Datum is a simple, flexible storage system designed to enhance workplace efficiency and optimize the use of space, that's compatible with all Steelcase products. A new unified key system meets

contemporary society's concerns over information security, enabling efficient control and management of information security, and easily copes with future changes and needs in the workplace.

Open Shelf

This simple open shelf unit is available with one through to five shelves. Shelves adjust in 26mm increments for flexible storage of both large and small items.

Lateral File

Convenient lateral file storage drawers have a smooth roller and rail movement for easy opening. Available in 620mm and 650mm drawer heights, with optional A4 or B4 file hangers.

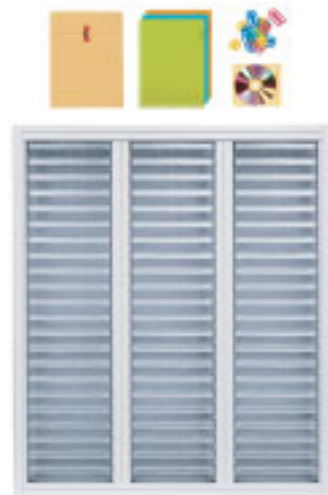

Hinged Door

A special shelf with rail underneath converts this unit into a personal and clothes locker. Shelves adjust in 26mm increments for flexible storage of both large and small items.

A4 / B4 Tray Cabinet

The easy way to organize and access documents, A4/B4 copy and fax paper. The many trays enable the creation of a tidy and ordered system.

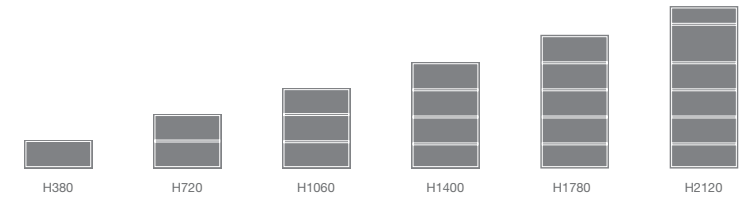

Sliding Door

Great for tight spaces where hinged doors are inconvenient, providing easy access to storage for large items. Shelves adjust in 26mm increments for flexible storage.

The smart Cylinder Key System simplifies efficient control of individual, team and business information security.

Cylinder Key System

Datum uses a versatile key cylinder system that unifies the use of keys by individuals and teams, simplifying the organization and management of information security. Changes in layout, organization and personnel can be accommodated simply by changing the inside cylinder to change key numbers.

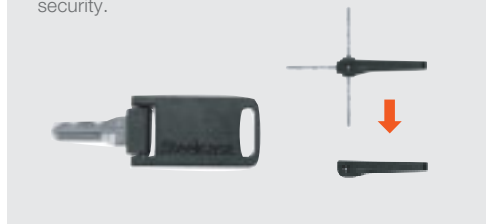

Master Key System

Secure storage inside a company can be controlled with one master key. This system resolves the multitude of keys in the workplace, and issues such as lost keys and emergencies that require quick access to storage units.

Secure key design

The cover on the compact, contemporary key features a 270° flip over function. Illegal copying of the key is very difficult, enhancing the system's security.

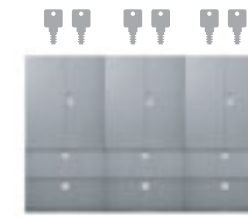

Too many keys to manage and control demands too much time for busy administrators.

An individual has two keys, and a team has three keys, but which is which?

As work intensifies, more storage and keys are required.

administration
The master key can be unified for administration of all storage in the workplace.

- Using the Master Key System unifies control and enhances the efficient management of security.
- Enables speedy solutions in cases of lost keys and emergencies.

individual
Only one key is required for all personal storage units that an individual uses.

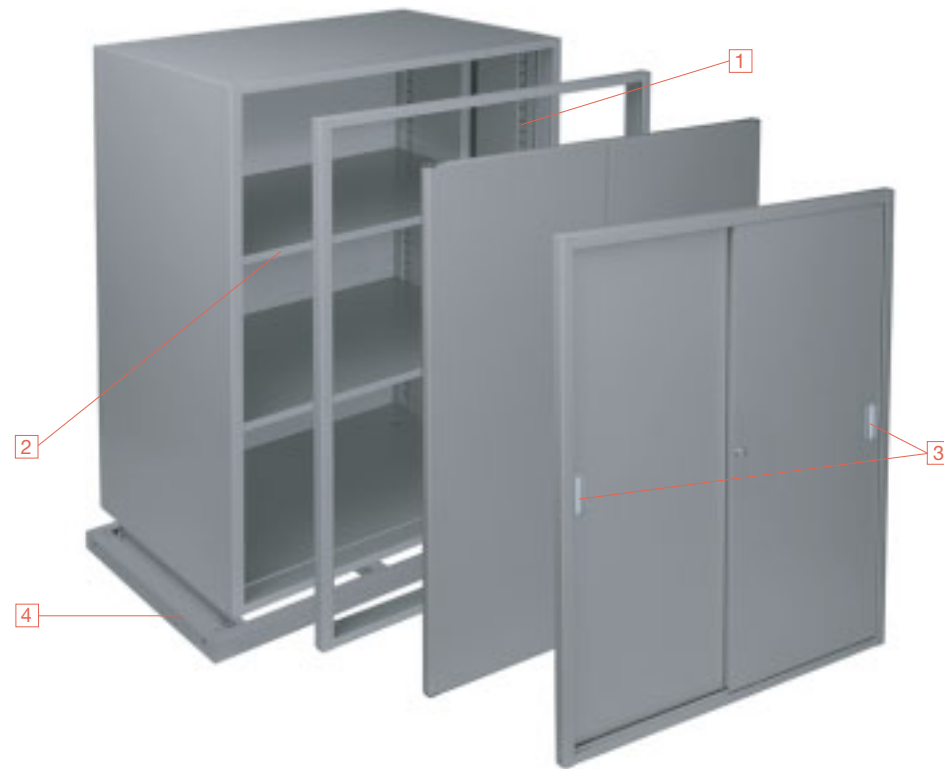

- Each individual needs only one key to manage their desk and personal storage.
- With the unified key number, new storage units can be accessed with the same key.

team
Key numbers for team storage units can be unified for use by all team members.

- Team storage units share the same control number, requiring only one key for access to all team units.
- Changes in personnel or layout require a simple change of the key number, not moving or buying additional storage units.
- Changing the key number simplifies control of important documents and access to special storage within the workplace.
- The system is available with up to 500 number combinations. (Special order)

Versatility lies in the details.

The modular construction of Datum units uses common components, so it is easy to change the open shelf, slide door, and hinge door units even after you have bought and installed them.

1 Shelves adjust in 26mm increments, to provide flexible efficient storage options with no wasted space.

2 Hinged door units are available with special shelves with a hanger rail that enable them to be used as a wardrobe.

3 The large, simple square handle design makes it easy to open and close drawers from any position.

4 All cabinets that sit directly on the floor require a base to optimize the strength, stability and safety of the unit.

environment friendly

The Datum range is an excellent example of how Steelcase's commitment to the environment is integrated into every aspect of a product's lifecycle. Designed and built to last, in its manufacture, use and disposal, Datum embodies the Steelcase environmental philosophy - Reduce, Reuse, Recycle.

Reduce Minimizing materials used and waste during the manufacturing process and eliminating emissions by using VOC-free paints.

Reuse Changing the key cylinder simplifies changes in personnel and organizations, extending the life of units. Changing the front panel to further extend the useful life of units is easy.

Recycle Datum incorporates considerable steel and aluminum components which are easy to recycle. The modular design enhances separation of materials for easy recycling.
