## Steelcase Flex Perch Stool Stools + Poufs

Steelcase Flex Perch offers a quick place to sit – while staying fully engaged in mind, body and collaboration. It's part of the Steelcase Flex collection made for dynamic teams. Space-saving and sustainability forward, this stool makes room for new possibilities.

## Key Benefits

### Just when you need it

When it isn't busy working the room, Steelcase Flex Perch saves space in style. Nest any number of these stools in a compact row, and fan them out across the room right when people want them for a quick think or sharing session. Super lightweight, with glides that work on hard floors and carpet, Steelcase Flex Perch transforms a space to suit the team's needs in seconds.

### Good for you and your team

Movement matters to well-being at work. Neither standing still nor sitting down for long periods of time is ideal. As you move through your day, Steelcase Flex Perch offers something in between: a transitional leaning stance that relieves pressure, engages the core, promotes healthy posture and keeps you in good proximity to others in the room.

### Taking recycling forward

Through a partnership with BASF, Steelcase Flex Perch is the first furniture product globally that reduces the use of fossil resources through Ccycling™. This innovation in sustainability transforms post-consumer waste from electronics production, once impossible to recycle into like-new raw material needed for high-quality products – reducing waste and reliance on fossil resources associated with carbon emissions.

## Surface Materials

-  Merle MG
-  Fog 6BE3
-  Saffron 6BD7
-  Light Peacock 6BE2
-  Baltic 6BE4

The colors are indicative and may vary slightly from the actual material.
