CLICK CONNECT SHARE

Building on the popular media:scape® PUCK interface, the Virtual PUCK™ maintains the simple Open, Connect, and Share user experience, allowing efficient and easy wireless content sharing from laptops and tablets on multiple media:scape displays.

80%

80% of organisations feel that they need to collaborate more.
IBM 2010 HR Study

- The virtual PUCK works seamlessly with physical PUCKs in any media:scape application.
- The user interface is simple and easy to understand.
- Users can seamlessly share content on up to 2 displays.
- Users can share content with a simple and security-minded software application.
