

Product Compliance Laboratory Confirmation of Product Compliance

5/18/2015

Steelcase Think seating products, manufactured by Asia-Pacific, have been designed, engineered, and manufactured, to meet or exceed all applicable ANSI / BIFMA (American National Standards for Office Furnishings) requirements for safety and performance.

Samples representative of current production have been tested and found to be in compliance with the following ANSI / BIFMA Test Requirements:

ANSI / BIFMA X 5.1 General Purpose Office Chair Tests

ANSI / BIFMA X6.1 Educational Seating Tests

Think 465 series work chairs and stools

ANSI / BIFMA G1-Ergonomic Guidelines – Think 465 series work chairs

LOAD LIMITS

All Think Series seating products have been tested to increased loads and forces that exceed the ANSI/BIFMA X5.1 Standard. These tests ensure Think chairs will support users weighing up to 300 lb. with no loss of performance.

Steelcase uses its own ISO 9001 registered and ISO 17025 accredited laboratories, and accredited independent laboratories, to verify compliance to the Standards and requirements listed. A list of accredited independent laboratories is available upon request.

Sincerely,

Jeff Musculus – Director, Global Testing, Codes & Approvals

Note:

This document may be reproduced in full only.

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and assembly directions. The use of unauthorized non-Steelcase components, parts, or materials with integrated Steelcase product solutions VOIDS all Steelcase claims of product compliance to BIFMA, UL, CSA, LEED, and / or any office furniture safety or performance standards, including all building, fire, and electrical codes. This exclusion includes but is not limited to the use of non-Steelcase panel supported work surfaces, leg supports, panels, brackets, shelves, overhead bins, and other integral components. The use of non-Steelcase components in an integrated product solution not designed, tested, or supported, by Steelcase is an unauthorized modification of the original product which voids all Steelcase warranties, expressed or implied.
