none"> • High relocation costs. • Moving junction boxes requires cutting a hole through the floor—a process called coring. • Moving junction boxes can disrupt work on two floors. • Monuments can cause people to trip. 	<ul style="list-style-type: none"> • Not accepted by some local fire codes. • May weaken floor slab. • Flexibility dependent on building structure. • Pedestals can conceal monuments.
Underfloor Duct 	<ul style="list-style-type: none"> • Ducts or continuous channels encased in floor slab. 	<ul style="list-style-type: none"> • Low life-cycle costs. • Easy access for relocation. • Relocation causes little disruption. 	<ul style="list-style-type: none"> • Flexibility limited to specific access points. 	<ul style="list-style-type: none"> • Increasing wire and cable requirements may exceed capabilities of existing system.
Cellular Floor 	<ul style="list-style-type: none"> • Underfloor system with large-capacity, divided distribution cells for electrical and telecommunication wiring. • Wiring runs perpendicular to the trench header, a special duct that cuts across all the cells and provides access. 	<ul style="list-style-type: none"> • Inconspicuous. • Electrical and telecommunication systems run together to the workstation. • Protects voice and data systems from interference and damage. 	<ul style="list-style-type: none"> • System can add to required length of wire or cable because of trench header-cell configuration. 	<ul style="list-style-type: none"> • Carpet tiles ease access to trench.

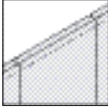

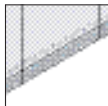

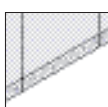

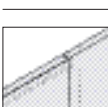

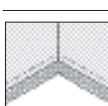

System	Characteristics	Advantages	Disadvantages	Comments
<p>Access Flooring</p> 	<ul style="list-style-type: none"> • Developed for mainframe computer rooms. • Modular floor panels raised above the slab on 6" to 36" high supports, and conduit and cables run beneath these floor panels. • Access through monument fixtures. 	<ul style="list-style-type: none"> • Ease of access and rearrangement of wiring systems. 	<ul style="list-style-type: none"> • May be noisy when walked on. • Requires stairs and ramps on building floor when added to existing facility. 	<ul style="list-style-type: none"> • Smoke alarms and fire protection sprinklers may be required. • Use only carpet tiles or area rugs.
<p>Flat Wiring</p> 	<ul style="list-style-type: none"> • Access from wall or column. Power and signal cables run to workstation via flat wire and cable sandwiched between slab and carpet. • Outlets in transition boxes on top of carpet. 	<ul style="list-style-type: none"> • Easy relocation. • Flexible. • Meets most capacity requirements. • Elements sold as one package. 	<ul style="list-style-type: none"> • Heavy wheel traffic can cause signal interruption in data transmission wiring. 	<ul style="list-style-type: none"> • Should not be used in areas susceptible to extreme dampness or water spillage. • Slab-on-grade installations, where concrete is poured directly on the ground, require careful preparation per manufacturer's instructions to ensure that moisture doesn't damage the system.
<p>In-Ceiling Wiring</p> 	<ul style="list-style-type: none"> • Conduit and cables run in space above suspended ceiling and are distributed to panels by power and cable poles. 	<ul style="list-style-type: none"> • Low initial cost. • Very easy to move. • Little disruption during move. • Space usually accommodates large capacities. 	<ul style="list-style-type: none"> • Power and cable poles used to route cables can detract from open-plan aesthetics. 	<ul style="list-style-type: none"> • Cost for installation increases when ceiling space is used as return air plenum to meet fire-protection codes. • Ceiling-suspended cable trays should be considered for communications wiring.

Cable Capacities

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable as well as the furniture configuration you are considering. Cable capacities in this table are based on non-plenum-rated cables installed by a cable contractor under ideal conditions. Figures are approximations. Actual capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

- 1 = Capacities include powerway space and cable-routing space.
- 2 = Capacities can be doubled if routed in two directions. Capacity figures are based on routing in one direction.

Specifying Avenir

Specifying Tips

186

Specifying Tips

General Tips

Standard Includes
<ul style="list-style-type: none"> • Worksurface/frame • End panels, back panel, and pedestal • Drawer pull(s) pair • Center drawer (if selected) pair • Lock (if selected, keyed randomly: 5001 Polished Chrome) • One convenience tray (in desk with drawer: 0000 Black plastic only) • One sill/accessory shelf per desk pair • One partition per drawer (if selected) • One compressor per file drawer (if selected)

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formulated pattern, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Panels

Specify style numbers and surface materials for all panels.

Tip: For most fabrics, fabric application is standard in the warp horizontal direction.

► See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Keep track of panels that require power and list panels with power separately because they'll have a different style number.

Specify panel connector packages, fillers, and change-of-height panel connectors when an application requires them.

Worksurfaces

Specify style numbers and surface materials for all worksurface packages. Some supports can be ordered by changing the worksurface style number suffix. Other supports must be ordered separately with their own style number. Also specify options such as grommets, worksurface wiring and cabling accessories, and any specific keying information.

Storage

Specify storage component style numbers, surface materials, and any specific keying information.

Lighting

Specify style numbers of lights.

Wiring & Cabling

If you specified with power as you ordered your panels, the only things left to specify are power-ins, power and cable poles (if desired), and receptacles.

Example of Order

Here's what the specification would be like for the installation shown at the left.

Qty.	Style No.	Description
Panels		
2	MPTAM6530	64 ¹ / ₁₆ "H x 30 ⁵ / ₁₆ "W tackable panels sides 1 & 2: fabric frame: paint

Cable-Management Panel Options for Tackable Acoustical Panels

With Powerway in Base

Cable-Management Panel Option Choices

Vertical cable routing only

Product Details

Use

- Use this choice in applications where you want to route cables vertically inside the panel and where you want to extend a power distribution network through a run of panels.

How to Specify

- 1 Specify a tackable acoustical panel **with** factory-installed powerway (suffix P3 or P4).
- 2 Next, select **options** and then choose **surface options**.
- 3 Next, select **able-management surfaces**.

- 4 Next, select **plain cable-management surfaces**.

Tip: Plain surfaces on cable-management panels have no receptacle openings, but the surface is notched at the bottom to avoid blocking the cable routing channels.

Tip: Remember to order cable knockouts for medium top caps to accommodate cable routing.

Not for use in NYC
▶ See page 178

Without Powerway in Base

Cable-Management Panel Option Choices

Vertical cable routing only

Product Details

Use

- Use this choice in applications where you need to route cables vertically inside a panel, but power distribution and receptacles are not needed.

How to Specify

- 1 Specify a tackable acoustical panel **without** factory-installed powerway.
- 2 Next, select **options** and then choose **surface options**.
- 3 Next, select **able-management surfaces**.
- 4 Next, select **plain cable-management surfaces** on **both** sides of the panel.

Tip: Plain surfaces on cable-management panels have no receptacle openings, but the surface is notched at the bottom to avoid blocking the cable routing channels.

Tip: Remember to order cable knockouts for medium top caps to accommodate cable routing.

Tackable Acoustical Panels

Tip: To price a panel with two surface materials in different price groups, add the two fabric price group option prices together and divide by 2; then add the result to the panel base price.

Tip: If you want the panel fabric to match the fabric on panel end trim, change-of-height panel connectors, power poles, cable poles, or fillers, check to see that the fabric you want is available on that product before you specify the panel fabric. Some fabrics are not available because they are not suitable for wrapping thin pieces.

**Tip: For most fabrics, fabric application is standard in the warp horizontal direction.*

► See *Specification Guidelines for Vertical Fabric Applications*, page 330, for details on these exceptions. Warp vertical is available as an option.

Tip: Replacement panel surfaces are available as standard product. The top cap, end trim, and base cover can remain in place during the replacement process. Special tools are not required. Adjacent panels are not disrupted.

Tip: 80½"H fabric-covered end trims are available in the warp vertical application only.

Tip: Factory-installed wire separator is only an option on panels without power. A wire separator is included with the powerway in panels specified with power.

Transparent Panels

Tip: If you want the panel fabric to match the fabric on change-of-height panel connectors, power poles, cable poles, or fillers, check to see that the fabric you want is available on that product before you specify the panel fabric. Some fabrics are not available because they are not suitable for wrapping thin pieces.

**Tip: For most fabrics, fabric application is standard in the warp horizontal direction. ▶ See Specification Guidelines for Vertical Fabric Applications, page 330, for details on these exceptions. Warp vertical is available as an option.*

Tip: 80¹/₂"H fabric-covered end trims are available in the warp vertical application only.

Tip: Factory-installed wire separator is only an option on panels without power. A wire separator is included with the powerway in panels specified with power.

Specifying Storage

Steelcase 800 Series lateral files are available with an Avenir-style pull to make these products compatible with Avenir. The Avenir-style pull complements the Avenir pull, but it is not identical. The Avenir-style pull is flush so it will allow the lateral file receding door to go back into the file.

Hutch Kits

Hutch Kits

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Tip: A hutch kit cannot support more than one bin.

Tip: Be sure to order the storage bin in the same paint finish as the hutch kit. Storage bin is ordered separately.

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Tip: 66\"W and 72\"W tackboards accommodate fabric in the horizontal direction only.

Standard Includes	Required to Specify

Standard Shelf Lights

Tip: Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.
 ▶ See page 154 for more information.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: Remember to order a daisy chain starter cord separately.
 ▶ See page 159.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/ EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

Not every paint color is available on every painted component.

▶ Refer to the *Paint, Textured Paint, and Coating Color Availability Matrix* on page 316 before specifying.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

Edge color for custom laminate orders must be determined by the dealer and customer before orders can be entered. There are no additional charges beyond the initial \$102 U.S. list to obtain different edge colors with Steelcase standard laminates.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Ⓔ = Established

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer**Wood Group 1****Flat-Cut Open-Pore**

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2**Flat-Cut Full-Fill**

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3**Quarter-Cut Open-Pore**

- 3832 QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the Surface Materials Reference Manual or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available with Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1

Flat-Cut Open-Pore

- 3JDX FC/OP Oak Composite
- 3JXX FC/OP Walnut Composite

Quarter-Cut Open-Pore

- 3F8X QC/OP European Walnut Composite
- 3GGX QC/OP Zebano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plastic

Steelcase Surfaces

Plastic products may not be available in all colors listed below.

► Refer to page 320 for an overview of the plastic colors that are available for each component.

- | | |
|-----------------------|----------------------|
| 6000 Black | 6635 Dawn E |
| 6009 Arctic White | 6636 Mist |
| 6052 Milk | 6654 Sand |
| 6053 Seagull | 6655 Warm White |

Color Coordination Matrices

Avenir Worksurfaces (Excluding Curvilinear and Universal)

Plastic edge trim color for all Avenir worksurfaces is determined by the work-surface color you select. The edge color is a default and cannot be specified.

All laminates, except woodgrain laminates, will have solid color plastic edging.

Woodgrain laminates will have woodgrain plastic edges and the grain of the edges will be horizontal. The woodgrain edge color will match the laminate color.

► For information regarding location of plastic edge on applicable Avenir worksurfaces, see "Standard Includes" information.

Avenir Curvilinear Worksurfaces

Plastic square edge trim color for all Avenir worksurfaces is determined by the worksurface color you select. The square edge color is a default and cannot be specified. Some worksurfaces have plastic T-mold edges that you can specify to coordinate or contrast with the laminate color that you select for the worksurface. The column at the far right lists recommended colors for use with each laminate color.

All laminates, except woodgrain laminates, will have solid color plastic edging.

Woodgrain laminates will have woodgrain plastic edges and the grain of the edges will be horizontal. The woodgrain edge color will match the laminate color.

Trim Color Defaults

for Mobile Pedestal Laminate Tops

Plastic square edge trim color of tops that are added to files is determined by the laminate color you select for the top. The edge color is a default and cannot be specified.

All laminates, except woodgrain laminates, will have solid color plastic edging.

Woodgrain laminates will have woodgrain plastic edges and the grain of the edges will be horizontal.

Plastic square edge trim is applied to all four sides of laminate tops.

Plastic edge trim is applied only to the sides (left and right) and back of bullnose laminate tops.

Directional Laminate Grain Directions

Directional laminates are standard with the grain directions shown.

Avenir Universal Systems Worksurfaces—High-Pressure Laminate

Specification Guidelines for Vertical Fabric Applications

What is the issue?

Some textiles are simple and look the same regardless of how you apply them to a product. Many other fabrics are patterned, textured, or have luster that will have a distinctly different appearance if applied in different directions on chairs or panels. Because of these differences, and the fact that there are limits to how some fabrics can be applied to Steelcase products, it is important to understand fabric application direction standards at Steelcase in order to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long yarns that run down the length of the roll are called the "warp" yarns. These yarns are used to define the direction you are viewing the fabric as it is applied to a panel or chair. Fabric directionality is determined by how the fabric comes off the roll. It is NOT determined by the way the pattern looks on the product (i.e., horizontal stripes do not mean the fabric was applied warp horizontal—it could have been applied warp vertical).

Warp Horizontal

Warp horizontal

application is the standard application direction for most Steelcase fabrics on Steelcase panel and seating products.

▶ See page 331 for details on these exceptions.

Horizontal application

means that as you view the panel or chair in its upright position, the warp yarns of the fabric are running in the horizontal direction.

Warp Vertical

Warp vertical application is the standard application direction for any panels taller than 68"H and a few other exceptions. Vertical application means that as you view the panel or chair in its upright position, the warp yarns are running in the vertical direction.

▶ See page 331 for details on these exceptions.

Warp Horizontal

Fabric on panels taller than 68"H cannot be applied warp horizontal because the height of the product is greater than the width of the fabric.

Steelcase is not responsible for charges associated with replacement or re-upholstery of products due to incorrect specifications.

The combination of tall panels (75"H with warp vertical) with short panels (65"H or less with warp horizontal) will result in the fabric patterns running in opposite directions.

To remedy this situation, the following options are available:

- Use non-directional fabric. Only a small selection of fabrics are non-directional.
- Use fabrics that have standard warp vertical application direction.
- Specify warp vertical application on fabrics that are standard warp horizontal.

Tip: If you require warp vertical and it is not the standard, you must specify the warp vertical option on every line in the order.

Application Topics

Surface Materials

Representatives are available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822 or fax 616.698.4700.

Price

No additional cost to specify warp direction.

How to Specify

You must specify warp direction when you need to depart from the standard. Avenir panels allow this option to be selected electronically. On non-electronic orders, add a written specification to each panel to indicate non-standard warp directions.

For example:
MPTAM5348
52³/₈"H x 48⁵/₁₆"W tackable acoustical panels
side 1: fabric 5F07 (Buzz2 Blue) with vertical application.
side 2: fabric 5F08 (Buzz2 Navy) with vertical application.

Standard Warp Directions for Avenir

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

For information regarding COM fabrics, refer to the *Steelcase Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

Lock and Keying	334
Style Number Index	336

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.
Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
 ▶ See below.

Required to Specify

Master key random +\$36 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify “plug” when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.
Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
 ▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
<ul style="list-style-type: none"> Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome Two keys 		1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and select beginning key number from FR305–FR454.
Master key random	+\$36 each	Specify <i>master key random</i> .
Master key specific	+\$36 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$36 each	Specify <i>master key consecutive</i> and select beginning key number from XF1001–XF1150.

Specification Information

Color	Style Number	U.S. Base Price

FR Series (Standard Keying System)–Lock Cylinder

Polished Chrome	LOCK9201FR	No cost
Ember Chrome	LOCK9250FR	No cost

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

Standard Lock Tool

	877102003SR	\$36

XF Series (Master Keying System)–Lock Cylinder

Polished Chrome	LOCK9201XF	No additional cost. Price included in price of furniture with master-keyed locks.
Ember Chrome	LOCK9250XF	No additional cost. Price included in price of furniture with master-keyed locks.

Master Lock Tool

	877102002SR	\$36

 **For Canadian Pricing**
 Multiply U.S. Price by the Canadian price factor.
 ▶ See page 1 for details.
