Product Description

i2i™ is a new alternative for collaborative settings that helps people stay focused and connected.

i2i is free of adjustments, yet has a flexing back and a mechanism that invite both movement and support. It supports a variety of postures through its dual swivel mechanism that allows users to swivel the seat and back together, swivel the back only (stay oriented to others while adjusting your posture to reduce fatigue) or swivel the seat only (keep your posture but change your orientation). The flexing back features molded “fingers” that support back movement and provide comfort.

The model chosen for analysis is the most frequently ordered one (code: 416B) from the **i2i** range. Standard features on this model include:

- Back: black
- Back upholstery: 3D Knit
- Fixed base: polished aluminum with glides
- Seat and arms: Atlantic
- Dual-swivel mechanism

Material Declaration

i2i consists of the materials listed below. The total weight is 27.988 kg including packaging.

metals	kg	%
Steel	8.240	29.4
Aluminium	5.639	20.1

plastics	kg	%
PA6 (polyamide 6)	4.653	16.6
PU (Polyurethane) foam	2.578	9.2
PP (polypropylene)	1.070	3.8
PET (Polyethylene Terephthalate) fabric	0.723	2.6
PU (Polyurethane) rigid foam	0.684	2.4
POM (Polyoxymethylene)	0.261	0.9
LDPE (Low Density Polyethylene) for packaging	0.132	0.5
Rubber	0.007	0.3
PP (Polypropylene) fabric	0.001	< 0.1

other materials	kg	%
Cardboard for packaging	4.000	14.3

Manufacturer

i2i is manufactured in Sarrebourg, France, by Steelcase, for the EMEA (Europe, Middle East and Africa) market. It is also manufactured by Steelcase in Highpoint, North Carolina, for the North American Market.

Since 1912, Steelcase has been committed to continually reducing the environmental impacts of its products and activities on a global scale, by constantly seeking more effective ways to conserve resources, prevent pollution and nurture environmental consciousness in its people every day.

Steelcase has management systems for quality (ISO 9001) and for the environment (ISO 14001 and/or EMAS II), ensuring that our customers are guaranteed the same level of product performance, wherever they are in the world.

Steelcase has a multi-site PEFC (Program for the Endorsement of Forest Certification schemes) certification for five of its production facilities in Europe. The certification acknowledges that the wood used in the products has been sourced from forests managed in a sustainable way. In the USA, Steelcase was given the FSC (Forest Stewardship Council) certification.

To show continuous improvements, Steelcase communicates the environmental performance of its products through voluntary environmental labels and declarations.

Life Cycle Stages

Materials

This stage includes raw materials extraction and transformation into material ready to be used.

Production

This stage comprises all production and assembly processes taking place at Steelcase or at suppliers.

Transport

Transport from suppliers to the production site and transport from the production site to the EMEA market is considered.

Use

During the use stage of the product - the longest stage of the life cycle - no relevant environmental impacts occur.

End of life

Any product can be disposed of in different ways, or become a resource itself.

Environmental performance

Environmental labels and declarations on the product and its materials.

This product, when made in North America, was designed according to the **C2C** principles and is currently going through the Cradle to Cradle Certification process.

This product, as the entire Steelcase European seating range, is SCS **Indoor Advantage™** and **Indoor Advantage™ Gold** certified.

A selection of polyester fabric labelled with the **Oeko-Tex 100** Standard is available, guaranteeing that the textile doesn't contain undesirable substances.

A selection of pure wool fabric labelled with the **European Flower** is available, guaranteeing that the textile meets stringent quality and environmental performance criteria.

Actions for reducing the environmental impacts at each stage of the environmental life cycle.

End of life

i2i is 84% recyclable by weight.

The cardboard and LDPE film used for packaging are 100% recyclable.

Plastic parts are clearly labelled for easy sorting and an effective recycling.

i2i was designed to ensure our clients environmentally responsible after use strategies for their furniture.

Use

i2i was designed for a long product life, with replaceable parts.

Our eco-labelled textiles release no toxic substances.

Being Indoor Advantage certified means that the product meets tough indoor air quality standards.

Maintenance information is available in the Steelcase website.

Transport

To reduce shipping, **i2i** is manufactured close to customers, in Europe as well as in North America.

Materials

Together with Steelcase Inc. for the North American market, McDonough Braungart Design Chemistry (MBDC) looked in-depth at the chemistry of materials and selected those that are safe, healthy, and ecologically sound throughout their lifecycle.

i2i contains no CFC or HCFC in the foam, and no PVC.

i2i contains 27% recycled materials, by weight (8% post industrial + 19% post consumer).

The packaging consists of 100% recycled cardboard and 30% recycled LDPE film (Low Density Polyethylene). Packaging uses water based inks without solvent.

Production

The production site in Sarrebourg has an ISO 14001 certified environmental management system.

Powder-coat painting is VOC-free and free of heavy metals; unused paint that does not attach to the product can be directly reused in the process.

Polyurethane foam is water-based.
